# 15th Annual Production Review

The Complete 1965 Buyer's Guide and Reference Bluebook  
to Qualified Producers of Business and Television Films

says John M. Clampitt, Director of Advertising and Sales Promotion for United Air Lines

"We've found that in the air transportation industry sponsored films are an effective, attractive, entertaining and economical means of telling our many-faceted sales story. That's why films have become an integral part of our advertising and sales promotion activities. We have found them to be a successful medium through which we maintain and magnify our corporate image and stimulate interest in travel; this interest, in turn, stimulates a desire to travel by air... specifically via United Air Lines.

"Right now we're all wrapped up in our popular 'Holiday in Hawaii' film. Modern is doing an excellent job of distributing the film to travel-minded, adult audiences via general bookings and television stations nation-wide. This exposure certainly helps attain company communications goals."

#### PARTNERS IN SUCCESS

TITLE	BOOKINGS	SHOWINGS	AUDIENCE
Holiday in Hawaii	16,808	23,960	1,477,763

## **Wilding International**

*another Business Communications division of Wilding*

*A Wilding International cameraman films a scene on location in Italy.*

## **How would you like to make a movie overseas...at one-half the usual cost?**

**Tell us your needs**—Does your company have a story to tell about a manufacturing plant in France?...an oil well in Iran?...a warehouse in Hong Kong?

**Around-the-world filming experience**—Let Wilding International film it for you. Since 1960, we have provided high-quality 35mm Eastman Color motion picture and still coverage from such places as Italy, Libya, Japan, Australia, Brazil, Egypt and Thailand. In fact, we've made films in over forty countries.

**You pay less**—Here's the best part. Overseas films produced by Wilding International can cost as little as one-half what you would expect to pay. You pay less because several Wilding clients underwrite the travel costs.

**Top-quality production**—The result of sharing travel costs

is that you get all the film you pay for...not a stack of ticket stubs and expense reports. And you are assured a top-quality film because finishing is done in America under complete Wilding control.

**Satisfied clients**—Clients who have gone world-wide with Wilding include Alitalia Air Lines, Eastman Kodak, Marathon Oil, the United States Navy, the Peace Corps and many more.

**Contact Wilding**—For more information about Wilding International, write Adv. Dept., Wilding, 1345 Argyle, Chicago, Ill. 60640. A Wilding representative can show you sample films, and discuss your particular needs. Offices also in Detroit, New York, Cleveland, Los Angeles, San Francisco, Cincinnati, Washington, and Toronto.

*A communications agency specializing in marketing and promotion*

**"Patterns for Progress" Theme of 26th Nat'l A-V Convention**

"Patterns for Progress" will be the theme of the 26th Annual National Audio-Visual Convention and Exhibit, July 17-20 at the Sherman House, Chicago.

Convention Chairman Eloise F. Keefe of the F.E.A. Film Library, Dallas, said the industry-wide A-V event is expected to attract a record 3,500 delegates this year.

Feature of the convention will be a 250-booth trade show of all types of communications aids, reportedly the largest industry show of A-V products assembled at one time under one roof.

Both motion and still picture projectors of every type, instructional television, classroom phonographs and tape recorders, plus a wide variety of accessory equipment and materials will be on display.

For additional information about the NAVA Convention or Exhibit contact association headquarters at 1201 Spring St., Fairfax, Va. •

**Report on U.S. Space Flights Feature of SMPTE Conference**

The National Aeronautics and Space Administration has named Astronaut William A. Anders to appear at a special session of the Society of Motion Picture and Television Engineers' 97th semiannual Technical Conference, Monday, March 29.

The conference is being held March 28 to April 2 at the Ambassador Hotel in Los Angeles.

The five-day conference will include sessions on the following topics: Aerospace Cinematography; New Materials and Processes; Laboratory Practices; Instrumentation and High-Speed Photography; Equipment Papers and Demonstrations.

Over 38 manufacturers will be displaying their new equipment in the 4-day exhibit. On Wednesday morning, March 31, exhibitors will demonstrate new items seen in the exhibit.

Captain Anders, 31, is one of 14 new astronauts picked by NASA in late 1963 to spearhead the nation's growing space program. Anders is one of seven chosen from the Air Force.

Anders will show film sequences with narration and discussion on the Gemini and Apollo programs. The films will cover milestones of the past year in addition to plans

for the future. Anders will further discuss astronaut training and research and development.

Anders' presentation, titled *Astronaut's Report on Manned Flight*, will be about an hour in length, with a question-and-answer session following it.

The program for the entire SMPTE conference, released by Program Chairman, Dr. Richard J. Goldberg, Technicolor Corp., Burbank, Calif., contains more than 100 papers, which are scheduled for 15 sessions during the six-day meeting.

Other session titles include: Motion Pictures and Television in Education; Instrumentation and High-Speed Photography; Television Developments; Application of Photographic Instrumentation and Applications in Science and Technology.

**Saskatchewan to Host A-V Conference in Regina May 3-4**

Saskatchewan's Department of Education has announced plans for a Visual Education Conference to be held in Regina, Saskatchewan, May 3 and 4.

E. Fred Holliday, supervisor of the Visual Education Branch, reports that the conference will include special sessions for equipment exhibitors representing Bell & Howell, Viewlex, 3M, Canadian Kodak, General Films, Angle photo-Montreal, and others.

He said film and filmstrip distributors represented will include Encyclopaedia Britannica Films, Jam Handy Organization; Educational Film Distributors, Toronto; representing International Film Bureau; Carman Educational Associates; Eye Gate; McGraw-Hill Co. (Canada) Ltd.; Modern Learning Aids; and National Film Board of Canada.

The Honorable George Trapp, Minister of Education for the Province of Saskatchewan, will be the guest speaker at the first night banquet.

Among the speakers for the two-day program are: Dr. J. Edwin (CONTINUED ON PAGE EIGHT)

**FOR COLOR AND BLACK & WHITE** COMPLETE 35 MM, 16MM DAILY AND MULTI-RANK RELEASE PRINT LABORATORY. FEATURING: • ADDITIVE COLOR PRINTING • 35MM & 16MM A & B CONTACT & REDUCTION PRINTING • LIQUID GATE BLOWUPS • UNSQUEEZING SCANNING • LIQUID GATE PRINTING • SEPARATION MASTERS & REGISTRATION INTERNEGATIVES • EKTA CHROME DEVELOPING & KODACHROME DAILIES • REVERSAL DEVELOPING AND PRINTING • FILM STRIP & COMPLETE TITLE DEPARTMENT • SOUND TRANSFERRING, INCLUDING 35 16MM DOUBLE RANK • NEGATIVE MATCHING • AIR-CONDITIONED FILM & TAPE STORAGE ROOMS • EDITING & CUTTING ROOMS AND THE FINEST PRIVATE SCREENING FACILITIES IN THE EAST.

Leading producers everywhere have turned to Mecca for more than a quarter-century for 16 and 35 mm black and white film processing . . . because they know the services they receive will be expert, personal, fast and of top quality.

### Thomas Fischer, Veteran AT&T Film Executive, a Heart Victim

Thomas F. Fischer, 55, Film Project Supervisor for the American Telephone and Telegraph Company, New York, died suddenly of a heart attack at home, February 5th. Mr. Fischer had over 39 years of service with the Bell System.

He was responsible for film productions involving safety and employee training. His list of films include such recent well-known

The late Tom Fischer

Bell Systems pictures as *Anatomy of An Accident*, *Before It's Too Late*, and *Seconds for Survival*.

Born in New York City in 1909, Mr. Fischer started his Bell System service as a messenger in 1925. Following several years in the General Service Department, he joined the company's film department. Here, he served as a cameraman, a production assistant, and production supervisor prior to his assignment as film project supervisor.

During World War II, Mr. Fischer served over four years with the U.S. Navy as a Chief Photographer's Mate. His tour of duty included several overseas assignments.

### 12th Int'l Ad Film Festival Adds Awards, More Categories

The 12th International Advertising Film Festival, scheduled for

June 14-19 in Cannes, France, will feature additional primary awards and increased categories for entries.

There will be 28 different classifications matched to lengths and production techniques of the film. For the first time, both the advertising agency and the production company will receive the winning silver cup, as well as the gold, silver and bronze plaques awarded to first, second and third prize winners.

### A Total of 64 Awards

With duplicate prizes and more categories, the total number of primary awards rises this year to 64 from 28.

In addition to category and grand prizes, two special awards are given each year by the local municipality, either Cannes or Venice, Italy, which alternate as host sites for the festival. These go to the film production company in television and in cinema which receive the highest number of total ranking points from the jury.

Producers of television and film advertising and advertising agencies from the United States and up to 30 other countries will enter their advertising films in the competition. Most of the U.S. entries are expected to be in the television group, as in the past.

### U. S. Took 10 Trophies

At last year's festival, U.S. entries came away with ten international awards in the television grouping and two in the cinema classification.

Peter E. Taylor, director general of Screen Advertising World Association, sponsor of the annual event, said more than 1800 advertising professionals from all parts of the world are expected to attend the week-long screening at the Palais des Festivals in Cannes.

### Sid Schwartz in New A-V Post at Atomic Energy Commission

Sid L. Schwartz has joined the Atomic Energy Commission's film program as assistant to the chief of the Audio Visual Branch, Division of Public Information.

His immediate past experience includes 11 years as chief of script and three years as assistant chief for the Motion Picture Service, Office of Information, Department of Agriculture.

He has written more than 60 film scripts for the department, including *Agriculture, USA*, which has been televised, shown at the Seattle World's Fair, and is now in world-wide distribution in 35 languages.

A major trade paper announced the alliance of the Niles organization and MCI with a banner headline. It was stated that together, these two giants in the business communications industry could provide "greater depth" than was available elsewhere. And, we might add, the broadest possible service in telling your product or company story.

the  
 alliance  
 of  
NILES  
 and  
MCI

IN THE \$500 MILLION  
 BUSINESS  
 COMMUNICATIONS  
 INDUSTRY... A  
 SIGNIFICANT  
 DEVELOPMENT

**H**E WANTED A SALES MEETING WITH A 'LITTLE ZIP.' In one of our first joint ventures, an executive of a major corporation came to us and said that his firm was about to introduce a new product line to its dealers, and wanted to do so with a "little zip." With that, he laid the whole project in our laps. Subsequently, we suggested an approach, which was accepted. It was a rather unique combination of film and live theatre. We produced the entire presentation, and it was a resounding success.

In essence, this is the purpose of our alliance...to offer you the most experienced one-stop counselling and production service available...highly skilled in *all* your business communications needs. For sales meetings, business theatre, industrial shows and the like, we have the finest in writers, choreographers, directors, set designers, lighting technicians, etc., available. For audio-visual production, we have fully staffed studios in Chicago, Hollywood and New York. Regardless of the size or scope of your needs—we are ready to serve you.

We are confident that our combined staff, facilities and talent pool are unparalleled anywhere for depth and service. We believe we can prove it to you.

# What kind of airline is this anyway?

Imagine, commissioning Duke Ellington to write an industrial film score.<sup>1</sup> Cy Coleman, too.<sup>2</sup> And movies without narration.<sup>3</sup> Or those "American Miniatures"<sup>4</sup>, 4½ minute mood pieces that give you an impression of a place and its people. What airline would dare "reissue" a 1933 aviation film<sup>5</sup> in this Astrojet age?

The answer is American Airlines.

American's film philosophy is very simple: "we try to make the most interesting, imaginative films we are capable of." Association Films distributes American's films non-theatrically and on television.

We have a philosophy of our own: "to reach the right audiences, efficiently, effectively and creatively." We believe that distribution is a lot more

than the trafficking of prints. Successful distribution, which means in its simplest terms audience fulfillment, calls for the same kind of creative thinking—and even daring—that goes into filmmaking.

We're delighted to have American as a client. Their films are always busy (in the past 12 months they were screened over 30,000 times), audiences say very nice things about them (we play these reactions back to American each month) and, frankly, they're fun to work with.

How we do our job is spelled out in "The Viewing Millions", a brochure we'll be happy to send along. We'll enclose a copy of American's film catalog, too. It's a beauty.

## THE AMERICAN FILM FESTIVAL

Sponsored by the Educational  
Film Library Association  
New York City April 21-24, 1965

☆ The 1965 American Film Festival, sponsored by the Educational Film Library Association, representing school, university and public libraries, and film libraries throughout the U. S. will be held April 21-24 at the Biltmore Hotel, New York City.

**CATEGORIES:** 32 major areas of education and information, art and culture, religion and ethics, business and industry, and health and medicine will be offered for final judging by screening groups during the Festival. Elections will have been made by pre-screening juries for final entries.

**AWARDS:** Blue Ribbon (certificate) Awards to be presented at banquet, Friday, April 23. Entries closed on January 20, 1965. •

### THE FOURTH ANNUAL FILM FESTIVAL AMERICAN PERSONNEL & GUIDANCE ASSOCIATION

Held in conjunction with the Annual  
APGA Convention at Minneapolis, April 12-15

**CATEGORIES:** Films and filmstrips in the following categories will be presented: Careers; Inter-Personal Relations; Educational Planning; Rehabilitation; Counseling Techniques.

**SELECTION:** All films and filmstrips presented at the Film Festival are previewed before the final invitation to the producer. Generally 75 to 100 films are previewed, and 25 to 30 are chosen. Selection is aimed to provide as wide a program as possible.

**INFORMATION:** Copies of the programs and further information about APGA Film Festivals are available from Laura Mac Kress, Film Festival Coordinator, 1609 New Hampshire Avenue, N.W., Washington, D.C. 20009. •

### THE 13TH ANNUAL COLUMBUS FILM FESTIVAL AND AWARDS

Sponsored by the  
Film Council of Greater Columbus  
in association with the  
Columbus Area Chamber of Commerce

**Awards Screenings (for General Public):**  
**October 2-3 (aft. & evening) at Battelle  
Memorial Institute. Chris Awards Banquet:**  
**Friday, Oct. 1st at Columbus Gallery  
of Fine Arts, Derby Court (evening).**

**ENTRIES:** Film producers and sponsors are invited to enter motion pictures and filmstrips produced in 1963, 1964 and 1965, provided they have not been previously submitted to any Columbus Film Festival. Entries (in the categories enumerated below) must be accompanied by 3x5 cards (for preview committees) noting type of audience intended.

Films are judged by professionals in the various fields. Entry fee for *all* motion pictures, re-

## National Programs for the Selection of Outstanding Pictures

ardless of length, (no filmstrips accepted this year) is \$15. Entries will be accepted beginning February 1 and closing date is August 1, 1965 at 5 p.m. E.S.T. Each print should be made available for judging for at least one month or longer. If less time is available, the category chairman should be so informed. This year no film will be accepted after the closing date for entries, August 1.

**CATEGORIES & CHAIRMEN:** (Motion pictures should be shipped directly to the following:) Business & Industry (job training; sales promotion; industrial relations; public relations; industrial safety and general information), *Galvy Gordon, Columbus Public Library, 96 S. Grant Ave., Columbus 15, Ohio*; Information & Education (classroom instructional films; specialized instructional; general information), *Keneth B. Hobbs, Battelle Memorial Institute, 505 King Ave., Columbus 10, Ohio*; Health & Mental Health (health & hygiene; mental health; general medicine; professional medicine; dental), *Dr. Arthur Peters, Battelle Memorial Institute, 505 King Ave., Columbus 10, Ohio*. Travel U.S. & Foreign, *Daniel F. Prugh, Film Council of Greater Columbus, 280 East Broad St., Columbus 15, Ohio*. Religious Films, *Miss Delores Sherwood, Augsburg Publishing House, Audio Visual Dept., 57 E. Main St., Columbus 15, Ohio*; Special Fields & Feature Films: *S. N. Hallock, Center of Science & Industry, 280 E. Broad St., Columbus 15, Ohio*.

**AWARDS:** This is the seventh year of the Chris Statuette Awards, presented to the outstanding films in each category. Films receiving the Chris Statuette must be voted "best in photography, story value, and technical aspects of production." Chris Certificate Awards are given to motion pictures considered "finalists" but not receiving the statuette award. •

### FARM FILM FOUNDATION PROFESSIONAL IMPROVEMENT AWARDS

**AWARDS:** For the 11th consecutive year, an inscribed certificate and \$500.00 will be given to an active member of the American Association of Agricultural College Editors, who is selected by a committee of three Judges as having made, through work in motion picture production, the most outstanding contribution to the advancement of agriculture, home economics, rural-urban relations, and the public interest during the past two years. Honorable

☆ News of specialized film award programs sponsored by other groups is provided all through the year in the pages of regular issues of *BUSINESS SCREEN*. Keep informed!

Mention Awards of \$50.00 each will be given at the discretion of the judges.

**PRESENTATION:** The Awards will be presented at a dinner co-sponsored by the Farm Foundation and the Foundation for American Agriculture at the annual meeting of the American Association of Agricultural College Editors scheduled for July 7, 1965 at Rutgers — The State University — New Brunswick, New Jersey.

**ELIGIBILITY:** Any active member of AAACE engaged in some phase of motion picture production is eligible to apply for the Award. •

### FREEDOMS FOUNDATION AWARDS

Sponsored by the Freedoms Foundation  
Valley Forge, Pennsylvania

Closing Date for Entries: November 1, 1965

**CATEGORIES:** Consideration is given to all films produced or released during 1965, which are aimed at building a better understanding of the American Way of Life.

**AWARDS:** A distinguished jury of State Supreme Court jurists and other eminent citizens selects one film for the top award and approximately 10 others for the George Washington Honor Medal recognition. Awards will be announced at Valley Forge on February 22, 1966.

**TO NOMINATE:** Nomination forms are available from Freedoms Foundation, at Valley Forge, Pennsylvania. •

### ANNUAL INDUSTRY FILM PRODUCERS ASSOCIATION AWARDS

IFPA Conference — June 3, 4, 5, 1965  
International Hotel, Los Angeles, California

**ANNUAL AWARDS COMPETITION** in recognition of outstanding factual films. The purpose of the IFPA awards is to stimulate constant improvement in the quality of documentary, public relations and educational films, and their effective utilization by industry, business, education and government.

**CATEGORIES:** Public Information; Technical Information; Sales Promotion; Training; Orientation and Indoctrination; Out-Plant or Independent Production.

**ENTRY INFORMATION:** Any film produced by or commissioned by an IFPA Active Member during the calendar year 1964, or any such film completed for release during the calendar year 1964 is eligible. Films completed earlier, under government security classification, but declassified during 1964, are also eligible for submission. More than one film may be submitted by the same member or organization. Entry deadline is March 15, 1965. Entry fee for each film is \$15. For additional information write to: Bob Ganon, IFPA Chapters' Vice President, c/o Motion Picture Distributors' Lockhead California Co., 2555 N. Hollywood Way, Burbank, California. •

# AWARDS FOR BUSINESS FILMS

## 5TH INTERNATIONAL FILM & TV FESTIVAL OF NEW YORK

(Held in Conjunction With the  
Industrial Film & A-V Exhibition)

New York City—October 13-15, 1965

The Fifth International Film & TV Festival of New York is scheduled for October 13-15, 1965, at the Americana Hotel, 53rd Street & 7th Avenue, New York City. Industrial and other sponsored films as well as TV commercials are eligible for entry.

**CATEGORIES:** Business films may be entered in (1) Sales Presentation; (2) Training; (3) Public Relations; (4) Scientific; (5) Educational; (6) Public Service; and (7) Documentary categories. Television commercials are grouped into (1) Live Action; (2) Animation and Puppet; and (3) Live and Animation, and are divided into (a) up to 30 seconds; and (b) over 30 seconds.

**AWARDS:** Grand Prix is awarded in each of the two primary groups, Business Films and TV Commercials. Each category in these two groups is eligible for First Prize and Special Awards. Special achievement awards are given for contributions in Best Direction, Best Musical Sound Track, Best Special Effects, Best Photography, Best Art Work, etc.

**ENTRIES:** For entry forms and fees apply to Industrial Exhibitions, Inc., sponsors of the Festival, 17 East 45th St., New York, New York 10017. Phone: OXford 7-4978. •

## SECOND ANNUAL INTERNATIONAL MANAGEMENT FILM FESTIVAL AND AWARDS

Sponsored by The  
Society for Advancement of Management

Finalist Judging—New York City

October 13-15, 1965

**CATEGORIES:** "Community service" in nature, stressing a management interest; films dealing in management techniques, such as management development and management theory; management in practice; technical films dealing with technical areas of management, or for the education of managers.

**ENTRIES:** Limited to two from each producer. Films must have been produced in 1962, 1963, 1964, 1965 and not previously entered in this festival. Films judged by professional executives in top management, and specialists in education and science. Entries accepted until October 1, 1965. Entry fee dependent on category entered. For full information write to: Peter Livingston, Film Director, Society for Advancement of Management, 16 West 40th St., New York, N.Y.

**AWARDS:** Bronze Plaques presented to grand prize winner and winner of each category. Awards presented at banquet on October 15, 1965 in New York City. •

## THE 22ND ANNUAL NATIONAL SAFETY FILM CONTEST

Sponsored by the National Committee  
on Films for Safety

**ELIGIBLE FILMS:** All motion pictures and sound slidefilms produced or released during 1964 whose primary objectives are safety or which have important accident prevention sequences.

**CATEGORIES:** Motion pictures, non-theatrical (16mm) in each of four fields: 1. Occupational. 2. Home. 3. Traffic and transportation. 4. General. Sound slidefilms are judged separately, as are television and theatrical subjects, TV shorts and spots.

**AWARDS:** Bronze Plaques will be awarded to top winners in each of the various areas of safety. Award of Merit Certificates will be given to other films for special reasons of subject treatment, production excellence and/or unusual contribution to safety. At the discretion of the judges, awards may be given separately for "instruction-teaching" and for "inspirational" purpose films.

**PRESENTATION:** Films winning the Bronze Plaque will be shown in October during the National Safety Congress and Exposition in Chicago, Ill. Plaques will be presented at that time to representatives of sponsors of these films by the Committee's chairman. Certificate of Merit winners will receive their awards after the final judging which is in April. All winners will be notified immediately after the judging.

**INFORMATION ON AWARDS PROGRAMS:** Write to William Englander, Secretary, National Committee on Films for Safety, 425 North Michigan Avenue, Chicago, Illinois 60611. •

## 12th ANNUAL "DAY OF VISUALS"

Sponsored by the  
National Visual Presentation Assn.

New York City—June 8-9, 1965

The 12th Annual "Day of Visuals" Awards Competition will be held June 8-9, 1965, at the Commodore Hotel, New York City. The events are open to both members and non-members, producers and non-producers.

The program includes two days of seminars, a luncheon program June 9, and the annual Awards Banquet. Winners will receive their awards at the Banquet June 9.

Overall chairman is Thomas J. Craddock of Moloney, Regan & Schmitt. Co-chairmen of the Judging Committee are George R. Jacobsen of the N.Y. Telephone Co. and John P. Tierney of Standard Oil Co. (N.J.).

**FOR INFORMATION:** Write M. E. Schack, c/o National Visual Presentation Association, 19 West 44th Street, New York, N.Y. 10036. •

News of other film awards programs appears on the following pages 14, 16, 18 and 20. •

## w.f.mutschmann makes 8 mm films

especially designed to fit into all those wonderful little boxes that salesmen are carrying around these days.

The 8 mm format demands new concepts, new techniques. That's why you should talk to a producer who has experience in—and respect for—the medium. (8 mm need no longer be considered underprivileged 16 mm.)

## w.f.mutschmann makes 16 mm films

Industrial. More than that, technical. If you believe that good industrial films are composed of about equal parts of imagination and technical insight, you'll like our philosophies. (You'll also like our philosophy on the economics of film making.)

W. F. Mutschmann makes 8 mm and 16 mm films in the Great Valley, Paoli, Pa. Less than two hours from New York. About a 60c phone call. 215-644-2774. If your budget is really low, call collect.

## W. F. MUTSCHMANN MAKES FILMS

(W. F. Mutschmann likes to talk to people who figure they can afford a film trip but not a motion picture.)

Other categories are: Features, arts, experimental, children's, general information, public relations, sales and promotion, training and instruction, travel and recreation, amateur. Award for Cinematography presented by Canadian Society of Cinematographers. Films released during 1964 by Canadian film producers are eligible for award. Entries closed January 31, 1965.

AWARDS: Award for the Canadian Film of the Year, a Certificate of Merit for best in each category, trophy of the Association of Motion Picture Producers and Laboratories of Canada for the best amateur film. •

#### THE SIXTH INTERNATIONAL INDUSTRIAL FILM FESTIVAL

Rouen, France, October 11-16, 1965.

Sponsored by the Council of European  
Industrial Federations

France is the host country for the Sixth International Industrial Film Festival, sponsored annually by members of the Council of European Industrial Federations (CEIF). European film entries are selected through national industrial film festivals held in each of the respective countries. Films of the United States are invited to participate through the National Association of Manufacturers in this country.

CATEGORIES: the following types of films are admitted to this International Festival:

A. Films about industrial questions (economic, social, technical or scientific) of general interest and intended for showing primarily to the general public.

B. Films about specific industrial products, materials or projects, intended for showing primarily to the general public.

C. Films aiming less at information than do the films in categories A and B, but which have the purpose of contributing to the prestige of the industry concerned or of a firm, intended primarily for the general public.

D. Films about specific industrial products, materials or projects or about industrial techniques (management methods, measures for increasing productivity, efficiency and output, rationalisation, automation, application of modern techniques, etc.) intended primarily for specialist audiences. (Cont'd. on Page 16)

How the vast resources of United World Films, Inc.— an affiliate of the only major Hollywood company in the sponsored film distribution field— make possible a program individually keyed to your marketing and public relations strategy

### Greater access to prime 16mm audiences

As the only company in the sponsored film field covering every phase of 16mm distribution, United is constantly adding newer and fresher audiences to its lists. An Educational Films Division provides films for thousands of classrooms; a Religious Films Division services churches of every denomination; the Entertainment Division circulates over 1,200 different feature films in 16mm. These audiences are automatically contacted by United for showings of sponsored films, affording clients a bonus circulation otherwise unobtainable.

### More extensive 35mm theatrical coverage with more first-run showings

Utilizing the experience and theatre contacts of its parent company, Universal Pictures, United World Films, Inc. is uniquely equipped to supply greater exposure in 35mm theatres. Clients benefit from over a half-century of cinema "know how" and close personal ties with motion picture theatre operators. Mass audiences can be reached with the highest degree of economy in print and distribution costs.

### Finer handling and service for United and "sponsor-generated" bookings

With a nationwide network of 43 distribution libraries—17 more than its closest competitor—United assures clients the fastest movement of prints to audiences plus a larger circulation with fewer prints. United's quality control system, one of the most comprehensive in the industry, provides the finest professional care of prints, including electronic inspection and their cleaning and care before shipment.

### More extensive television coverage

United has been able to deliver up to 40% more telecasts than any other film distributor—at a net saving in unit costs. Direct-mail and personal contact helps sustain this lead. In addition, United's

*News Parade* service can now provide all essential services needed to interpret your public relations story for news use and to obtain its release on regular television news programs.

In case after case, United's *custom* distribution, working as an integral part of marketing and public relations strategy, has more than fulfilled the requirements and expectations of film sponsors . . . delivering *more bookings at costs substantially lower than the industry average.*

Judge for yourself what United can do for your films. The full details on *custom* distribution are contained in a handsome, illustrated report entitled, *How United's Custom Film Distribution Can Improve Your Public Relations Program.* It's yours for the asking. Just phone or mail the coupon below . . . today.

# INTERNATIONAL AWARD COMPETITION

CONTINUED FROM THE PRECEDING PAGE 141

Films on industrial application of scientific principles and research intended primarily for professional audiences, including educational establishments, rather than for general showing like categories A, B and C.

Films on management and manpower training (for example, vocational guidance and training, training within the firm) and on manpower promotion and human relations within the firm, intended rather for an industrial audience than for the general public.

Films on accident prevention, occupational diseases, health, re-education and measures of social security, intended rather for an industrial audience than the general public.

Films will be shown in their original language. The two official languages of the Festival will be English and French.

**AMENDMENT TO THE RULES.** Since the Fifth International Industrial Film Festival in 1964 a rule which stated "Advertising films are excluded from the Festival" has been amended. "Cinema and TV Commercial Films are excluded from the Festival."

**EXHIBITION.** There will be an exhibition of equipment and services during the Festival.

**DEADLINE DATES.** Films should be received by the Lorrainere, Sixth International Film Festival, 48 Quai de Paris, Rouen, France, (Rouen 14069) not later than July 30, 1965. A list

of films selected in each category must be transmitted together with a synopsis (not exceeding 250 words) and commentary text of each film not later than July 30, 1965. Synopses are to be supplied in the English and French languages. Only National Federations may participate through their respective organizations.

## THE 9TH SAN FRANCISCO INTERNATIONAL FILM FESTIVAL

Film As Art, Film As Communication  
October 27 - November 9, 1965

**THIRD ANNUAL "FILM AS ART":** This division is designed to encourage and recognize efforts made in film making which use the medium as a creative means. Participation by independent film makers of all nations with their most recently produced works is urged. Originality in concept and imaginative use of material are the most important factors in this division. Effectiveness of expression and technical excellence are of secondary importance. One *Golden Gate Award* and two *Silver Awards* will be conferred, as well as *Honorable Mention Awards*.

**SIXTH ANNUAL "FILM AS COMMUNICATION":** This division is designed for films with a specific purpose for a defined audience in the following categories: 1. industrial, institutional and government films produced for their in-

ternal use; 2. government films as general information for the public; 3. films sponsored by industry, companies or other commercial institutions for the general public; 4. films sponsored by civic, community or any nonprofit organization for the general public; 5. primary and elementary educational classroom films; 6. secondary and college educational classroom films; 7. graduate, technical and training educational films.

**ENTRY INFORMATION:** Application blanks must be obtained from and returned to: San Francisco International Film Festival, Film As Art - Film As Communication, 172 Golden Gate Ave., San Francisco, Calif. 94102. Applications should be requested in April, 1965; all applications must be returned by August 1, 1965. Film As Art, Film As Communication divisions are open to 16mm films only.

## M I F E D , INTERNATIONAL FILM, TV FILM AND DOCUMENTARY MARKET

11th Cine Meeting, April 14-25, 1965  
12th Cine Meeting, October 14-23, 1965

**CATEGORIES:** Feature (entertainment) motion pictures, telefilms, publicity films and documentary motion pictures may be screened at this market-place for possible resale.

**MARKETS:** Two sessions are held each year. The Spring session is concurrent with the 43rd Milan International Trade Fair. The Fall session is concurrent with the 12th Cine Meeting; the 3rd International Exhibition of Technical Innovations in the Motion Pictures and Allied (CONCLUDED ON THE FOLLOWING PAGE 184)

**THE 12TH INTERNATIONAL  
ADVERTISING FILM FESTIVAL**

Cannes, France June 14 to 19, 1965  
Sponsored by the Screen Advertising  
World Association Ltd.

**MANAGEMENT COMMITTEE:** The Executive Committee, consisting of the President, Mr. Linten of Movierecord S.A. Madrid, and other officers of the above mentioned Association, is fully responsible for all policy matters in relation to the Festival Organization. Categories and awards are planned by these representatives of the sponsoring Association. Festival Director: Mr. Peter F. Taylor, Head Office, International Advertising Film Festival, Piccadilly London W.1., England. Phone: 7621 2.

**ENTRY DATE & CATEGORIES:** Entry forms are available from London Office during March. Closing dates for completed entry forms — April 15; for delivery of films to Cannes — May 15. Contact in United States: Jane Pinkerton Associates, 527 Madison Ave., New York, N.Y. 10022.

**CATEGORY MODIFICATION:** A number of changes have been made involving both cinema and television groups. A new category is being introduced for films of all techniques (except Panoscope) up to 10 metres in length, and a minimum length of existing categories for Live Action, Cartoon, Animation, etc. will be increased to 10 metres. The category for Puppets and Marionettes has been merged with Animated Objects; the category for Mixed

**AWARD PROGRAMS:  
Television Commercials  
& Theater Screen Ads**

Techniques will be split into two, for films up to 25 metres and over 25 metres. In the Television Group, the categories for Live Action are also being extended from three to four and, as in the case for the Cinema Group, Mixed Techniques will have two categories — for

films up to 30 seconds and those over 30 seconds.

**AWARDS:** Special awards will include besides the Grand Prix du Cinema and the Grand Prix de la Television, the Palme d'Or which will be awarded in each of the Cinema and Television groups for the highest average of marks attained for a minimum entry of six films in one or the other group. Wherever applicable, all category prizes, including the two Grands Prix, will be duplicated so that both the advertiser and the production company responsible for an award-winning film each receive one.

**JURIES:** Two international juries, one for the Cinema and the other for the Television group, each headed by a president to be elected just prior to the start of the Festival, will be selected to judge all the films in both groups. Members of the various international advertising associations and federations compose this judging group.

**THE SIXTH ANNUAL AMERICAN  
TV COMMERCIALS FESTIVAL**

New York City—April 9, 1965  
Chicago, Toronto, Dallas, Los Angeles,  
Atlanta and Boston—May & June, 1965

**ELIGIBILITY:** Open to commercials telecast in the U. S. and Canada for the first time during 1964. No limit on entries from sponsors, agencies, stations or production companies.

**CATEGORIES:** Forty product classifications plus one category for Classics, which must have been first telecast more than five years ago.

**JUDGING:** By seven Regional Councils of prominent advertising executives, headed in 1965 by Walter Weir, Chairman of the Executive Committee of West, Weir & Bartel Advertising Agency.

**CRITERIA:** Outstanding commercials . . . based on strength of the sales message, visual and aural appeal and allover technical skill.

**AWARDS:** A golden "CLIO" statuette to each Best of Product Category and Special Citation winner. Certificates to Runners-Up and 150 Finalists. (Continued on following page 20.)

### SIXTH ANNUAL INTERNATIONAL BROADCASTING AWARDS COMPETITION

Sponsored by the Hollywood Advertising Club

**OBJECTIVES:** To focus attention on the value of the two broadcast media; to give credit to ingenuity and creativity together with honesty and taste in advertising; to encourage the use of broadcast media as effective marketing tools; to recognize the international aspect of advertising as an indispensable tool in a free economy, and for the exchange of information and ideas among advertisers and broadcasters throughout the world.

**ELIGIBILITY:** Open to any company or individual engaged in creating or producing broadcast advertising anywhere in the world. Entries must have been broadcast on radio or television between December 1, 1964 and December 1, 1965. Deadline for entries is December 1, 1965 for next year's competition.

**CATEGORIES:** The twelve television categories include: Live Action, over 60 seconds; Live Action, 60 seconds; Live Action, under 60 seconds; Animation, 60 seconds and over (limit — 3 minutes); Animation, Under 60 seconds; Combination, any length up to 3 minutes; Videotape, any length up to 3 minutes; IDs, 10 seconds or less; Local (one market), any length up to 3 minutes; Humorous, any length up to 3 minutes; Public Service, any length up to 3 minutes; Series (limit 3 commercials), any length up to 9 minutes.

**AWARDS:** Each commercial selected by the Preliminary Judging Committees will receive one certificate. The winner of each category, selected by the Final Judging Panel, will receive a trophy and two certificates. The Final Judging Panel will also select two "Sweepstakes" winners, one for the best television commercial in the competition, and one for the best radio entry in the competition. Other awards may be made at the discretion of the judges.

**JUDGING:** Preliminary Judging Committees are held in various cities all over the world. Final Judging Panel is held in Hollywood just prior to the Presentation Dinner, and its twenty members include illustrious advertising men from all over the world.

**INFORMATION:** For further information, and entry forms, write to the club office: Hollywood Advertising Club, 6362 Hollywood Blvd., Hollywood, Calif. 90028, U.S.A.

After filling requests for showing all over the country, the winning commercials become the property of the Hollywood Museum. All other entries become part of the respective libraries of the Television Bureau of Advertising and the Radio Advertising Bureau, both in New York City. •

# how many HALF-salesmen have you?

It's easy to tell. A salesman may have a good knowledge of your product or service but, for sales success, that's only *half* of what's needed. The *other* half, equally important, is "people" knowledge. When a salesman lacks this, he's just *half* as effective as he should be.

To be *wholly* effective, salesmen must possess "people" knowledge, understand the fundamentals of selling, and develop persuasive skills that motivate prospects to want to buy.

This new University of Marketing audio-visual sales course *offers this knowledge*. It makes it easy to train your men in the attitudes and techniques of today's top earners. It enthruses men to want to do a better job . . . shows them how to work "smarter", rather than harder.

The six two-hour sessions are so clearly programmed, it's remarkably easy to conduct the training meetings.

Mail the coupon for details on how you can *add another half* to each of your men . . . and *double* his sales effectiveness.

## **ARRIFLEX® 16 BL\***

THE NEW LIGHTWEIGHT SELF-BLIMPED HAND CAMERA

We are not trying to soft-pedal the news but we can't shout it from the rooftops either because the new Arriflex 16 BL\*, a very, very quiet SELF-BLIMPED hand camera, won't be available until Spring of 1965.

Nevertheless, we owe it to our good friends everywhere to let them know that Arriflex's 'quiet one' is now in production and that it will pay them to wait a bit. The reward will be famed Arriflex quality and reliability plus

new and exclusive features that have no counterpart in any competitive offering.

The new Arriflex 16 BL was previewed and enthusiastically received at the May 1964 Industrial Film Producers Assn. in Los Angeles and at the October 1964 Audio-Visual, Pictorial & Educational TV Exposition in Washington, D.C.

When you see the model 16BL, you'll agree that it paid to wait for Arriflex's 'quiet one'.

**LITERATURE IS AVAILABLE NOW, SO PLEASE WRITE FOR THIS DETAILED PREVIEW.**

\* (former designation, 16Q)

**ARRIFLEX CORPORATION  
OF AMERICA**  
257 PARK AVENUE SOUTH, NEW YORK, N. Y. 10010

Center for Instructional Communications, Syracuse Univ.), *President*; Kenneth Norberg (Prof. of Educ., Sacramento State College), *President-Elect*; Philip Lewis (Dir., Research, Dev., & Spec. Proj., Chicago Public Schs.), *Vice President*; Mendel Sherman (Asst. Dir., AV Center, Indiana Univ.), *Past President*.

DUES: \$7 and \$12. Membership is approximately 6,000.

PURPOSE: The improvement of instruction through the better, wider use of audio-visual

**You've made a film.  
You've worked hard and long on it.  
It should meet your objectives.  
It may even win an award.  
It needs an audience.  
Are you going to buy numbers?  
Or people.**

**"Selective distribution" delivers  
real people, not just numbers.**

We can get you millions of viewers for your sponsored film, if that's what you want. But, if you want a better defined audience, we can deliver that, too. Want emphasis on adults, rather than teenagers? A predominantly female audience? Community leaders? You name it.

Sterling Movies U.S.A. developed "Selective Distribution" to give sponsored films pin-pointed exposure, not a haphazard collection of anonymous viewers. Call us. We'll show you how we can set up a specific distribution pattern which will zero in on your film's objectives.

# EDUCATIONAL & SCIENTIFIC GROUPS:

## THE EDUCATIONAL FILM LIBRARY ASSOCIATION

CONTINUED FROM THE PRECEDING PAGE 26) equipment, materials and techniques. Membership consists primarily of directors and specialists in colleges and universities, state departments, and county and city school systems, school supervisors and administrators, classroom teachers, librarians and audio-visual specialists in the armed forces, in industry and long religious groups are included in membership of this NEA a-v department.

REFERENCES: National Convention: 1965, Milwaukee, April 25-30; 1966, San Diego, California, April 23-30; 1967, Boston, April 16-21. Summer meeting in connection with NEA Convention, N.Y. City, June 29. Lake Okoboji Audio-Visual Leadership Conf., August 15-19.

ACTIVITIES, 1964-65: DAVI has a committee commission program dealing with such problems as quantitative standards, teacher education, professional education of the AV specialist, school plant design, technical standards for equipment, legislation, international relations, consultative service, research, and library and archives. A joint membership plan at a reduced rate has been set up with the National Assn. of Educational Broadcasters. DAVI participated in six international conferences in 1964: World Confederation of Organizations of the Teaching Profession, Paris; International Council for Educational Films

Conference, Paris; Audiovisual Workshop following the WCOTIP meeting; International Research Conference, Italy; Conference on Foreign Language Teaching, Belgium; Conference on Programmed Instruction, Berlin. DAVI also participated in state and regional audiovisual conferences and provided consultants for conventions of many national organizations; worked on joint projects with eight national organizations including the Educational Media Council; operated a National Tape Repository of over 3,000 titles offering recording service for educational institutions.

PUBLICATIONS: Official organ is *Audiovisual Instruction* (monthly except July and August); *AV Communication Review* (quarterly). Other recent publications include: *Selection and Use of Programmed Materials* (filmstrip and handbook); a *Handbook for Affiliates; Tips to the States; National Tape Recording Catalog; Supplement I; Research Principles and Practices in Visual Communication; Trends in Programmed Instruction; Language Laboratory and Language Learning, Monograph #2; Studies in the Growth of Instructional Technology, II; A Directory of Closed-Circuit Television Installations in American Education with a Pattern of Growth.*

This listing of educational and scientific organizations continues on the following pages.

OFFICE: 250 West 57th Street, New York, New York 10019.

OFFICERS: Galon R. Miller, *President*; James L. Limbacher, *Vice President*; William J. Speed, *secretary*; Emily S. Jones, *Administrative Director* (at headquarters).

COMMITTEES: Frederic Krahn, *Festival Chairman*; William J. Speed, *Nominations Chairman*; James L. Limbacher, *Membership Chairman*; Theo Betjemann, *Evaluations Chairman*.

MEMBERSHIP: (Constituent) — 525 non-profit educational institutions; (Service) — 61 commercial organizations and interested individuals; 4 international members (government agencies, film groups of other countries); 46 sub-memberships and 162 personal memberships, for a total enrollment of 798.

PURPOSE: To encourage and improve the production, distribution and utilization of educational films. EFLA conducts a film evaluation service.

1965 AMERICAN FILM FESTIVAL: To be held April 21-24, at the Biltmore Hotel, New York City. (See awards listed on page 11.)

PUBLICATIONS: For members — Evaluations, EFLA Bulletins, Service Supplements and Film Review Digest. A catalog containing descriptions of EFLA "general" publications is provided on letterhead request.

## Young Again!

When does a film grow old?

Wear-and-tear begins with the first showing. As showings increase, wear-and-tear mounts, and the tell-tale signs of stress and strain appear. When this happens, you can anticipate real difficulty in the projector. Don't wait until the film starts tearing — or until the buckle or curl becomes unpleasantly noticeable.

Before this happens—call on us.

Comprehensive Filmtreat Rejuvenation can restore your print to "like new" condition—at a fraction of replacement cost.

Comprehensive Filmtreat Rejuvenation removes scratches and abrasions; restores the original color brilliance; makes brittle and curled prints pliable; stretches shrunken film.

It costs you so little, saves you so much. Literature and prices on request. Please write

### THE FARM FILM FOUNDATION, INC.

MAIN OFFICE: 1425 H St., N. W., Washington, D. C. 20005.

OFFICERS: Walter D. Fuller (Walter D. Fuller Co.), *President* (deceased); Mrs. Edith T. Bennett, *Executive Vice President*; Beatty H. Dimit (National Grange), Francis Wilcox (Sunkist Growers, Inc.), Mrs. Haven Smith (Women's Committee, Am. Farm Bureau Federation), E. M. Norton (National Milk Producers Federation), *Vice Presidents*; Ken Geyer, (Connecticut Milk Producers Assn.), *Treasurer*; J. K. Stern (American Institute of Cooperation), *Secretary*; Charles Dana Bennett, *Special Consultant*; Lew B. Martin (Pope, Ballard & Loos), *Counsel*; Dickson Loos (Pope, Ballard & Loos), *Assistant Treasurer*.

BOARD OF TRUSTEES: Elmaar Bakken (Boy Scouts of America); Mrs. Edith T. Bennett, *Exec. V. P.*; Henry O. Bercher (International Harvester Co.); William T. Brady (Corn Products Co.); Mrs. Anna Breckenridge, (Potomac Grange); Rober Corbett (New Mexico State University); P. O. Davis (Assn. of Land Grant Colleges); Beatty H. Dimit (National Grange); Roger Fleming (American Farm Bureau Federation); Ken Geyer (Connecticut Milk Producers' Assn.); James E. Gibson (Peace Corps.); H. G. Hawes (Maine State Dept. of Agriculture); Karl D. Loos (Pope, Ballard & Loos); Herschel D. Newsom (National Grange); E. M. Norton (National Milk Producers Federation); Mrs. Haven Smith (Women's Committee, Am. Farm Bureau Federation); J. K. Stern (American Institute of Cooperation); Carroll Streeter (Farm Journal); R. Douglas Stuart (Quaker Oats Company); Webster Tenney (Future Farmers of America); Orville F. Walker (National Assn. of County Agr. Agents); Walter Wightman (Michigan Farm Bureau); Francis Wilcox (Sunkist Growers, Inc.); P. O. Wilson (National Live Stock Prod. Assn.).

HONORARY LIFE MEMBERS: Earl W. Benjamin, Frank W. Jenks, James A. McConnell, Wheeler McMillen, Mrs. Raymond Sayre, William T. Spanton.

BOARD OF CONSULTANTS: Roy Battles (Clear Channel Broadcasting Service); E. G. Cherbonnier (Foundation for American Agriculture); Don Donnelly (American Farm Bureau Federation); Kit H. Haynes (National Council of Farmers Cooperatives); Wib Justi (National Grange); J. Don Parel (Association of America Railroads); Val Sherman (National Milk Producers Federation); C. Maurice Wieting (Ohio Farm Bureau Federation); Louis H. Wilson (National Plant Food Institute); Judd Wyatt (Missouri Farmers' Association).

MEETINGS: The Trustees meet each year in June. The Board of Consultants meet to screen films on call of the Executive Vice President.

PURPOSE: The creation of better understand-

ing between rural and urban America through audio-visual education.

ACTIVITIES: (1) Distributes through its main office and cooperating depositories 16mm motion pictures found suitable by Board of Consultants for Foundation endorsement. Distribution for Foundation endorsement. Distribution is principally to rural America. There is no cost to film users except for return postage. There is, however, a small library of special purpose rental films maintained at the main office. (2) The Foundation, through its contacts with all phases of rural America, makes available a unique consultation service to film sponsors and producers.

### THE UNIVERSITY FILM PRODUCERS ASSOCIATION

OFFICE (of the President): Frank R. Paine, Film Production, Southern Illinois University, Carbondale, Illinois.

OFFICERS: Frank R. Paine, *President*; Jesse L. Senn, Jr. (Motion Picture Prod., Purdue Univ.), *Executive Vice President*; Robert W. Wagner (Motion Picture Div., Ohio State Univ.), *Editorial Vice President*; William Drake (Motion Picture Div., Ohio State Univ.), *Conference Vice President*.

BOARD OF DIRECTORS: Oscar E. Patterson (Univ. of So. Calif.), *Immediate Past President*; Raymond Fielding (UCLA); Richard Goggin (New York Univ.); Edward Fischer (Notre Dame); Larry Silverman (Wayne State Univ.); Byrl Sims (Univ. of Illinois); J. Blair Watson (Dartmouth).

COMMITTEE CHAIRMEN: Herbert E. Farmer (Univ. of So. Calif.), *Constitution*; John Kuiper (Univ. of Iowa), *Curriculum*; Robert Oesterling (Univ. of Mississippi), *Distribution*; Vincent Talbot (Loyola Univ. of Los Angeles), *Equipment*; J. E. Oglesby (Va. State Bd. of Education), *Festivals and Contests*; John Mercier (So. Ill. Univ.), and Kenneth Mason (Eastman Kodak Co.), *Historians*; Don G. Williams (Univ. of Missouri at Kansas City), *International Relations*; Mrs. John Flory (Penfield Central Schools), *Membership*; Howard W. Cotton (So. Ill. Univ.), *Personnel*.

PUBLICATIONS: The formal publication of UFPA is a quarterly issue, *The UFPA Journal*, (subscription to non-members is \$4.00 per year). Other special reports and papers published at intervals for member guidance. The *UFPA Digest* is a publication for members only and is published monthly. The Association is represented annually at Film Festivals and at the International Congress of Schools of Cinema and Television in Europe.

ANNUAL CONFERENCE: 19th Annual Conference to be held August 16-21, 1965. Hosted by New York University. William Hodapp (New York Univ.), *Conference Coordinator*.

EDITOR'S NOTE: A detailed resume on the University Film Foundation, Inc., closely related to the above organization, is provided on Page 184 of this Production Review issue.

# ...IS ALSO AVAILABLE TO YOU

Whether it is a one-reel industrial film or a multi-million-dollar theatrical production—Technicolor gives the same quality and service to all producers of motion picture film. Remember Technicolor quality costs you no more. Also, services are available to you that you can not obtain elsewhere. Give your next production that “Extra Star”—Color by Technicolor.

Technicolor printers are programmed to make automatic fades, dissolves, deletions or substitutions. For instance, a 13-minute and a 27-minute version may be printed from the same original negative without recutting.

Negatives are coated with a cleansing solvent during printing; abrasion is avoided, and if already present, is rendered invisible.

There are over forty different methods and aspects of printing that are standard products. (Anamorphosing, deanamorphosing, enlargement and reduction of image.)

Continuous processing from raw stock to completed color and sound print is accomplished in one pass through processor and projected inspection. Electronic and mechanical programming guides progression of operation. Every print is objectively and subjectively inspected before packaging.

EXECUTIVE DIRECTOR: Harold Klein

PURPOSE: An organization of professionals in  
the art and craft of motion picture making,  
dedicated to preserving standards of quality,  
service, good practice, ethics and to the devel-  
opment of the Industry. The organization,  
through membership meetings and active com-  
mittees, works to advance the motion picture  
industry in all of its branches; to establish  
and maintain a high standard of ethics among  
producers, their employees, their suppliers and  
their clients; to distribute accurate information  
with regard to technical improvements; to ad-  
vise the general public on the importance of  
the film industry in the nation's economy; to  
encourage responsible people to enter the in-  
dustry; to promote, stabilize and coordinate all  
elements of the industry. •

**THE FILM PRODUCERS  
ASSOCIATION OF MINNESOTA**

OFFICERS: Norm Hamilton (Studio One, Inc.),  
*President*; Cliff R. Sakry (Promotional Films,  
Inc.), *Executive Secretary*; Anthony Lane  
(Anthony Lane Studios, Inc.), *Treasurer*;  
Floyd Klang (Countryman-Klang Film Pro-  
ductions, Inc.), and Richard Polister (George

ductions; Empire Photosound, Inc.; George Ryan  
Films, Inc.; Promotional Films, Inc.; Rusten  
Film Associates; Anthony Lane Film Studios,  
Inc.; Studio One, Inc.; Image, Inc.

PURPOSE: The advancement of the arts and  
crafts of film production for the betterment  
and improvement of the film industry; the  
establishment of improved client relations and  
the exchange of technical information.

PROJECTS: Advertising, publicity and public  
relations campaign to build recognition and  
prestige for the accredited local film producers;  
to enlighten business and industry in the types,  
uses and advantages, of films and to encourage  
wider use of films in training, selling, advertis-  
ing and public relations

MEETINGS: Third Monday of each month,  
6:30 p.m., Minneapolis. •

# Trade and Professional Organizations Serving the Audio-Visual Industry

Associations of Dealers,  
Engineers, Laboratories  
& Producers in the U. S.,  
Canada and Abroad

## International Producer and Laboratory Groups

### THE ASSOCIATION OF MOTION PICTURE PRODUCERS AND LABORATORIES OF CANADA

OFFICE (of the President): 19 Fairmont Ave., Toronto 3, Ontario. (of the Executive Secretary): Suite 1301, 55 York Street, Toronto Ontario, Canada.

OFFICERS: C. H. Everett (Crawley Films Limited, Ottawa), *President*; S. Dean Peterson (Peterson Productions Limited, Toronto), *Vice-President*; Roger J. Beaudry (Patheflux of Canada Limited, Toronto), *Second Vice-President*; John T. Ross (Robert Lawrence Productions (Canada) Ltd., Toronto), *Secretary*; Frank A. Young, *Executive Secretary*.

DIRECTORS: David Bier (David Bier Studios and Film Laboratories, Montreal); Robert B. Grosiers (Rodesfilm Inc., Montreal); E. G. Hamilton (Trans-Canada Films Ltd., Vancouver); Pierre Harwood (Omega Productions Inc., Montreal); Mort Lesser (Lesser Audio Ltd., Toronto); Andre Prefontaine (Trans-World Film Laboratories Ltd., Montreal); Wm. C. Kennedy (Crawley Films Ltd., Toronto).

MEMBERSHIP: Canadian firms, proprietorships, partnerships and corporations engaged in motion picture production or laboratory work are eligible for Active Membership. Persons, firms or organizations acceptable to the membership and interested in the furtherance of the motion picture industry in Canada are eligible for Associate Membership. Present membership: 53 Active Members; 12 Associate Members; Total 65.

PURPOSE: To promote the common interest of those engaged in the motion picture production and laboratory industries in Canada by maintaining the highest possible standards in the production of motion pictures for commercial, theatrical, or television release; to represent the industry in its relations with government, other associations and the public at large; to encourage government agencies to require films let by tender to private producers.

1965 ACTIVITIES: 1. To emphasize the position of the Canadian private film production industry — that in order to survive, government agencies must halt their growth and let an increasing amount of work by tender to private producers and laboratories. 2. To continue and enlarge our program of acquainting industry, advertising agencies, television stations, networks, and other potential sponsors with the work of Canadian film producers. 3. To intensify our efforts to assist the development and promotion of the Canadian Film Awards presentations — in order to gain recognition for this event as the All-Canadian Film Showcase.

### FEDERATION OF SPECIALIZED FILM ASSOCIATIONS

OFFICE (of the Secretary): 2, Bouchier Street, London, W. 1, England. Telephone: REGent 3781. R. C. Elstone, CBE, MC., *Secretary*.

PURPOSE: The Federation represents and promotes the interests of all branches of the specialized film industry through its constituent member Associations: (1) Association of Specialized Film Producers representing the producers of cinema shorts, documentaries, sponsored industrial and Government films. (2) Advertising Film Producers Association representing producers of advertising films for television and cinema. (3) British Animation Group representing producers of cartoon, animated diagram, special and model animation films. Each Association is represented on the Federation Council by its Chairman and Vice-Chairman and elected representatives.

### SCREEN ADVERTISING WORLD ASSOCIATION LTD.

OFFICE: 35 Piccadilly, London W.1, England. Cables: FESTFILM LONDON W.1.

OFFICERS: Jo Linten, *President*; Ernest Pearl, *Honorary Life President*; Charles Ruedi & Fritz Rothschild, *Vice Presidents*; Peter Taylor, *Director General*.

PURPOSE: To promote and develop cinema screen advertising on an international basis; to assist in the promotion and trade among members of the Association by provision for distribution facilities and a central information service; and by arranging for the exchange between members of information for their mutual assistance.

1965 ACTIVITIES: The Association is responsible for the organization of the International Advertising Film Festival. The Twelfth International Advertising Film Festival will be held during the period June 14-19, 1965, at Cannes, France, under its auspices.

## National Organization of Audio-Visual Dealers

### THE NATIONAL AUDIO-VISUAL ASSOCIATION, INC.

NATIONAL OFFICE: 1201 Spring Street, Fairfax, Virginia 22030.

CONTACT: Don White, *Executive Vice-President* or James W. Hulfish, *Director of Information*.

MEMBERSHIP: A trade association of the commercial audio-visual industry; membership consists of (1) A-V dealers and film libraries; (2) A-V materials' producers; (3) A-V equipment manufacturers; and (4) independent A-V suppliers' representatives.

PURPOSE: The Association was organized in 1939 to (1) collect and furnish data which will benefit A-V business; (2) improve the

professional status and business practices of the industry; (3) provide business education and information; and (4) promote better relations between A-V suppliers, distributors, and customers.

OFFICERS: Harold E. Newman (Newman Visual Education, Inc., Kalamazoo, Mich.), *President*; Eloise Keefe (T.E.A. Film Library, Dallas), *First Vice President*; Max Rarig (Rarig's Inc., Seattle), *Second Vice President*; Frank S. Bangs (Frank Banks Co., Wichita), *Secretary*; John Ellingson (Inland Audio-Visual Co., Spokane), *Treasurer*; Robert P. Abrams (Williams, Brown & Earle, Inc., Philadelphia), *Chairman of the Board*.

DIRECTORS-AT-LARGE: Paul Cox (Coast Visual Education Co., Hollywood); Howard Holt (Audio-Visual Film Service, Inc., Birmingham, Ala.); Matt Dowling (Dowlings, Inc., Oklahoma City); Jack Spire (Ideal Pictures Co., Miami).

REGIONAL DIRECTORS: C. M. Meserve (A. H. Rice Co., Inc., Manchester, N.H.); C. T. Chandler ("The" Film Center, Washington, D.C.); Jack L. McCracken (Tarmac Audio-Visual Co., Asheville, N.C.); Alan P. Twyman (Twyman Films, Inc., Dayton); Ray Swank (Swank Motion Pictures, Inc., St. Louis); J. L. Miller, Jr. (Miller's Visual Aids, Inc., Fort Worth); Ronald Nelson (Redland A-V Sales & Service, Redlands, Calif.); Peter Allinger (Viewsound Supplies, Vancouver, B.C.).

PRINCIPAL COMMITTEES: Listed with their chairmen — *Convention*, Eloise Keefe; *Educational*, Ellsworth C. Dent; *Film Council*, C. T. Chandler; *Industry & Business Council*, Robert P. Abrams; *Membership*, Max Rarig; *Nominating*, E. E. Carter; *Religious Council*, Roa Kraft Birch; *Resolutions*, Matt Dowling; *Long Range Planning*, Max Rarig; *Technical Standards*, Ainslie Davis.

PUBLICATIONS: The Association's regular bulletin, *NAVA News*, is published 26 issues per year, available to members only. Of general interest are: *The Audio-Visual Equipment Directory*, Eleventh Edition, published January, 1965 (343 pages, \$6.00); *The NAVA Membership List and Trade Directory*, 1963-64, coded to show services and products available (free on request); *The Audio-Visual Speakers' Guide*, 1964 (free on request); and *Talk Is Not Enough*, 1962, an A-V utilization handbook for industry (single copies, free on request).

1965 ACTIVITIES: The NAVA Convention and Trade Show, July 17-20, Hotel Sherman, Chicago, Illinois. Guests admitted on fee basis.

## There are five new films from Eastman Kodak (The first has highest acutance)

New breakthroughs in emulsion technology make XT pan superior in sharpness and apparent grain structure than previous Eastman films. And besides, here's an *exterior* film for shooting at *slower speeds* (E.I. 25). Shoot at optimum lens setting—no need to stop down or use dust-trapping filters. New XT pan gives you everything a fine-grain release positive can take...no special handling required. Want to know more? Contact our nearest office.

## Civic and National Film Council Groups

### CHICAGO FILM COUNCIL, INC.

**OFFICE:** 400 E. Randolph Street, Chicago, Illinois 60601

**OFFICERS:** Robert Scipp, (WTTW-TV), *President*; Jerry Curto, Jr. (Santa Fe Railroad), *Vice President*; Phil Tobin (Contemporary Films, Inc.), *Treasurer*; Frank Bronwell (Chicago Cinema Club), *Program Director*; Gloria Janis (Argonne National Laboratory), *Secretary*.

**DIRECTORS:** Dr. Philip Lewis (Chicago Board of Education); Darryl Miller (Am. Dental Assn.); Richard Edmundson (Illinois Public Aid Commission); William Kruse (Audio-Visual Media, Inc.); John Coiburn (John Colburn Assoc.); Bernard Mack (Filmack Studios); Donald Buck (Coronet Films); Esther Altschul (Journal Films, Inc.); Robert Konikow (Advertising & Sales Promotion); Frank Greenleaf (U.S. Steel Corp.); George Tressel (Argonne National Lab.); Jack Lusk (Modern Talking Pictures).

**PURPOSE:** The purpose of the Council is to promote, improve, and extend the use of films and other audio visual materials for commercial, informational, cultural, and socially constructive purposes, and to seek progressive methods of film production, distribution and effective use of films.

### THE FILM COUNCIL OF GREATER COLUMBUS

**OFFICES:** Center of Science and Industry, 280 E. Broad Street, Columbus 15, Ohio, and Film Dept., Columbus Public Library, 96 So. Grant Avenue, Columbus, Ohio.

**OFFICERS:** Dr. D. F. Prugh (Director, Franklin County Historical Society), *President*; Galvy Gordon (Public Relations Dir., Columbus Public Library), *Vice-President and Business Film Coordinator*; Kenneth B. Hobbs (Battelle Memorial Institute), *Vice President*;

Mary A. Rupe (Film Librarian, Columbus Public Library), *Secretary-Treasurer*.

**TRUSTEES:** Dr. Edgar E. Dale (Director, Bureau of Educational Research and Service, Ohio State University); Robert Wagner (Director of Motion Pictures, Department of Photography, Ohio State University); Earl Wilson (Columnist); Frank C. Croxton (Technical Director, Battelle Memorial Institute); Al Garrett (Vice President, Ohio State Univ.); Robert Finehout (Vice President, Association Films); John Desmond (Vice President, United World Films); Carl Lenz (President, Modern Talking Pictures); George Stevens, Jr. (U. S. I. A.).

**PURPOSE:** To promote a greater interest in the production and use of films by schools and universities, public service organizations, civic groups, and business firms and industries. The use of films by these organizations in the Columbus area and the state is also stressed.

**1965 ACTIVITIES:** The Thirteenth Annual Columbus Film Festival featuring the "Chris" Award Banquet, Friday, October 1, 1965 at The Columbus Gallery of Fine Arts (Derby Court) including Chris Certificate and Statuette Awards. Film clips will be shown of Chris Statuette winners in each of the seven categories. Public Screening will be held in the new auditorium of Battelle Memorial Institute on Saturday and Sunday, October 2 and 3. A registration fee of 75c will be charged.

### THE CANADIAN FILM INSTITUTE

**NATIONAL OFFICE:** 1762 Carling Avenue, Ottawa 13, Ontario, Canada.

**OFFICERS:** His Excellency Major-General Georges P. Vanier, DSO, MC, CD, Governor-General of Canada, *Honorary President*; Jean Clavel, *President*; A. L. Hepworth, *Vice-President*; G. Delisle, *Vice President*; L. F. MacRae, *Honorary Treasurer*; Roy Little, *Executive Director*.

**DIVISIONS:** Canadian Film Archives, Canadian Federation of Film Societies, Scientific Film Division, Business Film Service.

**PURPOSE:** To bring together Canada's educational, scientific, cultural and community interest in the field of documentary films and to encourage and promote the study, appreciation and use of motion pictures and television as educational and cultural factors.

**ACTIVITIES:** Distribution—National Film Library (8,000 titles in 32 special collections); National Science Film Library established June, 1962, Peter Morris, *Director*; Importation of films from other countries; Information Service; Preservation of films of historical interest; Distribution of sponsored films; Canadian Film Awards; Special services in the fields of business films, scientific films, films on art, films for UNESCO's East-West project, medical films, etc.

**PUBLICATIONS:** Bulletin, Catalogues, Special Subject Listings of Film Societies, Information Sheets on selected entertainment films, C.F.F.S. Bulletin.

**COMMITTEES:** Canadian Film Awards, Canadian Film Archives, Canadian Labour Film Committee, Canadian Centre of Films for Children are represented by committees.

## There are five new films from Eastman Kodak (The second is fastest)

Anyone can make a fast film. But not like new Eastman 4X pan. It's fast all right . . . E.I. 500! But with no more grain than you would expect from some medium-speed emulsions. New 4X pan combines the characteristics of speed, resolution, acutance and a long, brilliant tonal response. And, it has an extended forced-processing range. That combination means quality even under the toughest newsreel conditions. Interested? Contact our nearest office.

## Advertiser Practices and the Business Film

Association of National Advertisers' Audio-Visual Committee Report Summarizes Production & Distribution of 209 Pictures

**T**HE LATEST IN A SERIES of published reports on sponsored films, prepared by the Association of National Advertisers under the auspices of its Audio-Visual Committee is "Advertiser practices in the Production and Distribution of Business Films." The new book was released on January 27th at a special meeting of members of the Association's Audio-Visual Group, film producers, distributors and other businessmen concerned with the medium. The book was reviewed and discussed at the Biltmore Hotel in New York.

The new report is based on 209 business film "case histories" received in response to an Audio-Visual Committee questionnaire from among ANA member companies. Its announced purpose was to yield basic information which might be helpful to an advertiser in managing his own business film program.

### Important Audiences Are Ranked

Highlights of the survey include data on audiences deemed to be most important to sponsors among the 209 case examples polled. These were listed as (1) secondary and trade schools, (2) industrial concerns, (3) civic clubs, (4) public service television, (5) men's wholesalers, (8) women's clubs, (9) trade, business and professional associations, and (10) fraternal clubs.

Audiences reached by the surveyed films varied a great deal in size depending on the film's objectives, time in distribution, methods of distribution and other determining factors. Median non-TV audiences per year of film life was 47,256; median TV audience per year of film life was 1,500,000, and the median total audience per year of film life, combining non-TV and TV audiences of films having both types of distribution, was 2,136,000.

### 52% Enlist Distribution Help

45 per cent of the films were distributed only by the sponsor. About 37 per cent were distributed by both the sponsor and an outside service such as a commercial distributor or noncommercial film library. Approximately 15 per cent were distributed by an outside service alone. The use of an outside service to handle film distribution generally resulted in larger non-TV audiences.

Presenting the A.N.A. Report at luncheon were Bob Dunn, Film Manager, Ford Motor Co. (left), Chairman of the Audio-Visual Committee; and W. J. Connelly, Mgr. of Advertising, Plastics Division, Union Carbide Corp., Chairman of the Subcommittee which prepared 61-page report on business films.

According to sponsors' estimates, television generally delivered younger audiences than did non-TV distribution. Whereas about two-thirds of the non-TV audiences were more than 75 per cent adult, only one-fifth of the estimated TV audiences included as large a proportion of adult viewers.

### 90% Get Nationwide Showings

Nearly 90 per cent of the films were distributed nationally throughout the U.S. Approximately 55 per cent were shown in foreign countries.

About one-third of the productions were in distribution with 100 or more release prints. The median number of prints per film came to 47.

A large majority of films in the survey (62 per cent) were produced by the sponsor in combination with an outside service. Roughly one-third were made ex-

Below: producer Scudder Boyd, at left, reviews report with distribution executive John Desmond, vice-president of United World Films, Inc.

## There are five new films from Eastman Kodak (The third has finer grain)

There's plenty of room in 16mm for sharp prints, and our new *Eastman Fine-Grain Release Positive* will make a striking difference here. For the finest results, try this film in combination with our new slower-speed, high-acutance XT pan negative. They make a great team. Actually, this print film makes any negative look great . . . and it processes on existing equipment and also in the *Eastman Viscomat* Processor. Why not investigate? Contact our nearest office.

## Advertiser Practices and the Business Film:

CONTINUED FROM PAGE 38)  
 sively by an outside producer  
 of a relatively small number were  
 produced by the sponsor alone.  
 Business film costs, as itemized  
 in the survey, showed that among  
 outside-produced films the median  
 cost was \$32,000, while among  
 110 internal and outside films  
 the median cost was \$12,120  
 (including internal overhead  
 costs), and 11 internally produced  
 films had a median cost of \$7,000.  
 Distribution costs indicated a  
 median figure of \$3,190 for films  
 in circulation for a year or less,  
 \$5,000 for films in circulation  
 1 to 36 months, and \$9,048 for films  
 in circulation over three years.  
 The median cost per non-TV booking  
 by the sponsor direct was \$2.50,

and by a commercial film distributor \$3.00.

### "Costs Not Definitive Norms"

The ANA Committee carefully pointed out in an introduction to the report that it "does not wish to suggest that the median costs or audience figures which have been developed are necessarily the definitive norms. Rather the standards against which an individual film should be measured must relate to the objectives which have been set for it."

The introduction to the Report goes on to say, "In this context, the costliest production may in the long run be the most economical in terms of the role in which it has fulfilled for the sponsor. Conversely, a \$1,000 investment in an in-

ternally produced film could prove to be an extravagance or a tribute to ingenuity, depending upon the degree to which the film succeeds in meeting the sponsor's objectives. By the same token, a highly selective audience of 10,000 over a three-year period may represent a genuinely rewarding performance, whereas an audience of 1,000,000 over a one-year period may be disappointing to the sponsor. In light of these considerations, it appears clear that the experience of others, however useful in lending perspective, should not supplant a company's specific communications requirements as the governing criteria."

### Only 10% Were Large Programs

Print costs of films in the survey generally came to less than \$5,000 per production, although in 26 per cent of the cases print costs exceeded \$10,000, while in roughly 10 per cent the investment in prints ran higher than \$25,000.

An interesting section of the 62-page report contains comments from sponsors who provided data for the survey. An overwhelming majority of these sponsoring companies found the film medium to be a most effective means of advertising, marketing, or disseminating the public relations image of the company.

The ANA Audio-Visual Committee is composed of 15 men re-

Luncheon guests: David Beer, of British Petroleum (North America) Ltd. (left); and Robert Bergmann, president of Filmex, Inc.

ponsible for audio-visual activities in their respective companies. Chairman is Robert O. Dunn, of Ford Motor Company. Sidney J. Shulins, of ANA, is Administrative Secretary for the committee. The subcommittee responsible for preparation of the new report was under Chairman William J. Connelly, Union Carbide Corp., Plastics Division. Other subcommittee members were Jack Hansen, Johnson & Johnson; John Flory, Eastman Kodak Company; Willis H. Pratt, Jr., American Telephone & Telegraph Company; and Frank Rollins, E. R. Squibb & Sons division of Olin Mathieson Chemical Company.

Copies of the report are available from the Association of National Advertisers, Inc., at 155 East 44th Street, New York 10017. •

Below: Discussing A.N.A. report (l to r): Ralph Del Coto, Modern Talk-Picture Service; Harold Klein, Executive Director, Film Producers Assn. of NY; and Walter Louendahl, v. p. of Dynamic Films, Inc.

### The A. N. A. Study: a Model for Statistical Abstraction

REDUCING THE MAGICAL EMPATHY of a successful film experience — those precious minutes when a truly useful motion picture is viewed by a concerned audience — to pages of tabular statistics somehow profanes this very powerful sight-sound medium. But advertisers like arithmetic and this report dutifully sets out to give them more of that than anything else. But how do you get anything but statistical abstraction out of combining the *All-America Football Team of 1962* with *Pressure Steam Sterilization*?

A.N.A. Audio-Visual Committees have given the industry some highly-useful reference reports. But not this time. Media people would cringe at comparative studies which grouped LIFE with WILDING ENGINEER. What do "median cost figures" mean when a milk separator film is compared to IBM's imaginative *Question Tree*? But, more significant than such absurdities as those which group functional farm films with *All-Star Golf Tips*, is the absence of *basic guidance*. The prospective sponsor has a right and a need to know how today's highly-specialized, separate channels of distribution can be successfully travelled. These tabulations offer cross-currents and shoals.

This report buries the tremendous interest in theatrical showings of sponsored short subjects as "non-TV!" It sets no guidelines for public-service distribution on television. In short (and these comments are all too brief) we *still need a broad, embracing report* to really tell the nation's businessmen what's going on in the exciting world of the sponsored film. — OHC

## There are five new films from Eastman Kodak (The fourth has no flare)

Your sports, news, documentary films really benefit when you use new TRI-X Film. There's minimum flare and halation; tonal quality is enhanced, and there's reduced grain. The improved halation control eliminates "blooming" on night shots. New TRI-X Reversal Film is also a natural for high-contrast subjects. Want to try it? Contact our nearest office.

Industrial Audio-Visual Association president Robert McCaslin (left) and workshop program chairman Roy Vanderford (at right) welcome members and guests to the 1965 Technological Workshop in Hollywood.

Workshop guest speakers (at left above), Jerry Fairbanks, president of Fairbanks Productions, spoke on commercial labor agreement prodd to Hollywood crafts. Top right; Charles (Cap) Palmer, president of Pathé Pictures, told how to work with your script writer. Below left; Ross Sutherland, Industrial Films Division at Hanna-Barbera and (at right) John Barbera, president of Hanna-Barbera Studios, at luncheon.

Above: IAVA members Jack Duffy (Kraft Foods) and Bob McCaslin (Caterpillar), at top right; Edward Hinger, executive vice-president, Technicolor Corporation, presents the tour of Technicolor lab facilities. Below left; George Sidney, president of the Directors Guild of America, with members at Smoke House luncheon. At right: James Wong Howe, honored banquet speaker at the IAVA Technological Workshop.

## A-V Executives Attend Western Workshop

Three-Day Program at Hollywood-Roosevelt Includes a Review of New Techniques in Processes and Production in That Area

SOME 46 MEMBERS of the Industrial Audio-Visual Association attended its 1965 Technological Workshop held January 26-29th at the Hollywood-Roosevelt Hotel and in various studios and laboratories throughout the metropolitan Los Angeles, California area.

IAVA's came to study the latest in techniques, equipment and ideas presented in this film-making area. They heard a producer (Jerry Fairbanks) describe the "new look" which Hollywood crafts are taking at the factual film field; producer Charles (Cap) Palmer talked at length on "how to work with your script writer." A visit to Hanna-Barbera Studios brought a demonstration of the dramaColor technique and a tour of the Laboratory facilities of Technicolor included discussion of imbibition color printing, the Techniscope process and 8mm projection advances.

### Members From All Sections

Program arrangements were made by member Roy Vanderford, recently retired from AT&T. Member companies were represented from all parts of the country, including the East and Southeast as well as Midwest. Honored guest and speaker at the concluding banquet ceremonies of the Workshop was James Wong Howe, ASC, who talked of his experiences as a topflight cameraman on many entertainment features.

Special program events included such topics as the use of "Closed-Circuit Television As a

Workshop interlude: chairman Roy Vanderford (right) discusses the program with an IAVA member.

Management Communication Tool" presented by Ernest Frankel of North American Aviation and of "A Branching Teaching Machine Using Motion Pictures" described by Donald Perrin of the University of Southern California.

### Tour Hanna-Barbera, MGM

Studio tours included the Hanna-Barbera visit (and a luncheon at the Smoke House Restaurant in Burbank) with president Joe Barbera as host to the group; there was also an inspection of lots at MGM and demonstrations of quartz lights and special effects work at that studio.

There were also demonstrations of new Mitchell and Eclair cameras and the latest in color films.

As such treks go, there was the inevitable visit to Disneyland but this one had a special purpose: IAVA members looked closely at such a-v highlights as the Circarama show, the use of animatronics in Adventureland and in the Enchanted Tiki Room. The Workshop program totaled up to a highly-useful membership activity. •

Below: IAVA members and guests assembled in the screening room of the Hanna-Barbera Studios for a dramaColor demonstration by Fred Harpman.

# There are five new films from Eastman Kodak (The fifth ups production)

That's right! You can now cut master production time by *as much as 75%* with this new fine-grain duplicating positive! The secret? The film is four times faster and has an altered curve shape which permits recording in the lower straight-line sector. That means a "thinner" master—but without sacrifice of fine-grain quality. Increased speed can also bring material savings... like reduced lamp replacement. All processing procedures are conventional—except for the speed! Can you use some? Contact our nearest office.

## New York City Adopts Long-Awaited Law Which Eases Control on Storage, Handling of Safety Film Stock

A NEW LAW went into effect in New York at the beginning of the year which provides relaxed controls for the storage and handling of safety motion picture film. The new law recognizes the difference in fire hazard between inflammable nitrate film and the non-inflammable safety film by continuing the strict Fire Department controls on all types of nitrate film despite the reduced regulations for safety film.

At the City Hall ceremonies, after Mayor Wagner had signed the bill, Harold Klein, Executive Director of the Film Producers Association of New York, reported that many film companies, suppliers and laboratories have long awaited the new legislation and will immediately proceed with plans for new buildings or alterations to existing plants.

### Clears Way to Modernization

"It wasn't only the high cost of providing explosive-proof conditions unnecessary for safety film," explained Mr. Klein, "it was the sheer futility of attempting to modernize the premises with the explosion and vapor-proof fixtures and stark steel furnishings required by the old code. Now that the technological safety advantages of the cellulose-acetate film are being recognized, virtually all of the companies in the \$175,000,000 commercial television and industrial motion picture industry in New York City will be only too happy to refurbish their premises.

"The new Article 20-B is more than a law under the Administrative Code. It is a milestone of progress. It is proof that city administrators, safety officers and industry can cooperate to create intelligent controls which benefit all concerned. The motion picture industry here at long last has sensible safe working regulations," Mr. Klein said.

### Cites Growth in Use of Films

"Greater quantities of motion picture film are now required for television program and commercial use, industrial, public information, technical training, indoctrination and educational films of all types. The new law will make it economically profitable to handle these films with the City of New York instead of forcing the industry to enlarge the film exchanges which have been established in New Jersey," he concluded.

Mr. Klein regarded as tremen-

dously important the section of the new law which requires compliance with the new regulations only for those areas where safety film is handled or stored. The old regulations forced film companies to install automatic sprinklers, fire-rated doors and walls, and similar safety devices designed to protect explosive materials. This included private offices and reception and conference rooms, even though film was never stored or handled there.

Other liberalized provisions reduce the area covered by fire extinguishers; permit vaults or storage rooms up to 10,000 square feet to be regulated by the practical rules covering workrooms now set forth in the new Article 20-B. Larger stages remain tightly controlled by the existing code.

The code now allows greater quantities of safety film to be considered as work, and out of containers in workrooms. The containers need only have a fire rating equal to or better than safety film, whereas previously metal was required.

### Wider Choice of Locations

Asked to point out other advantages, Mr. Klein said that, "The labs and film producers will be able to locate in many buildings formerly denied to them. They will find it possible to redecorate executive or general offices, install fluorescent lighting and modern conveniences in cutting rooms, relocate storage rooms for greater efficiency, economy and convenience, and generally benefit from the use of equipment formerly forbidden. Meanwhile, fire safety and working conditions will be greatly improved."

Development of the new law has been in preparation in New York for several years. Back in 1961, Mayor Wagner authorized then Deputy Mayor Paul Serevane and City Administrator Charles Tenney to appoint municipal officials to join with the FPA to investigate and propose revisions to the code.

### Gross Headed Joint Committee

Robert Gross, American Film Productions, former president of the FPA, was made chairman of the joint committee. Mr. Gross and his FPA associates, Ted Gaski, Movielab, Inc., Sanford Greenberg, MPO Productions, and Peter Mooney, Audio Productions, researched and studied the industry problems (CONCLUDED ON PAGE 46)

**Vacuamate Corporation Names Bunchez as Managing Director**

☆ Samuel H. Bunchez has been appointed the new director and managing head of the Vacuamate Corporation. He succeeds the late Lucile H. Fleck, president of the company, who died in February.

Mrs. Fleck, who took over the reins of the company while her husband was in the Navy in World War II, was responsible over the years for many new methods and services.

Under her guidance, Vacuamate expanded from a company offering just a film protective treatment to a many-faceted film servicing organization with personalized and custom designed services by promoting, in conjunction with the film treatment, print mailing, packaging, shipping and inventory control.

All these policies and services will be continued under the leadership of Sam Bunchez, Mrs. Fleck's right-hand man for many years.

\* \* \*

**"Winstoo Churchill" Film Now Available from Castle Films**

☆ Business and educational film libraries can acquire *Sir Winston Churchill — Man and Statesman*, a new Castle Film release available in 8mm and 16mm silent and sound editions.

The motion picture is a pictorial record of Churchill's greatness with particular emphasis on his contributions during the war years as Britain's Prime Minister.

The camera follows him to the war fronts; to his meeting with Roosevelt and Stalin; to Libya where he kindled the spirit of the fighting men who had driven a wedge into Axis positions; to the joint Congressional session in Washington; and to his historic meeting with "Ike" to plan the invasion of Normandy.

Packaged with this special film release at no extra cost is a commemorative book, *Churchill, In Memoriam*, edited by the staff of the New York Times. Published by Bantam Books, it is 160 pages in length, including 16 pages of historic photographs.

## Useful Role of Industrial Newsfilms is Discussed at Second Annual Industrial Film Methods Seminar

CURRENT INDUSTRIAL NEWSFILM and sponsored motion picture practices were examined at the Second Annual Industrial Film Methods Seminar held on February 25th, at the Statler-Hilton Hotel in Washington, D.C.

Speakers at the seminar, which was arranged by Associated Film Consultants, New York, were Richmond M. Keeney, Insurance Director, Air Force Association; Benjamin S. Greenberg, President, Mercury Newsfilm; Robert Barron, Assistant Public Relations Director, American Bankers Association; and Charles W. Gruenberg, Information Supervisor, Western Electric Company.

### Films Keep Public Informed

Mr. Gruenberg, a former NEWS-DAY and NEW YORK POST editor, is responsible for the dissemination of all non-technical information for Western Electric and is representative of growing corporate concern with keeping the public informed through newsworthy facts on film.

Seminar leader Ben Greenberg noted that "although it was the neighborhood theatre that gave birth to news film, it is television that has promoted it to a position requiring the close scrutiny of all PR people."

### A Medium for Trade Groups

"The unique role of trade group and association releases in developing American standards has put group spokesmen in new positions of responsibility," according to Mr. Barron. "However," he noted, "spokesmen have financial responsibility to their groups, too, and hit or miss news film techniques are expensive and unjustified, today."

Trade group films can play an even larger role in communications between committees, units and members of an association in the view of Mr. Keeney. He re-

ported further that the use of training and documentary films within an association need not be ruled out by budgets. Methods for arranging sponsorship of important productions include straightforward appeals to corporations and foundations as well as the enlistment of support from film makers and distributors.

\* \* \*

### Tyo to Syracuse University as Head of Film Production

John H. Tyo, former head of the motion picture unit of the RAND Corp., has been named supervisor of motion picture production at Syracuse University.

He has been teaching classes in film-making at Syracuse, and has taught in the motion picture departments of Penn. State Univ., the Univ. of California, Indiana Univ. and the Univ. of Puerto Rico. Before coming to Syracuse he had been in Africa since 1963 working for the Communications Media Project of the Western Nigeria government in Ibadan.

# AUTOCRAT??

Doesn't look much like an autocrat, does it? Looks just like the same old film you deal with everyday. Well, film it is, but it's also the beginning of all the headaches encountered in film production . . . difficult schedules . . . delicate color values . . . need of creative imagination . . . and a lot of other things. Yes, it is an autocrat indeed. It rules with unlimited authority. Jamieson, 48 years of experience (since 1916, to be exact) have taught us to handle expertly and smoothly all facets of this fellow.

Produce pictures on this old autocrat, all

sizes of it. Prize winners! We process the pictures we produce, or we'll process the pictures you produce. Motion pictures in color or black and white . . . Television . . . Filmstrips . . . Animation . . . Everything.

With us it's easy. We make lambs out of lions, kittens out of tigers and sometimes even bring a little order out of chaos. We use the same film as everybody else, but we handle it differently.

Find out. Try Jamieson for your next job on film. We're Autocrat allerators!

## Leaders of Engineering Society Cite 1965 Goals

**N**EW GROWTH AND ACTIVITY for the Society of Motion Picture and Television Engineers has been forecast by two presidents of the Society — one outgoing, the other just taking office.

In his outgoing message to the members, as published in the Society's Journal, Past-President Reid H. Ray, Reid H. Ray Film Industries, St. Paul, Minn., praised SMPTE members for their support and cooperation and said that the continuing success of the Society is a result of the interest and effort of the members — and one of SMPTE's greatest assets is membership participation.

Incoming President Ethan M. Stifle, Eastman Kodak Company, New York, called for increased membership in the Society. "Only by attracting newcomers can we maintain our vitality," Stifle said. The creation, by amendment to the SMPTE constitution, of new vice-presidencies in motion pictures, television, high-speed photography and instrumentation, education, and photoscience, should spark renewed growth.

Such growth, Mr. Stifle continued, will be aided by a continuation and enhancement of the Society's education program. An advisory committee on education will help foster a college curriculum aimed toward establishing Bachelor of Science Degrees in photographic and TV engineering. Short courses for training technicians and broadening the use of audiovisual media will also be considered.

Mr. Ray also pointed out the need for an accredited college or university course leading to the degree of photoscience engineer, but went further by suggesting a scholarship program to bolster the Society's education program. •

\* \* \*

### Irene Dunne Joins the Board of Directors at Technicolor

Mrs. Francis D. Griffin (Irene Dunne) was elected a director of Technicolor, Inc. at a recent Board of Directors meeting. Mrs. Griffin is the first woman to serve on the board of the color film processing company.

She has been a motion picture star, and had a career in the theater that included both singing and dramatic roles. Her interests outside her career include being national vice-chairman of the American Red Cross. •

## DEPARTMENT OF DEFENSE

Office of Public Affairs: Directorate for  
Information Services—Audio-Visual Division

The Pentagon, Washington, D. C. 20301

• This division is the central Armed Forces contact for the news media and producers in the important fields of radio, television, still pictures and motion pictures. Direct contacts on national and international release matters in these fields are:

Robert W. Harvey, *Deputy Director  
Information Services—Audio-Visual*  
Phone: OXford 7-1162

Norman T. Hatch, *Chief, Radio-TV  
News Branch*  
Phone: OXford 7-5111

Maj. F. N. Satterlee, USAF, *Chief, News  
Photo Branch*  
Phone: OXford 7-5331

Donald E. Baruch, *Chief, Motion Picture  
Production Cooperation Branch*  
Phone: OXford 7-4596

**ACTIVITIES:** The Motion Picture Production Cooperation Branch approves release of Armed Forces stock footage which cannot be procured commercially for newsfilm television programs, theatrical productions, etc. The Branch cooperates with producers of some 35 major theatrical productions and 10-12 TV series featuring or relating to the Armed Forces. Information on Armed Forces films available for public non-profit showing or cleared for public service TV programs can be obtained from the Motion Picture Production Cooperation Branch.

The Radio-TV News Branch releases approximately 260 (2-3 minute) subjects to the TV, newsfilm and theatrical newsfilm media annually. It maintains two small Pentagon studios for servicing the news media and radio programs, which feature interviews with top Defense officials. In addition, the Radio-TV News Branch releases taped and filmed messages by Secretaries and Service Chiefs and radio trailers for Armed Forces Day.

The News Photo Branch releases to the press and television approximately 1500 photographs per year.

**PRODUCTIONS:** The only film directly produced by the Office of Public Affairs for the Secretary of Defense is an annual film report on the progress and achievements of the Armed Forces. It is expected to be available in May.

### Armed Forces Institute of Pathology

#### Medical Illustration Service

Morris M. Goldberg, *Chief, Medical  
Illustration Service*  
Phone: 576-2866

John A. Ey, Jr., *Asst. Chief, Medical  
Illustration Service*  
Phone: 576-2867

James N. Young, *Chief, Training Aids Division*  
Phone: 576-2865

Miss Daisy B. Howze, *Chief, Audio-Visual  
Communication Center*  
Phone: 576-2864

**ACTIVITIES:** This Institute makes or supervises films for the Armed Forces on medical subjects.

**FACILITIES:** In-house capability, and contracts through the Army Signal Corps.

**DISTRIBUTION:** AFIP operates a U. S. Army Signal Corps film exchange for medical films. The Institute procures and loans films for the Medical Services of the Armed Forces wherever and whenever they are needed. Unclassified films are available to members of the medical profession, with borrowers paying return postage. For information about available films, write the Government Printing Office, Washington 25, D.C., and refer to *The Film Reference Guide—Medical and Allied Subjects*.

## Directorate for Armed Forces Information and Education

Paul J. Mundock, *Chief, Motion Picture  
Division*  
Phone: OXford 7 2967

Dallas Halverstadt, *Assistant Chief*  
Phone: OXford 7 2967

• This office produces and distributes information films for the use of the Armed Forces. Films are distributed through the film exchanges of each service, through on-base theaters, and to Armed Forces TV networks in 31 overseas locations.

## DEPARTMENT OF THE AIR FORCE

The Pentagon, Washington, D.C.

• The U.S. Air Force produces approximately 100-500 reels of film each year by contract with commercial producers or in-service. These films are used by all levels of management for education, training and informational briefings.

**ACTIVITIES:** Headquarters, USAF at the Pentagon, Washington D.C. The management focal point within the Air Staff for all photographic policy is the Audio-Visual Systems Group, Directorate of Operations. Complete address is:

Hq U.S. Air Force  
AFXOPB  
Washington, D.C. 20330

The key personnel in charge of the program are:

Lt. Col. Donell E. Bjoring  
Thomas E. Farmer

This office is responsible for determining or validating requirements for all Air Force motion pictures and insuring that the capability exists within the Air Force to either procure them by contract or produce them with in-house facilities. In this respect, they monitor the Air Photographic and Charting Service. This organization is a technical service under the Military Air Transport Command and is directly responsible for producing or procuring films, adequate photographic documentation of the total Air Force mission and distribution of release prints.

**FACILITIES:** The Air Photographic & Charting Service, Orlando AFB, Florida, is the headquarters for the Air Force world-wide photographic program. Complete motion picture production facilities located at the 1365th Photographic Squadron, Orlando AFB, Florida, and at the 1352nd Photographic Group, Los Angeles, California, support Air Force-wide production requirements.

1350th Motion Picture Squadron, APCS, Wright-Patterson AFB, Ohio, is responsible for contract procurement and commercial production of Air Force films, and provides in-service engineering and film report type productions to Technical Commands. The 1350th Motion Picture Squadron also maintains the USAF Film Depository, a film archive with historical and current film footage holdings in excess of 99,000,000 feet.

APCS also maintains photographic units at Vandenberg AFB, Santa Maria, Calif.; Ent AFB, Colorado Springs, Colo.; and Andrews AFB, Camp Springs, Md. to provide documentary and instrumentation coverage of Air Force missile and other activities. APCS also maintains combat documentary teams capable of rapid deployment anywhere in the world. These teams are permanently located at March AFB, Riverside, Calif.; Olfutt AFB, Omaha, Neb.; and Westover AFB, Chicopee Falls, Mass. Photographic Detachments are also located overseas, in the Far East, Europe and certain other areas of the world, to provide historical and combat documentation film coverage of important events of national and Air Force interest.

Additional information regarding the Air Force Film Program may be obtained by contacting (LISTING ABOVE CONTINUES ON NEXT PAGE)

## A-V PROGRAMS OF THE FEDERAL GOVERNMENT:

### DEPARTMENT OF THE AIR FORCE

Brigadier General John B. Wallace,  
*Commander, Air Photographic & Charting  
Service, Orlando AFB, Florida 32813*  
Phone: 211-5611, ext. 501

Col. James P. Warndorl, *Deputy Chief of  
Staff, Photography, Air Photographic &  
Charting Service, Orlando, AFB, Fla. 32813*  
Phone: 211-5611, ext. 501

• Specific information regarding the Commercial Production of Air Force films may be obtained by contacting:

Lt. Col. Peter Boyko, *Commander*  
1350th Motion Picture Squadron, APCS  
Wright-Patterson AFB, Ohio 45433  
Phone: Clearwater 3-7111, ext. 30158

**DISTRIBUTION:** Approved Air Force films, filmstrips and related visual aids are distributed by the Air Photographic and Charting Service through the centralized facilities of the Air Force Film Library Center, St. Louis, Mo. This facility routinely distributes 360,000 films per year to Air Force units and other agencies all over the world. The present active inventory consists of nearly one-half million prints of more than 4,000 separate film subjects. The Film Library Center also maintains overseas central Film Libraries located in France, Japan and Alaska, with a Branch Film Library in the United Kingdom. These libraries are strategically placed and stocked to service approximately 140 Base Film Libraries located throughout the world. Information regarding distribution of these films can be obtained by contacting:

Major James R. Watkins, *Commander, 1356th  
Film Library Squadron, 8900 South Broad-  
way, St. Louis, Missouri 63125*  
Phone: MElrose 1-4800, ext. 671

### DEPARTMENT OF THE ARMY

**Office of the Chief,  
Communications — Electronics  
Pictorial and Audio-Visual Directorate  
The Pentagon, Washington, D. C.**

• The Chief, Communications—Electronics of the Army is responsible for policy matters on the procurement, production and distribution of all motion pictures for the Army. As a result, all film programs are authorized by the Pictorial and Audio-Visual Directorate of the Office of the Chief, Communications—Electronics. Information pertaining to the production or the distribution of prints may be obtained from the following:

Col. Daniel C. Bird, *Director, Pictorial  
and Audio-Visual Directorate*

Phone: OXford 7-3520

Col. L. J. Fishkin, *Deputy Director,  
Pictorial and Audio-Visual Directorate*  
Phone: OXford 5-6958

Lt. Col. Charles E. Campbell, *Chief,  
Photographic Division*

Phone: OXford 5-3806

James A. Moses, *Chief, Concept &  
Application Branch*

Phone: OXford 7-2039

**ACTIVITIES:** The Pictorial and Audio-Visual Directorate coordinates production of more than 300 films of all types each year, including the TV series *The Big Picture*, and some films for the Office of Armed Forces Information and Education.

THE ARMY PICTORIAL CENTER has primary responsibility for the actual production of motion pictures and requests for information concerning contracts for writing, production and processing should be directed to the Commanding Officer, Army Pictorial Center, 35 11 35th Ave., Long Island City, New York 11106 Phone Astoria 4-3100.

**DISTRIBUTION:** All official motion pictures, film strips, transparencies, language training materials and language laboratories, and related audio-visual aids are distributed throughout the Army by the U. S. Army Film Distribution & Utilization System. This system includes the Audio-Visual Distribution Division, Pictorial and Audio-Visual Directorate, OCC-E, the Distribution Branch of Army Pictorial Center, and the 258 Audio-Visual Communication Centers located at Army headquarters, major service schools and training installations throughout the ZI (Zone of Interior) Armies and Overseas Commands.

### DEPARTMENT OF THE NAVY

Washington, D. C. 20390

• The U. S. Department of the Navy produces motion pictures for such purposes as training, maintaining fleet readiness, explaining new weapons and devices, and for medical, historical, indoctrination, safety and recruiting uses, to name a few key subject areas.

• *Information and General Policy Procedures* on all aspects of the Navy film program, including application information for commercial producers interested in bidding on Navy contract films, are handled by the Chief, Bureau of Naval Weapons, Navy Department, Washington, D. C. 20360.

Captain J. J. Crowder, USN — Code FF, *Di-  
rector, Photographic Management Division*  
Phone: OXford 8-3417

E. L. Randel, Code FFMP, *Head, Training  
Film & Motion Picture Branch, Photographic  
Management Division*

Phones: OXford 8-3470, OXford 8-3472

• *Procurement policies and procedures*, which involve information on technical questions regarding bids, are handled by the Officer in Charge, Navy Purchasing Office, Washington, D. C. 20360.

Captain O. W. Stafford, USN, *Officer in  
Charge*

Phone: OXford 8-2901

Cdr. E. C. Goodwin, USN, *Director,  
Purchase Division*

Phone: OXford 8-2845

**FACILITIES:** The U. S. Naval Photographic Center, a field activity of the Bureau of Naval Weapons, is the central photographic laboratory for the Navy Department and the Navy's largest photographic activity. The Center, composed of about 530 military and civilian personnel, provides photographic assistance and specialized services to the entire Naval Establishment, supervises the production of Navy training films and maintains the Navy's motion picture and still photographic film libraries.

The motion picture production facilities at the Center are modern and complete. There is a sound stage, film and tape recording and mixing equipment, an art and animation group and editorial branch. Here experienced script writers and artists collaborate with Navy photographers and technicians, maintaining high standards of quality for Navy productions. The processing division has the capability to develop and print negative film and release prints in 35mm and 16mm black-and-white and negative-positive color. About 75 percent of all Navy films, however, are contracted with established commercial producers.

In addition, there is a growing requirement for films to report on the Navy's research and development activity. To meet this need, a TV closed circuit kinescope facility has been installed. Two video tape recorders and kine-recorders together with viscomat processing make for rapid completion of urgent films.

Extensive libraries of both still and motion picture photography are maintained at the Center. Library services are provided to the Naval (CONCLUDED ON THE FOLLOWING PAGE 54)

# Change films in 2 seconds flat!

Read how Fairchild's amazing new MoviePak cartridge can multiply the value of your entire sound film program

At last you can show any film, anywhere, anytime—without threading, film handling or rewinding.

Sound incredible? Nothing to it!

Simply select the MoviePak sound film cartridge you want, snap it into the Mark IV rear-screen projector, and play.

In broad daylight. In a prospect's office. In showrooms. At trade shows. On sales counters. In training labs. Or in the boardroom.

Want to switch to another film instantly, to answer a question, make a point, follow up on an opening?

Watch!

Just snap out one cartridge, snap in an-

other, and you're off and running.

Think how this revolution in 8mm projection unleashes the full power of your film program.

No longer do you or your salesmen have to master complicated equipment, sweat out set-up time, or juggle projection schedules.

Better still, you never have to pass up a perfect opportunity to show a film you spent good money to make.

Every film you have can be easily and inexpensively converted to 8mm, and threaded into the MoviePak cartridge.

Duplicate prints are less expensive than 16mm, too, so you can afford to have them available wherever they might be needed.

The Fairchild Mark IV projector itself is a miracle of practicality. It is totally portable, weighs just 20 lbs., and is always ready for action.

Nothing to set up. Just plug in and run, no warm-up time required. The Mark IV takes up to 22 minutes of sound color film in a single MoviePak—and repeats automatically.

For display use, the Mark IV will run indefinitely without supervision. And its trouble-free operation means exceptional film-life—up to 3000 plays per print.

Doesn't it sound like your films would

work harder for you in MoviePak cartridges? Doesn't it sound like they'd get more exposure on a Fairchild Mark IV rear-screen projector?

We'd be happy to verify. Just rush the coupon.

# NAVY PROGRAMS OF THE FEDERAL GOVERNMENT:

## THE DEPARTMENT OF THE NAVY

Establishment, other government agencies and commercial concerns on a cash sale basis. The Motion Picture Department produces all types of motion picture photography such as press, serials, murals, and official portraits. Modern continuous roll processing and printing and processing units meet the Navy's large volume print demands. There are complete negative, positive and transparency processing facilities.

A research and development group conducts tests, experimentations, development and evaluation of photographic equipment. Here, technical photographic specifications, instructions and other publications are also prepared. Information about the Department may be obtained from: Commanding Officer, Naval Photographic Center, U. S. Naval Station, Washington 25, D. C.

Captain M. P. MacNair, USN,  
Commanding Officer  
Phone: OXford 8-2101

Cdr. T. E. DeVees, USN, *Head,*  
*Motion Picture Department*  
Phone: OXford 8-2142

Instructions: Prints of all Navy films available to the public can be purchased from DuArt Labs, Inc., 245 W. 55th St., New York, New York, under an annual contract administered by the U. S. Office of Education. Civilians may borrow films from Naval District Public Information Offices, Training Aids Libraries, Aviation Film Libraries, Recruiting Stations and Public Information Offices located throughout the United States. Requests for the use of Navy stock footage in commercial productions should be submitted to the Chief of Information, Navy Department, Washington, D. C. 20390.

## United States Marine Corps

• For information on U. S. Marine Corps films, which are produced by the Department of the Navy, write to the office of:

Head, Pictorial Unit; G-3 Division  
Headquarters, U.S. Marine Corps  
Washington, D.C. 20380  
Phone: OXford 4-2394

## DEPARTMENT OF AGRICULTURE

### Office of Information

### Motion Picture Service

Washington, D. C. 20250

• The Motion Picture Service of the USDA produces motion pictures in color and black-and-white on agricultural and related subjects for various agencies within the Department and, on occasion, for other Government agencies. Production and laboratory services are also available on a cooperative basis with land grant colleges and universities.

C. A. Carrello, *Chief, Motion Picture Service*  
Phone: DUDley 8-6072

Martin Lobdell, *Associate Chief for Production, Laboratory Services*  
Phone: DUDley 8-3628

Homer Boor, *Producer*  
Phone: DUDley 8-3086

Judd Scott, *Producer*  
Phone: DUDley 8-6518

Gilbert Courtney, *Producer*  
Phone: DUDley 8-3319

Joseph Sanders, *Chief, Business Management*  
Phone: DUDley 8-7263

Arthur Foster, *Chief of Laboratory*  
Phone: DUDley 8-6747

James E. Alford, *Chief of Distribution*  
Phone: DUDley 8-5246

Mrs. Anne Ware, *Stock Footage Librarian*  
Phone: DUDley 8-3629

ACTIVITIES: The USDA currently has more than 300 films in distribution with an estimated audience of 350 million persons. These films cover such subjects as conservation, forestry, agricultural research, insect eradication, control of animal diseases, consumer information, rural area development, nutrition and marketing. In addition, the Department is prepared to cooperate with qualified non-government organizations in the production and distribution of agricultural educational motion pictures and TV films which are related to agricultural programs, if the non-government cooperator is a non-profit organization or association concerned with the dissemination of agricultural information or the production or handling of one or more agricultural products. Maintains an extensive 16mm color stock footage library of agricultural scenes which are for sale at nominal cost.

FACILITIES: The USDA Motion Picture Service has complete in-service production and laboratory facilities which have been in continuous operation since 1912.

DISTRIBUTION: Films for school and group showings are distributed through 69 cooperative film libraries located in each state. Films for TV bookings are distributed directly from Washington, and prints of all films may be purchased from DuArt Film Laboratories, Inc., 245 W. 55th St., New York, N.Y., 10019. Catalogues are available of motion pictures, films suitable for TV showing, state produced films and of stock footage scenes.

PUBLICATIONS: Two catalogs contain complete listings of USDA motion pictures; one of these provides data on films for general 16mm distribution; the other lists films available for public service showings by television stations.

**DEPARTMENT OF COMMERCE**  
Washington 25, D. C.

• The U. S. Department of Commerce produces and circulates motion pictures dealing with those domestic and foreign subjects relating to the offices under the jurisdiction of this Department.

**Business & Defense Services Administration**

James L. Oliver, *Director, Scientific, Photographic and Business Equipment Division*  
Phone: WOrth 7-3518  
Earl Young, *Motion Picture Analyst, Motion Picture & Photographic Products Branch*  
Phone: WOrth 7-2911

• The Motion Picture and Photographic Products Branch was established to serve the motion picture apparatus, equipment and supplies industries. It performs many functions, some of the more important being to foster, promote, and develop the foreign and domestic trade of these industries. It provides market development counsel to producers and exporters as to where and how to cultivate and expand their overseas sales, acquire distributors, facilitate the acquisition of frozen remittances, and render assistance in other problem areas. It also participates in tariff and trade negotiations, and maintains constant surveillance of foreign trade trends, and periodically issues concise basic information releases for industry guidance. Furthermore, the Branch acts as the focal point for industry with reference to advice and guidance to other agencies and use of other agency facilities.

**Coast & Geodetic Survey**

G. P. Meredith, *Chief, Administrative and Technical Services Division*  
Phone: 496-3382  
• Over the past decade, the Bureau has produced five documentary films covering both its general activities and such specific programs as tide and current measurement, wire-drag tech-

**A-V PROGRAMS OF THE FEDERAL GOVERNMENT:**

niques, surveying and the oceanographic cruise of the Ocean Survey ship "Explorer." The Bureau is now working to replace its older documentaries. The activities film has been completely revised and was released in July, 1961. A new film is planned to cover the Bureau's participation in this year's International Indian Ocean Expedition.

Collaborative film work at the Coast and Geodetic Survey included assistance on the National Academy of Science *Planet Earth* series and in the preparation of *Science for Survival*, a recent production of the Interagency Committee on Oceanography.

Film information is available through the Administrative and Technical Services Division.

**National Bureau of Standards**

William R. Tilley, *Office of Technical Information, Connecticut Ave. & Van Ness St. N. W., Washington, D. C. 20234*  
Phone: EMerson 2-1010, ext. 7093

• This Bureau produces scientific and technical films about its own research programs. Films are available from above address for loan without charge except payment of return postage and insurance. Produced in 1961: *Calibration of Platinum Resistance Thermometer*, 16mm sound; 16 min. running time. Other calibration pictures planned. Film catalog on request.

**Bureau of Public Roads**

William F. Hall, *Chief, Photographic Section*  
Phone: WOrth 7-3013

ACTIVITIES: This Bureau produces films on subjects pertinent to highway development, safety and related subjects, sometimes in cooperation with other government agencies, state and local highway departments, and other interested organizations.

FACILITIES: In-house capacity.

DISTRIBUTION: These films are available on a loan basis, with borrower paying return transportation from Chief, Photographic Section, Bureau of Public Roads, Washington, D. C. 20235. Films may be purchased by responsible organizations, by inquiry to same address.

**U. S. Weather Bureau**

Herbert S. Lach, *Public Information Officer*  
Phone: 965-2100, ext. 156

• The Weather Bureau occasionally contracts for films and film shorts to be used in warning programs associated with hurricanes and tornadoes. In addition, it provides technical assistance for films on weather related subjects. The Bureau has a library of other weather films produced elsewhere. Loan information is available from the Public Information Office.

**Office of Publications and Information Domestic and International Business**

Americo A. W. Favale, *Director, Graphics Division*  
Phone: WOrth 7-5481

ACTIVITIES: This office produces films describing Government-industry cooperation in staging official U. S. Exhibitions at international trade fairs overseas.

FACILITIES: Footage is shot by staff photographers of the Graphics Division and films are produced on contract by industrial film companies.

DISTRIBUTION: Color films average 15 minutes in length and are available on a free loan basis by application to the Director, Graphics Division. These films are also available through Department of Commerce Field Offices. Black and White prints are available for TV use.

FILM NOW AVAILABLE: *The Trade Fair Story*.

**C**

C. Plug in the "Mark IV" and on with the show!

... then reach for the next 8mm cartridge in the Telicase\* Portable Library.

## COMMUNICABLE DISEASE CENTER:

Dr. James Lieberman, *Director*  
Edward F. McClellan, *Deputy Director*  
James D. Clark, *Asst. to the Director*  
Katherine C. Skogstad, *Information and Publications Officer*

Dondell C. Cotter, *Program Management Officer*

Lucian Glen Lambert, *Chief, Motion Picture and Television Section*

Robert S. Craig, *Acting Chief, Graphic and Photographic Arts Section*

Charles N. Farmer, Jr., *Chief, Utilization and Distribution Section*

**ACTIVITIES:** The Public Health Service Audiovisual Facility, a Branch of the Communicable Disease Center, is a national center for development of a nationwide audiovisual program in medicine and the allied sciences. It produces films, filmstrips, television tapes, exhibits, publications and other audiovisual forms for the medical and scientific communities.

In 1964 the Facility sponsored, with the Naval Medical School, a seminar-workshop on television in biomedical communications held in conjunction with the annual meeting of the Council on Medical Television. In April, 1965 a similar conference on the single concept teaching film will be sponsored.

A special program to promote exchange of medical audiovisual materials between the United States and other nations is now underway.

**FACILITIES:** The Facility has complete in-plant motion picture, filmstrip and television, production and laboratory equipment located in a new four-story building designed especially for audiovisual activities. In addition, the Facility acquires, prints and distributes medical and health-related films, operates the National Archives of Medical Motion Pictures and maintains an international central reference file of medical audiovisuals. within minutes of Chicago's Loop or  
O'Hare International Airport

Midwest Studios, Inc. has the finest physical facilities in the Midwest for the production of sound motion pictures or videotaping . . . a production man's dream come true! Here, under one roof, is a complete service studio available to any organization.

### PHYSICAL DETAILS:

This sound studio has *two* stages. The main sound stage is 100 feet long by 60 feet wide, height to overhead catwalk 30 feet. Catwalks on both sides of the stage 16 feet from floor. Ground level entrance to stage for passenger cars and trucks. Stage is equipped with overhead electric crane. The second stage is 40 feet long and 24 feet wide with a 14 foot ceiling.

### OTHER PLUS FACTORS:

3000 amps of 120 volt AC current distributed to stage plugging outlets; hundreds of feet of cable . . . A permanent sweep set, as well as miscellaneous sets and components . . . Sepa-

rate make-up and dressing rooms for men and women . . . Screening room . . . Modern kitchen . . . Carpenter shop with power tools . . . Large fire-proof vault . . . Fully equipped editing room . . . Production office facilities for unit renting the stages . . . Conference room available for top executives' "office-away-from-the-office" while working in the studio.

### Midwest Studios, Inc. Operational Policy

Midwest Studios, Inc. is owned by a realty corporation and will not compete with its service customers. No production personnel will be employed by the studio corporation. A producer desiring to rent studio space may bring his own personnel and equipment. However, upon request, Midwest Studios will supply or suggest sources of personnel needed, such as directors, set designers, cameramen, sound men, carpenters, painters and other technicians. Talent sources also available. Arrangements may be made through the studio for any and all types of equipment as required.

## A-V PROGRAMS OF THE FEDERAL GOVERNMENT:

### COMMUNICABLE DISEASE CENTER:

**DISTRIBUTION.** Public Health Service films are available from the U. S. Public Health Service Audiovisual Facility, Atlanta, Georgia 30333, on loan to schools of the health professions, other educational institutions and medical health organizations throughout the U. S. and abroad. Films are listed in a Public Health Service Film Catalog published by the Facility. Information on teaching films is available on request.

**REFERENCE SOURCES.** Three other film catalogs are published by the Facility, *Film Reference Guide for Medicine and Allied Sciences*, *Cancer Motion Picture Guide*, and *Film Guide to Neurological and Sensory Diseases*. Other specialized reference works are in production.

**PRODUCTIONS.** Recent motion pictures produced by the Facility are: *Chronic Bronchitis and Pulmonary Emphysema*, *The Scar Beneath*, a series of 13 films on *Medical Self-Help*, *Normal Heart Sounds and Innocent Heart Murmurs*, a series of single concept films teaching laboratory techniques and diagnosis including *Isolation of Enteroviruses*, *Preparation of Tissue Culture*, *Fluorescence Inhibition Test for Toxoplasmosis*, *Hemagglutination Test for Echinococcosis*, *Microtiter Techniques in Virology*, IIA, III, *Enemy in Your Home*, *Safe Food*, one of a series of three about migrant workers' health. Nineteen films will be completed in Spanish or French versions by July, 1965. This year the Facility will produce 16 television programs and 25 spot announcements for television.

### Social Security Administration

Baltimore 35, Maryland

Roy L. Swift, *Information Officer*  
Phone: 944-5000, ext. 2187

Wallace Kendall, *Chief, Production Branch, Office of Information*  
Phone: 944-5000, ext. 2985

**ACTIVITIES.** The Social Security Administration produces and distributes films on Old Age, Survivors and Disability Insurance. These are public information films designed to explain the Social Security Law. All films are designed for TV audiences, and both spots and film shorts are produced.

**FACILITIES.** The Administration, located in Baltimore Headquarters, has a small studio and limited production facilities. Most film work is contracted to commercial producers.

**DISTRIBUTION.** Through 611 District Offices throughout the country, prints may be obtained on a free loan basis. Prints may also be bought.

### Vocational Rehabilitation Administration

W. Oliver Kincaid, *Special Asst. (Program Aids) to the Deputy Commissioner*  
Phone: WOrth 2-2040

• This office produces TV spots on vocational rehabilitation for state agencies which then distribute them through local TV.

### DEPARTMENT OF INTERIOR

Washington 25, D. C.

• The Department of Interior produces films which are concerned with the management, conservation and development of natural resources in every section of the Nation. Films are available from the bureau in which they have been produced.

### Office of the Secretary

Harkin Wood, *Division of Information*  
Phone: REpublic 7-1820, ext. 3171

### DEPARTMENT OF THE INTERIOR:

Inquiries concerning the use of Department of Interior films for television should be addressed to this office. A Departmental film catalog is available on request.

### The Bureau of Mines

A. Nicholas Vardac, *Motion Picture Repr., Bureau of Mines*, Washington, D. C. 20240,  
Phone: REpublic 7-1820, ext. 3359

Meyer Reiness, *Chief, Bureau of Mines Distribution*, 4800 Forbes Ave., Pittsburgh, Pa. 15213

**ACTIVITIES.** The Bureau of Mines has a broad film program dating from about 1920. Motion picture subjects deal with natural resources of states and areas and with mineral commodities including metals, non-metals and petroleum. Recently released films include: *Cast Iron, the Biography of a Metal*, and a new version of *Washington and Its Natural Resources*.

**FACILITIES.** All films are made in cooperation with private industrial firms which pay production costs and select commercial film producers. The Bureau maintains no production facilities for these films.

**DISTRIBUTION.** About 5,000 prints of films are distributed to the public on a free loan basis from the central film distribution center of the Bureau of Mines, 4800 Forbes Ave., Pittsburgh 13, Pa., and from depositories in 40 states. Annual number of showings is 200,000. Most films are cleared for free TV use. Single or block booking arranged. Catalogues available.

**PRODUCTIONS.** Films in current production include: *The Story of Potash; Helium*; and presently untitled films on aluminum, steel and natural gas. Educational TV Program Series: The following television series are available: *Down to Earth; States of the Union; Out of the Earth* (FEDERAL LISTINGS CONTINUE ON PAGE 60)

# You Beat The Drum

## and We'll Do the Rest!

If you're a good drummer you can save up to 1/3 the cost of each sponsored film booking placed for your company.

Do your own mailings and dealer programs keep present prints busy? If that's your situation, Ideal recognizes you as a successful promotional drummer and offers to eliminate all promotional charges from your film distribution account.

Yes, you handle the drum and Ideal will handle all booking, reporting, shipping and inspection with the sure skill of 46 years' experience.

But if you want promotion too, we've 28 offices across the country—each with its own drummer. And a list of more than 100,000 film audiences who think our service is good enough to pay for—they are our regular rental customers. *They can be your new, mass film audience.*

103 major film sponsors now use Ideal, and we're growing to beat the band—or drum.

## FEDERAL A-V PROGRAMS

U. S. DEPARTMENT OF INTERIOR:

### The Bureau of Reclamation

Ottis Peterson, Assistant to the Commissioner,  
Information  
Phone: 343-4662

**ACTIVITIES:** The Bureau of Reclamation produces one or two pictures a year on water resource development in the seventeen western states. These films are usually "low budget," sound-color films which run 14 or 25 minutes for TV use. Film catalogs are available from the Washington, D. C., office of the Bureau; the regional offices and the Film Distribution Center in Denver.

**FACILITIES:** Most of the film work for the Bureau of Reclamation is contracted by the appropriate regional office with commercial producers. There are seven regional offices, all in the western states, supervised by the Washington office.

**DISTRIBUTION:** Distribution of Bureau of Reclamation films is now accomplished through the Film Distribution Center, Bureau of Reclamation, Bldg. 53, Denver Federal Center, Denver, Colorado. On occasion, prints are loaned to educational institutions for short periods of time.

**PRODUCTIONS:** Recent productions include: *Clear Water on the Colorado*, a spectacular portrayal of the clearing of the once muddy and almost inaccessible Colorado River in the canyons of Arizona and southern Utah; *Great River*, relating the comprehensive development of America's greatest power stream (sponsored jointly with the Bonneville Power Administration); *The Story of Hoover Dam*, presenting scenes of actual construction of Hoover in the 30's and of more recent project activities; and *Miracle of the Missouri* which portrays the efforts of the Federal Government to develop the resources of the Missouri River Basin.

### The Bureau of Land Management

Dan Saults, Information Officer  
Phone: 343-3609

• Four films are available from the Bureau's Washington, D. C., office and from 11 State offices in western states.

Available for loan and for TV showings are: *Our Public Lands*, a 28-minute color film on conservation and development of the public lands; *Alaska, Land to Grow On*, 28-minute color film on public lands and resources in Alaska; *Watershed Conservation*, demonstrating water conservation on the public lands; and *Rogue River Country*, 28-minute color film about the recreational opportunities and wealth of natural resources found in the Rogue River Valley of southwestern Oregon. State BLM offices having film libraries are: Portland, Sacramento, Phoenix, Reno, Salt Lake City, Santa Fe, Denver, Cheyenne, Boise, Billings, and Anchorage.

### The U. S. Geological Survey

Frank H. Forrester, Information Officer  
Phone: 343-1100, ext. 4646

• This office has a small collection of documentary research and training films dealing with geology, water resources, topographic mapping, aerial photo interpretation, and related subjects. The films were produced in cooperation with the Pan American Institute of Geography and History and other Governmental agencies and are circulated through the Washington, D. C., office.

### U. S. Fish & Wildlife Service

Elliot A. Macklow, Chief, Audio Visual Services, Branch of Marketing, Bureau of Commercial Fisheries, Fish & Wildlife Service  
Phone: 343-6597 A C 202

**ACTIVITIES:** Using commercial contractual motion picture facilities, this organizational unit produces and distributes fishery marketing and educational motion pictures sponsored by bot

**H.P.I. Slide Stick\***  
holds six 2x2 slides in any mount (paper, metal, glass). Finger-tip control forward, reverse or skip.

**H.P.I. Groupshow Mini\***  
a rear projection screen that folds as small as a notebook. Yields brilliant, attention-holding pictures without darkening room.

**H.P.I. Protecto Pad\***  
marked to automatically align projector and screen. No set-up fumbling. Protects desk top, eliminates reflections.

\*TRADE MARK

EDUCATIONAL / INDUSTRIAL DIVISION — Dept BS

HUDSON PHOTOGRAPHIC INDUSTRIES, INC., IRVINGTON ON HUDSON, NEW YORK

## Slides made while you wait. 55¢.

While you wait 10 seconds or 2 minutes.

10 seconds for a line copy slide.

2 minutes for a continuous tone slide.

It's done, as you might expect, with a Polaroid Land camera and Polaroid Land transparency film.

And it's about as easy as taking Polaroid Land snapshots. So, anybody can do it.

All you do is snap the shutter. Pull

the tab. Wait for your picture. Dip it in a hardening solution. Slip it into a snap-together plastic frame. And you've got a slide ready for immediate projection.

The type of film you use depends on the particular kind of slide you're making. To make a line copy slide like you see here, you want to use PolaLine Type 146-L transparency film. It's especially for line copy work.

For continuous tone work, there is

Type 46-L Polaroid Land Projection Film.

Both kinds of film make slides that fit any standard lantern slide projector. Both can be used in any Polaroid Land camera that takes Series 400 film, except for the J-66.

Both films make slides that are sharp, brilliant, and free of grain.

And they do it for less than you pay for conventional slides.

Or just about 55¢.

**Polaroid Land Transparency Film**

# A-V PROGRAMS OF THE FEDERAL GOVERNMENT:

## U. S. FISH & WILDLIFE SERVICE

Government and industry. Other audio-visual materials such as fishery television spot announcements, radio spot announcement discs, slides, specialized publications, etc. are also produced and distributed by the Unit.

**FACILITIES:** Commercial contractual motion picture facilities.

**DISTRIBUTION:** Utilizing about 200 Government and private film libraries, 22 fishery motion pictures are distributed free of charge upon request. Provisions has been made so that most of the films are cleared for television, although special permission is required before telecasting. Stock footage is not available. A catalog listing the commercial fisheries films distributed and the instructions for obtaining them may be obtained free of charge upon request. A central Audio-Visual Services film library is maintained. Films and information may be obtained by writing Audio Visual Services, Bureau of Commercial Fisheries, 1815 N. Ft. Myer Drive, Arlington, Va., 22209.

**PRODUCTIONS:** Recent productions include: *Sponge Treasures From the Sea*, an Edinburgh Film Festival honor film, *Salmon-Catch to Can*, *Fishing Five Great Lakes*. A documentary motion picture, *Watermen of Chesapeake*, sponsored by the States of Maryland and Virginia, was honored at several film festivals. A new motion picture is going into production for the Marine Sardine Council and a series of filmed public service television spot announcements are in production.

These listings are an exclusive Review feature.

## AGENCY FOR INTERNATIONAL DEVELOPMENT

Communications Resources Division  
 State Department, Washington, D. C. 20523  
 Gerald F. Windfield, *Director, Communications Resources Staff*, Phone: DU 2-6113  
 Gale C. Griswold, *Chief, Communications Techniques Branch*, Phone: DU 2-6102  
 V. M. Commerce, *Chief, Audio Visual Services Section & Film Production*, Phone: DU 2-7531  
 George Crown, *Assistant Chief, Audio-Visual Services Section*, Phone: DU 2-7531  
 Walter E. Smith, *Radio and Television Officer*, Phone: DU 2-6115

**ACTIVITIES:** This organization is composed of a group of communications specialists whose prime duties are to provide professional technical advice and assistance to overseas functionaries working with U.S. Mission projects in the co-operating countries of the free world. Because of the nature of communications and the techniques employed, this support becomes an integral part of all AID programs in technical assistance.

**FACILITIES:** With respect to film productions, some Missions have complete professional staffs and facilities, others vary widely in degrees of completeness. All rely on the Washington staff to a greater or lesser extent for "backstop" guidance.

**DISTRIBUTION:** Except for a limited number of films produced under contract in the United States, motion pictures, film strips and slides are made in cooperating countries and are designed for overseas distribution.

## POST OFFICE DEPARTMENT

Washington, D. C. 20260  
 Ica Kapenstein, *Special Assistant to the Postmaster General, Public Information*, Public Information Films  
 Phone: Sterling 3-3100, ext. 500

John D. Horton, *Training Staff Assistant*, Bureau of Personnel (Training Films)  
 Phone: Sterling 3-3100, ext. 5023

**ACTIVITIES:** The Post Office Department currently uses training and engineering photo reports.

**FACILITIES:** This Department has no provisions for making films. All work is contracted; for information on contracts write:

Bureau of Facilities, Procurement Division  
 Room 1206, Post Office Department  
 Washington, D.C. 20260

**DISTRIBUTIONS:** Public information film clips for public service are distributed through U. S. Postmasters in all regions. Training films are distributed by Regional Directors in 15 regions.

## U. S. TREASURY DEPARTMENT

Washington, D. C. 20025  
 Alvin W. Norcross, *Assistant to the Director of Personnel (Project Officer)*, Phone: WOrth 4-2425

Charles M. Lammond, *Public Information Officer, Internal Revenue Service (Coordinating Producer)*, Phone: WOrth 4-4037

• The Treasury Department is entering into a limited film production activity, which in its initial major production will treat the activities of all of its bureaus and departments: Bureau of Accounts, Customs, Coast Guard, Engraving & Printing, Internal Revenue Service, Mint, Narcotics, Public Debt, Savings Bond Division, Secret Service, and Office of the Treasurer of the United States. This film, 28 minutes, 16mm color, will be available in the late spring and

is designed for use on television and by civic organizations and schools.

On its 175th Anniversary, the Department produced a 15-minute 16mm color film noting highlights of the presentation of awards to personnel for superior accomplishments, and briefly showing their activities.

## Internal Revenue Service

Washington, D. C. 20025  
 Charles M. Lammond, *Public Information Officer*, Phone: WOrth 4-4037  
 John Burleson, *Audio Visual Training Officer*, Phone: WOrth 4-3962

**ACTIVITIES:** The Internal Revenue Service prepares, from time to time, motion pictures for either internal or external use. Those prepared for training purposes are produced under the jurisdiction of the Internal Revenue Service Training Division, and are used at district and major local offices throughout the United States to instruct new personnel or those being assigned to different tasks in the work they are to undertake. The Public Information Division supervises the production of films and television spot announcements intended to acquaint taxpayers throughout the nation with matters of presumed interest to them involved in Internal Revenue Service operations.

**FACILITIES:** The public information films of Internal Revenue Service are produced professionally, usually utilizing the agency's own office facilities and personnel for background scenes by hiring professional talent for action bits, narration etc. Laboratory production facilities are contracted to complete the film after the first rough cut. Training films are sometimes produced with Internal Revenue Service personnel and some times with professional talent.

**DISTRIBUTION:** The 58 district offices, and several of the larger local offices, distribute Internal Revenue Service film productions. All clearance and releases have been obtained for general showing of all Internal Revenue Service films

## THE INTERNAL REVENUE SERVICE

**PRODUCTIONS:** The Internal Revenue Service now offers a catalog listing and describing its films, all of which are 16mm color and available from district offices for television, civic organizations, schools, etc. *Your Federal Income Tax* - 25 min.; *Then and Now* - 22 min.; *Time and Taxes* - 18 min.; *The Inevitable Day* - 22 min.; *Push Buttons and Taxes* - 10 min.; *Moonshine and Taxes* - 15 min. *Since the Beginning of Time*, *Then and Now*, and *Moonshine and Taxes* are available as 1-reel films for theater use.

### United States Coast Guard

H. E. Whitwer, *Chief, Motion Picture & TV Branch, Public Information Division*  
Phone: WOrth 4-5303

**ACTIVITIES:** The U. S. Coast Guard produces information and training, as well as recruiting films. The majority are in 16mm color-sound with running time of 10 to 28 minutes. For the past three years, CG films have consistently been selected by the United States government for entry in foreign film festivals, and have won a number of awards.

**FACILITIES:** In-house capability. The CG uses its own facilities, including writing, directing, shooting, and editing to final cut of its productions. **DISTRIBUTION:** Distribution of the films is made through the various Coast Guard District offices and from Headquarters to television stations, schools, colleges, various organizations providing information to their members. Usually, the films are cleared for non-theatrical and television use, and no charges are made for use. An annual Film Catalog is issued by Coast Guard Headquarters and separately by each District office.

**PRODUCTIONS:** Recent subject matter of the films has ranged widely across the world, including new LORAN station construction on Yap Island, W.C.I.; oceanographic operations in the Atlantic, Pacific, Arctic and Antarctic oceans; installation and maintenance of intra-coastal waterway aids to navigation; and a new Coast Guard Academy film *To Choose the Sea*.

### U. S. Savings Bonds Division

Jacob Mogelevy, *Promotion Manager, U. S. Savings Bonds*  
Phone: WOrth 4-5702

• A variety of films telling the story of U.S. Savings Bonds is available, suitable for community audiences of all kinds. Many are inspirational, some humorous, some informational. All were made available to the Treasury by volunteers and showings take place under volunteer auspices. *The Land We Love*, 16mm, sound-color, 20-min., is a film tour produced by Warner Brothers in association with other major motion picture studios. *Wilbur Gets the Message . . . About Payroll Savings*, 16mm, sound-b&w, 20 min., has been cleared for television. *Danny Kane for School Savings*, 16mm, sound-b&w, 16 min. is not cleared for television. *The Junior Astronaut*, 16mm, sound-b&w, 15 min., is cleared for television.

Not an agency of the U. S. Government but an active user of films is:

### ORGANIZATION FOR ECONOMIC COOPERATION & DEVELOPMENT

Washington Office: 1346 Connecticut Avenue.

• OECD, Washington Office, screens and selects technical training, scientific, educational and business management films for inclusion in the Paris reference library of OECD and for distribution among its 21 member countries. The OECD is an international governmental organization with headquarters in Paris, concerned with economic growth and development

## "YOU'VE GOT A BEAUTIFUL BROCHURE BUT YOUR FILMS STINK . . ."

is what the sponsor-type fellow told another producer recently. He was perfectly sincere. We admired his candor. We understood his viewpoint. (Understanding the client's viewpoint is half our job.)

The other half is making outstanding films. Not just technically superior. But creatively inspired ones, too.

Unfortunately, we don't have a beautiful brochure to offer. For that matter, we don't even have a brochure right now (we just moved).

But as luck would have it, we've just finished a new demonstration reel. It contains some particularly interesting examples of motion pictures, filmstrips, and TV commercials we've done. A phone call or letter will bring a 16mm print to your doorstep. Later on, we hope it brings us to your doorstep.

## UNITED STATES ATOMIC ENERGY COMMISSION

### Division of Public Information Audio-Visual Branch

Washington, D. C. 20545

• The Audio-Visual Branch of the Atomic Energy Commission has as its primary function responding to requests from the public media in all the audio-visual fields for assistance in the preparation of films, stills, and other audio-visual materials on atomic energy.

Edwin L. Wilber, *Branch Chief*  
Phone: 973-5365 A C 301

Elton P. Lord, *Deputy Chief*  
Phone: 973-5476 A C 301

Sid L. Schwartz, *Asst. to the Chief*  
Phone: 973-4239 A C 301

**ACTIVITIES:** This branch plans and carries out audio-visual and still picture projects to advance specific Commission Programs, and acts as advisor to Commission and contractor personnel in Washington and nationwide on audio-visual problems and projects. This branch also places Commission- and contractor-produced motion pictures into loan and commercial sale channels, determines the content of the 10 domestic and 4 overseas film libraries, and issues popular-level and professional-level film lists.

**FACILITIES:** AEC has no motion picture production facility or motion picture laboratory, but uses Government and or commercial services.

**DISTRIBUTION:** AEC operates an 8,500 still photo library, and distributes films through 10 domestic film libraries which cover particular geographical areas. All films are for free-loan. Each library has about 300 titles (popular, semi-technical, and technical levels). The Commission also has four overseas libraries at its offices at the U. S. Embassies at London, Brussels, Tokyo and Buenos Aires, stocked with semi-technical and technical films, and also supplies films to the film library of the International Atomic Energy Agency in Vienna, The American Film Library, The Hague, Holland, The National Science Film Library of Canada, and to USIS-Stockholm for use throughout Scandinavia, The Brussels and Buenos Aires libraries have about 50 films each in French and Spanish respectively. Information on libraries available from Washington office.

**Stock Footage:** The Commission has more than 120,000 feet of 35mm black-and-white unedited film footage on peacetime uses of atomic energy available for purchase. Information may be obtained from Washington office. Color stock footage is also available from any of the completed documentary films produced by or sponsored by the government. Films may be borrowed from libraries in geographical areas for footage counts prior to purchase of duplicating materials from the various laboratories holding the originals. Unedited stock film footage in black-and-white and color on nuclear or thermonuclear detonations sold at Lookout Mountain Air Force Station, USAF, 8935 Wonderland Avenue, Hollywood, California 90046.

THE UNITED STATES  
INFORMATION AGENCY

Washington, D.C.

ACTIVITIES. The Agency produces and distributes 228 posts in 100 languages, in commercial, educational, and cultural programs. Distribution is by mobile film units, TV, and other organizations. An estimated 100 million people overseas saw USA films in 1966. In 1966 the Agency produced its longest length documentary, *John F. Kennedy's Lightning Day of Drums*. It was shown in major world capitals in November, 1966, and is being shown in commercial and educational theaters all over the world. Other films include *New Town Little Rock*, *Bridge To Freedom*, *U.S. vs. This Capitalism* series, *Jobs: Social Security*, *A Skill for Mohini* (vocational rehabilitation), *Beate a Man* (blind rehabilitation), and *U.S. vs. the Blues* (public health service). Distribution. See above. The address of the local USA (usually called USIS overseas) can be obtained at any American Embassy or Consulate.

THE PEACE CORPS

Washington, D.C. 20525

## LET'S TALK

Maybe a film really isn't the answer to your particular sales or public relations problem. If it isn't, we wouldn't hesitate to tell you so. We've turned down assignments in the past... but we've turned up many more result-producing films for such clients as Xerox, Westinghouse, Corning Glass, R. T. French, Graflex, Dunlop, Hooker Chemical, Bausch & Lomb, Marine Midland, and The United Appeal of Greater Cleveland, to mention a few.

If there is a film in your future, protect your investment now by working with a business-oriented motion picture production firm specializing in business films. Holland-Wegman Productions, Inc. has the experience, know-how, staff and facilities to put more telling force into your selling force. To put effective communications to work for your firm, simply contact Ed Wegman. He's as close to you and your business problems as your telephone.

### THE LIBRARY OF CONGRESS

Washington, D. C. 20540

Dr. Edgar Breitenbach, *Chief, Prints and Photographs Div.*

Phone: STerling 3-0400, ext. 217

Paul Spehr, *Motion Picture Librarian*

Phone: STerling 3-0400, ext. 721

Joseph W. Rogers, *Chief, Copyright Cataloging Division, Copyright Office*

Phone: STerling 3-0400, ext. 455

Mrs. Katharine W. Clugston, *Audio-Visual Specialist, Descriptive Cataloging Div.*

Phone: STerling 3-0400, ext. 484

Miss Frances L. Menges, *Head, Special Services Section, Card Division*

Phone: STerling 3-0400, ext. 8039

• The Library of Congress has an unrivalled collection of American films dating from the infancy of the motion-picture industry, which it has acquired through the operation of the copyright law and through gifts, and it also has a large body of foreign films turned over to it as a result of wartime seizure. The Library's activities in the motion-picture field include the registration of claims to copyright, the acquisition of films, the cataloging of films and related bibliographic service on the collection.

The Library's Copyright Office has registered claims to copyright for motion pictures since 1894, when the first examples of this medium were deposited in the Library in the form of photographic paper prints; since 1912 the copyright law has provided for the registration and deposit of motion pictures as such. Generally, under the provisions of the motion-picture copyright agreement between the Library of Congress and the motion-picture proprietors, the films are returned to the copyright proprietor by the Library after registration, but the Library has the right to claim the deposits for its collections later.

The Copyright Cataloging Division of the Copyright Office prepares a semi-annual *Catalog of Copyright Entries: Motion Pictures and Filmstrips*, which lists all such materials registered for copyright in the United States and which is published by the Library and sold by the Government Printing Office. It has also prepared four cumulative catalogs entitled *Motion Pictures*, which together cover registrations of films for the years 1894-1959 and which are for sale by the Government Printing Office.

In addition, the Library's Descriptive and Subject Cataloging Divisions catalog educational films, using data submitted largely by producers

and distributors, and the Library publishes this cataloging information in two useful forms for purchase by other libraries or individuals. One form is the printed catalog card, which any film-user may purchase to establish his own card-catalog for the control of his collection and for the dissemination of film information. The other is a book-catalog reproduced photographically from the printed cards and containing a detailed subject-index, adequately cross-indexed; entitled *Library of Congress Catalog - Motion Pictures and Film-Strips*, this publication is issued quarterly and in annual cumulation, and it also appears as a volume in the quinquennial cumulation of the Library's *National Union Catalog*. Both the printed catalog cards and the book-catalog may be purchased from the Card Division, Library of Congress, Building 159, Navy Yard Annex, Washington, D. C. 20541.

The Library's collection of motion pictures comprises about 78,000 reels and is in the custody of the Prints and Photographs Division in the Reference Department. It is primarily an archive in nature, and reference service is limited to assisting research activities. The Library does not lend motion pictures, but some films may be copied under certain conditions; copying requires the signing of a standard agreement concerning the clearance of copyright and the copying of equivalent footage for the Library.

### The National Archives

May E. Fawcett, *Audio-Visual Branch, National Archives*

Phone: WOrth 2-2513

• This Branch is the depository for a growing number of retired motion pictures from the various Government agencies, and from a few private sources. Among these last is the recently acquired Ford Motor Company Historical Film Collection with films of American life from 1914-1915. These valuable films will be made available to the public when fully cataloged and processed. The entire Archives collection of motion pictures (about 42 million feet) covers the period of 1896 to the present, with especially extended coverage of the two World Wars. Films are available for viewing by anyone. No films are reproduced without the consent of the depositing agency. No loan service is maintained.

**WORLD'S FAIR PROGRESS REPORT**

New Films for Principal Exhibit Areas Are Listed; Technical Improvements Being Made in Major Shows

**T**HE LATEST PROGRESS REPORT of the New York World's Fair lists several changes and improvements which are scheduled to take place with the reopening of the Fair, April 21, 1965. Here is a run-down of the changes in visual communications aspects of the various pavilions:

**INTERNATIONAL AREA**

**CENTRAL AMERICA & PANAMA:** Motion pictures featuring the tourist attractions of the Central American countries will be shown.

**CHRISTIAN SCIENCE:** Will have a new descriptive film on the nature of God.

**KOREA:** New films showing the industrial progress of the country as well as its history, customs and religion will be introduced.

**MOROCCO:** Will add color slides depicting places of scenic beauty to be projected continuously.

**SWEDEN:** The Johnson Industrial Group has added a colorful continuous slide presentation depicting typical Swedish scenes.

**FEDERAL AND STATES AREA**

**UNITED STATES PAVILION:** Changes will be made in the opening film, *Voyage to America*, to show not only the immigrants who came here, but to present America as the land of opportunity that it was and is.

**HAWAII:** Upon entering the exhibit, visitors will be given beautiful leis which admit them to the Aloha Theatre where giant screen movies are shown of lush Hawaii, exciting volcanic eruptions and surfing in the island waters.

**ILLINOIS:** The Disney audio-animatronic show, *Great Moments with Mr. Lincoln*, will be technically improved without any major change in content.

**INDUSTRIAL AREA**

**BELL SYSTEM:** A ten per cent increase in the speed of the Bell System's popular film ride will boost capacity by 3,000 to about 41,000 total. The pavilion plans to continue its streamlined method of crowd handling which is credited with an average visitor wait of less than 15 minutes on the busiest days.

**CLAIROL:** Passengers on the Carousel will sit in booths which will now be the "world's smallest movie

theatres" where a film on beauty will be shown.

**CONTINENTAL INSURANCE:** Will have an expanded Cinema '76 theatre.

**DUPONT:** New music, new choreography and new film will be added to the musical revue, *Wonderful World of Chemistry*.

**EASTMAN KODAK:** Certain motion pictures and slide shows of the various displays are being changed. In the Tower Theatre a new version of Kodak's feature presentation *The Searching Eye* will be shown.

**GENERAL CIGAR:** Changes will be made in the vertically projected Sports Illustrated exhibit.

**GENERAL ELECTRIC:** The audio-animatronic figures have undergone appearance and animation improvements at Disney's West Coast studios to make them more sophisticated and realistic.

**HALLMARK FOUNDATION:** Will present a *Tribute to Winston Churchill*, an entirely new exhibit for the 1965 season. It will include a special 15-minute Churchill film in a new 600-seat theatre.

**IBM:** The multi-screen film presentation in the big ovoid theatre is undergoing revisions.

**TRANSPORTATION AREA**

**MARTIN-MARIETTA:** Combines a Cinemascope color film with full scale models of space vehicles executing a rendezvous mission. The theatre in the Hall of Science will be equipped with seats.

**ABBOTT LABORATORIES:** *Chemical Man* will portray through three-dimensional models, cinemicrography and animated motion pictures the role of certain molecules in creating and sustaining human life.

(CONTINUED ON PAGE 74)

## NEW YORK WORLD'S FAIR REPORT:

(CONTINUED FROM PAGE 72)

**GENERAL ANILINI & FILM:** Will contain expanded audio and visual communications techniques to describe complex technical chemical processes.

**SCIENCE FOR SURVIVAL:** Will have a new five-minute film illustrating the adaptation of man to his environment.

**SOCOSNY MOBIT:** Will increase its capacity by altering the electronic control equipment to operate the film portion of the show simultaneously on both sides of the pavilion. The program previously played alternately on the two sides.

All of the popular film shows of 1964 — Johnson's Wax, Billy Graham, Morman, Greyhound, etc. — are scheduled to return again, intact, in 1965. •

\* \* \*

### "To the Fair" Is Bringing New York's Show to Millions

A new 26½-minute film describing the New York World's Fair has recently been released by the Fair Corporation. Emphasizing the fun of fairgoing, *To the Fair* was produced by Francis Thompson, whose Johnson's Wax three-screen documentary was so highly acclaimed last year.

"We are convinced," said Fair President Robert Moses, "that this fast-moving Technicolor film has tremendous audience appeal. It should be an important factor in attracting a great number of visitors to the 1965 World's Fair."

#### See It Through Their Eyes

*To the Fair* looks around the fairgrounds in the company of an American family, two teachers, an East Indian engineer and his sariclad wife, two college boys chasing a couple of girls, and a whole Boy Scout troop. The cameras jump from one to another of these people as they go about the various pavilions, take the rides, watch the fountains and bright lights at night.

While not as exciting as *To Be Alive*, the film does present the

Fair with its best face showing, and it is lively fun, indeed.

The film made its debut at a recent World's Fair board of directors meeting and received lavish praise. It is expected to be seen by approximately 25 to 30 million people during the year.

#### 30,000 Showings Are Expected

The Fair's most important promotional effort to increase attendance at the 1965 exposition, opening April 21, the film will be distributed on free loan by Association Films, Inc. It is estimated that *To the Fair* will be shown 30,000 times in schools, churches, fraternities, conventions, civic and business organizations, etc.

The film is also being used by World's Fair exhibitors and associated companies in the travel, transportation and related fields. It will also be seen on television and in theatres. (It was booked into several dozen metropolitan New York theatres in early March, playing on the same bill with *Goldfinger*.)

#### Directed by Alexander Hammid

*To the Fair* was directed by Alexander Hammid and Wheaton Galentine, with Peter Robinson as associate director. The music was composed and directed by Gene Forrell; narration was written by Edward Field and spoken by Robert Fields. •

\* \* \*

### Appoint Casey General Manager of Kodak World's Fair Exhibit

Carroll E. Casey has succeeded Thomas M. Connors as general manager of the Kodak Exhibit at the New York World's Fair for 1965. In making the announcement, Gerald B. Zornow, Vice President, Marketing, said Roy F. Horne will continue as assistant manager of the exhibit.

Casey will report to Lincoln V. Burrows, Director of Marketing Administration, who will continue to have the responsibility for coordination of the exhibit plans. Casey will operate out of Rochester until the Fair opens. •

## Cancer Society Votes Budget for New Films

**T**HE AMERICAN CANCER SOCIETY has voted \$100,000 for the production of four films during 1965 and is considering a proposal to further update the Society's medical film library. The Survey Committee recommended that up to \$250,000 be spent on this project.

Francis J. Wilcox, chairman of the Society's board of directors, included the preceding report in his letter which opens the Annual Report for 1964, recently distributed by the Society. The report reflects the importance of audio-visual aids in the programs and national crusade of the organization.

During the next few years, the Society hopes to produce 15 new films for physicians. Among the new titles will be *Cancer in Children*, which is being planned by the California Division, in cooperation with the National Society.

A new filmstrip on *Breast Self-Examination* (BSE) was completed at the end of the year. According to the report, about one in five women have seen the Society's other great film on BSE, produced by Audio Productions, Inc.

During 1964, the anti-smoking program aimed at primary and secondary schools received the most attention, the report states. More than 30,000 pupils in 85 schools saw the film *Is Smoking Worth It?* The cartoon film, *The Huffless, Puffless Dragon*, aimed at sixth and seventh graders, reflects educators' feelings that the very young must be reached and their images of the smoker and non-smoker changed.

Since the beginning of the program in 1958, the Society has distributed 53,000 copies of two filmstrips and 17 million copies of two leaflets on smoking to schools. Its programs have been used by more than 23,000 secondary schools and nearly 9,000 elementary schools.

During 1964, the educational "Tell Your Neighbor" campaign was pushed by the Society. •

There is nothing worse  
for our trade  
than to be in style"

### Canada

Association-Industrial Films, 135 Peter Street,  
Toronto, Ontario, Mrs. Jean Lewis, *Vice-President*  
and *General Manager*; James Bach, *Sales Manager.*

**BACKGROUND:** Founded in 1911 (as "The YMCA  
Motion Picture Bureau," a division of the Inter-  
national Committee of the YMCA's), Association  
Films was the first sponsored film distributor in  
America. In 1949, the company was incorporated  
as an independent national distribution service.

**SERVICES:** Promotion and Publicity: Promotes  
sponsored films through catalogs, special supple-  
ments (directed to teachers and program chair-  
men), advertising in educational and adult jour-  
nals, individual film brochures, exhibits at con-  
ventions, publicity services. Print Inspection and  
Maintenance: prints are electronically cleaned  
and inspected after each use; repairs are made  
as needed and replacement prints ordered on  
sponsor's authority; scratched prints are given  
Perma-New treatment, as authorized; during the  
first 36 months of print life Association Films  
shares in replacement costs due to damages.  
Monthly Reports: sponsors receive detailed per-  
formance reports (IBM) which give audience  
size and composition; film-user evaluations and  
comments; course of study where film was used,  
bookings and showings (current, year-to-date,  
and cumulative); summary of coverage by  
States; and other data about performance and  
audiences. Programming Services: confirmation  
and advance booking notices are sent to users  
and sponsors on a daily basis, bookers assist  
organizations in arranging programs and special  
distribution concepts (Movie-A-Week, Films for  
Freedom, etc.), Library Service Plan: a profes-  
sional "physical handling" service for sponsored  
film libraries that provides all regular services  
(except promotion, as desired) and includes  
Sponsor Imprinted forms.

**ASSOCIATION TELEFILMS:** This division is re-  
sponsible for the distribution of sponsored films  
to commercial and educational TV stations. It  
maintains daily contact with TV programmers,  
creates sponsored-film series and special con-  
cepts, prepares TV promotion kits, publicizes

sponsored films in "TV Guide" and local news-  
papers and distributes newsclips and scripts to  
TV news departments. Current AF-TV series in-  
clude: *Kyle Rote's World*, *Films for Freedom*,  
*Your Neighbor - The World*, *Theatre 30*, *Holi-  
day Time*, *Achievement* and *This Aerospace Age* -  
all comprised of sponsored films.

**THEATRICAL DISTRIBUTION.** Through the book-  
ing services and facilities of Theatrical Film  
Distributors, Association Films places sponsored  
films in motion picture theatres. Monthly reports,  
comment cards and advance booking notices are  
provided, promotion is sent to theatres and 31  
exchange-city bookers, publicity stories are sent  
to theatrical trade magazines.

**ASSOCIATION INSTRUCTIONAL MATERIALS.** This  
division of Association Films handles the sales,  
long-term leasing and rental of educational, train-  
ing and special purpose films and filmstrips. •

## THE JAM HANDY ORGANIZATION, INC.

### Headquarters Office:

2521 E. Grand Blvd., Detroit, Mich. 45211  
Phone: TRinity 5-2450 A C 313

Betty Watters, *in charge, Distribution Services*

**SERVICES:** Currently distributing theatrically  
throughout the U. S. A. with fifty-odd years of  
active experience in the theatrical and non-  
theatrical distribution field. Special services in-  
clude physical handling of sponsored films for  
self-equipped audiences; major convention and  
other group meetings projection service in all  
principal cities. See studio listing pages for com-  
plete data on corporate background. •

## 15TH PRODUCTION REVIEW SPECIAL REFERENCE REPORT

# NOW

## "On Location" Pictures in your own Studio with\*

# FRONT PROJECTION

Now unlimited backgrounds can be yours in any studio, large or small.

You can photograph a Swiss Alps Winter ski scene in July or a Summer setting in the middle of January. And you can photograph them in brilliant color or black and white.

With the FRONT PROJECTION Background System the walls of your studio can expand to include a whole world of real or imaginative backgrounds for a new dimension in Portraiture, Illustrative, Commercial, and Industrial Photography.

Write for our brochure today and see for yourself why FRONT PROJECTION was called "The Hit" of the 1964 Professional Photographers of America Show.

**BACKGROUND:** Founded in 1920 in Chicago. In the past 43 years, has grown into a national organization of 28 offices handling rental films for schools, churches, clubs and industry. In 1945 Ideal began the distribution of industrial films, for the first time making available a proven paying customer list for the distribution of industrial films services.

**SERVICES:** Promotion, publicity; booking, shipping, storage and inspection of prints (electronically); film programming (community and school groups); film programming (TV stations). Furnishes monthly reports on print activity and audiences, all supported by actual signed audience reports; advance booking notices to sponsors; correspondence and confirmations (to users); merchandising of teaching aids and other film-related materials; print servicing (physical handling of professional, sales and TV prints).

**OPERATION:** Prints and bookings are serviced from 28 company-controlled distribution centers.

**BACKGROUND:** The outgrowth of a pioneering program in the field of talking motion pictures by Electrical Research Products, Inc., a subsidiary of the Western Electric Co., formed in 1927 at the birth of the commercial sound motion picture medium, Modern Talking Picture Service first emerged as the non-theatrical department of that company. An early pioneer in the licensing and operation of portable projection service for industry, etc., Modern's present trade name was adopted by its licensees in 1935 and Frank Arlinghaus, then of ERPI, was placed in charge of this growing activity. Modern became an independent corporation on July 1, 1937, under the ownership and management of its distribution employees.

**SERVICES:** In 1965, in its 28th year, Modern represents over 400 organizations from industry, commerce and the professions, distributing their public relations films to schools, colleges, industrial plants, offices, and to the public and private clubs, and social groups throughout the United States and Canada. Other primary channels of distribution in which Modern is a leading specialist include: theatres showing sponsored short subjects; television stations. Modern operates a network of 32 regional libraries. For sponsors utilizing its service, the company promotes, ships, cleans, repairs, maintains and stores their films. Additionally, it counts audience attendance, records their comments and furnishes the sponsor a monthly tabulation. Extensive IBM facilities and equipment for promotional printing are maintained at New York headquarters. All regional libraries are equipped for electronic film inspection and handling. In 1960, Modern established its Modern Learning Aids division to distribute educational films for purchase, subscription (series rental) and lease-to-buy. MLA distributes film series developed by the Physical Science Study Committee, CHEMstudy, Colonial Williamsburg, SMISC, and others.

### ROTHACKER, INC.

Rothacker Building, 241 West 17th Street,  
New York, N.Y. 10011  
Phone: 989-2929 A C 212

Douglas D. Rothacker, Jr., *President*  
W. Stanfield Cooper, *Vice-President*  
Edward F. Psotta, *Vice-President*  
Mayme R. Dawson, *Secretary-Treasurer*

**BACKGROUND:** Established in 1910 as the Rothacker Film Manufacturing Co., pioneer producer and distributor of sponsored films, the organization was subsequently reorganized as Rothacker, Inc., and is currently engaged in specialized business film distribution throughout the world.

**SERVICES AND OPERATIONS:** Distribution of sponsored business films through theatrical, non-theatrical and television outlets is handled from the New York office and the various distributors throughout the United States and Europe. Emphasis is put upon reaching exactly the audience the sponsor wishes to reach; and this individual approach is accomplished through separate promotional campaigns, audience selection, publicity and physical handling done on a separate basis for each film. A general catalogue is not published since each title receives an exclusive handling, thus assuring the sponsor of more complete identification and a closer tie-in with his film. Prints are all hand-inspected, sound-read, cleaned and repaired and a complete record maintained on condition of each print. An individual print breakdown with classification is always available and print lifetime guarantee is offered as part of a special service. Monthly exhibition reports sent with full information of each showing. Special questionnaires and personal attendance at screenings provide additional information and can be keyed to supplement companies' other public relations efforts.

**FOREIGN DISTRIBUTION:** In addition to full coverage throughout the United States and Canada, Rothacker, Inc., offers international distribution service for Europe and the Orient. The main basis of operation is from Germany with other distributors located in England, France, Scandinavia, the Benelux countries, Italy and Switzerland. The foreign distribution is handled in basically the same manner as the domestic with special emphasis on audience selectivity and a high standard of the circulation of each film title. As this type of activity continues to grow throughout Europe, the number of specific outlets in specialized categories continues to increase.

this symbol, appearing over a distributor's listing, indicates that display advertising containing additional and useful reference data appears in other pages of this 15th Annual.

**BACKGROUND:** United World Films was organized in 1916. It is part of the Music Corporation of America, which includes Universal Pictures Co., Inc., Decca Records, Inc., and MCA-TV, Inc. In 1916 United World Films purchased the Bell & Howell Film-O-Sound library which was the largest film library operating in the United States. In 1916 United also purchased outright Castle Films, the largest producer and distributor of 8mm and 16mm sound and silent motion pictures. **SERVICES:** Since its organization, United World Films has distributed sponsored films for industry. Distribution is conducted for non-theatrical, television and theatrical audiences through 13 distribution offices located throughout the United States. United also produces and distributes classroom teaching films to the nation's schools. It makes available on 16mm film all of its own company (Universal) feature theatrical titles along with selected features from Paramount and J. Arthur Rank. Demand for its films comes from clubs, business organizations, colleges, universities, high schools, women's organizations, agricultural groups, etc. These audiences are constantly increasing and United uses this source of fresh new audience contacts for distributing their clients' sponsored films. In the distribution of their clients' 35mm sponsored films, United utilizes the theatrical knowledge, experience and contacts of Universal Pictures, its parent company. By reason of its affinity with MCA, United has the added opportunity to be in constant contact with the program departments of television

stations throughout the country. These contacts are used by United in arranging showings for its clients' films.

**PROMOTION AND PUBLICITY:** United not only produces individual advertising and brochures for each of their clients' pictures, but also has available the extra advertising exposure via listings in other film catalogs produced by the company and distributed to 16mm audiences. United maintains booths and exhibits at the important convention and audio-visual demonstration centers throughout the world.

**PRINT SERVICES AND MAINTENANCE:** Because it is part of a professional motion picture distribution organization, United maintains the highest standard of inspection. Prints are inspected and cleaned utilizing the latest electronic equipment. Scratched prints are repaired under a special film coating process. United also shares in the cost of replacing any prints damaged during the early years of distribution.

**FILM USES EVALUATION REPORTS:** Certified attendance report forms are supplied to the client on every showing.

**MONTHLY REPORTS:** The sponsor receives detailed performance reports which supply audience information by type and size. A detailed recapitulation of the cumulative total audience is supplied each month together with information on number of showings, bookings and the like.

**TELEVISION DEPARTMENT:** This department specializes in the distribution of client sponsored films to commercial and educational T.V. stations utilizing T.V. station contacts of MCA.

**THEATRICAL FILM DEPARTMENT:** Through this department, arrangements are made for quality theatrical distribution dates utilizing the experience and theater contacts of the parent firm, Universal Pictures. The latter company has had over 50 years experience in theatrical distribution and was the first organized motion picture company in the industry. United also makes arrangements for its sponsored clients through its film editing staff to produce 35mm prints from existing 16mm prints via a special process. These 35mm prints are thereafter exhibited in the nation's theaters. Professional advertising is employed by United in the exploitation of its clients' films in the theatrical distribution.

**NON-THEATRICAL DIVISION:** Clubs, organizations, colleges, universities, men's and women's groups, high schools, agricultural groups, etc. are but some of the audiences supplied to their clients by this division of United. Film showings are arranged, advance booking notices supplied, monthly reports and recapitulations utilizing automatic business machines.

**SPONSOR-GENERATED DISTRIBUTION:** Where a client wishes to solicit and obtain bookings himself, United provides the physical handling, inspection, storage and distribution of such films utilizing its professional experience and facilities. Additional services include "custom" promotion and national research can also be obtained under this type distribution.

**"CUSTOM" SERVICES:** United produces a "custom" service which includes promotional kits supplied (under a special contract service with its client) by United to each film audience. This gives the sponsored client the added public relations effect surrounding each local community film distribution. It is accomplished by United's publicity division and advertising staff which prepares special news releases, film guides, advertising mats and special posters for use by local film exhibiting audience.

**NATIONAL RESEARCH FACILITIES:** United has engaged a national research organization on a permanent basis for the purpose of conducting a detailed research on questions of importance and interest to its clients. Such things as preferred length of films, content and the like is obtained from audiences throughout the country.

## HOW 3 COMPANIES USE FILMSTRIPS TO HELP SALESMEN SELL

Filmstrips can help train your salesmen — can help you sell a product, a service, an idea.

Here are three case histories that explain how filmstrips have been used successfully — by Field Enterprises Educational Corporation to train book salesmen — by Dodge Manufacturing Company to interest distributor salesmen in a unique flexible coupling — by Iowa Manufacturing Company to sell prospects on the benefits of a paving machine.

Each case history is brief, to the point — tells, (1) objective of filmstrip, (2) how objective was accomplished, (3) results, and (4) total cost. For copies, write or telephone...

## Multimedia Classroom Sets an Example for Industry, Schools

"The MIL" is a theater-like classroom at the University of Wisconsin which features audio-visual aids as an essential part of the course.

The University's Multimedia Instructional Laboratory is a practical, even if experimental, program designed to improve teaching.

The classroom-lab has a large screen in the front of the room which becomes animated as soon as the professor begins his presentation of his course. Up to three images can be projected onto the screen simultaneously as the lecture proceeds.

Operated via rear screen projection, the MIL installation includes a 16mm film projector, slide and film strip projectors, an opaque projector, tape recorder, record player, closed-circuit television and an overhead projector.

A full-time engineer watches over each production, which is controlled by a triple-panelled control board.

MIL was established at the University at the urging of Prof. John Guy Fowlkes, director of the Wisconsin Improvement Program. He first became interested in the multi-visual technique for large-group instruction in 1960 when he saw an exhibit presented by the U.S. Department of Agriculture in India.

The exhibit used a large, 5-part screen to project 269 slides from the rear by five projectors, with one to five slides being shown on the screen at one time. A tape-recorded narration and slides were presented automatically and simultaneously.

In February, 1961, with \$50,000 Prof. Fowlkes established the MIL on the Wisconsin campus. Since then another \$15,000 has been spent on equipment and design.

Twenty-five classes have been conducted in the MIL, and it is currently operating at capacity schedule from 7:45 a.m. through 2:25 p.m. The remaining hour are used in pre-setting the equipment and for run-throughs with the course professors.

Course preparation can take up to 120 hours for a single presentation. The professor presents a rough outline and notes on the course to a programmer, who then works with a team comprised of one of the professor's teaching assistants, an artist, photographer, script-writer and typist.

Currently over 40 U.S. colleges have similar a-v installations or are planning to install them.

A TOTAL of 10,735 medical and health films were loaned to physicians, hospitals, medical schools or other professional groups by the American Medical Association Film Library during 1964.

Many of the films were employed as educational material for physicians, medical students and nurses.

### Largest Bookings in History

The number of bookings was the greatest ever recorded at the library. In fact, total bookings have increased each year since 1955 when 3,007 were recorded, according to an analysis prepared by Ralph Creer, director of the AMA Department of Medical Motion Pictures and Television.

Creer also noted continuing wide distribution and acceptance of the catalog of selected "Medical and Surgical Motion Pictures," published by the AMA.

More than 3,000 available mo-

tion pictures dealing with every phase of the healing arts are listed in the new book. Listings are kept up-to-date by computer processing. Copies of the catalogue are still available at \$5.00 a copy to addresses in the U.S., U.S. possessions and Canada, \$5.50 to foreign addresses.

### Most Active Users of Library

Analyzing 1964 film bookings further, he said that the largest single users of films from the AMA library were civilian hospitals and schools of nursing. Every U.S. medical school except one also used the services of the Film Library during the year, and medical societies were increasingly heavy users.

The library now consists of 1,829 copies of 418 films. The total includes 113 health films which can be used by physicians who are invited to address lay groups. A current list of these films is now available.

Below: chart shows 10-year pattern of growth for the AMA Film Library.

## Want Big Screen Pictures?

The high brightness of the snow-white light source of the

## YEAR'S BEST TV COMMERCIALS

12 Television Spots Cited by Hollywood Ad Club  
Receive 5th International Broadcasting Awards

THE 5TH ANNUAL International Broadcasting Awards for the "world's best" in television advertising were announced last month in Hollywood.

Nearly a thousand industry executives were present in the Hollywood Palladium as the 19 major commercial winners were announced from official sealed results.

### Entries from 16 Countries

Sixteen countries had submitted 1,895 entries. Preliminary judging was done by committees in London, Mexico City, Sydney, Australia and in 12 U.S. cities.

All finalists received certificate awards, with 72 nominated from 712 radio entries and 135 selected from 1,183 television entries. This year's entries represented a 24.5% increase in radio and 12.5% gain in TV entries over last year, according to Don Estey, president of Tel National Advertising and Judging Chairman of the competition.

General Chairman of the 1965 competition, which is sponsored by the Hollywood Advertising Club, was James G. Riddell, Chief Executive Officer of ABC's Western Division.

### Endorsed by Int'l Association

The International Advertising Assn., with members in more than 100 countries, endorsed the event and participated in preliminary judging and in selection of final judges.

Robert L. Dellinger, president of the Los Angeles Chapter of the IAA and Executive Vice-President of Grant Advertising, headed the final judging committee and invited the participants.

The IBA competition is a non-profit competition, with all money after expenses earmarked for the Hollywood Advertising Club's IBA Scholarship Fund, established in 1964 to provide funds for advertising majors at the Univ. of Southern California.

### Details on Best TV Films

This year's winners are:

#### TELEVISION COMMERCIALS

Live Action over 60 Seconds: *Rolling Tire*, Gulf Oil Corp.; produced by MPI for Erwin Wasey, Inc.

Live Action 60 Seconds: 659-60 *Woman Stranded No Man*, Good-year Tire & Rubber Co.; produced by FilmFair for Young & Rubicam.

Live Action under 60 Seconds: *Cinema*, Cadbury Brothers Ltd.; pro-

duced by Anglo-Scottish Pictures, Ltd., London for Hobson, Bates and Partners Ltd., London.

Animation 60 Seconds and Over: *Winston Typewriter*, R. J. Reynolds; produced by Joop Geesink's "Dollywood," Amsterdam, for William Esty

Animation under 60 Seconds: *Ruckwand*, Schwabenbrau, Dusseldorf; produced by Insel-Film GmbH, Munchen, for H. McCann Comp m.b.H. Kohn/Rein.

Combination any Length: *Bicycle*, British Nylon Spinners; Rank Organization-Adv. Films Div., London, for Notley Adv. Ltd., London.

Video Tape any Length: *Pork Roast*, Heublein; produced by Videotape Productions of New York, Inc. for Fletcher-Richards.

I.D.'s 10 Seconds or Less: *Muppets Western*, Claussens, Inc.; produced by Rodell Productions, Inc. for Cargill, Wilson & Acree.

Local, any Length, Any Technique: *Relax*, Bank of Miami, Inc.; produced by PGL Productions, Inc. for Papert, Koenig & Lois.

Humorous, any Length, Any Technique: *Gamma*, Morton Salt Co.; produced by TV Graphics for Needham, Harper & Steers, Inc. Public Service, any Length, any

Technique: *Angles*, United States Air Force; produced by Robert H. Klaeger Associates, Inc. for MacManus, John & Adams, Inc.

Series, any Length, any Technique: *Golfer*, *Seascape*, *Tree*, Kodak Limited; produced by James Garret & Partners, London, for J. Walter Thompson Co., Ltd., London.

### Winners to Hollywood Museum

After nationwide requests for showings have been filled, these winning spots will be placed in the new Hollywood Museum in future years. Other entries become part of the library of the Television Bureau of Advertising, for study by advertisers and agencies.

News of Pictures & People from the Nation's Capitol

**Over Nine Million Viewers for  
Bureau of Mines' Films in '61**

Films depicting the conservation and development of America's mineral resources became increasingly popular with audiences during 1964, the Department of the Interior's Bureau of Mines reported last month.

Both the number of showings—more than 190,000—and the total recorded audience of nearly 9.4 million represent gains over 1963, the Bureau said. It noted that additional millions viewed the films on public-service telecasts.

All of the films circulated by the Bureau are 16mm sound and nearly all are in color. Most show the methods, techniques, and equipment used to extract and process metals, nonmetals and fuels. Others present comprehensive views of the conservation of mineral and other natural resources of various states.

The ten most popular films of 1964, in order of popularity, were: *California and Its Natural Resources; The Petrified River (The Story of Uranium); Copper, the Oldest Modern Metal; Alaska and Its Natural Resources; The Magic of Sulphur; Arizona and Its Natural Resources; The Story of a Modern Storage Battery; Texas and Its Natural Resources; The Drama of Steel; Oregon and Its Natural Resources.*

The number of showings in 1964 ranges from a high of 14,568 for *California and Its Natural Resources* to 7,065 for the Oregon film.

As the year ended, several productions were underway and co-operative agreements for others had been completed. New motion pictures on helium, aluminum and potash are expected to be ready for circulation during 1965, and zinc and steel subjects are scheduled for early production.

**Jose Yovin, Government Film  
Veteran, Succumbs to Illness**

Jose A. Yovin, a well-known figure in Government cinematography and the motion picture industry died in Alexandria, Virginia January 31 after an extended illness.

Yovin began his professional career assisting with theatrical productions in New York and Philadelphia, and was a pioneer in feature motion picture production. In 1942 he joined the War Department Bureau of Public Relations

and served until the end of the war, when he was cited for Meritorious Civilian Service.

Yovin also held key posts in the Veterans Administration and the Office of the Secretary of the Air Force. He later was Chief of the Pictorial Branch, Office of the Assistant Secretary of Defense (Legislative and Public Affairs), until poor health forced his retirement in 1958.

He is survived by his widow and three sons.

**U. S. Chamber of Commerce  
Film on Effects of Regulation**

Business prospers best under a minimum of essential regulation—this is the theme of a new film premiered by the Chamber of Commerce of the United States at its Fourth Annual Association Public Affairs Conference.

Titled *Once Upon A Time*, the film portrays conditions in a mythical kingdom of ancient times as it drifted into excessive regulation of the woodcutting industry. The king finally has to greatly reduce its regulations, discarding much needless red tape, to restore economic health and jobs for the people.

Calvin Productions, Inc., produced the film, which has both full animation and live-action sequences. Voice characterizations are by Mel Blanc.

The 16mm color film is distributed by the Chamber of Commerce of the United States, 1615 H Street, Washington, D. C. 20006, on a rental and print-sale basis. The film is available to television stations on a free-loan, public service basis.

**Harry A. Carragher Represents  
Jam Handy in Washington, D.C.**

The Jam Handy Organization has assigned Harry A. Carragher as representative in Washington, D.C. He will provide services for national associations in the production and utilization of motion pictures and other visual presentations. His Washington office is at 1724 Connecticut Avenue, N.W.

**Focus on Human Interest in  
Social Security Film Series**

New releases from the Social Security Administration last year included a series of five-minute color motion pictures featuring unusual human interest stories from

A Medical Conference  
on Single-Concept Films

THE FIRST IN A SERIES of conferences on the single concept teaching film for medicine and allied sciences is being held April 1-2 at the Public Health Service Audiovisual Facility in Atlanta, Georgia. The Facility is a component of the Department of Health, Education, and Welfare.

Phillip Sattin, M.D. of England, Director of the Medical Division, Eothen Films Limited, and Dr. Louis Forsdale of the Columbia University Faculty, author of a definitive text on the 8mm single concept film, will be featured at the conference.

Dr. Sattin's subject will be "Single Concept and Conventional Films in Tandem." Dr. Forsdale will speak on the subject, "8mm Film: A New Tool For Research and Education."

The single concept film, a newcomer to the arsenal of audiovisual tools for education, teaches a single principle, technique, or concept in six to eight minutes. The 8mm single concept film is stripped of extras, i.e. background music, dramatic situations and elaborate set changes. It is pre-packaged in plastic cartridges which are inserted into 8mm projectors without threading or other mechanical gymnastics.

The projection equipment is well-suited for individual instruction, a feature which makes it valuable to medical students and others in the health sciences. The PHS Audiovisual Facility is a primary producer of single concept films for biomedical education and communication.

Dr. James Markee, Chairman of the Department of Anatomy at the Duke University School of Medicine, is speaking at the morning session on April 1st on "The Integration of Single Concept Films Into the Medical Curriculum."

Attending the conference are deans and other staffs of medical schools throughout the United States. Later conferences will be held for educators in other of the health sciences. •

Quality-Bilt  
Film Shipping Cases

- Best quality domestic fibre

## BUSINESS & SCHOOLS

Business Is Spending \$160 Million for School Media, Including Films

IN A RECENT SURVEY conducted by Albert L. Ayars, Educational Director of Hill & Knowlton, a New York public relations firm, it was revealed that American business is currently spending \$160,000,000 annually for aid to schools. The survey also shows that 60 per cent of the companies surveyed are active in providing audio-visual materials, including sponsored films.

Dr. Ayars' study was based on 248 respondents to a survey of large companies — industrials, utilities, banks and retailers — which in 1963 accounted for one-fourth of all U.S. sales and profits. Each of these companies spent an average of \$250,000 for school aid, totalling \$60 million.

### \$10 Million Budget of Trade Associations

An estimate of the remaining three-fourths of business outside of the survey would add at least an additional \$90 million, while previous studies have indicated that trade associations provide \$10 million in annual school aid.

This totals up to \$160 million for educational materials, programs and services, and not including support through fellowships, scholarships, endowment of professorial chairs, employee matching grants, research grants, and other kinds of financial aids.

Topping the list of instruction aids (which are a significant part of the overall aid program) were informational booklets supplied to schools. 67 per cent of the companies surveyed supplied them.

### 60 Per Cent Supply Audio-Visual Media

Other media of importance included: filmstrips, slides, films, recordings, 60 per cent; books, 39 per cent; samples of raw materials and/or products, 34 per cent; displays and exhibits, 31 per cent; directories or catalogs, 22 per cent; wall charts, easels, flip charts, graphs and maps, 21 per cent; bulletin board materials and posters, 20 per cent, etc.

Science, with 47 per cent indicated, was the most prevalent subject area of the aids supplied.

## 5 Unique Powers of the Film Medium

WHY FILM? Ask yourself what other medium guarantees full attention to your entire message. No print advertisement, no TV show, no brochure, not even the most hypnotic salesman can persuade a prospective customer or an unbeliever to sit quietly for 5 to 30 minutes and concentrate on your message.

Thanks to this unique environment, film can get your message over in the right logical progression of the message-points — without the prospect being able to interrupt, or worse, to skip ahead.

Film doesn't need to waste precious time on attention-grabbing "stoppers," because the viewer is already seated and attentive.

Film "carries its stinger in its tail," i.e., in its residual impression, and hence is free to implant important, though sometimes quiet, foundational material up front, with a solid effectiveness impossible in any other medium.

Finally — and perhaps most important — film implants its impressions in the form of picture-images. And since people tend to remember what they see better than what they hear, the impressions burned into their minds via film have a better chance to endure — to inform, persuade, inspire . . . and compel action: to motivate.

Ask Parthenon for loan prints of any of the above subjects. Or let our people screen them for you in New York, Chicago, Detroit, or California. (We will suggest competent film-makers in other areas.) Telephone Parthenon Pictures at (213) 385-3911 and ask for Cap Palmer.

Public Health Doctor Otto Lehrman looks into the strange case of four persons discovered suffering from poison on a public highway.

## A CASE OF THE BLUES

SPONSOR: United States Information Service.

TITLE: *A Case of the Blues*, 15 min. b.w., produced by Owen Murphy Productions.

This is one of a series of U.S.I.S. *Democracy at Work* films on the activities of American public servants — in this case the Public Health Officer.

On one day, along a stretch of Highway 9, a truck driver, a student, a young boy and a policeman are found unconscious and brought in to the hospital, showing signs of some kind of poisoning and a peculiar blue complexion.

Dr. Otto Lehrman, a Public Health Officer, is assigned the job of tracing the mystery. Could it be a chemical poison in the air? a high carbon monoxide area on the highway? food poisoning? Dr. Lehrman and his assistants go through the complex job of tracking down every possible lead, using every sort of technical aid, spending hours of foot-work to pin-point the source of the trouble.

They finally find it. As U.S.I.S. films are not shown in the United States it is fair to divulge the outcome of the mystery here — the four poisoned people had used inordinately large quantities of "salt" at a diner on the highway — "salt" that tasted like common sodium nitrate, but in actuality was sodium nitrite, a similarly appearing substance, used as rat poison, that had been poured into one of the salt cellars by a tragic error.

*A Case of the Blues* will be shown throughout the world under U.S.I.S. auspices. It is based upon an actual medical case history. The film was written and directed by Paul Cohen.

## CARROLL BAKER AS "HARLOW"

Unusual Short Film Promotes Major Release on TV

**A**N UNUSUAL SHORT FILM titled *Carroll Baker as Harlow* was released February 1st to selected television stations. This film was made in connection with *Harlow*, a major motion picture based on the life of one of Hollywood's greatest screen stars, which is being produced by Joseph E. Levine for release in June by Paramount Pictures.

The production of *Carroll Baker As Harlow* by Turteltaub & Moss,

Carroll Baker poses before giant photo of the late Jean Harlow.

Inc., involved several unique features. The entire movie was filmed on board the Queen Mary enroute to England.

Robert Whittaker, head cameraman, obtained some very stylistic and creative effects from shots of Carroll silhouetted against the sea and sky, as she strolled about the ship and studied her upcoming role.

Director Stanley Turteltaub achieved a remarkable air of spontaneity by keeping the script to a minimum and allowing Carroll to ad lib informally about her problems with the Harlow part and her methods of preparing herself physically and psychologically for it.

In a detailed 8½-minute sequence the film shows the intricate make-up procedures which are used in aiding Carroll as she becomes the living image of Jean Harlow. The camera follows carefully as expert hair stylist Nellie Mann of Paramount creates a hair style of the 30's to complete Carroll's transformation. Then, looking like "The Platinum Blonde" herself, Carroll attends a gala ship-board party in her honor which recalls the glitter and glamour of Harlow's colorful era.

Available in two lengths, the film is tailor-made to fit into var-

ious TV formats — either as a five-minute segment in a live show or as a quarter hour film program, complete in itself. The five-minute version does not have the detailed make-up scenes, but it does offer a candid over-all explanation of how an actress assumes a new character and appearance.

Unlike many sponsored films which have an aura of timelessness about them to insure years of circulation, *Carroll Baker As Harlow* is being distributed on a crash program basis, from February through May, to the top 125 television markets in the country. It is available on free loan from Sterling Movies U.S.A., Inc. in New York.

### Donates Historic Cameras to UCLA's Dept. of Theater Arts

A large collection of early photographic and motion picture apparatus has been given to UCLA's Department of Theater Arts. Mrs. Joyce Primrose Shaw-Kennedy made the donation in memory of her father, Hugh Vernon Primrose Shaw-Kennedy.

The collection includes over 80 cameras, most from the late 19th century, as well as very early exposure meters, lenses, flashguns, are lamps, stereoscopic viewers and developing apparatus. All of the pieces are scarce, and some are exceedingly rare.

# Meeting tomorrow?

## Tape it today!

Here's the fast, easy way to put professional impact and sparkle in your next big meeting—through the electronic magic of video tape.

Tape makes it possible for your producer to come to Videotape Productions, Inc., one of the most elaborately equipped production houses in the world, and (if necessary) leave the same day with a finished, completely edited job that presents your president or sales manager face to face—lifelike to audiences anywhere!

That's because tape creates an amazing, uncanny feeling of "liveness." As a matter of fact, it's almost impossible for even an expert to distinguish between a live picture on the screen and one that's been taped.

And with tape, there's no waiting around to see what you've got, not taking a chance on what's "in the can." The finished tape can be played back *instantly*. If you're not satisfied, you simply do it over again.

On video tape, executives who are not trained public speakers emerge as compelling, forceful performers. This is partly because of tape's sense of immediacy, partly because they can see what they're doing as they go along, and adjust for any flaws in their style.

Here are just a few of the business leaders who have taken advantage of the "miracle" of video tape:

ASTROVISION IS A SERVICE MARK OF AMERICAN AIRLINES, INC.

**American Airlines:** An executive faced thousands of employees at one time to announce the great new selling feature "Astrovision." He came across with "living room" ease and a "live" look! Closed circuit telecast of video tape made it possible.

**Oldsmobile:** The announcement of the 1965 line, via closed circuit TV by TNT, Inc., complete with all the new cars and an hour of Broadway-quality entertainment, was shown to dealers from coast to coast on video tape. The carefully planned sales story was made even more effective by the crisp, live look of tape.

THESE ARE OFF-MONITOR PHOTOS.

**Gillette:** Sales manager conducted a fast-moving fire-breathing sales meeting via video tape. Impressed his national sales force with sure-fire methods for selling the new line.

How do you arrange to play back video tape? You can do it through a closed-circuit system in meeting rooms, with the facilities of your local TV station, or with new, compact portable tape playback equipment or by projecting tape-to-film transfers.

And where to tape it? At Videotape Productions—the largest, most up-to-date tape production center in the world. Mail the coupon to find out how we can put our creativity and electronic know-how to work for you.

**Videotape Productions, Inc.** **3M**  
A SUBSIDIARY OF **3M** COMPANY

**N**EARLY EVERYONE has been watching the progress of the factual film medium's "new" dimension: 8mm. Aware of the great savings in equipment and print weight (with the latter of extreme importance in travelling these films coast-to-coast and overseas), all film users have been awaiting both manufacturer and laboratory acceptance of long-range standards for the 8mm film.

When Kodak engineers pointed over the proverbial left-field fence with their introduction of a proposed new 8mm film format at a meeting of the Society of Motion Picture and Television Engineers last year, "fandom" held its breath. Last month, their company followed through with the "home run" as the Eastman Kodak Company announced the adoption of this "Super 8" principle, yielding a projection picture area 50 per cent greater than the conventional 8mm frame does today.

The "Super 8" movie system, involving an improved Kodachrome II film base, camera and projector, makes its debut at the May 1 opening of the International Photographic Exposition in New York's Coliseum. Bell & Howell president Peter G. Peterson has also disclosed that his company "will have a full line of motion picture equipment which utilizes the new film in May, concurrent with Kodak's planned introduction of the film." Other 8mm movie equipment makers have announced similar plans. *It should be carefully noted that these developments primarily affect the amateur market* but it can also be safely predicted that business, educational use of 8mm is most definitely involved — and with great eventual benefit in wider use of all kinds of factual films.

Briefly, the new "Super 8" format is made possible by reducing the width of sprocket holes from 52 to 36 mil. Each perforation is located opposite the center of the picture, instead of at the frame line, so that splicing cuts do not pass through the perforation. A 20-mil-wide sound stripe is located on the opposite edge of the film, shifted away from the perforations to give it a more uniform base and keeping the film flat in the gate at both sides.

But it's the *size* of the new image that really enhances the possibilities of 8mm. And now that the new standard is announced, there will be a steady, forward move toward the wider use of this useful dimension. 16mm remains the present generally-accepted dimension for widespread domestic use and will for many years. Hundreds of thousands of 16mm sound prints in use today (and a half-million 16mm sound projectors) make that standard as predictable as 35mm projection is among the great majority of the world's entertainment theaters.

\* \* \*

#### **Color Television Set Sales Exceed Our Own Predictions; Boon for Film Producers**

While writing about "channels" of picture distribution to viewers, we remind readers that this publication repeated its predictions of the boom in color television set sales several times early last fall. In January, after the usual holiday sales rush, consumers made us look good when the demand for color sets went to 141-

000 units, 70% ahead of the same month in 1964. February ran just as strong and most set makers now predict that sales in 1965 will hit 2.2 million.

That's a boon for color film producers and processors; for sponsors of desirable short subjects for telecastings. Travel promotion should especially benefit with such obvious subjects as home design, gardening, and a myriad of other color-conscious products and applications most appropriate for this vastly-increased viewing audience. Color television commercials are today just beginning a wave of popularity which bodes well for experienced film makers.

\* \* \*

#### **National Release of 1964 Olympic Games' Film Announced by American Dairy Assn.**

The most exciting news of the month in outstanding new releases from alert sponsors is the impending world premiere (at the National Press Club in Washington, D. C. late in March) of *The World Is One — The Olympic Games, 1964*. This 28-minute color film of the Tokyo games is being sponsored by the American Dairy Association for nationwide release via Modern Talking Picture Service.

Made in cooperation with the U. S. Olympic Committee by alert Baltimore, Md. producer Milton Stark, it's said to be an unusually artistic as well as uplifting review of the games. Stark Films emphasized the theme of "unity through athletics" and has given the countless millions of viewers who will eagerly seek this subject an inspiring as well as very complete story of the Olympic Games.

Modern will make prints available to community groups, schools, summer resort and "Skyport" (air terminal) audiences through all of its nationwide film libraries on free-loan.

\* \* \*

#### **Announce First International Conference On "The Impact of Educational Technology"**

The American Management Association has announced a first international conference and exhibit on "The Impact of Educational Tech-

National Council of Churches recently previewed a new film. Pictured at the showing (l to r), producer Robert Klager, Robert Currie, Director of Programming, Broadcasting and Film Committee, National Council, and C. A. Weisner, church consultant on the picture (story next month).

nology" at which there will be displays and discussion of new tools and requirements for progress. The conference will be held July 12-16 at the Americana Hotel in New York City.

Featured events at this major meeting will include evening demonstrations and the showing of the world's best in training and educational films. School-industry-government panels will critically examine the needs of education and training in the present era. These columns will carry complete details on the formulating program in subsequent editions.

\* \* \*

#### **Bulletins from the News at Presstime:**

The news from the business world was highlighted at presstime by these announcements:

#### **Robins Industries Acquires Genarco, Inc.**

The acquisition of Genarco, Inc. of Jamaica, N. Y. has been announced by Robins Industries Corp. Genarco will be operated as a wholly-owned subsidiary of Robins under the present management of Jean Paul Latil, president. In this field, Genarco is a well-known maker of powerful slide projection equipment but it is also a very prominent factor in the environmental test field and a major source of carbon arc solar radiation simulators.

#### **Kellock Productions in New Glenview Studio**

James A. Kellock, active in industrial film production for more than 30 years in the Chicago area, has announced the formation of Kellock Productions, Inc., with offices and facilities at Midwest Studios, 1037 Woodland Drive, Glenview, Illinois.

#### **Death Takes Lab Executive and Producer**

We are saddened by the deaths of Forrest Jennings, general manager of the Color Reproduction Company, in Hollywood and of George Johnston, president of Washington Video Productions, Washington, D. C. George was stricken by a heart attack in late March.

#### **Film Safety Award Winners Next Month**

These pages will announce the winners of the 1965 National Safety Film Awards next month. Selections by the National Committee will be covered in detail in our next issue.

\* \* \*

#### **Fandom Note: U.S.I.A. Films & Friend**

The New York Times reports that during the violent anti-American demonstrations by African students against the American legation in Budapest one student among those who broke in the building, found himself in the basement movie theatre. He joined other rioters in smashing furniture, but was heard to caution them:

"Don't break the movie projector. I want to see the film here next week."

The projector was left alone, as reported in its story.

In promotional media are grouped with prints of two Bell System films used in the Information Service program.

## 40,000 Voices That Say "May I Help You?"

Performing Her Routine But Highly-Useful Task, the Information Operator Stars in Two New Bell System Motion Pictures Which Interpret This Important Service

AS MORE and more of the relations between the telephone companies and their customers are being conducted by the impersonal dial it has become increasingly important to the companies that their few remaining human contacts be made as pleasant and helpful as possible.

Frequently the Information operator is the only company voice the customer ever hears, as more and more long distance calls are dialed directly. Thus, Information is more of an important job today than ever before.

But, many of the Information

operators have felt that this was a cooped-up, un-glamorous, stop-gap, "no brains" kind of job, just looking up numbers all day — no talking to London or Tokyo — no chance to see and meet people face to face as in some other telephone jobs.

This feeling is exactly what the companies are trying hard to overcome. The Information operator really has a much more demanding job than she realizes — one that takes judgment, discretion and imagination.

In a new film recently released by American Telephone & Tele-

graph Company, Kathy, Nancy and Jaqueline are seen as Information operators — jobs which they hold in real life. They were chosen for their roles because they are typical of some 40,000 other operators who handle Information service in the Bell System.

### New Challenges in Each Day

The film mirrors the challenging experiences Information operators encounter in their day-to-day work. Writer-producer Charles Palmer, of Parthenon Pictures, Hollywood, analyzed the wide variety of calls to Information and watched hundreds of operators at work before

beginning to produce the film, which is the first ever made on Information service.

The picture is entitled *May I Help You? — The Story of The Information Operator*. Its 28-minute running time is crammed with real-life situations. Information operators meet in providing telephone numbers and other special services for customers.

### Change All Through the Years

In its early sequences, the film tells of the many changes over the years in the work of Information operators — starting back in the last century when boys worked as operators. But the film points out that while working procedures have changed, the objective remains the same — to be helpful to the customer.

The growing importance of Information service is stressed, and the qualities of the operators — including those of initiative and judgment — are dramatized in the busy activities of Kathy, Nancy and Jaqueline. Answering the varied inquiries from customers, the operators find that the "book" does not contain all the answers. Time and again they find themselves relying on their personal knowledge and experience in answering requests.

### Takes a "Thinking Operator"

As the film points out, "Only a thinking operator can meet and handle the hundreds of situations — the millions of calls for Information . . . that these girls receive every day."

A second version of the film, used for training drill, is titled *20 Information Calls*, and presents one specimen call after another — all taken from incidents in the film.

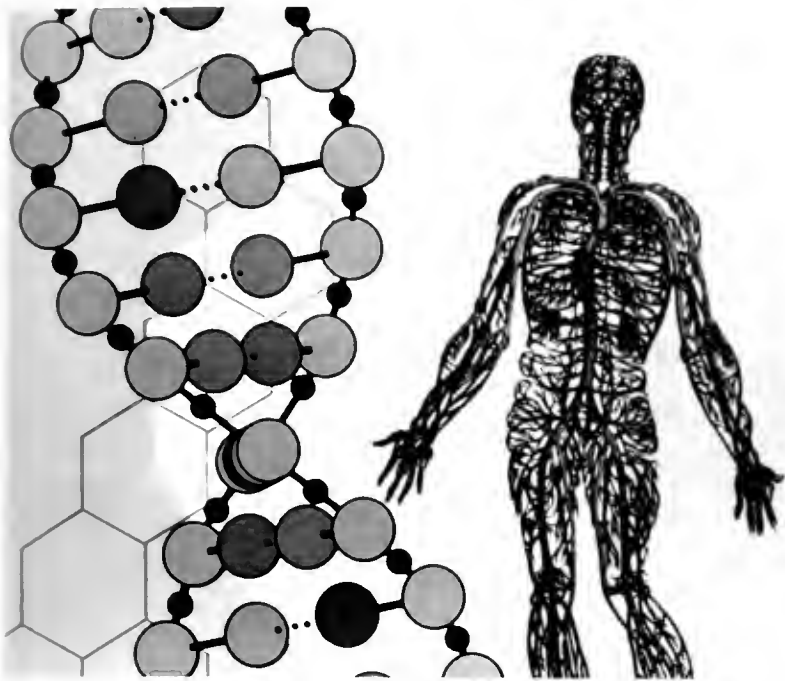

*May I Help You?* was directed by David Bowen, of Parthenon, and supervised for A.T.&T. by the late Tom Fischer.

"May I Help You?" is the first film ever produced on Information Service. It is helping to improve the morale of operators performing these tasks.

Out of the pages of familiar phone directories loom the faces of typical Information operators as pictured in this scene from Bell System's film,

Color animation in NDC film of anatomical man and molecular structure

## Anniversary Gift to Nutrition Education

National Dairy Council Contributes "Food — the Color of Life"

**I**N THIS Golden Anniversary Year of its founding, the National Dairy Council continues its dedication to a half-century of service by giving the world a truly useful and thoroughly interesting film exposition on nutrition, titled *Food — the Color of Life*. Since its public release on February 5th, 300 prints of the 22½-minute picture have gone into distribution.

The film was produced by Reid H. Ray Film Industries, under the direction of Reid H. Ray. An original script by Stanford Sobel as well as art and animation direction by Gordon Ray of the Reid Ray studio are notable features.

According to Lorraine Weng of the NDC executive staff, production of the film was under discussion for five years. The objective, when finally resolved, was "to motivate people towards a better diet and to emphasize individual responsibility for intelligent food selection." That aim is well-satisfied in *Food — the Color of Life*. A top-ranking Advisory Council, headed by Dr. Robert E. Shank, as nutrition consultant, aided by Sheldon S. Steinberg, Ed. D., includes a public health nutritionist, a biochemist, two college food and nutrition professors.

This is a *motivational* film. It was designed to capture adult audience interest first, to show the glorious rhythm of life, the color-coded secrets of food and the essentiality of nutrients in food.

While it does focus on dairy foods as an essential part of the adult's total nutrient intake, *Food — the Color of Life* also stresses the crucial concept that wise food selection is an *individual* responsibility. Both writer and producer have combined their talents to achieve the kind of picture which is sure to be well accepted by adult viewers.

Production qualities are exceptional, from careful choice of the principal player who exemplifies the average homemaker (Mary Linn Mason) to the high-fidelity of its color in both food and location sequences. The picture is slated for awards competition and should score well on the basis of its color photography, animation design and the widely-useful content material.

Many NDC units from coast-to-coast have already acquired prints; Association Films is handling distribution in other areas.

Mary Linn Mason exemplifies the average homemaker in NDC's film

## We Learn About the Telephone

Bell System Replaces "Most Popular Sponsored Film Ever Made" With Updated Educational Picture on Phones for Young Viewers

**T**HE MOST Popular sponsored film ever made is probably *Adventures in Telegonia*, a 1949 motion picture made for informational use in the primary grades of schools by the American Telephone & Telegraph Company, and featuring the Bil Baird puppets. To date, the Bell System companies have purchased 6,522 prints of this film.

Although it is still a favorite with many school teachers after all these years and has still received thousands of bookings annually, some respected educational leaders have told the company that modern kids would respond a little better to something a little more sophisticated.

So — this year — the company has released a replacement film, produced by Jerry Fairbanks Productions and titled *We Learn About the Telephone*. Advance

Communicating by smoke signals!

demand for this film has been so strong that even before preview prints were sent out, the various telephone companies had piled up 2,500 orders. It is perhaps destined to go as high as its predecessor some day.

*We Learn About the Telephone* is a simple, pleasant little story about young Jimmy, sister Suzy, their Uncle Bill, an artist, and a trip to the park for a picnic.

Along the way, the youngsters find out a lot about such things as how to answer the phone properly, and—on Uncle Billy's animated drawing board—how man communicated before the telephone, how the telephone works, how to look up numbers in the directory, and how valuable the telephone is in emergencies, such as helping the police to find lost children.

It is specifically geared to the level of understanding of young children, who, as the company knows, will very soon grow into the most enthusiastic and frequent users of telephone service.

A series of filmstrips covering

all points brought up in the film has been designed for auxiliary teaching use.

Jimmy's on the telephone while Suzy wonders why she can't overhear him through that wire!

Alphabetized telephone directory is explained to primary graders

Uncle Bill shows how easy it is to keep a personal number book

The film says: "The telephone is like a magic wand that lets you talk to anyone you want to."

# Motivated by Customer Needs

Newly-Integrated Motion Picture & Education Markets Division at Eastman Kodak Has Primary Responsibility for Audiovisuals

*"The customer is always right!"*

Although some persons in selling might wish to dispute that ancient proverb of the tradesman, the Eastman Kodak Company has taken the meaning to heart. Alert readers of business columns in newspapers and trade magazines have noticed that quite a few management changes have been taking place within Kodak's sales setup.

In what might be termed as enforcement of the marketing concept which has grown so popular within the past five to ten years, Kodak is fundamentally restructuring its entire photographic products marketing team.

**Outlines the Basic Purposes**

Gerald B. Zornow, vice-president for marketing, points out:

"The rearrangement now taking place has two basic purposes:

"First, it is to afford full recognition to the importance of the customer. We feel that the one indispensable person is the customer.

"Thus the move places more stress on evaluation of customer needs and on seeing to it that these needs are translated to our development groups.

**The Power to Make Decisions**

"The second purpose is to broaden the decision-making power in our internal marketing organization. For this reason, we have designated five principal areas of responsibility.

"We expect to gain — and are gaining — a stronger, more responsive organization. We anticipate that the marketing concept will involve the entire company —

research, development, production, and staff."

**Five Areas of Responsibility**

The five areas of responsibility to which Mr. Zornow referred are those related to the photographic aspects of Kodak's business:

1. Motion Picture and Education Markets Division (with the word "education" here defined in broad terms to encompass use by business and industry, by governmental agencies, etc., of not only films but a wide gamut of other audiovisuals);

2. Professional, Commercial and Industrial Markets Division;

3. Consumer Markets Division;

4. Radiography Markets Division; and

5. Recordak Corporation.

As indicated, each responsibility area is called a "markets division," and is headed by a general manager. Within each division are four sections — product development; sales; information and analysis; and advertising and customer services.

**A Single Marketing Group**

In effect, Kodak has combined its line of audiovisual products with that of its professional motion picture films to form a single, integrated marketing group, in the area of greatest interest to readers of BUSINESS SCREEN. Considering the fact that the audiovisual market has been showing a steady increase since the days of World War II, the Kodak move is looked on by many as an optimistic sign for the future of the field.

Donald E. Hyndman, a Kodak assistant vice-president, is the general manager of the motion picture

Donald E. Hyndman, general manager of Motion Picture and Education Markets Division at Kodak.

and education markets division.

Among the key men reporting to him are R. M. Corbin, manager of product planning; R. H. McPherson, manager of advertising and customer services; and R. E. Connor, manager of information and analysis.

The reorganization came after an exhaustive study of Kodak's many kinds of customers and their needs, an evaluation of the company's product lines, and a review of other marketing operations.

A basic reason for these marketing studies was an awareness of the ever-increasing atmosphere of strong, competitive activity. Kodak is utilizing its considerable marketing strength and, at the same time, choosing some areas to restructure its organization.

"A major change such as we are going through does not happen overnight," explains Mr. Hyndman. "As soon as possible, we are trying to call in person on each customer to explain the plan and to find out in what ways Kodak can be of greater service." •

R. M. Corbin, manager of product planning within the new Division.

R. H. McPherson, manager of advertising and customer services.

R. E. Connor, manager of information and analysis in Division.

## Tradition Plays Key Role in "Nothing But a Man"

The new smash-hit feature film, *Nothing But a Man*, which has received unanimous rave reviews from all of New York's film critics and the national weeklies, was produced by Michael Roemer, Robert Young and Robert Rubin in association with Du Art Film Laboratories.

The background for this unusual co-production arrangement goes back to the day of the old Biograph Studios. Al Young, one of the founders of Du Art, was an editor at Biograph and had been with other Hollywood producers before starting the laboratory. One of his sons, Irwin Young, succeeded him as President of Du Art.

Scene from "Nothing But a Man," outstanding new feature picture.

Another son, Robert, went into documentary and television film production, first in school at Harvard (where he met and started working with Michael Roemer) and later at NBC.

For years, Irwin and Bob Young have been discussing doing a feature film together. When the idea of *Nothing But a Man* came up, they decided to go ahead. The Du Art organization, as one of the producers, handled all the financial, bookkeeping and distribution arrangements for the film.

The successful association of Du Art and Roemer-Young is expected to continue in any future projects the young film makers are involved in.

*Nothing But a Man* was the only U.S. entry at this year's Venice Film Festival, and received two awards from the Festival Committee. It was also shown at the New York Film Festival last September where it received thunderous applause from the audience. •

\* \* \*

EDITOR'S NOTE: This new film is also making a significant contribution to human relations and merits the commendation which reviewers have bestowed upon it.

Expert JHO lighting and staging puts focus on Xerox' product features.

## Xerox Prepares the Buyer for the "2400"

Color Motion Pictures "Think Ahead With the New Xerox 2400" and "A Third Dimension" Show Key Features to Salesmen, Users

**K**EEP IT QUIET and surprise the market or should a manufacturer tell the world about a new product nearly a year before it is ready to deliver?

The Xerox Corporation, one of the leaders in the highly-competitive field of copying equipment, is using the motion picture medium to establish a waiting market for a new copier, even though it will not be available until later this year. Two films, both produced by The Jam Handy Organization, are appropriately titled, *Think Ahead With the New Xerox 2400* and *A Third Dimension*.

### Of Advantage to Prospects

The key point for both is that prospects will find it to their advantage to know about and plan for the use of the new "2400."

*Think Ahead* shows the prototype of the new model, emphasizing styling that was created for a wide range of office settings. But it also demonstrates ease of performance and speed: 40 copies a minute; 2,500 copies an hour via the "2400." This film is especially oriented to the needs of salesmen and technical representatives, to let them see just what happens and how, when a "2400" goes to work.

### Five Years and \$40 Million

*A Third Dimension* goes farther as it demonstrates this versatile new product to potential users well in advance of availabilities. Five years of research and development (and some \$40 million)

went into the design and building of the Xerox "2400" and these 10-minute color motion pictures are playing key roles in a widespread pre-introduction selling campaign being carried out by the company's sales force and its technical representatives.

### Good Use of Limbo Staging

Good limbo sets add crispness to JHO production styling on the two color pictures, concentrating viewer interest on the product and its design advantages. Prospective buyers are being shown the consumer version in their own offices or wherever they choose. They learn how the "2400" bridges the gap between ordinary office copiers and higher-cost, remotely located high-speed reproduction equipment with which this new product will compete. •

Prospective users discuss "2400" features in scene from one film.

## A Buyer Preface to the Producer Listing Pages

**T**HE PRIMARY GOAL of the 67 pages of listings which follow has never been that of sheer numbers. Our own high standards of reference and reliability have always kept these Production Review listing pages well within bounds. *Quality* is the objective, not *quantity*. And yet these listing pages remain the most complete and definitive source of specializing audio-visual production facilities published anywhere in the world.

Here is detailed information for the guidance of the buyer of motion pictures, slidefilms, show presentations and all the other related audio and visual media, freely-given for your assurance of satisfactory service, by 382 companies in the United States and Canada. 55 producing companies on all continents throughout the world are also represented with detailed facts-in-depth. For your reference convenience, these pages also contain details on 89 branch offices of U.S. and Canadian companies.

Many thousands of copies of this 15th Annual Production Review will now go into almost daily use among business firms in the U.S. and abroad; government and trade group executives concerned with audio-visual procurement have come to depend on its authoritative factual content. *There is no other, easier way to define such a highly-creative, technically-complex industry.* These buyers will look to references of recent experience for evidence of competence and versatility. Here they will find titles and sponsors of 1,918 motion pictures and 553 slidefilms which these producers turned out in 1964. They will also look to the names of 1,895 *key people* within these listed companies.

The buyer will readily identify the specialized nature of these listed companies' production experience. Specialists in television commercials, now a major business turning out millions of dollars in advertising films, are so identified, for example. But the listings do not reflect the important fact, also, that these are the producing companies of factual business, documentary and educational films which have, by the record, been the recipients of a vast majority of awards honors, recent and past, wherever given such media. They should also note that *these are the producers of industry's most resultful films*, whether for public relations, selling, training, dealer education and a multitude of other specific purposes.

*Look again to these primary guidelines* in achieving the successful employment of these powerful sight sound media: *financial stability* (the ability to complete a given assignment on original terms); *permanence of staff and physical facilities* owned or readily available; and *experience* (familiarity with the specific medium involved as well as ability to understand and properly interpret the subject matter).

We would also note the absence, under a very few listings throughout these pages, of the minimum standard of five or more title sponsor references. This is either indicative of a *new company organized within the past year* and therefore eligible under that proviso or that the competence of the accepted listee has been established by the Editors while the studio has been on special, limited assignment during the past year.

Finally, within these countless thousands of lines, there will be the inevitable gremlins, a few unexpected omissions and the absence of others whose good intentions exceeded our extended deadlines. For all of these we offer an early Production Review Supplement, scheduled to appear at mid-year. But we take pride, also, in the accuracy and completeness of these pages and in providing our buyer-subscribers with another and most substantial edition of these Annual Production Reviews. While this is only the 15th of these reference works, it begins our 26th volume of this publication, which is now read worldwide.

### Your Key to Producer Listings

☆ The detail in depth of these listings of business and television film companies provides the sponsor, advertising agency and government film buyer with a complete picture of his prospective producer.

In addition to names of principal officers and data on services and physical studio facilities, the facts on "Recent Productions and Sponsors" show the nature of recent studio experience, of films produced in the past year. Preview current pictures as a prerequisite to purchases; bidders should also provide factual data on experience, staff, facilities and financial stability.

There was no charge or obligation whatsoever to these listed companies; every known source was contacted with three separate first-class mailings. Only those who furnished evidence of recent production were accepted for unqualified listing.

**Sound Advice for the Film Buyer**

☆ A careful study of the prospective producer's listing text is a prerequisite to film buying. See the pictures listed by the company; note the nature of client references. And if the prospective producer isn't listed in these pages visit his facilities; meet permanent staff personnel and view current pictures identified as his own productions.

Arriflex 35 cameras, as exemplified in the new Model 2C series, are better than ever—welcome news for professional cinematographers throughout the world whose achievements with Arriflex equipment have made "front page" in almost every category of motion picture endeavor.

Arriflex 35 cameras, climaxing a record of continuous improvements, have reached their most advanced state of development with the introduction of the Model 2C series. The famous Arri cardioid film movement and precision film gate is still the heart of the new model 2C line—continued

assurance of proven theatre-quality footage even under the most difficult filming conditions. The equally famous Arri mirror-shutter is now incorporated into a completely new reflex optical system that provides the cameraman with significant filming advantages.

Arriflex's reputation has made the name synonymous with fine professional filming. The compact, lightweight new Arriflex 35 2C cameras will provide the film-maker with even greater versatility and economy.

## IMPORTANT FEATURES

Now the cameraman can do it himself. The ground glass on the model 2C can be quickly interchanged on the spot—without tools or special adjustments—through the easy accessibility of an empty lens turret socket. A series of ground glasses are available, marked with projector aperture, center cross and camera aperture. The most popular camera formats are included: Academy Aperture, Cinemascope Aperture (.735"x .868"), 1.85 to 1 Aperture, TV Safe Action Aperture, etc.

"THE ARRIFLEX-35 MODEL 2C. INTERCHANGEABLE GROUND GLASSES IN THE MOST POPULAR FORMATS ARE ILLUSTRATED ABOVE. EACH GROUND GLASS IS MARKED FOR CAMERA APERTURE, PROJECTOR AND CENTER-CROSS."

**LARGER. BRIGHTER.** "What you see, you get" has been an often praised feature of the Arriflex mirror-shutter reflex viewing system and now that feature has been further improved. You can "see" even better. The completely redesigned new finder optical system on the model 2C, incorporates a larger ground glass, provides a 6.5X image of increased brightness and clarity—makes exact framing and precise focusing easier than ever.

The finder shows the full field for 35MM Cinemascope Aperture (.735"x .868" squeeze ratio 2X.)

A new, separate and detachable eye-piece assembly is another very important feature of the model 2C, providing several special and "personal" advantages. The eye-piece is interchangeable between all Arriflex 35MM, 2C models and with all late model Arriflex 16's as well.

The eyepiece unscrews for replacement by other eyepieces or for insertion of the Periscope Attachment. A pressure-actuated accessory eyepiece will soon be available, offering a built-in, automatic closure mechanism which closes when the cameraman removes his eye from the finder.

A welcome feature for the cameraman who wears eyeglasses. Both the new standard eyepiece and the new automatic eyepiece have an easily interchangeable snap-on rubber eye-cup assembly into which a prescription 15.2MM spectacle lens can be supplied and inserted by any optician. Interchangeable too, on all latest model Arriflex 16MM and 35MM cameras and eyepieces.

1. Lever for New Finder Closure Mechanism
2. New Style Viewfinder Tube with threaded retaining ring
3. Viewfinder Eyepiece with diopter adjustment and new diopter lock ring
4. New snap-on Eyecup with prescription spectacle holder
5. Improved Transistorized Governor Controlled Motor, 12-16V. DC, with new heavy-duty transistor
6. Stop/Start Toggle Switch
7. 400 ft. Magazine with new all-gear drive, forward & reverse
8. Magazine Cover Latch with safety lock
9. Magazine Retaining Lock

10. Detachable Matte-Box with adjustable leather bellows
11. Replaceable Matte
12. Adjustable Filter Stage with rack and pinion control
13. Matte-Box Beam
14. Matte-Box Adjustment Clamp

this symbol over a producer's listing in these pages refers to display advertisement in this 15th Production Review issue.

Framing focusing composing — all the advantages of the famed Arriflex reflex viewing system are further dramatized in the new optical system of the model 2C. The Periscope Finder Attachment makes the

"difficult" shot, due to cramped quarters, lack of head space and necessity for right and left eye viewing, not only possible but comfortable! It is easily and quickly mounted or removed from the camera and may be used on the Arriflex 16M and 16S models as well. With the Periscope Finder Attachment in place, headroom is increased and the cameraman can easily use either right or left eye head position for viewing. In tight quarters, the camera can be backed against the wall for maximum wide angle coverage and the camera operator can view from the side of the camera. In other situations, the camera can be placed at ground level for low angle shots — or high, over a microscope or copy stand — no matter how awkward the camera position, with the Periscope Finder Attachment the eye-piece can be positioned for comfortable, precise viewing. The Periscope Finder Attachment shows a large clear circular field of approximately 22mm.

The introduction of a new model in any well established product line always precipitates the question: can my present accessory equipment be used with the new model? The answer is "yes" for all the basic accessories in the current Arriflex line — lenses, motors, power supplies, magazines, matte boxes, blimps — all can be used interchangeably on the new model 2C. And the reverse is true for all those new accessories which were designed to complement the new Arriflex 35 model 2C. They will contribute to the improved use and operation of all model Arriflex 35 cameras.

A few of the newest accessories specifically designed to contribute to the advanced features of the new model 2C merit special consideration and are described as follows:

The new magazine (suitable for all Arriflex 35 models) is all gear-driven, uses ball bearings at all vital points and can be driven forward or reverse without special adjustment. There are no belts and no pulleys. New, adjustable, heavy-duty friction clutches have been incorporated so that load on the camera is minimal and uniform. The result is an important advance in controlled camera speed and rugged, dependable performance.

A new manually operated closure mechanism is incorporated into the cover and finder assembly of the model 2C to cut stray light out of the reflex finder. As a factory installed optional extra, this mechanism can be replaced by an anamorphic element to provide an "unsqueezed" finder image when Ultrascope or other anamorphic objective

lenses are used. An external control knob swings the element out of the light path when normal spherical lenses are employed thus providing complete viewing selectivity.

The Variable Speed Motor (12-16 Volt DC) has been improved too. It is now equipped with a forward/reverse switch. The motor, when used with the aforementioned new forward/reverse 400 ft. magazine, provides new capabilities for filming special effects, photo instrumentation, X-Ray cinematography and other sophisticated applications.

The design of the Arriflex 35 Governor Controlled motor (12-16 Volt DC) incorporates a rugged heavy-duty transistor with an overload reserve of such sufficiency that no fuse is required in the circuit. Another significant contribution to controlled camera speed, for dependable location synchronous sound-recording and for trouble free filming,

Arriflex 35 cameras have earned an enviable reputation among professionals all over the world during the past 25 years. Now in the new model 2C series, Arriflex 35 cameras represent an even better investment in uncompromised quality, dependability and economy of operation. There are models and accessories for every professional filming assignment. All 2C models come equipped with the new and improved Reflex Finder, Detachable eyepiece and Interchangeable Ground Glass.

Except as noted in the following, Arriflex 35 2C cameras are supplied with Academy gate and ground glass marked for Academy Aperture. Camera models are as follows:

with New Improved Reflex Finder showing Cinemascope Field, (0.735"x0.868"), detachable eyepiece and interchangeable ground glass with film gate and ground glass for Academy Aperture (180 shutter): Without lenses, motor, matte box or film magazine.

same as above but with Variable Shutter (0-165 ).

same as model 2C, but with Control Signal Generator (24 FPS, 60 cycles) and Electric Clap-stick, factory installed.

same as model 2C, but with specially balanced movement, special tachometer and special 32 volt DC motor, for operation to 80 FPS.

**KODAK K-100**  
Turret Camera. Holds any three Cine EKTAR Lenses coupled to corresponding viewfinders. Expose up to 40 feet of film with one winding. Choice of additional lenses from wide-angle to telephoto... plus many accessories for special effects.

## How to find qualified backstopping on film programs

Come to where equipment, film, and techniques originate. Come to Kodak.

**FILM:**  
Color or black-and-white. Color-negative or color-reversal. Slow speeds or fast. Whatever film characteristics you need, Kodak can supply.

**KODAK PAGEANT** Sound Projector, Model AV-126-TR. Transistorized; 12-watt amplifier; built-in P.A. system (microphone and extra speakers optional); gentle film-transport system. High-fidelity performance plus lowest maintenance cost of any 16mm sound projector. Best value on the market.

**TECHNICAL HELP.** There's hardly a photographic problem or technique that hasn't been covered in depth by Kodak literature. Tell us what you'd like to know and we can probably get the answer back to you fast.

## Compact Sound/Filmstrip System

Adds Sound...  
Advances  
Filmstrip  
Automatically

The Audio-Sell PULSEMATIC Tape Cartridge Sound Unit and GRAFLEX Compact Filmstrip Projector adds sound to your filmstrip library—easily, inexpensively. PULSEMATIC uses standard dual track tape—recorded on your home stereo tape recorder. One track carries sound, the other an inaudible signal that automatically advances your film. Tape cartridge rewinds itself, ready to repeat in an instant. GRAFLEX Projector is quiet-running, projects a bright picture without darkening the room. The PULSEMATIC is fully-transistorized for instant sound, complete with internal speaker, external speaker jack and Freeze-frame switch.

## **A Complete RCA Optical Film Recording System**

**Modular and Fully Transistorized — It Even Improves on Traditional RCA Reliability**

There's so much new about RCA's PM-80 film recording system. New solid state circuitry. New styling. Compact design. New conveniences for easier operation.

In all respects, a better value than ever in film recording. Yet, the most important feature of this new film recording system is that it continues to reflect RCA's traditional leadership in film recording — leadership built on superior reliability and long-term performance perfection — your assurance of quality.

You can buy the PM-80 with full assurance that it incorporates latest "state-of-the-art" features, that it is carefully built to stringent quality standards, that it will fulfill the most demanding recording requirements.

For details on the PM-80 and RCA's full range of quality recording equipment, write: Dept. 806, RCA Broadcast & Communications Products Division, 2700 West Olive Avenue, Burbank, California, or 36 West 49th Street, New York City.

## GENARCO

This is a professional slide projector suitable for the largest audiences indoors or outdoors. Bright enough so that the area need not be darkened. With the standard objective lens the 3000 watt projector projects 6000 Lumens, more than carbon arc projectors and lamp life is 100 hours. Cooling is so efficient that a slide can be projected for hours without overheating. The 3 1/4" x 4" slides are changed manually or automatically or by a push button electric slide changer for 70 slides.

Make Your Meetings or Your Exhibits More Effective with the

**FOR VISUAL IMPACT  
EVEN IN FULLY-LIGHTED  
ROOMS — THE NEW  
WILSON OVERHEAD  
PROVIDES 50% MORE  
CONTROLLED BRILLIANCE**

**\$189**

The new Wilson overhead is 50% brighter than most compacts in use today—and the brilliance is controlled so that pictures are considerably brighter in the corners and along the edges of the screen image.

This superb picture is possible because Wilson is the first and only overhead to combine the high intensity light output of a Quartz-Iodine lamp with the light distribution control of a TRUE optical system using a condensing lens and mirror—the same as in the largest, most expensive overheads.

Additional Wilson Benefits: overhead is lightweight, coolest operating, has tilting head, 10" x 10" stage plus an amazing one-year guarantee AND an exclusive Performance Guarantee based on your satisfaction.

Before buying any overhead at any price see the new Wilson!

## NEW AUDIO-GRAPH shows brilliant 35mm slides without darkening room

SELF-CONTAINED floor and table model Audio-Graphs present brilliant, full-color 35mm slides in daylight or normal room lighting on no-glare screen by rear projection.

Voice may be synchronized on magnetic tape for automatic operation, or pictures changed at speaker's will by remote control.

For easy transporting, the floor Audio-Graph has a specially-designed Wheelit TRI. The Table or Compact Audio-Graph uses Wheelit 4102-A, as illustrated. This Wheelit also serves as a stationary projection table when brakes are set.

Audio-Graphs are being widely adopted as the most efficient method of teaching factory processes, for sales training, hospital nurses and patient lectures, convention exhibits, sales demonstrations and advertising in airports, rail stations and other public places.

### AUDIO-GRAPH FLOOR MODEL

No. 1824—with 18 x 24 in. screen is designed for larger audiences. Has sturdy welded frame with durable panel finish, insuring long service. Accessories: Wheelit TRI, heavy duty Carousel circular 80-slide projector, 20-foot retractable cord reel and Synchro Repeater for voice on magnetic tape.

Audio-Graph Compact

No. 1624 with 16 x 24 in. screen, uses Wheelit 4102 A for transportation. Sturdy construction, attractive finish. Accessories: 80 slide Carousel projector and Synchro Repeater. Wheelit accessories, shelf and retractable cords.

See your local Audio-Visual dealer or write for descriptive circular with prices and specifications

(WRITER LISTINGS CONTINUED ON PAGE 184)

... and  
we quote:

“... so when my client said he liked the latest film I had produced for him I failed to understand why he had changed to another producer.. then he told me that their titles were much better than mine... they had been made by Knight Studio, Chicago. Now I get my titles there... I have my client back... and we're all happy.”

**Knight Studio**  
159 E. Chicago Avenue, Chicago 11, Illinois

*When military or commercial laboratories want to upgrade their processors to handle new film emulsions, whom do they contact?*

**TREISE**  
*of course!*

**MODEL EKC 16/35**

Custom designed for Wilding, Inc., one of the nation's largest commercial film producers

**MODEL MT20**

A standard module processor for the U.S. Air Force, Edwards Air Force Base, Calif.

In order to take advantage of new film emulsions, many military and commercial laboratories have found it necessary to improve their processing equipment. Drying capabilities have to be increased and humidity controls perfected. New types of heat exchangers and precision controls are needed to accommodate the elevated temperatures. Increased processing speed calls for improved film spools and bearings. Certain emulsions require specially designed rollers and sprockets to prevent skiving.

Under these circumstances, who is usually contacted? Treise, of course! Why?—Because Treise engineers are trained in problem-solving. Our staff can rebuild your existing equipment to accommodate the newer color emulsions or to increase your production capacity. Moreover, we are equipped to repair and upgrade your present processors and to supply Treise engineered accessories and replacement parts

**WE BUILD... REBUILD... or REPLACE!**

Treise engineers have the specialized knowledge needed to build any size of continuous lab processor... from small B&W models to giant 100 f.p.m. color processors... and to provide maximum film capacity consistent with high quality and within practicable budget limits. When you buy from Treise, you have the assurance of performance possible only from a manufacturer noted for its outstanding laboratory experience!

*Write for Free 4-Page Catalog on Treise Continuous Lab Processors and Accessories!*

## TIME is MONEY...

### Critical Path

A new motion picture designed to demonstrate an efficient technique used to plan, schedule and control the many operations necessary for on-schedule project completion.

This technique is illustrated by a simple example, the building of a gas station. The technique, called *Critical Path*, is based on a logically-arranged visual presentation, which focuses attention on the most important operations and facilitates effective and economic changes of plan to compensate for unforeseen problems—thus enabling completion on the date scheduled. *Critical Path* planning shows clearly which operations in each project must be done consecutively, which may be done simultaneously, and which depend on others. It facilitates quick recognition of those operations with fixed completion times and those which have latitude—an important factor in saving time. It makes it possible to assign work crews efficiently; to analyze effects of numerous changes; and to regularly update planning as needed for schedule adherence. This technique is most valuable on large, complex projects, but as the film shows, the logic and methods can be applied beneficially to simple projects and to almost every industry.

"see for yourself"

## CALL 236-8488

**INDY:** Everybody, from the National Broadcasting Company to the Commander of the Bisbee, Arizona Post of the American War Dads, seems to go to Indianapolis each year and grind away at the action with a wild assortment of motion picture cameras. Of late, the really neat shots are ending up on a 16mm reel produced annually by Sportlite "500" Films of Chicago.

This year's effort, titled "Driver's Choice," is the result of 20 cameramen having exposed over 13,000 feet of Ektachrome during the qualification periods and the Race itself. Every moment of significance in connection with the Speedway during the month of May was captured by the crew, and hopes for another nomination by the American Film Festival (accorded the 1962 production) are running high following its recent premiere.

# OXBERRY™ "Quality Proven" ANIMATION AND FILM STRIP STANDS

*For all industrial, educational and professional requirements*

Model PEC

Designed to exacting professional standards, OXBERRY UNISTANDS offer maximum versatility within a limited budget.

**Features:**

- Electrically Operated Zoom. (Range permits photographing art work up to 24 inches wide.)
- Table Height Electrically Adjustable. (PEC only.)
- Table Allows Diagonal Pans and Rotation.
- Automatic Focus Available. Adapts to Different Lenses.
- Adaptable for Most Cameras.

**OXBERRY CAMERAS BEING READIED FOR FALL DELIVERY**

**Model 26 — 16mm Animation Camera**

... the first low-cost camera designed exclusively for animation.

- Built-in stop motion drive, with automatic forward and reverse operation, single frame or continuous.
- Reflex type superimposition viewing device with large viewing screen.
- Large fade and dissolve scale.

**Model 27 Film Strip Camera**

... for single and double frame 35mm film.

- Rapid switch over from single to double frame.
- Precision film advancement drive repeats within  $\pm .0015"$ .
- Independent shutter and film advancement permits double exposure without moving film in camera
- Adjustable film plane readily permits 1:1 focus.
- Built-in stop motion drive with automatic forward and reverse operation, single frame or continuous.
- Remote projection of reticle onto table top.

Model TE

**OXBERRY Model MP-4200 Animation Stand**

Now available with Automatic cel cycler, interlocked electronic zoom and pan controls.

**OXBERRY Model FS-4300 Filmstrip Stand**

Now available with variable timed exposure control for new high quality slow speed color films

## Family Circle: A Trend-Setter in Action

Show Media Buyers "A Magazine Only a Homemaker Could Love"

SPONSOR: Family Circle Magazine.

**TITLE:** *A Magazine Only a Homemaker Could Love*, 15 min., color, produced by Dynamic Films, Inc.

FAMILY CIRCLE'S new film, now playing to open-eyed and enthusiastic media-buyers across the country, pin-points the magazine's tremendous vitality — circulation up to 7,500,000 in 1964, from 5,000,000 in 1961 — and its constant emphasis on *service* in reaching homemakers who enjoy their jobs.

Family Circle, the film shows, is made of "Trend-setting ideas that start millions of actions all over America — the kitchen as a family room . . . salads as a popular main dish . . . cultivating a new taste for fine art with over two million art prints ordered by readers in the past few years. That's what this magazine is made of!"

### Wives Applauded the Picture

Family Circle has shown the film, which cleverly combines live action with animation and direct pick-ups from the magazine's pages, to groups of advertisers and their agencies in a number of large cities. In some cases wives have been invited to dinner party showings with considerable success.

Here is what a Detroit agency account executive's wife had to say: "Marvelous film, marvelous magazine — I promise to work on my husband to buy space." Another agency VP commented: "Excellent film presentation . . . entertaining and factual. Good idea to include the wives. Interested to hear the gals' reactions."

### Comments Off Preview Cards

Other comments among a hundred or so compiled by Family Circle thus far have ranged from a Y&R man, "That was a GREAT movie!" to a MacManus VP, "Photography is fabulous. A job well done!"

A dozen or so comment cards have noted such remarks as these:

"I learned two or three things about Family Circle that may stand one of our clients in good stead, and will ultimately result in something rewarding for him, for my company, and for Family Circle."

You can't do much better than that in audience reaction. •

## Management Problems in Filmed Lectures

Created at University of California's Extension Media Center

THE UNIVERSITY of California Extension Media Center has produced a group of 16mm films designed to supplement management training programs in business, industry and government.

The films document research in management by educators and research specialists and explore management techniques and practices of interest to top and middle management and supervisors.

### System for Method Evaluation

*Managerial Grid* explains a system for evaluating management methods and determining the attitudes, values, degree of commitment, creativity, and conflict that can be expected under different

methods. Robert Blake, professor of psychology for the University of Texas, is the filmed lecturer.

*Problem Solving in Groups* outlines the functions of management committees and describes how to improve group problem solving and decision making methods. The speaker is Richard Wallen, former professor of psychology and member of the Personnel Research and Development Corp. of Cleveland.

Wallen also discusses a variety of personnel problems and methods for dealing with different personality types in the film *Emotional Styles in Human Behavior*.

### Measuring Work and Delays

*Introduction to Work Sampling* demonstrates how work and delay in time may be accurately measured and predicted from random sampling. The speaker is a professor of engineering and production management at UCLA who was then a consultant.

Other films include *Theory of Management Development*; *Foreman Discovers Motion Study*; *Establishing Work Standards by Sampling*; *Making a Work Sampling Study*; *Time Study Rating*; *Multiple View Time Study Rating*; and *Electronic Computers Improve Management Control*.

\* \* \*

### "The Scenemakers, U.S.A." Offered by Association Films

*The Scenemakers U.S.A.*, a 10 mm color film, features a cross-country tour of the United States with three fashion-conscious deb

Produced by Spectrum Associates, this 14-minute motion picture is available for free-loan by TV stations and junior and senior high schools. It is presented by J. C. Penney Co. and distributed by Association Films, Inc.

The "scenemakers" begin with a boat ride down the Mississippi river and a visit to a Southern plantation. From there, they travel to New Orleans for some Bourbon Street jazz, then west to the Rockies to salute the cadets at the U.S.A.F. Academy, and to climb Pike's Peak for a breathtaking view.

In San Francisco, the last stop before home, they explore the winding streets, ride the cable car and visit the Japanese Tea Garden.

The trip provides an opportunity to display the latest in spring and summer fashions from coordinate outfits to formal gowns.

IS THIS HOW YOU CHOOSE YOUR LAB?

**If you do, you are gambling on quality. Why not cut down the odds by choosing the Geo. W. Colburn Laboratory. With our white glove treatment you'll be a winner everytime.**

## A Basic Film Series for Art Instruction

Color Films on Ceramics Launch Widely-Used Series of 35 Titles from Orientation Program of Chicago's Art Institute

**T**HE CHICAGO ART INSTITUTE is planning to release a series of 35 educational sound films on art for students at the junior and senior high school grade levels. The films will be available in 16mm black-and-white and color — and in 8mm cartridge-load prints.

Based on the Institute's "Orientation to the Visual Arts" program required for all first-year students, the series will cover seven subject areas: Ceramics, Drawing, Painting, Photography, Print Making, Sculpture, and Weaving. Each subject will be divided into five ten-minute films, for a total of 35 individual titles.

Films Produced by Jack Lieb  
Jack Lieb Productions, of Chicago, has already produced the pilot films on Ceramics. From this first set, the Institute has developed a format for a complete one-year beginning art course on film emphasizing the materials and through them teaching appreciation.

The films were shot in actual classroom situations, at the School of the Art Institute. Original recordings for title music utilizing a "swindle" type rendering of Bach and Mozart in woodwind ensemble add an upbeat, modern feeling to the traditional art form.

Each Shown in Two Segments

Each ten-minute film is designed to be shown in two segments during a class period. The first half gives the student enough information to start him on a project. After a half-hour of lab work, when the student has first-hand information on the handling characteristics of the material, the remaining sequences are shown.

A new film is used each week, and at the end of five weeks, the entire series on one subject can be shown as a review.

In the films, the student sees other students like himself en-

countering the same problems he has just had and he sees their solutions. His imagination is stimulated by the narrator's comments, as well as by the students' ideas.

At the end of the films, he sees museum exhibits that identify

closely with the students' work, and with his own. Realizing the value of praise, the Art Institute matches student work to examples of the art of ancient or primitive people. Students are told that since they are just beginners, it will take some study and experience before they can try to stand on the shoulders of the 20th Century.

### Three Years in the Planning

Plans to extend this well-rounded orientation program to students in general, regardless of whether they plan to enter a professional school, go back about three years. After considerable interest had been aroused, Norman B. Boothby, Dean of the Schools of the Art Institute, broached the idea to Chicago film producer Warren Lieb.

From their talks, motion pictures emerged as the best way to extend the Art Institute's teaching to any class, anywhere. But was there a need for such a program?

This, and many other questions, had to be answered before the films could be planned, so the SAIC sent a questionnaire to thousands of art teachers across the country.

### What Art Teachers Wanted

Results showed a great gap in the teachers' knowledge of films on art available for classroom use. Preferences were for films on the lives of famous artists and scenes of them at work. Short programs,

Pictures on this page are from the Ceramics film produced by Jack Lieb Productions, Chicago.

taking no more than 15 minutes, and in color, were preferred. Documentary treatment was more believable and had more immediacy.

A group of SAIC faculty members surveyed a large cross section of art education films, and found that none were made to fit into a unified curriculum. Too often, the films on art appreciation spent valuable time entertaining, so their educational value was diluted.

### Show Own Students at Work

With a need for good films established, the structure gradually took shape. Instead of showing a professional glibly demonstrating his skill, the Institute decided to show a documentary record of their own Orientation students.

They felt that the visual identification of seeing other students of the same approximate age and art experience, would prompt viewers to accept the skills and imagination demanded as possible for them.

The idea was tested in the spring of 1963 when a motion picture record was made of a class in the first orientation class in Ceramics. Teachers, educational film producers and distributors thought the results outstanding. One comment summed up the rest — which encouraged the completion of the series: "The best tool for teaching creativity we have ever seen." •

EDITOR'S NOTE: This new series of art teaching films fills a longfelt need in the educational field.

You can improve immediately the effectiveness of audio-visual instruction with this new aid from Audio Visual Research, Inc.

## This new rear projection cabinet relieves the five most common AV headaches

"Our darkened visual aids room goes unused too many hours every day."

"I'm never sure what's going on while the lights are out."

"Preparing to show a film wastes too much time."

"I usually see the film for the first time when I show it to my class."

"Storage of projection equipment creates real problems."

The new AV rear projection cabinet demolishes all these frequently-voiced complaints. It ends the need for costly darkened rooms. The lights stay on, the blinds stay up. Instructors maintain supervision at all times.

The AV cabinet rolls easily from room-to-room, completely self-contained with your projector installed and a big built-in speaker. It per-

mits instructors to preview at their convenience. Easily, quickly stored.

### GIVES YOU THESE ADVANTAGES

It gives you a distortion-free, 22"x28" picture on a new Polacoat non-glare screen. Cabinet accommodates most late-model projectors. Exclusive Buhl built-in lens (optional) provides full-screen presentation from projectors with two-inch lenses and larger, including slide and filmstrip projectors. Riser modification available to accommodate Bell & Howell projectors.

Prompt delivery guaranteed. Send for free brochure containing complete information. Order direct from factory or your AV supplier.

## Design Inspiration for Home Interiors

J. S. Plywood Picture Proves That "The Eyes Have It" in Design

SPONSOR: United States Plywood Corporation.

TITLE: *The Eyes Have It*, 26 min., color, produced by the Institute of Visual Communications.

Paraphrasing the line of Keats that "Beauty is truth, truth beauty," this new film is designed to demonstrate that *function* must be beautiful and beauty truly functional.

In invoking the spirit of design in our homes to beautify our lives, choices are abundant. The film shows a number of examples of good design as seen in the Better Living Center at the World's Fair and at the recent Design and Decoration show at the Coliseum in New York.

### Views of Design Consultants

Seven of today's leading design consultants are seen as they combine the facts of our individual ways of living with inspiration from a variety of motifs. Among the ideas pictured are ways to give the hi-fi stereo a truly functional and beautiful place of honor in the modern living room; how to use ancient Chinese art in a traditional American interior; how to achieve the effect of space and grace in a

mobile home, or in a small Manhattan apartment.

A William J. Ganz Production

*The Eyes Have It* was produced by William J. Ganz, written by Tony Silver, narrated by Ron Cochran, and supervised for U.S. Plywood by Allen MacKenzie and Frank Hinds. It will be shown extensively on television and to consumer groups.

**"Friends and Allies" Presents Behind-Scenes Look  
at Cooperation and Friendship Among NATO Forces**

A PUBLIC-SERVICE FILM, *Friends and Allies*, has been cleared for U. S. television release. The 28-minute picture, sponsored by the German Information Center, shows NATO cooperation and friendship at work in four episodes, filmed in Europe by Profil Film of Hamburg, Germany. Sterling-Movies U. S. A. is handling the television bookings.

At the North Atlantic Treaty Organization's headquarters in Paris, high-ranking officers confer as the film's narrator says:

"Here the members of 15 allied nations work amicably together. The bonds of fellowship which bind them together are not confined to this headquarters; they exist wherever NATO forces come together."

**Allies at Sea and in the Air**

The first account is that of a seaman in the Royal Navy. Steve Ellen explains from the deck of his frigate that he can speak a bit of German as the result of an appendectomy. On a British-German anti-submarine exercise in the North Sea, Steve was stricken and a doctor from a German frigate arranged his transfer by helicopter to a hospital in Germany.

Here he shared a room with a sailor from a German frigate. Herbert introduced his pretty sister to his British ally.

Another kind of emergency confronted Sergeant Erich Schmitt of the German Air Force. While piloting his jet, Echo Alfa Two Four Nine on a routine exercise flight, his generator cut out at 20,000 feet, leaving Erich about 400 seconds of flight time, with the ground hidden by clouds.

Changing course to "get away from the East border," he calls to all radar stations in the vicinity and one of these directs two American F-102's to his aid. They guided him to the landing field and a surprise reunion.

**Engineers Build a Playground**

In another incident, French and German troops rehearse an assault boat action on the Rhine. Their children crawl through the barracks' fence to "drive" a Jeep. At the canteen, their fathers resolve to build a playground as they discuss the problem. In an illustration of the Engineers' motto, "For all, everywhere," they level space with borrowed German bulldozers; build and test the playground equipment.

As the fathers watch their chil-

dren swinging, sliding and revolving. Staff Sergeant Roger Prevert answers a friend's question in German.

**Peter Joins an Italian Family**

In the final episode, filmed in Sardinia, Italians, Canadians and Germans share an air base at Decimo Manu. Aircraft maintenance was the responsibility of young German first lieutenant Peter Holdack and his men. Off duty, Peter spent much time with a local fisherman, Beppo Tomasi and his family.

Peter tells the story of how their friendship began. He had discovered Beppo in despair because the motor of his fishing boat was "prima kaputt." Peter's diagnosis and five evenings of labor got the engine running and as he chugs

This French first lieutenant of the *Chasseurs Portes* is briefing a German second lieutenant from a Koblenz armoured infantry company during a NATO field exercise.

off to the fishing grounds, with Peter aboard, the lieutenant remembers:

"I help Beppo with his work and enjoy his wife's fish soup. From

**"Wings to Germany" is Latest Pan American Airways Release**

Pan American World Airways has released a new film for 16mm audiences, *Wings to Germany*. The color documentary film was produced by Vision Associates, New York.

Filmed under the direction of Lee R. Bobker, Vision president, this is the first time an entire classical music score background has been used in a Pan Am travel film. The motion picture covers a areas of Germany open to American tourism and includes a spectacular skiing sequence and scenes of the annual Oktoberfest held in Munich.

Pan Am has also contracted with the same producer to make new documentary color film of France. Production will begin in April and the international air line expects to release the film in late '65.

\* \* \*

**Canada's Far North Problem Theme of 'Northern Dialogue'**

Canada's Department of Northern Affairs and National Resources has released *Northern Dialogue*, 14-minute film in sound and color about the Civil Servant concerned with the problems of the north.

Crawley Films produced the film, which is distributed by the National Film Board.

Using the 1964 Conference of the North as its frame of reference, *Northern Dialogue* illustrates with footage shot in the north some of the north's problems and opportunities.

This conference is attended every second year by administrators, teachers, social workers, engineers and other officers of the Department who are stationed in the north. According to Crawley, the "dynamic engagement" in helping the people of the north is the heart of the film.

For all the news and features about current factual films, look to the pages of Business Screen Magazine.

Pilot Productions, Inc. presents a new motion picture, "The Merrell DAC System"

**Positive Drug Identification, Improved Inventory and Storage Provided in "The Merrell DAC System"**

A 14-MINUTE motion picture, which explains an improved and convenient system for handling drugs in hospitals, has been released by The Wm. S. Merrell Company, Division of Richardson-Merrell Inc., Cincinnati.

Produced by Pilot Productions, Inc., the film instructs nurses in the day-to-day application of this Merrell system for distributing and controlling medication in the hospital.

Titled *The Merrell DAC System*

the film shows how the new system assures positive drug identification — while at the same time permitting efficient medication inventories, convenient storage, quick, accurate counting during dispensing and the elimination of danger of contamination.

Sequences show these positively-identified Merrell ampule-packaged medications from the pharmacy to patient, chronologically tracing the handling, dispensing and administering of the drugs. Scenes actually filmed in hospitals show DAC System "Strip" packaged ampules are easily loaded into dispensers, how a packaged unit of ten DAC ampuls permits accurate audit by the nurse, and how each unit dose is clearly identified by name of drug, potency and Merrell's control number.

The 16mm color-sound training film for hospital personnel is now being distributed on free loan by Merrell in Cincinnati and by Ideal Pictures' regional film libraries.

**Reeves-Souderatt Names Two as Sales Outlets in Canada**

The Reeves-Souderatt Division of Reeves Industries, Inc. has appointed two Canadian representatives.

E. S. Gould Sales Co., Ltd. will maintain a warehouse inventory of all Reeves sound recording products in both Montreal and Vancouver.

Applied Electronics, Ltd. of Toronto will represent Reeves' professional sound recording products.

Elston Howard narrates and shows his skill in "The Yankees at Bat."

Whitey Ford gives techniques in film "Pitching for the Yankees."

## SPORTS PICTURE

is not something young players should copy — he says he swings up at the ball too much, would be better off if he'd learned early to use a more level swing.

Whitey Ford is the mainstay of the pitching film, supported by Stan Williams, Ralph Terry and Al Downing. Ford advises aspiring young pitchers to start out in other positions (throwing strikes at the first baseman) before beginning to pitch regularly. He says that many boys ruin their arms trying to throw all kinds of weird arm-straining pitches too early in their careers.

### Where to Obtain These Films

The three Yankee films are available from club headquarters at 745 Fifth Avenue, New York. •

## Championship Baseball: the Yankee Way

THREE INSTRUCTIONAL FILMS about baseball are now being distributed by the New York Yankees and P. Ballantine & Sons, the large brewery which has been a Yankee TV and radio sponsor for many years.

The films, each 14½ minutes and in color, are *Infield Play — the Yankee Way*, *The Yankees at Bat* and *Pitching for the Yankees*. Shot primarily at spring training in Ft. Lauderdale in 1964, and completed during the season at Yankee Stadium, the films were produced by Arthur Mokin Productions, New York.

### Useful to Fans and Players

Based on preliminary showings to groups and organizations, the films' appeal is to both fans and baseball players. For the school or amateur ballplayer they serve as excellent instructional aids. For the fan they are human interest documents illuminating the inside or players' view of the game — and unique is the fact that the only voices heard are those of the players. Of considerable interest, too, are the players' own estimates of what makes the Yankees . . . the Yankees.

*Infield Play* . . . which seemed the best of the three at a recent preview showing at Toots Shor's in New York, features Bobby Richardson, Tony Kubek, Joe Pepitone and Clete Boyer in some startling close-up shots of ball-handling. Richardson does a particularly fine job of his share of the narration.

### Elston Howard in "Star" Role

*At Bat* starts out with the voice of erstwhile manager Yogi Berra explaining what it means to be a Yankee. Elston Howard, however, cops the prize for best voice and appearance in this film. Other

stars are Mickey Mantle, Roger Maris and Tom Tresh. Mantle explains that his own batting swing

## "Ski With Buick" Honored by Michigan's Outdoor Writers

Stein Eriksen's film, *Ski With Buick*, released for free distribution only a few months ago, has won its second unique award—best-of-class in the annual Michigan Outdoor Writers Assn. Film Awards competition.

The competition is for outdoor films only, the only one of its kind in the world, and the judges created a new permanent category for the Eriksen film—How to Do It. It was a tribute to the full 16 minutes, more than half the film, Eriksen uses in color and live sound to instruct in the new, fast-growing, U. S. uniform ski-teaching techniques.

The film was produced by GM Photographic, General Motors' Detroit-based photo section, under commission from Buick Motor Division. The award was accepted by the producer, James W. Bostwick, audio-visual manager, on behalf of K. C. Dick, GM photographic director, and the film's director and script writer, Don Norborn and Eddie O'Brien.

### Over 6 Million Have Seen It

The success of the film has been phenomenal. By month's end it will have been shown free about 6,000 times to a cumulative audience of almost 6,300,000 in only ten months since it was released. It is one of the most widely shown all-sports pictures and is or soon will be the most widely shown all-ski movie.

It has had many informal honors: Acclaim by editors and ski writers at New York and Michigan previews; a consensus of "greatest ski film ever made" by Aspen ski authorities; and universal approbation at last fall's convention of the U. S. Ski Association.

### Lensed at These Ski Centers

*Ski with Buick* was made at deep-snow locations at ski areas in New England, the midwest and the Rocky Mountains. It stars on Eriksen, fourtime Olympic and world-championship gold-medal winner acknowledged as the world's greatest skier, as both performer and his own commentator.

The film achieves strong narrative values, Eriksen teaching his family of four to ski and on camera almost constantly. It ends with one of the most exciting ski sequences ever filmed—four minutes of a run by Eriksen from 14,000 feet down to about 7,500 at Aspen.

*Ski with Buick* is an addition to the Buick shelf of PGA-action g-

### REID H. RAY FILM INDUSTRIES

CHICAGO ST. PAUL

films, all produced by GM Photographic, latest of which is *The 1964 Buick Open*, starring Tonyema, British Open champion, and featuring Ken Venturi, U.S. Open champion, two members of 1964's Big Four of golf. It was released for free showings only last September.

That film by month's end had had almost 3,500 free showings to a cumulative audience of more than 3,350,000 in less than seven months.

All four Buick Open golf films (1961, '62, '63 and '64) will by the end of March have had close to 1,000 free showings to almost 3,400,000 people.

**Prints Available from Modern**

All five films, including Steinrikksen's *Ski with Buick*, are sound and color, run about 28 minutes, and are available for free showings to groups anywhere in the U.S. from Modern Talking Picture Service, Inc., any of 31 U.S. offices or from the home office, 3 East 54th St., New York, N.Y. 10022.

**Miller Releases "Highlights": 1964 NFL Football Review**

Two new half hour color films have been added to the sports film library of the Miller Brewing Company. They are *Highlights of Sports* and *1964 National Football League Highlights*.

*Highlights of Sports* focuses on seven of last year's top athletic events: Northern Dancer winning the 90th running of the Kentucky Derby in record time; Ken Venturi riding out from oblivion to take the National Open Golf Tournament; A. J. Foyt's second trip to the Indianapolis Motor Speedway's Victory Lane as the 48th 500 is marred by the tragic crash of Edie Sachs and Dave MacDonald; Australia's victorious campaign to win the Davis Cup from America; the sixth renewal of the United States—U.S.S.R. track meet; the 19th challenge for the America's Cup, yachting's classic race since 1851; and the epitome of American college football, the Army-Navy game.

**14 NFL Teams Shown in Action**

The NFL film highlights the memorable plays, punts and passes of all fourteen teams in the National Football League. Included in the footage is Jim "Wrong-Way" Marshall's touchdown run for the losing team. The sparkling color of this year's production adds a new dimension to the enjoyment. Both films are narrated by

sportscaster Chris Schenkel.

Prints of *Highlights of Sports* and *1964 NFL Highlights* are available for use without charge to television stations and social, civic, church or fraternal groups. They join 2,000 copies of 200 other free 16mm. sport films that cover the world of automobile racing, skiing, golf, bowling, fishing, basketball, boat racing, baseball and rodeo skills.

**Where to Obtain These Films**

Bookings and a list of the titles available may be obtained by contacting the Public Relations Department, Miller Brewing Company, 4000 West State Street, Milwaukee, Wisconsin 53208.

**"To the Fair" Extols Visit to the Big Show in New York**

*To The Fair*, a 26 1/2-minute Technicolor film extolling the New York World's Fair, is now available for free loan by schools, churches and community organizations through Association Film's libraries.

The film was produced by Francis Thompson, whose highly-acclaimed Johnson's Wax documentary film, *To Be Alive*, played to capacity audiences last year.

It is difficult to describe what we do.

I guess we develop ideas and concepts — but who doesn't?

Maybe you should simply see some of the results.

Like the Red Room at the DuPont Pavilion at the New York World's Fair.

Or Character Recognition and Language Translation at the IBM Pavilion.

Maybe your children enjoyed the Junior Laboratory of Science in Seattle.

Or you're fascinated by VW demonstrations at automobile shows.

Or United States Steel trade shows all over the country.

Or you learned how Polacolor works in a technical film.

Or watched a steel kite fly — or lightning strike a Timex watch.

Or a Ford stopped in mid-air by its own brakes.

Of course we didn't do these things alone.

But we did help.

If you need to explain complicated things to people in films, exhibits, world's fairs, advertising, or in museums, maybe we can help.

NEW PRODUCTS & ACCESSORIES FOR PRODUCTION AND PROJECTION

against moisture. The company reports that Filmpack's lighter weight, compared to present shipping covers, offers savings in air shipment costs.

Size now in production is the P-D 1200 for 1200' 16mm reels, steel or plastic. Other sizes are contemplated for future production.

Write for details to the New Products Desk, BUSINESS SCREENS.

## Tungsten Iodine Light Source for Continuous Filmstrip Unit

A British manufacturer, T. Hartman & Co., Ltd., is now marketing a continuous filmstrip projector using a tungsten iodine lamp. The projector can accommodate

a filmstrip 5 feet long containing 62 frames, and will automatically change the picture at 5-second or other predetermined intervals.

The two tungsten iodine lamps have a life of 2,000 hours. Housed in a cabinet 18" wide, 22" deep, and 36" high, the projector gives a picture 17½" x 13½" on the cabinet's self-contained screen.

The machine is available for use on 110-120 volts AC or 210-250 volts AC. A manual remote control can be fitted for educational and lecturing use, and the projector can be linked to a tape recorder.

For purchase and license data, contact the New Products Desk, c/o BUSINESS SCREENS.

## Here's the 16-pound Jayark-8 sound projector w self-contained screen Light, Low-Cost "Jayark-8" Cartridge-Load Sound Unit

A new, low-cost 8mm sound projector has been introduced in the audio-visual market by Jayark Instruments Corp., New York.

Called the Jayark-8, the projector is only 13 inches high, weighs 16 pounds, and features an automatic film-loading cartridge that permits changing films without threading or rewinding. It has a self-contained 11½ inch non-reflecting rear screen.

Reuben R. Kaufman, president of Jayark, who unveiled the new projector last month at the firm's New York offices at 733 Third Avenue, said the projector "incorporates advanced principles and a major technical improvement which have been sought after for years. The price of under \$300 per unit in quantity, the foolproof simplicity of operation, complete elimination of manual film handling, and unique portability of the Jayark-8 represents an important breakthrough for audio-visual applications."

Manufactured by Jayark Instruments Corp., a wholly-owned subsidiary of Jayark Films Corp., the projector will be marketed through an internal network of distributors and dealers.

The automatic film cartridge used in the projector is capable of handling from 2 to 28 minutes of film. It is inserted into an opening in the projector, and at the push of a button, the film and sound are activated. The film can be set to stop automatically when finished or to repeat endlessly, if desired.

The life expectancy of the 15 volt, 150 watt lamp is 100 hours. Write Jayark Instruments Corp., 733 Third Avenue, New York City for literature or ask our New Products Desk to help.

Photo: Courtesy of Jayark Instruments Corp.

## Audio-Sell System Combines 8mm Films With Taped Sound

Audio-Sell, Inc. has announced a sound-film system featuring one projector for both sound and silent film speeds. It includes a cartridge-loaded variable speed 8mm Technicolor projector and a Tele-Sell tape cartridge player.

Film and sound cartridges are snapped into place, and the correct speed — from 14 to 25 frames per second — is dialed for a synchronized presentation.

The projector is blower-cooled and has a frame adjustment switch, retracting cord, geared tilt control, room light outlet and a carrying handle.

The cartridge player is transistorized and has a built-in speaker, auxiliary speaker outlet, instant sound film switch, and an automatic tape shut-off. The tape continuously rewinds so a presentation can be repeated immediately.

For details contact the New Products Desk at BUSINESS SCREENS.

## Light Plastic Film Container Announced by Probe & Develop

The P-D Filmpack, a patented plastic film container, has been introduced by Probe and Develop, Inc., San Francisco.

The film carrier is twisted to open and close, and when closed is locked for shipment and sealed

**Motor Drive for Angenieux  
Zoom Lens Announced by Arri**  
The Arriflex Corp. of America  
s introduced a new motor drive  
r the 12-120 Angenieux zoom  
as. The drive is based on a spe-  
ally designed, custom wound DC  
otor, and is said to provide bi-  
irectional, adjustable speeds esti-  
ated at a range of 8 to 1.

As an example, from an Arri-  
x 8 volt battery pack, the com-  
ny reported that the motor drive  
ll provide full 12 to 120 mm  
oms at speeds ranging from ap-  
roximately 6 to 50 seconds.

A slip clutch and warning light  
e built into the system, and a  
ntroller unit is provided to give  
e cameraman one-hand control  
er stop-start, direction and speed  
zoom. The system also provides  
justable pre-set stops, so the  
meraman can predetermine zoom  
nges.

The motor drive may be mount-

ed on all 12 to 120 Angenieux  
lenses and may be powered from  
a variety of battery supplies, rang-  
ing from 4.5 volts to 16 volts; cur-  
rent drawn is 1/4 ampere.

For details, contact Arriflex  
Corp. of America, 257 Park Ave-  
nue South, New York City 10010.

**"Solo Projection System" of  
Briefcase Size, New from HPI**

A miniaturized projector and  
folding rear projection screen have  
been combined as a complete pro-  
jection outfit that fits easily into  
a briefcase. This new outfit, called  
the Solo Projection System, has  
been announced by the Educatio-  
nal-Industrial Division of Hudson  
Photographic Industries, Inc., Ir-  
vington-on-Hudson, N.Y.

The system consists of the HPI  
Mini Projector which opens like a  
clam shell for showings, and the  
Groupshow Mini, a rear projec-  
tion screen that folds smaller than

HPI Solo Projection System

a note book. The system will pro-  
ject slides, or with an adapter,  
filmstrips, in lighted rooms, using  
only two feet of desk space.

In operation, a protector pad,  
wrapped around the screen when  
carried, is opened and placed on  
any desk or table. The Protecto-  
Pad, as HPI has named the device,  
is marked with the exact positions  
of both screen and projector. This  
eliminates the fumbling sometimes  
associated with projector set up. It  
also protects the desk or table top.

The Groupshow Mini, an 8 by  
8-inch rear projection screen,  
opens easily and has its own built-  
in backlight hood that permits pic-  
tures to be projected in a lighted  
room.

The HPI Mini Projector opens  
at the touch of a button. A built-in  
projection stand raises it to proper  
height to prevent keystoneing. It has  
a condenser system matched to an  
f 2.5 lens which can also be used  
to fill a 40 by 40-inch screen in  
a darkened room. It will operate  
on any voltage, including 12-volt  
automobile, merely by lamp  
change.

The Solo Projection System,  
consisting of Mini Projector,  
Groupshow Mini, Protecto-Pad  
and one Slide-Stick slide-holder, is  
available from HPI Educational-  
Industrial dealers at \$57.95. •

### Viewlex Markets New "V-27" Filmstrip and Slide Projector

A new filmstrip and slide projector is now being marketed by the Viewlex Corporation, Holbrook, N.Y. The new V-27 model is said to have a cooler operation and brighter light on the screen resulting from a 750 watt lamp and other interior innovations.

According to Viewlex' vice-president Monty Abrams, the continued use of the familiar Viewlex outward design in the V-27 is in line with the company's policy of

V-27: shows slides or filmstrips.

not obsoleting equipment merely for the sake of change through the addition of frills or revamped body lines.

The Viewlex V-27 uses a pre-focus, longer life lamp with a built-in proximity reflector, and improved heat shield, and a new cast aluminum chimney for still cooler operation.

The V-27 is equipped for both filmstrip and slide operation, by changing the carrier. It accommodates standard 2" by 2" slides mounted either in glass or cardboard. It will show all 35mm sizes, single or double frame and Bantam, in both vertical and horizontal positions. Both single and double frame filmstrips can be shown with the unit.

Lenses available are in a variety of focal lengths from 3 to 11 inches. A Viewlex Strip-O-Matic changer (also an improved version) which advances the frame automatically is available.

The Viewlex V-27, with a 5 inch lens, including filmstrip and slide carriers, is priced at \$112.50. Carrying case is \$11.90.

\* \* \*

### Beseler Offers a File Cabinet for Overhead Transparencies

Charles Beseler Co. is now offering a file cabinet specifically designed for storing full-sized mounted transparencies that are used with overhead projectors.

The transparency file cabinet (Beseler Cat. No. 7237) is of all-

metal construction. It comes with three drawers and is finished in neutral beige.

Overall dimensions are 47¼" high, 18" wide, 26½" deep. Dimensions of the largest mounted transparency accommodated are 12½" x 13¾". Price is given as \$75.00.

For additional information, write the manufacturer, 219 South 18th St., East Orange, N.J. Mention BUSINESS SCREEN.

\* \* \*

### New Light, Optical Features of Wilson's Overhead Projector

H. Wilson Corp. reports a new overhead projector as "the first compact model to combine the high-intensity light output of a quartz-iodine lamp with the light distribution control of a true optical system (a condensing lens and mirror)."

According to the company, the "traditional" hot center surrounded by soft, dull edges has been eliminated, and a good brilliance is spread evenly across the screen.

The lamp is located to the rear of the case in a wind tunnel housing behind the condensing lens.

The H. Wilson Overhead Projector Heat from the lamp is confined to the housing and vented out by a 4" high pitch fan. A 650 watt quartz-iodine lamp provides approximately 1700 lumens on the screen and has a rated life of 10,000 hours.

The new Wilson overhead has a head that tilts 30°, a 10" x 10" stage, dial focusing, and weighs 17 lbs.

For information or demonstration, contact H. Wilson Corp., 54 W. 119th Street, Chicago 60621. Mention BUSINESS SCREEN.

Carousel AV-900 projector weighs only 7½ lbs.; has 2000 hour motor. Light, Compact "Carousel" is Latest from Eastman Kodak. A new light-weight, compact model of the Carousel slide projector has been announced by Eastman Kodak Company. At the same time, Kodak also introduced the Carousel Universal Slide Tray which accepts up to 80 thick glass slide mounts as well as all thinner types.

The Carousel AV-900 Projector weighs 10½ lbs., a reduction of 7½ lbs. below the weight of the Model AV-580 which it succeeds. It has a 2,000-hour motor, with an average life four times as great as the earlier audio-visual model.

Machine protection in unattended operation is provided by a circuit-breaker switch which automatically shuts off both motor and lamp if the projector becomes overheated. The projector has complete remote control and automatic operation features.

Model AV-900 incorporates a 100-watt DEK lamp and offers a choice of lenses: 3", 4" or 5" f/3.5; 5" f/2.8; 7" f/3.5; and 4" f/3.5 Zoom. It will also accept all other Kodak Carousel Projector accessories.

The Universal Slide Tray, which is supplied with the Model AV-900 projector, accepts all 2 x 2" slide mounts including those .125" thick. It fits all models of the Carousel.

Further data is available from the Motion Picture and Education Markets Division, Eastman Kodak Company, Rochester, New York 14650.

#### New "Port-A-Matic Sound 8" from Electronic A-V Devices

Electronic Audio-Visual Devices, Inc. has introduced an 8mm repeating sound motion picture projector with a 10" screen. The 17-lb. "Port-A-Matic Sound 8" sets up on any desk top and is

a completely self-contained unit.

Film can be run at both 16 and 24 frames per second, so up to 22 minutes of color and up to 40 minutes of black and white film can be shown. It can be repeated hundreds of times without removing the film magazine or re-threading the projector.

The all-silicon transistors in the custom amplifier are reported to give clear undistorted sound from whisper to auditorium volume (12 full watts of music power).

Port-A-Matic Sound 8 is recommended for industrial sales presentations, training programs, trade shows and other audio-visual applications.

Write the New Products Desk, 7064 Sheridan Rd., Chicago, Ill. 60626, for further details.

Execugraf 303; for cartridge-load showing of stripfilms with sound.

#### Execugraf 303 a Sound/Strip Projector With Many Features

A stripfilm projection viewing system, with sound, designated the "Executive" Model 303, has been announced by the Execugraf Corporation.

It features the Execugraf automatic drop-in film cartridge with up to 100 35mm picture frames, synchronized with a Fidelipac tape cartridge.

Sound tape is continuous loop and the interchangeable automatic film cartridge can be reversed to any picture in seconds. A presentation can be stopped at any point to insert a new film cartridge for detailed presentation without film and sound synchronization adjustments.

The Execugraf 303 utilizes a 500-watt light source for rear screen projection on its 10" x 7½" internal screen; with a flip of a switch it projects on a large screen or wall. The internal screen can be viewed from any angle without loss of brilliance, the company says.

Model 303 weighs 13 lbs. and has closed dimensions of 12" x 12" x 5". For information, contact the New Products Desk at BUSINESS SCREEN in Chicago.

## Our Clients Love Their Films . . .

THAT'S WHY THEY COME BACK TO O'CONNOR FOR MORE!

• The bulk of our business is repeat business. What better evidence of customer satisfaction could we have? They like our professional approach, our permanent-staff teamwork, the convenience and reliability of our company-owned studio and equipment. But most of all, they like the quality and technical excellence of the final results. Just a few of our repeat clients: U. S. Air Force, Taylor Wine Company, Commonwealth of Pennsylvania, Pennsylvania Bankers Association.

• Most recent productions include films for Landis Machine Co., Thomas Machine Mfg. Co., Charms Candy Co., Yark-Shiple, Inc., and the Pennsylvania Department of Public Instruction, among others. The latter is another example of repeat business, being the third series of educational films produced for D.P.I. in recent years. [The last series was selected over 85 contenders for nationwide ETV and commercial showing.]

## BUSINESS SCREEN EXECUTIVE

NEWS OF STAFF APPOINTMENTS AND A-V INDUSTRY DEVELOPMENTS

### 3M Photo Products Group Appoints Culligan Ad Mgr.

Robert E. Culligan has been appointed advertising and merchandising manager for the Photographic Products Group of 3M Company, according to a report from George J. Wachholz, group vice president.

Culligan will work with the Photographic Equipment and Optical division, the Photographic Film division including Dynacolor, Inc. and will have coordinating responsibility for Ferrania, recently acquired Italian photographic firm. He has been with 3M since 1956. ●

### Graflex Appoints J. E. Robbins as Market Development Mgr.

☆ Nathaniel M. Marshall, vice-president of marketing at Graflex, Inc., has announced the appointment of James E. Robbins as market development manager.

Graflex, a subsidiary of General Precision Equipment Corp., is promoting Robbins to the Graflex home office in Rochester to assist in the support of field sales and dealer organizations. He has been with Graflex since 1957, first as head of the company's Photojournalism Group and since 1961 as a district manager based in Memphis. ●

### Frank Bucci to Direct Eastern Sales for Pathe Laboratories

Frank P. Bucci has been named sales manager for the East Coast Division of Pathe Laboratories, Inc. Announcement of the appointment was made by Otis W. Murray, president of the national film processing company. ●

### Austin to Consult for Pathe

Chuck Austin, ASC, has joined Pathe Laboratories as a consultant to its marketing people. Formerly with the Mitchell Camera Corporation (for 15 years), he was recently re-elected president, Local 644 of the Cinematographers' union (IATSE), for his fourth consecutive term. ●

### Jack Lind is A-V Supervisor for Muller, Jordan & Herrick

Jack Lind has joined Muller, Jordan & Herrick, Inc. as a project supervisor in the New York company's audio-visual department. He was formerly an account executive at Benton & Bowles. ●

### Beatty Directs Marketing for Mutschmann Films, Paoli, Pa.

☆ George L. Beatty's appointment as vice-president of marketing for Mutschmann Films was reported by W. F. Mutschmann, president. Beatty has been associated with the Paoli, Pa., film producers for the past year.

Previously, Beatty had been regional sales manager for the Mechanical Dynamics Division of Cincinnati Milling Machine. He has also been a manufacturer's representative for firms in the machine tool and electronic controls field.

### Promotions at Sturgis-Grant for W. H. Terry, W. T. Moeller

☆ Two promotions at Sturgis-Grant Productions, Inc. have advanced William H. Terry to executive vice-president and Willie T. Moeller to production supervisor.

Warren Sturgis, president of the New York film company, announced their appointments.

Terry's career, prior to joining Sturgis-Grant in 1963, included six years as director of production for Louis de Rochemont Associates. Moeller, a cinematographer and film editor, also joined Sturgis-Grant in 1963.

### Jack Price is Vice-President of Vogue Productions, Louisville

Edward A. "Jack" Price, an 18-year veteran of Studebaker Corp., has been appointed Vice-President and General Manager of Vogue Film Productions, Louisville, Kentucky.

Price was formerly Director of the Motion Picture, Still Photography and Art Department of the automotive firm. He will be responsible for Vogue's overall operations and act as associate producer on specialized film projects.

In his announcement, company president Hal Vinson said Price's appointment is part of Vogue's expansion program, which will also include the building of a new shooting stage. Vinson said he will continue as producer, devoting more effort to sales and client relations.

### Film Counselors Elects Three as Vice-Presidents of Agency

☆ James P. Dalton, David J. Sheehan and Robert Silberglit have been elected vice-presidents of Film Counselors, Inc. Dalton's

charge of the distribution; Sheen heads project planning and Berling supervises production for the film agency.

\* \* \*

**Alvin Hall Directs Marketing for the Metro/Kalvar Company**

Alvin W. Hall, Jr. has joined Metro/Kalvar as Director of Marketing. From Metro/Kalvar offices at MGM studios in Culver City, Calif., he will oversee the promotion of products related to motion picture and television industries.

His background includes two years as a Dallas Power and Light Co. executive and over 20 years of active duty with the U.S. Navy. His last assignment before retiring as a commander in 1962 was as Executive Officer of the Naval Photographic Center, Washington, D.C.

\* \* \*

**Halle Now TV-Radio Producer at Ketchum, MacLeod & Grove**

William V. Halle has been promoted to TV-Radio Producer at Ketchum, MacLeod & Grove, Inc., advertising and public relations agency.

Halle joined the agency in June, 1963, and has been an assistant producer. Previously, he was production manager of WNEM-TV, Community Broadcasting Co., in Saginaw, Mich.

\* \* \*

**Sickles Holding "Open House" at New Arizona Headquarters**

To celebrate the move of Sickles Sales and Service Company to new headquarters, Ralph Sickles is holding an extended "Open House" through April 15.

He is inviting his friends and customers across the U.S. and Canada to visit Scottsdale, "the West's Most Western Town." Sickles has ordered to send colorful travel folders of Arizona, Phoenix, and Scottsdale to anyone who writes.

**Camera Veteran Jack Etra to F&B/Ceco as Consultant**

F & B Ceco Inc. recently announced the appointment of Jack Etra, veteran cameraman, as a technical consultant at their Florida branch.

Etra began his career in 1927. He has been the Director of Cinematography on Jackie Gleason's TV series *The Honeymooners*, and his most recent short subject, *Wonders of Miami* (1964), has been nominated for an Academy Award.

In another recent announcement, F&B Ceco reported the expansion of their Florida facilities. They have acquired the entire 15,000 ft. building at 51 East 10th Ave., Hialeah, which doubles their floor space.

The company has added a preview theater, a 50' x 100' sound stage, equipped with lights, cameras, dollies, etc. and a 22' ceiling height. Equipment has been overhauled and increased, and the staff of technicians has been enlarged.

The Florida branch maintains a direct teletype link with N. Y.

\* \* \*

**Myrna Spector to Jack Pill's**

Jack Pill's Camera Equipment, Hollywood, Calif., has appointed Myrna Spector to its sales staff. Miss Spector has been associated with S.O.S. Photo Cine Optics, Inc. for the past five years.

\* \* \*

**Matthews to Reeves Soundcraft Division as Sales Representative**

Robert A. Matthews has been appointed a sales specialist by the Reeves Soundcraft Division of Reeves Industries, Inc. In his new position, he will be responsible for the firm's full line of sound recording, professional and videotape products in the New York metropolitan area. He has been on the sales staff of Reeve's Copy Products Division.

**New Line of Closed-Circuit  
TV Equipment Offered by RCA**

RCA has introduced a new line of closed-circuit television equipment reported to have features previously available only in more expensive, broadcast-type apparatus.

Basic product in the new line is a fully-transistorized vidicon camera, type PK-301, which is designed for continuous operation over long periods without correction of such functions as focus and contrast. The camera, a non-viewfinder type, is priced at approximately \$2,500.

The company notes that the new line is "professional television equipment" and will include newly-styled TV monitors, solid-state distribution amplifiers, switching equipment and other items for originating and distributing TV signals.

The stability afforded by all-solid-state design makes the new camera ideal for surveillance and for assignments at difficult-to-reach locations, an RCA official noted. The camera is 6x6x10" and weighs 16 lbs.

It features modular construction for flexibility and simple maintenance, and is available in 16 different configurations, such as battery operation and remote control.

Operating controls are roughly comparable to those found on home TV receivers, including brightness and "focus" knobs and a "day-night" switch for picture contrast.

Special housings are available for difficult environmental conditions. Technical information is available from RCA, 30 Rockefeller Plaza, N.Y. 20, N.Y. Mention BUSINESS SCREEN.

\* \* \*

**Ampex Unveils Light, Low-Cost  
Recorder and New Videotrainer**

Ampex Corp. is marketing a compact Videotape television recorder and a mobile closed-circuit video recording system at less cost than comparable equipment previously available.

The new Ampex VR-303 Videotape recorder weighs 95 lbs. and records live action and sound or television programs on magnetic tape for immediate playback through conventional television receivers. Price is \$3,950, compared with \$10,000 to \$12,000 for previously available recorders of this type.

The Ampex Videotrainer combines the VR-303 recorder, an Ampex television camera, television receiver, tripod and microphone in a complete mobile closed-

**equipment**

circuit recording system the size of a tea cart. It is designed for use in education, industry, medicine, sports and other fields. Price: \$6,000 to \$7,000 depending on choice of camera.

The VR-303 records up to 30 minutes of program material on 12½" reel of Ampex video tape. The tape moves past fixed recording and playback heads at a speed of 100" per second. Sound is recorded simultaneously on the tape.

The new recorder operates on ordinary household current and is available in both 60-cycle and 50-cycle versions for use in all parts of the free world.

\* \* \*

**Portable 16mm Magnetic Film  
Recorder Introduced by Ampex**

A portable, synchronous sprocketed 16mm magnetic film recorder has been introduced by Ampex Corporation. According to the company, absolute lip-sync can be achieved with the new Amega-M-3 with any camera using a 1/50 cycle output generator, or with cameras driven by synchronous motors.

The recorder, which uses rechargeable nickel-cadmium batteries, can be used without any external power source or frequency regulation. A built-in 60 cycle transistorized frequency generator and a tuning fork keep it at a constant frequency — accurate to a minimum of .0015%, the company says.

The Amega M-3 is reported quiet enough to use on sound sets, and the stability of the recorder drive enables it to be operated in a horizontal or vertical position, in the widest temperature extremes.

The M-3 provides 10 minutes of continuous operation with 400' of 16mm magnetic film. The complete unit weighs 22 lbs.

Specifications and details are available from Ampex Corp.

Ampex 16mm magnetic film recorder.

### Graflex "Messenger" Combines Record Player With "Compact"

Graflex, Inc. has introduced a  
Graflex "Messenger" sound film-  
strip projector. It consists of the  
Graflex Compact remote controll-  
filmstrip projector and a 4-  
speed record player and integral  
amplifier.

The Messenger is completely  
self-contained in a vinyl-clad steel  
carrying case. The removable

cover of the case is finished white  
and serves as a 12" x 16"  
screen. There is also storage area  
for the two 12" records in jackets  
under the cover.

The filmstrip is synchronized  
with the record commentary with  
inaudible recorded 30-50 cycle  
tone. A "pause" control makes  
it possible to stop the record and  
view the picture on the screen to  
discuss a specific point. When the  
presentation continues, it begins  
immediately where the record left

The record player handles all  
standard speed records (16, 33,  
45 and 78) with a lift-up insert  
adapter for 45 rpm records. Rec-  
ords up to 12" are accepted.  
For additional data write: Gra-

flex, Inc., 3750 Monroe Ave.,  
Rochester, New York 14603. •

### Beseler "Super Porta-Scribe" a Portable Overhead Projector

Charles Beseler Company has  
added the Super Porta-Scribe  
Model 17575 to its line of port-  
able overhead projectors.

This model is designed to accept  
accessory attachments accommo-  
dating acetate or cellophane writ-  
ing rolls which move either from  
left to right or in a vertical pro-  
gression.

Model 17575 accepts 10" x 10"  
transparencies and can be used in  
fully lighted rooms. The projec-  
tion head has a 3-element 3½"  
diameter x 12½" f3.5 fully cor-  
rected lens which projects screen  
images ranging from 39" square to  
86" square at distances from 4'  
to 9'.

An Instant Automatic Lamp  
Changer for changing lamps with  
a flip of a switch is featured. The  
unit, which is housed in the light-  
box, also permits use of lamps of  
different intensity for regular pro-  
jection and for special situations  
or emphasis.

For information write the Char-  
les Beseler Co., 219 South 18th  
St., East Orange, N.J. •

\* \* \*

### Buhl's "Space Saver Junior" is a New Overhead Projector

Buhl Optical Co. has introduced  
the Space Saver Junior, an over-  
head projector with a wide-angle  
lens system reported to cut projec-  
tion distance by 15%.

The model features a slim-head  
silhouette, that is no wider than  
a man's hand. The lens used is a  
fully corrected and coated, 3-ele-  
ment, 4" diameter system with a  
focal length of 12.5".

Requests for additional infor-  
mation should be addressed to the  
Buhl Optical Co., 1009 Beech  
Ave., Pittsburgh, Pa. 15233. •

## Values for Judging the TV Commercial

Criteria for Film Jurors from Agency Executive Walter Weir

**T**HE RAPID PROLIFERATION of film awards of one sort or another in the past few years, has made it fashionable to discount them as just so much wallpaper — to insist that the only *valid* reason for consideration of the merit of a sponsored film or TV commercial is as a device to sell merchandise — and that no other criteria are germane.

To those harboring these convictions, we would like to call attention to some recent cogent comments by Walter Weir, of West, Weir & Bartel Advertising, and Chairman of the Council of Judges of the 6th Annual American TV Commercials Festival.

Speaking at the orientation breakfast for judges of the festival at the Waldorf Astoria on February 16, Mr. Weir had this to say:

"I am delighted to see so many of you not only willing but even eager to participate in what might appear to be just another of the many award-giving promotions with which so many industries involved with communications are associated.

#### One Goal: to Improve Quality

"All too many of these are directed towards promoting the utilization of the services backing them. This one is not. This one is dedicated towards improving the quality of the TV commercials the advertising industry produces and the viewing public sees.

"I am most grateful for your cooperation. May I point out that the purpose of the Festival is to utilize your sound professional judgment in helping the most intimate advertising messages to — first — win the acceptance of those who view them and — second — attain the degree of effective persuasion that those who pay for them expect.

"May I warn you, as one who has participated in the judging of other award-making activities, that no matter how carefully you judge, you will quite possibly be criticized for putting aesthetic values before practical values. You will have cited to you commercials you found abominable which, nevertheless, sold an immense amount of merchandise.

#### Principle of Successful Selling

"Do not be disturbed. Please believe me — there are few things so practical, in terms of dollars and cents, as aesthetic values. I do not say this as a visionary. I say this because you cannot offend public

taste and still expect an enthusiastic and continuing endorsement of your product. I say it knowing that public taste goes up a notch with every college graduate, with every additional high school graduate, who enters our economy and these, today, are legion.

"I do not subscribe to the school that believes a TV commercial must above all be entertaining. I know all too well that a TV commercial must, through merchandise sold, justify the investment made in it. *I believe, however, that the more agreeable the selling message is made, the more the commercial ultimately returns on the investment made in it.*

#### Sales Volume Not the Measure

"I know that those of you who judge these commercials will think largely in terms of their persuasiveness. You may fail to acknowledge a commercial that, for one reason or another, sold a vast amount of merchandise. Recognizing such commercials is not the purpose of the Festival.

"The purpose of the Festival is to help point the way to commercials that accomplish their practical end pleasantly. In judging you will be very much in the position of a sales manager who, interviewing salesmen, does his best to determine those who will be able to sell the company's product without losing respect for either the product or the company. This is the chief contribution the Festival hopes to make to advertising."

This year's festival, attesting Mr. Weir's remarks, drew a record number of entries. 1,487 commercials (91 more than in 1966) were submitted by over 700 national, regional and local advertisers, their agencies, production companies and television stations. This despite a raise in entry fee that was calculated to reduce the number of entries and thus facilitate judging.

#### Announce Awards on April 9th

CLIO statuettes will be presented and the top award winner screened at the Sixth Annual Awards Luncheon in the grand ballroom of the Waldorf-Astoria on Friday, April 9. Regional festivals will follow during April and May. A long-hoped for foundation to take over and operate the project on a non-profit, industry-wide basis is being developed, and hopefully will be announced at the April 9th festival.

# American Airlines Premieres New Pictures

Films on Cities, Sports and Air Freight Join Growing Library

FIVE NEW FILMS on sport fishing, historic landmarks and vacation areas in the United States have been added to the expanding public relations film library of American Airlines, and are now on release, it has been announced by Red Sutherland, American Airlines Director of Public Relations Services. The films, in 16mm and color, are available to television stations, travel agents, community organizations, clubs and resorts through Association Films and through Modern Talking Picture Service on a free-loan basis.

The American Airlines library now totals 17 films in all, running from 3½ to 30 minutes in length. "The major purpose of our film program," said Mr. Sutherland, "is to generate interest in travel and convey to the viewer American's leadership in commercial aviation. The millions who have seen American's films indicates progress in this direction. The acceptance by writers and critics in the film, advertising and broadcasting trade press, television management and producers is an indication that the concept on producing the industrial film might also be in the right direction."

The five newest productions include *Kings, Cod and Stripers*, which shows saltwater game fish fighting battle with saltwater fishermen in some of the nation's best fishing spots; *Early America No.* featuring three landmarks recreated from America's past: Mystic Seaport in Connecticut, Greenfield Village in Dearborn, Mich., and the historic Alamo in Texas.

Press preview glimpse: Robert Finchout, Association Films (left) and Edward Rogers, Modern Talking Picture Service (right), congratulate John Bain, new manager of promotional services at American Airlines.

There is *America's Natural Wonders No. 2*, which highlights three scenic wonders at Big Bend National Park, Texas; Cape Cod National Seashore, Massachusetts; and Point Lobos National Park, California.

*Three American Cities* and *Astro-Freight* are the fourth and fifth films. *Three American Cities* takes a close look at the metropolitan aspects of American living and explores the personalities and moods of Los Angeles, Boston and Detroit. *Astro-Freight* is a documentary that captures the tempo and drama of air cargo with an original musical score by Duke Ellington and his orchestra.

*Astro-Freight* was produced by Sidney Stiber Productions; the other new films by Larry Madison Productions.

## Color Film Pays Tribute to San Francisco Advertising Art

✧ The Art Directors and Artists Club of San Francisco has released a 16mm sound, color motion picture containing award-winning TV commercials, billboards, magazine ads and other examples of advertising art.

The eight-minute documentary pays tribute to this year's winners of the San Francisco Medal of Advertising Art. Produced by Fraser Productions of San Francisco, the film is a "play-within-a-play", set in a typical Club luncheon meeting.

Prints may be obtained by contacting either the Art Directors Club at 576 Sacramento Street, Room 403 or Fraser Productions, 38 Hoteling Place.

## Trends in the BUSINESS of Audio-Visuals

### Kodak's 1964 Sales Up 12%: Net Earnings Increased 30%

☆ Eastman Kodak Company sales were up 12% and earnings up 30% in 1964. The firm's chairman, Albert K. Chapman and president, William S. Vaughn, included these figures in a recent financial report.

Consolidated sales of the company's U.S. units last year reached \$1,237,176,239 and net earnings were \$187,248,263. The 1963 sales and earnings figures were \$1,106,670,760 and \$144,428,503, respectively.

The earnings were equal to \$4.64 per common share, against \$3.57 in 1963, based on the 40,301,359 shares outstanding at the year's end. Net earnings were 15.1% of sales.

Kodak reported that sales in the professional, commercial, and industrial fields made good progress during the year. Gains were made by most professional films; products for photofinishing and the graphic arts; microfilm and information handling equipment; aerial film; and photo-recording materials for industry and science.

Kodak professional motion picture products were well received by business, entertainment, documentary film makers, and in the television industry. Kodak reported that "about 80% of the programs shown during prime TV viewing time are now on film."

Sales to export dealers and to Kodak associate companies outside the U.S. totaled \$170.1 million, an increase of 21%. Exports accounted for about 14% of total sales. Outside the U.S., sales by Kodak associate companies advanced 15% to \$436.4 million in 1964. Their net earnings were \$31.5 million, and they paid dividends and royalties totaling \$18.2 million to the Eastman Kodak Co.

During 1964, Kodak carried out its largest capital improvement program to date, investing more than \$86 million in U.S. facilities to improve or add equipment, raise product quality, hold down costs and make new products. The 1965 budget includes \$109 million for improvements and additions to manufacturing and marketing facilities.

At the end of the year, the company's U.S. employment was 50,800, with 33,600 employed in Rochester, N.Y. World-wide employment was 81,500. Nearly 135,000 share owners were recorded at the close of the year.

### MPO Sales Increase of 21%: Over \$12 Million in Past Year

☆ MPO Videotronics, Inc., a major producer of TV commercial and audio-visual communication for industry, has issued its annual report for the fiscal year ended October 31, 1964.

The report shows sales for the 1964 fiscal year at a record high of \$12,277,200, compared with sales of \$10,088,773 for the previous year, an increase of 21.7 percent.

Earnings after taxes in 1964 were \$252,297, including a special credit of \$89,011 resulting from the capital gain from the sale of the company's half interest in Eastern Effects, Inc. In the preceding fiscal year net income after taxes was \$206,789.

\* \* \*

### Technicolor Income, Sales Up Sharply for New Records in '64

☆ Technicolor, Inc. and its subsidiaries ended their first half-century of operations with the highest net sales and net income since its founding.

Melvin H. Jacobs, president and chief executive officer of the company announced recently that net income for 1964 was \$4,603,060 or \$1.46 per share compared with \$3,688,079 or \$1.18 per share in 1963. Net sales for 1964 were \$108,521,172, compared to the previous year's \$86,239,292.

\* \* \*

### 3M Company Sales, Earnings Set New Records in Past Year

☆ The 3M Company has reported record sales and net income for 1964. 3M sales have set records every year since 1938 and net income has set new highs annually since 1951.

In a preliminary annual statement, the company said its worldwide sales rose to \$903.9 million up 11.2% from \$813.2 million in 1963. Net income climbed \$102.3 million from \$93.2 million in 1963. Earnings per share came to \$1.92 compared with \$1.75 in 1963.

All figures for 1963 have been restated to reflect a pooling of interests with Ferrania, S.p.A., the Italian photographic firm acquired by 3M in July, 1964.

Dividends paid to stockholders in 1964 climbed to a record \$5 million compared with \$47 million the previous year. This amounts to \$1.00 and 90 cents per share, respectively. Last year was also the 49th consecutive year t

has paid quarterly dividends. Sales volume overseas, including export, in 1964 rose to \$275 million, an increase of about 20%, the company reported.

Investment in new domestic and overseas plant facilities came to more than \$56 million. The expansion program includes two plants which were completed during 1964 at Camarillo, Calif. One manufactures sound and instrumentation recording tapes and the other, precision recording-reproducing equipment.

**Da-Lite Adds 70,000-Sq. Feet Plant in Warsaw, Indiana**

Da-Lite Screen Co., Warsaw, Indiana, has recently begun construction of a 70,000-square-foot plant addition, according to George Lenke, Jr., president.

Lenke said the addition is expected to be completed by May, 1965. He noted that Da-Lite will then have 183,000 square feet under one roof, making its facility the world's largest projection screen manufacturing plant.

This is the second expansion program announced by the company in the last 12 months. In 1964, a 13,000-square-foot addition was completed.

Da-Lite started in Chicago with 15 employees in 1909. After extending Chicago facilities, the company moved to Warsaw eight years ago. It currently employs over 200 persons.

**Open Rose-Magwood Facilities in California and in Canada**

Jim Rose and Howard T. Magwood have announced the formation of Rose-Magwood Productions of California, Inc. and Rose-Magwood Productions Ltd. in Canada.

Both companies were opened to facilitate filming in their areas. The California company will have offices at General Service Studios. Art Reynolds, a Hollywood commercial producer-director, will be in charge of West Coast productions.

Walter Magder and Sy Beard of RMP, Ltd., will be in charge of the Canadian company of RMP, Ltd. which will be located in Toronto. They will act as producers. Ernesto Caparros will be available as Director of Photography.

Directing for both new companies will be handled by Lee Goodrich, Larry Doheny, Howard T. Magwood or Jim Rose of RMP, Ltd., New York City.

**Technicolor Budgets \$2 Million for Worldwide Plant Expansion**

☆ In 1965 — its 50th anniversary — Technicolor plans to spend over \$2 million in world-wide plant expansion. Their program was announced recently by Paul W. Fassnacht, vice president of International Operations, Motion Picture Division.

He said capital expenditures in Hollywood will approximate \$800,000. This will cover the addition of two new Dye Transfer Color processing channels to the Hollywood plant, and a three-story addition to Plant #4 for additional work, storage and personnel areas.

The amount will also include the reactivating and modernizing of Plant #5, but will not cover the cost of the new Plant #20, now being constructed at Universal City for processing television film.

The Technicolor Limited Plant at Harmondsworth, Middlesex, England will incorporate the latest technology for continuous film processing flow lines, at a cost estimated at \$700,000.

In Italy, The Technicolor Italiana plant near Rome will install new processing equipment with building extensions. Technicolor said the cost will run approximately \$500,000.

**Maier-Hancock Ships 12,000th Hot Splicer to Camera Mart**

Maier-Hancock Sales Co. announced the sale of their 12,000th portable hot splicer last month. According to Art Bolt, company vice-president, shipment was made to The Camera Mart, in New York City.

According to company sales figures, the splicers for 8, 16, and 35mm film are used by motion picture and TV studios, schools, special study groups, industrial plants and government agencies.

### New Correlli-Jacobs Offices House Expanded Music Library

Correlli/Jacobs Film Music, Inc., has moved to new offices at 25 West 45th Street, New York. The new premises will house one of the largest background music and sound effects libraries in the country. Also added are enlarged facilities for audition and music editing.

### 3M Sets Magnetic Tape Lines In Revere-Minicom Division

The 3M Company is consolidating all activities in the magnetic tape recording equipment field into a newly-formed Revere-Minicom division.

All facilities and personnel of the former Revere-Wollensak and Minicom divisions are being assigned to the new operating unit, the company announced. R. J. Gavin, vice president and general manager of the Revere-Wollensak division, will hold the same positions in the new division. His headquarters will remain at 3M's executive offices in St. Paul.

Products of the Revere-Minicom division include the Wollensak line tape mastering equipment.

### Positive Print Identification Goal of New Branding Method

The Film Identification Bureau is previewing a new method of "branding" 16mm film prints for positive owner identification.

Services of the FIB, a Division of the Jack C. Coffey Co., will be described to those attending the meeting of the NAVA Film Council in New York City on April 21-22.

This service uses a patented, precision machined code press and matching plates to emboss small indentations on the frame lines of film. The never-duplicated code cannot be copied. It is designed to help film libraries, producers, schools and others prevent loss, straying, theft and print-switching.

Each subscriber leases the code press and plates to mark the films

Code press for film identification.

in his library, and registers his brand with FIB for quick, positive establishment of ownership.

The marking is good for the life of the print and can be embossed every 75-100', in addition to the leader, so it will be impossible to remove without ruining the content of the 16mm print.

### Comments on Sound Slidefilms Available from Colburn Lab.

Colburn Comments on Sound Slidefilms is a new stiff-cover booklet designed to serve as a basic guide and dictionary for users of visual presentations.

Published by the Geo. W. Colburn Laboratory, Inc. of Chicago, the booklet uses charts, illustrations and a glossary of basic terms to describe the use and techniques of filmstrips.

Production areas covered include the lab steps of putting the picture on film, preparing pre-print material, sealing to proper field area, making masters, and the use of Answer Prints. The creative phases and the advantages of using sound slidefilms are also discussed.

### Horizon Photo/Optics Agent for Liesegang Photo Products

Ed. Liesegang, Dusseldorf, West Germany, has appointed Horizon Photo/Optics, Inc., New York as its agent to create a market for Liesegang photographic products, including slide and opaque projectors for the industrial field.

Liesegang, founded 112 years ago, specializes in enlargers and projection equipment, going back to the oil-lamp illuminated magic lanterns which the company introduced in Europe in 1875.

Horizon Photo/Optics will introduce the Liesegang Jax opaque projector, Synchro 8mm projector, and Automat 35mm slide projector to the American audio-visual market in the near future.

SOMEONE RECENTLY LIKED television directing to surviving in an old-fashioned Indian fight—"Keep your eyes open for the nearest horse, 'cause sooner or later the one you're ridin' is gonna be shot out from under you."

There was a time we directors listed our credits thus:  
STAGE: directed "Emmy's Little Panic" thirteen times in stock off-Broadway (Atlantic City is considered "off-Broadway" when you're listing credits . . . )  
RADIO: 10 years of potboilers for Air Features (or Ziv, or B.B.D. & O., or Blackett-Sample-Hummert, or whatever).

TELEVISION: (and here we shouted with all the self-glorification we could muster): "one full season as director for "Wide, Wide World," NBC-General Motors, directing up to thirty-eight cameras and the combined talents of Dave Garro-way, Dave Brockman and The American People!!!"

COMMERCIALS we offered with a parenthesis around them; and when it came to FILM, we embellished with all the care and honesty of a PR man selling a horror movie. INDUSTRIAL FILM credits we gave only in the dead of night to those "with a need to know."

**Unarmed and on the Battlefield**  
Then someone shot another horse out from under us. With contract changes and recession, the television networks dropped staff directors, and we found ourselves unarmed on the battlefield of free-lance directing. What's more, all the settlers were cueing up for horses. Mother Network had finally sent her young ones out to become big scouts, and the Indians sure did know how to hurt a fella . . . For the wounded, may I point to another horse?

**ZOOM IN TITLE: Whatever Happened to Baby Fox?**

or

*Can A Director, Trained In the Ways of NBC, Broadway, and Motion Pictures, Find Happiness in Industrial TV and Film Presentation?*

**Our Tasks at North American**  
In Downey, California, the Space and Information Systems Division of North American Aviation has been sold on using television as a) an industrial tool; b) a management communications aid; c) a new training medium.

At S & I D Television we are producing network caliber TV with broadcast standard equipment. We have two very active studios, three installed video tape recorders and a portable unit, plus remote equip-

# What Happened to Baby Fox?

Can a Director, Trained in the Ways of NBC & Broadway, Find Happiness in Industrial TV and Film Presentation?

by Van Fox, as told to Dr. H. O. Dyrenforth

ment which allows us to cover events in areas far removed from our studios. Our cameras are Vidicons—because of lower cost and higher reliability. We have four channels over which we can direct our message into a specific area over any of more than 500 outlets.

There are more than 60 miles of cable, and, in addition, we use lease lines or microwave to reach other areas of the vast North American enterprises. We have our own TV micro-wave installations at the Seal Beach, Slauson, and Santa Susana facilities. We also have a complete Apollo sound network with leased telephone lines; Telefax is used to coordinate with Cape Kennedy, Tulsa, Oklahoma, and White Sands, New Mexico. At Downey, we then televise the same telefax visuals over our video networks.

**How to Accept the "Stranger"**  
"So what's the problem?" you may ask. Just one of man's oldest, to accept the stranger and let him put his shoulder to the same wheel. You hear comments like the following: "Industry doesn't need Cecil B. DeMille productions . . . Why do you need music? . . . Why can't you just let the man stand up and talk? . . . This is no place for silly jokes . . . Too much Holly-

wood . . . You don't have an engineering degree!"

But then—we've all run into this before. Remember these? "Those are Chicago credits—so what've you done in New York? Sure, you've got good TV credits, but where's your film credit?"

**And What We Have to Offer**

The facts are that industry *does* need to communicate its ideas in a more vital, visual fashion for added clarity and lasting impression. And industry *does* need a new tool with which to educate workers in proper safety practices, or work simplification, or motivate them to high reliability efforts or mechanical excellence.

And we, who come from show business, have had to develop a capacity to work with any audience, to understand its needs, to organize a presentation, and give it all we've got! We are schooled to please clients and make friends in doing so. We have graduated from our own colleges and drama schools. We have mastered formats from Aeschylus to Albee, and language from Burbage to Brando. And we have gone through the school of hard—very hard—knocks.

**You Don't Just Push Buttons!**

But it still wasn't easy. There are too many people in industry who wouldn't think of buying an expensive piece of equipment, like a computer, and turn it over to an amateur to operate it, but who believe that motion picture or TV cameras by themselves, with only a crew to run them, can tell a story.

What gave closed-circuit TV its start at the Space & Information Systems Division of North American was, quite simply, a need—a desperate need—a company that had been awarded two of the largest contracts ever given to American industry: the Apollo and Saturn S-II contracts, grew in one year

**Note About the Author**

In his 15 years with NBC, New York, Van Fox directed many award-winning programs, most notable of which was *Wide, Wide World*. He now works in Hollywood, where he free-lances as a TV, film, and stage director, teaches "Industrial Television" at Columbia College, and has produced and directed over 30 industrial programs for S&I D Television. •

## What Happened to Baby Fox?

(CONTINUED FROM PAGE 207)  
from 8,000 to 30,000 employees! Information, communication and coordination needs multiplied a thousandfold.

Luckily, the Founding Fathers of S&ID Television, Earnest Frankel, a fine film writer-director, and Lewis Gomavitz, former producer of *Kukla, Fran and Ollie*, had the good judgment to include in their programming staff people with impressive credits from NBC, CBS, ABC and the Hollywood film factories—in the firm belief that *experienced* program people make the difference between a successful and unsuccessful use of the medium.

### Help for Training, Motivation

There are many areas in which the product of our TV & Film Presentations Department is being used: Instrumentation, Reports to Management, Communications, Proposals, but the most interesting ones, in my opinion, are Training and Motivation.

"When business or industry is at the break-even point on a given project—that's when training can help," said one of the training experts of my acquaintance recently. He further explained that the cutting of costs depends on more efficient work force—and often efficiency can be increased only by training. The government recognizes this, to the effect that many of its contracts actually *stipulate* training programs.

### The Organization of Material

The S&ID Manager Development & Training Department has been one of television's most consistent users. The training people had organized their material well, but only for the classroom, and in most other areas, such as Safety Practices, Work Simplification, High Reliability or Mechanical Ex-

cellence, there was no organized material whatever. So we had to adapt and create, we had to originate new teaching formats, techniques and devices.

There were many questions we had to ask of our requesters (company English for "customers"), such as: What is the problem? Who is the audience? What attitudes will we meet—sympathetic, apathetic, antagonistic? Are there intra-mural politics? Where is the material? Is it complete, well-organized and accurate? What is the language and the social or educational level of our audience?

### We Have to Have Right Answers

If the customer or the training expert did not have the answers, we had to find out for ourselves. We were persistent. We made a concentrated effort to analyze our audiences, *their* needs and *their* level of acceptance. When they didn't like music, we examined the music we had used, and when we were certain that we had used it well, we continued to use it.

When we re-examined our jokes in the light of genuine understanding of the company's needs, we often agreed that they were not so funny after all, and treated our subject with more respect. Sometimes, we found light treatment which did fit, but it was far less often than we had thought. We researched the engineer and studied his frustrations, his likes and his dislikes. We analyzed the "pride appeals" of our audiences.

And in doing all this, we expanded our customers' and our audiences' parameters, too. When they said something was "too Hollywood," we explained that dramatizations of problems and showing attitude changes of people was called *Motivation*, and that information is assimilated and retained better when it is visualized.

### What Will Audiences Remember

When we tested audiences and proved that they remembered the lesson, objections gradually diminished, and many came to see the value of this type of instruction. In short, both parties learned, and the experience was mutually beneficial. We now ask a new question—"Just what do you want the audience to remember?"—and it surprisingly all-embracing.

We are expanding our applications daily: it is rewarding to see how helpful this tool is to engineers on the test stand, and to see the light of acceptance come into the eyes of a man when he realizes

how his eyesight has been extended and his memory has become 100% perfect.

When a first-line scientist addresses an audience here, we have the tape to replay for other North American audiences. When NASA, Air Force, or other government officials come for inspections, we use our television magic carpet to transport them faster, further, and into more areas of interest than ever before.

**Programs Speed Up the Work**  
Television allows supervision to communicate more thoroughly with all levels and speeds up the work. Our 86 produced instructional programs alone have resulted in millions of dollars in savings of time and effort.

Just one more outstanding example: One day last week, word reached us from top management that there had been some difficulty with the reading of engineering drawings, and that a new policy was to be effected. That same afternoon, I as the director, the writer and the supervisor of graphics for the proposed program, met with the requesters, obtained the information and decided on the format.

By 6:30 writer and graphic artist went to work. At 8:00 A.M. the next morning, a read-through of the first draft took place. By 9:00 A.M. graphics and other visuals, 2 in all (!), were ready, and final revisions of the script had been made.

At 9:30, lighting and setting up began on the sound stage. At 10:30 the final revised script had been xeroxed and distributed. At 11:00 A.M., rehearsal began on stage. By 1:30 that afternoon, I had the show taped, and editing was completed by 6:00 P.M. And the next morning at 9:00 A.M., the 15-minute program was shown to a selected gathering of 1,500 engineers.

**Timetable for Written Word**  
Now let's compare this to the time it would have taken for the same material to be distributed in written form, keeping in mind that the urgency and immediacy of television would be missing here:

a) writer is briefed, gathers additional information from experts, writes rough draft . . . . . 3 days;  
b) rough draft is approved by management (optimistic) . . . . . 1 day;  
c) revised and approved draft goes to typing pool and is typed . . . . . 1 day;  
d) retyped draft goes back

to writer for proof, and is turned over to Publications for final typing . . . . . one day; e) Reproductions runs off 1,500 copies by offset or multilith, collates, staples and binds them . . . . . two days; f) copies are distributed to engineers . . . . . one day; g) engineers read material (optimistic estimate) . . . . . two days.

**Not Just Time: Getting Thru!**  
In other words, it would take at least 12 working days for the information to reach the consumer in written form, while TV did the job in 38½ hours or 1½ days—and had the great advantage of undivided audience attention and the impact of a "live" communicator, instead of the overused and often disregarded printed word.

Now—this is not a success story. We are still being asked — "so what have you done lately?" But that's all right with us — we're here to serve. The theater is ours, and no good writer, producer, director or performer could ask for more. If you want to get into this new television game, don't approach it with less than a desire to learn a new language called *Industry*.

**We Respond to the Challenge**  
It's a challenge, and—to wave the flag a bit—it's helping to make this country great. The theater man has always wanted to respond to his time and place, but he has always had to be tremendously skillful in selling himself into the position to do the job . . . . Don't expect it to change.

\* \* \*  
**A/V Dept. of General Aniline Offers Transparency Brochure**  
A new brochure describing a set of eight transparencies on the subject of overhead projection has just been made available by General Aniline & Film Corporation.

The transparencies, which show how conventional and overhead projectors work, describe the advantages of overhead projection in both lighted and unlighted rooms. They show a little-known but highly useful formula for determining letter height in preparing transparencies and describe the flexibility of overhead projection. The transparencies are 10 by 10 inches.

Further information and a copy of the brochure may be obtained from the Audio Visual Department, General Aniline & Film Corp., 140 West 51st St., New York 10020.

perfection in projection since 1909

COMMENTING ON THE RESULTS of the 5th International Industrial Film Festival, the publisher of BUSINESS SCREENS hoped that U.S. business would view the category award-winning films to study their techniques and note the differences between what "goes well" at home and what "won't go" overseas. In a recent issue Albert Amateu of the Institute of Foreign Languages pleaded for an "Overseas Markets Workshop" for U.S. sponsors and producers.

International trade is a multi-directional affair and, believe me, there is just as much need for the European and other trading nations to examine the "go" and "won't go" aspects of their own industrial films.

#### Business Can Study Medium at Festivals

At the moment the annual International Industrial Film Festivals offer the only opportunity for this vital study, but they are attended only by a handful of specialist film makers and those industrial executives who have already developed a keen interest in film as an industrial communications medium, and who are already aware that there ARE problems to be solved.

For the majority of sponsors, experience is dearly bought at the cost of the "won't go" film and its distribution, unless they can learn from reports on foreign trends issued by the Industrial Audio-Visual Association in U.S.A., the British Industrial Film Association and equivalent industry-oriented bodies in France, Germany, Italy and Sweden.

#### Producers May Learn What Works Abroad

Film producers have an even greater need to study techniques of winning buyers in export markets — as a service to their clients — and as an insurance against want, for there is no better way of going out of business than making films which are consistently rejected by audiences.

First, I should explain that, like the exposure meter, "readings" at the international festivals should not be followed blindly. They offer an excellent guide, but winners are not always the most successful films for industry.

Secondly, even in the area of export marketing, some sponsors and producers may unwittingly find themselves more concerned with the art, the novelty or the entertainment value of their films than with their motivational value. It may be heresy to question Bert Haanstra's *Glas*, probably one of the internationally best-known and loved industrial movies ever made, but has there ever been an assessment of the good it did for the Dutch glass industry?

Thirdly, many film makers and critics cling to a widely held belief that there was once a golden age of sponsored documentary film,

#### FROM ROBINSON P. RIGG'S VIEWPOINT\*

which has been betrayed by present day commercialism — to which they look back, rather than forward to the reality of international communication and understanding.

#### Recalls Documentaries of a "Golden Age"

Edgar Anstey, President of the International Jury at the 5th International Industrial Film Festival in London last year, was a pioneer producer in this mythical golden age — and this is what he has to say about it:

"In the thirties . . . enlightened industrial public relations officers were already conditioned to believe that they should give attention to what was *really* happening to the public with whom they were required to relate . . . So it came about that I made films on slum housing and malnutrition under the auspices of the gas industry, and Paul Rotha and Basil Wright looked at the peoples of Africa and Ceylon on behalf of Shell-Mex & B.P. and the Ceylon Tea Propaganda Board, respectively."

#### Great Films: Which Too Few Ever Viewed

Anstey continues that it would be a mistake to think that these "golden age" sociological films represented a whole collection of similar films — in fact there were very few of them, but they got an enormous press. Unfortunately they got very little distribution to the public for whom they were intended.

Though these classic documentaries never achieved their intended objectives — they did set standards of imagination, artistry and creativity for sponsored motion pictures which have rarely been excelled. However their universal acceptance may have led producers and critics to regard the news value of a film as more important than its effect on audiences.

#### Exploring the Effect Upon the Audience

Convinced of the danger of this is Geoffrey Sumner, who produces films for the British Iron and Steel Federation:

"In their simpler forms, industrial films can teach and demonstrate swiftly and concisely — in their more subtle forms they have the power to move an audience emotionally. They can create an atmosphere and tell a story. How an audience loves a good story! How it loves to involve and identify itself with that story! It follows then, that motion pictures have the power to influence human behavior and human attitudes, and no other medium can do that. I have tended more and more to explore the more human possibilities of industrial films and their potentiality for audience appeal — and audiences can be tough — as tough as the complimentary ticket holders in the theatre!"

#### Is This a Business — or An Art Form?

Returning to the argument, Edgar Anstey notes:

"During recent years I have visited a number of countries to discuss documentary films, and in general I find that the British situation

bewilders them. They are impressed by the scale of British-sponsored production (*about 700 a year, Ed.*) for even in the Communist countries of Eastern Europe there are few films being made. They are impressed too by the technical polish and 'professionalism' of our work.

"Yet one senses, even in West Germany that they find us over organized. They see us engaged in a business rather than an art; and however impressive our films may appear in Venice or Turin . . . we are very small fry compared with the angry and anarchy young men who are using their cameras to show what lies behind the respectable facade of the 'establishment'.

#### How Dependent Are U. S. Film Makers?

"In North America one finds a similar suspicion . . . existing alongside considerable production of short films as part of conventional advertising campaigns. The fact that British short-film makers have managed, for the most part, to keep outside the plush advertising agency world, yet seem to have taken full advantage of their independence, is very puzzling to the film-makers of New York . . .

"The view appears to be that British sponsored film production is a flourishing and highly skilled business, with a considerable degree of independence, but lacking the drive that comes from an urgent sense of purpose."

#### A Film from Britain Won Commendation

Nevertheless the Association of National Advertisers (U.S.) selected a British-sponsored film for screening and special commendation at their Annual Convention last Fall. *The Sid Thing* is a cartoon film made by Beryl Stevens of Larkins Studios for the British Insurance Association to overcome objections to insurance sales.

There is a clear sense of purpose in the best sponsored films, of whatever nationality and it cannot be repeated too often, that the most brilliantly produced film will be worse than useless, unless both the sponsor and his filmmaker are satisfied that it is the most suitable medium for the job in hand and, in addition they have already decided where, to whom and how it can be shown to advantage.

#### Always Ask: Did the Film Do Its Job?

It is right and possible that we should view the films of other nations — to help us make really effective industrial motion pictures. But it is easy to gain a false impression of their value to their sponsors, unless we have evidence of effect on their intended audiences and can confidently answer the question, "Did the film do its job?"

Too many organizations send their sponsored films to work overseas, thinking that they will be as useful abroad as they were at home — and they neglect even to consider carrying out the minimum research they would regard as essential to the market planning of their most insignificant sales product.

#### Any Questions? We're At Your Service

Perhaps it is because they just do not know who to contact or how to go about the task — if this is the reason, BUSINESS SCREENS' international team of correspondents is at your service. All you have to do is write the Editor!

## BUSINESS & SCHOOLS:

(CONTINUED FROM THE PRECEDING PAGE 95) plied. Others were economies, 33 per cent, various social studies grouped together 52 per cent; industrial arts, 16 per cent; mathematics, 10 per cent; arts and crafts, 4 per cent; and music, 2 per cent.

However, while the companies supplied more science material than economic tools they actually believe that the proportion should be reversed, with economies being the subject most *needed* by schools — 47 per cent; followed by science, 31 per cent; mathematics, 11 per cent; English, 10 per cent; and all other subjects, 15 per cent.

### Marked Change in Attitude of Business

In an article based on the survey which appeared in the *SATURDAY REVIEW* (Oct. 17, 1964), Dr. Ayars points out that the attitudes of educators toward business and industry have changed markedly since World War II.

"The war itself dramatized the crucial role that industrial production played in providing the means for defending the free world, and since the war there has been a growing awareness of the vital function performed by industry in sustaining the nation's peace time economy.

"During the same period," Dr. Ayars continues, "businessmen have come to have a better understanding of the essential nature of the educational enterprise and are no longer so likely to believe that teachers and the schools are waiting eagerly for their pronouncements. Their respect for the professional teacher and schoolman has grown, and with it has come an awareness that effective aid to schools must be shaped by education's needs, not by industry's desire.

### Less Demanding of Return on Investment

"Too, industry has become more aware of the long-term benefits to be derived from more effective schools and strengthened ties with the community and feels less need to demand an immediate return on its investment in education.

"As a result, teachers and schoolmen who once looked on industrial organizations as suppliers of 'vast and varied misinformation' have now accepted them as helpful partners, pursuing their own enlightened self-interest through promotion of the general good."

### Why Business Considers Aid Important

The survey shows that business and industry believe that the school aid programs are important. Four principal reasons being:

(1) To help increase teacher efficiency; provide fresh, new, up-to-date materials, equipment, techniques and information; strengthen instruction, and raise the general level of education.

(2) To help educators and students understand the aims, accomplishments, problems and needs of the particular business and the free enterprise system — the practical side of business in term of economies, people, and skills.

(3) To help create a plentiful supply of educated manpower, skilled, and practically

## Features Outlined in Detail for SMPTE Universal Leader

A new leader for all motion picture film release prints has been announced by the Society of Motion Picture and Television Engineers. Called the SMPTE Universal Leader, it replaces the old Academy and Society leaders;

Though the SMPTE Universal Leader includes many new features, the major aspects of the old leaders were retained to permit established film laboratory and theatre practices to be followed while meeting the new requirements of television transmission.

Changes incorporated into the Universal Leader include:

(1) Timing or count-down in seconds at 24-frame/seconds running instead of the present 16-frame "footage" count down; (2) A continuously moving clock-type wedge to denote passage of time; (3) Reduction of flashing to prevent instability in automatic television projection; (4) Use of slightly redesigned 35mm and 16mm sound cues in the anticipation of international acceptance;

(5) Provision of space in the synchronizing section to be replaced by a similar number of control frames to provide technical checking frames or duplicate tests of the b/w or color picture frames; (6) Inclusion of 35mm and 70mm magnetic cue position; (7) Provision of three successive frames marked Head, O, and P to guide the operator print when threading in the dark room.

(8) Retention of the former cue for television switching which also indicate to film examine cutters and projectionists when leader has been spliced too often shortening its effective length; (9) Addition of a series of X's and O's on separate frames and on opposite sides of the film to provide print-through cues for sound tape sync.

The length of the new leader has been kept the same as the original Academy leader to avoid errors in printing and sound cueing and to permit operators to continue to use well-established practices.

The Society will make available copies of the new leader on master positive material on both 35mm and 16mm film, to enable laboratories to produce negatives for their own customers. The Society points out that anyone wishing to replace old positive leaders or obtain new leader on release positive stock from any commercial motion picture laboratory.

# Gene is back

**and the Motion Picture  
and TV Industry is glad.**

Few names are better known in the motion picture and television equipment industry than Gene Levy's. After getting budget approval, countless producers, directors, cameramen and sound technicians have said, "Let's call Gene!"

Whether it's equipment for cameras, sound equipment and a variety of other related products Gene always comes through with quick and economical solutions.

Come see him in his new company—to renew old friendships with a warm handshake—to plan for the present and the future. He values your friendship as much as he does your business.

## BUSINESS & SCHOOLS:

(CONTINUED FROM THE PRECEDING PAGE 211)  
oriented; to build awareness of employment opportunities.

(4) To fulfill community responsibility of the firm since education is the basic force of progress, prosperity and peace and the first line of defense — a benefit to generations to come.

The companies also believe that there are important benefits to be derived for themselves for the overall program of education cooperation. The four responses most commonly mentioned in the survey were:

(1) Better community and public relations; more understanding of and sympathy for business problems and goals; greater company prestige; favorable comments, friendly attitudes.

(2) Stronger teaching, improved curricula, more student interest in school, faculty development, better achievement in the classroom, better trained graduates.

(3) Greater understanding of business, industry and the free enterprise system on the part of teachers and students.

(4) Better employees, more student interest in working for the firm; improved work skills.

"It would be possible to interpret these responses from industrialists and businessmen in a variety of ways," Dr. Ayars concludes.

"But, whatever the reasons, business-industry-education cooperation is a fact, is expanding and certainly will continue to grow."

*A Name  
with a Purpose*

★

The objectives of Comprehensive Service Corporation are, as the name implies, to render the most comprehensive and satisfying service, with complete understanding of the needs of all who require motion picture equipment, accessories and supplies.

We point with pride to our long list of large and small customers all over the world, who have been coming to us, again and again, over the many years. Our ever expanding business is proof of their confidence in the quality of our products, our dependability and expert knowledge.

For the Finest in Products and Services  
Look to Advertisers in Business Screen!

"Cheshire Puss," said Alice,  
"would you tell me please, which  
way I ought to go from here?"

"That depends a good deal on where you  
want to get to," said the Cat.

"I don't much care where—" said Alice.

"Then it doesn't matter which way you  
go," said the Cat.

If you don't care about the quality of  
your filmstrips or color slide duplicates, it  
doesn't matter where you go. Any labora-  
tory will do. But, if you care enough to get  
the very best, come to Frank Holmes Lab-  
oratories. Here you will find an outstand-  
ing enthusiasm for perfection in every  
department. Letters from customers all  
over the world praise the zealous care we  
give each job, no matter how large or how  
small. Try us on your next job  
and find out for yourself!

What's Happening to Your

# IDEAS ?

IDEAS aren't "factory-made."

Once sparked, they develop inside people, nurtured by previous experience. They go to work only when understood and launched with enthusiasm.

You're invited to inspect the unequalled, specialized facilities of The Jam Handy Organization—for protecting the basic integrity of ideas.

You are assured of effectiveness with economy.

Ideas for  
expressing  
your ideas

*dramatically  
lucidly  
convincingly.*

## **Technical Animation**

*another Business Communications service from Wilding*

## **Need proven capability in technical animation?**

**Wilding's large, permanent staff of expert artists and technicians** have experience in visualizing practically every type of subject and action—mechanical, electrical, chemical, medical, geographical. Recent assignments include demanding work in such sophisticated fields as Electronic Counter-Measures, Atomics, and Avionics.

**Maximum quality in minimum time—for minimum dollars** results from the combination of experience and the inherent capabilities of this staff. *For example, we don't have to budget for unknowns! And...*

**Avoiding the cost of cel animation** by creative use of models and stop-motion photography is a typical way Wilding know-how can pay off for you.

**Top-drawer clients** include Union Carbide, G.E., Remington Rand, NASA, and the armed forces.

**For more information** write Advertising Department, 1315 Argyle Street, Chicago, Illinois 60640. A representative can show you sample films, and discuss your particular needs. Offices also in Detroit, New York, Cleveland, Los Angeles, San Francisco, Cincinnati, and Toronto.

*A communications agency specializing in marketing and promotion*

## Is It Worth While...

### FOR HER AND THE BANK?

Is it worth while to . . .

- treat people courteously
- sell additional services
- win new customers
- handle complaints with tact
- avoid dictatorial directions
- develop a friend-making personality
- be alert to sales clues, both in, and outside the bank?

You can show your staff that it is worth while, with this new

**Sales and Personality Training**  
**HOW TO SUCCEED IN BANKING**  
 Ten 30-minute Meetings . . . offering  
 FIVE COLOR SOUND FILMSTRIPS  
 FIVE WORKSHOP MEETINGS  
 COMPLETE TRAINERS MANUAL

This course builds profits for the bank by stimulating staff interest in selling—shows that selling is "helping people"—necessary alike to bank growth and job opportunities.

Here's training that wins enthusiastic staff cooperation, through participation and open discussion . . . and it's amazingly easy to administer.

# control

Key to perfection in Byron "Color-Correct"® prints is Byron's every-step-of-the-way control by skilled men and machines. Byron chemists check again and again for constancy of developing solutions. Sensitometric strips, each with 21 color steps of varying density, are accurately printed and processed at frequent intervals. Using the finest color densitometers, Byron experts read the red, green and blue densities of each strip to maintain perfect color balance. Men checking machines. Machines checking men. Because no color process is any better than its control. Yours at Byron, where film producers from all over the world turn for the finest in 16 mm "Color-Correct"® prints . . . only at Byron.

### 6th Int'l Industrial Festival Opens at Rouen, France Oct. 11

The Sixth International Industrial Film Festival returns to the scene of its inaugural on October 11 through October 16 when delegates and their film entries from all over Europe, Canada, Africa, Japan, and the United States assemble at Rouen, France.

The Festival is sponsored by the Council of European Industrial Federations and was held at Turin, Berlin, Madrid and in London in the years since its first premiere at Rouen in 1960. Awards will be presented at banquet ceremonies on Saturday, October 16th.

The Norman capital will also host a special exhibition of "Film and Photography at the Service of Industry." E. Loraillere is general secretary of the Festival at Rouen. U.S. entries have been selected by a special committee of business film executives on behalf of the National Association of Manufacturers.

\* \* \*

### British Industrial Film Assn. Judges Pictures on June 15-16

☆ The British Industrial Film As-

sociation will hold its annual National Awards Competition for that country's outstanding 1964 business-sponsored motion pictures on June 15-16. Results of the competition will determine Britain's 15 entries for the Sixth International Industrial Film Festival at Rouen, France in October.

The National Awards contest is organized under the auspices of the Federation of British Industries and the British Employers' Confederation. Showings will be held in the Shell Center Theater, South Bank, London, S. E. 1 and at the Central Office of Information Cinema, Hercules Road, Westminster Bridge Road, also in London S. E. 1.

According to BIFA secretary J. Michael Shersby, a special conference on the use of film as a means of communication in industry will be arranged for delegates on Wednesday, June 16. Following the conference, all delegates will attend a luncheon given by the Association at the Savoy Hotel, where the 1965 awards will be announced. A special prize will be awarded to the film "best calculated to promote British exports."

Peter J. Mooney; heads Audio Productions, Inc., New York City

### Mooney Succeeds Speidell as Head of Audio Productions, Inc.

☆ The new chief executive at Audio Productions, Inc., New York City, is Peter J. Mooney, who succeeded Frank J. Speidell as president of this leading producer of business, government and television films on April 15th. Audio was founded in 1933 and its former president is retiring after 32 years of distinguished service in the industry.

"Pete" Mooney is another veteran member of the Audio staff and has been extremely active in industry affairs, having served two

terms as president of the Film Producers Association, New York

\* \* \*

### Technicolor's J. Curtis Ke, Now V.P. for Advertising, R

☆ J. Curtis Kent is now vice president for advertising and public relations of the Technicolor Corporation. He was named to that post by president Melvyn Jacobs last month.

Kent joined the company in 1961 as director of advertising and p.r. after serving the previous three years as advertising and sales promotion manager for the Schick Safety Razor Company. From 1950 to 1958 he was in sales management and promotion for McKesson-Robbins, Inc., a major wholesale drug firm.

The new Technicolor v.p. is a native of Alabama and received his B.A. degree from Southern University, Memphis, Tenn.

\* \* \*

☆ The Columbus Film Festival has appointed Dr. Florence Fogle, Associate Professor of Health Education at Ohio State University, as chairman of the festival's Mental Health category.

Dr. Fogle can be contacted at 321 West 17th Ave., Columbus, Ohio 43210.

**DeLuxe Laboratories Appoints Four to Top Sales Positions**

Four top sales positions in DeLuxe Laboratories, Inc., have been filled by appointments announced on April 22 by Neal Kechn, recently made director of sales for this nationwide complex of film laboratories.

Kurt Kanis has been named sales manager for the DeLuxe plant in New York City. In Hollywood, at the General Film division of DeLuxe, Frank A. (Bud) Berend was appointed to head television commercial sales and service; Robert Creamer will head feature and television show sales and service; and Jack West is now in charge of educational and industrial sales.

West has also been assigned responsibility for all General Film division sales outside the Hollywood area.

\* \* \*

**Reg. Armour is President of S.O.S. Photo-Cine-Optics, Inc.**

S.O.S. Photo-Cine-Optics, Inc., has announced the appointment of Reginald Armour, long active in executive management capacities within the motion picture industry, as its president. He is being joined in the top echelon of the New York and Hollywood production equipment firm by Newell P. Crawford, newly-appointed vice president and treasurer.

Joseph A. Tanney, a founder of S.O.S., has joined the new management team as a consultant. Armour has been associated with RCA, RKO Radio, Walt Disney, Columbia and Republic Pictures in various top executive posts. Crawford was a senior officer and director of Olympic Radio and Television Corp. S.O.S., which was founded in 1926, recently moved to new and larger quarters at 387 Park Avenue South in New York City. Its Western office is located at 6331 Hollywood Boulevard in that film center.

\* \* \*

**Getzler Is General Manager of Hanna-Barbera Productions**

The newly-appointed vice-president and general manager of Hanna-Barbera Productions is Bud Getzler, formerly executive vice-president and treasurer of Format Films. His appointment was announced in April by William Hanna and Joseph Barbera.

Getzler will be active in the stu-

dio's television and motion picture work as well its film and commercial divisions.

\* \* \*

**Alfred C. Butterfield, 4 Succumbs After a Long Illness**

Alfred C. Butterfield, 47, chairman of United States Television, Inc., New York, died at home in Weston, Conn., of an illness of almost a year.

Mr. Butterfield was editor and producer of Columbia and educational films including such outstanding titles as *Crests of the Reef*, *Helen Her Story*, which won an Oscar Award, and *Horizons of the Sea*, a series which is widely shown in schools.

He was formerly head of Information Productions, Inc., a predecessor company to United Productions, and before that had joined in forming the firm of Butterfield & Wolf to specialize in the acquisition, development and distribution of television and theatrical films.

After graduating from Harvard in 1937 Mr. Butterfield joined the staff of Time, Inc., as assistant producer of March Time. In 1942 he became executive producer of *Road News*. His other activities included working on CBS radio programs and serving as associate editor of Life Magazine. His book *The Coral Reef*, was published last year.

He is survived by his wife, Ann Cornell Butterfield, and two sons.

### Air Photographic & Charting Service Has New Commander

The Air Photographic & Charting Service (MATS) has a new commanding officer. Colonel William S. Barksdale, Jr., assumed the new command at ceremonies held at Orlando AFB, Florida on April 19. He replaced Brigadier General John B. Wallace who is now commander of MATS' 1607th Air Transport Wing at Dover AFB, Delaware.

On the reviewing stand with General Wallace and Colonel Barksdale was Major General Glen R. Birchard, Deputy Commander of the Military Air Transport Service.

This is Colonel Barksdale's second assignment with the global photo and charting organization. He was its vice-commander from 1958 to 1963. During that time he was instrumental in achieving the rapid expansion of photographic capabilities to meet the Air Force's increasing activities in the missile field and other areas.

After leaving APCS in June, 1963, Colonel Barksdale went to the Republic of Korea as vice-commander of the 314th Air Division. In August, 1964 he was reassigned to MATS' Eastern Transport Air Force as Senior Air Advisor to the Pennsylvania Air National Guard. The APCS commander was born in Randolph, Va. in 1914. Rated as a command pilot, he wears the Legion of Merit, Distinguished Flying Cross, Bronze Star, Air Medal, Commendation Medal and seven Service medals.

### Continental Film Productions Acquires Sam Orleans' Assets

Purchase of all physical equipment, original negatives and goodwill of Sam Orleans Productions, Knoxville, Tenn. by Continental

Col. William S. Barksdale

Film Productions Corporation, Chattanooga, has been purchased by James E. Webster, president of the latter firm.

The late Sam Orleans, who died in a plane crash last year, produced countless motion pictures for government and industry the past 17 years. He was active in the atomic energy field at the time of his death. The Knoxville studio has been closed.

Former Orleans' staffer, James Ashe has been retained by Continental as director of motion picture photography.

**U.S. Steel Assigns Greenleaf to Public Relations in Field**

One of our favorite Frank Alger stories concerns Frank Greenleaf, who started as an orphan boy and became supervisor of the U. S. Steel Corporation's field office in Chicago. Last year Greenleaf was named a field public relations representative for the company.

During his years in the field bureau activity, he booked estimated 100,000 U. S. Steel motion pictures for showing in school, church, engineering and civic groups throughout the midwest. A charter member of the Chicago Press Club, Frank Greenleaf was one of the founder members of the Industrial Audio-Visual Association and was honored by this national society of business a-v executives when they elected him president of that organization several years ago.

He will serve U. S. Steel in the Chicago area, Waukegan, DeKalb and other Illinois communities. Greenleaf and his wife, Peggy, have four children and live in Chicago.

### GOT DIFFERENT SIZE TRANSPARENCIES?

**AT CFI, WE MAKE GREAT FILMSTRIPS** from a wild assortment of transparencies. 35 mm, 2 1/4 x 2 1/4, 2 1/4 x 3 1/4, 4 x 5, 5 x 7, 8 x 10 . . . Bring 'em all in! With our special equipment we shoot them directly into your filmstrip, with no intermediate reduction step to cause color degradation or loss of detail. Our advanced lighting techniques insure faithful color rendition with minimum contrast gain and frame to frame color correction to maintain over-all balance. And our unique continuous-loop printing equipment assures you absolutely uniform filmstrip prints from scratch-free negatives. *Need some artwork to mix with your transparencies? A line of hand lettering? Type set on cells or for superimposure? Our art talent can do. We'll even design and execute original frames for you — or shoot your own flat copy up to 24" x 32" (32 field). Do you also have products to shoot? We photograph them into your filmstrip using a colorful background for eye appeal. How long for a filmstrip? Well, our normal delivery is one week. But on super-rush jobs, our experts will work with you to meet a tighter deadline. Just need advice? We'll discuss your particular problems on the phone. Call Lou Livingston at HO 2-0881.*

*Your filmstrip benefits from the superior facilities and technology that have been developed to meet the high standards of the motion picture industry.*

THE EDITORIAL VIEWPOINT

### THE FAIR'S A REALLY GREAT SHOW

**T**HE 1965 EDITION of the New York Fair is a *great show* in a *great town*. Yorkers will do well to put aside their preconceptions of ultrasophistication with which they greeted the big show on Flushing Meadows since the outset and share with us folks from the boondocks the excitement and assurance of enjoying all that's good about the million dollar assemblage of exhibits and entertainment in their town.

Our second annual "look" at the Fair was presented in the next issue, picking up the exhibit changes, the inevitable (but bearable) waiting lines and other 1965 camera notes as captured by the words and pictures of Bob Seymour, who did such an exemplary job in these pages last year.

\* \* \*

### Frank Speidell, a 32-Year Veteran of the Film Industry, Retires as President of Audio Products

We'll sorely miss one of the finest gentlemen we've known in our decades of service to the factual film industry. Frank Speidell has retired as president of Audio Products, Inc., New York City, after 32 warm and wonderful years of service to his company, its clients and this business. The son of a doctor who entered this field in its formative years, his career has been distinguished by some very important contributions to the medium.

When he joined Audio in 1933, his industry was in the depth of the great depression. He kept his first pledge: that every person which this company employed would have a steady and secure job and would be paid. Audio's veteran staff, now headed by its capable Pete Mooney, would agree. Mr. Speidell

Scott and FPA's Robert Gross (both on far left) watch the recent ceremony held in Manhattan.

# ARRIFLEX at work — ONE OF A SERIES\*

Camera crew enters surf at Malibu to capture first wave of grunion influx

Female lays eggs in sand for fertilization by writhing males.

Arriflex records embryo stages through the microscope

## ARRIFLEX records amazing grunion spawning cycle for biological science

An unusual 15-minute film of the amazing mating habits of the grunion — the only fish that spawns on land, and only in Southern California — was recently completed for biological science study by Academy Films of Hollywood. "The Grunion Story" was filmed under the direct supervision of Zoology Professor Boyd Walker, of the University of California at Los Angeles. Hip-booted Academy cinematographers and technicians waded into the Malibu beach surf over 50 times, in early morning hours, to catch the grunion spawning activity. At regular tide and moon phases, both male and female grunion emerge from the sea to fertilize eggs laid in the sand. After mating, the grunion (which can remain on land as much as 20 minutes) are washed back or flop their way to finny freedom.

Having recorded the mating phase, Arriflex was then put to work in the studio, shooting grunion egg-hatching through a microscope at 50 fps, using standard Arriflex microscope accessories and variable speed motor. Hour by hour, day by day pictures of heart beats, embryo movement, blood circulation and instantaneous hatching were perfectly recorded.

Again operating under unusually difficult lighting and location conditions...abused by sand and surf, subjected to rough handling...the compact, adaptable Arriflex successfully met every requirement of this unusual and exciting assignment — from location shooting to microcinematography. Whatever your filming needs, it will do as rewarding a job for you!

From the microscope to the missile range... from spot locations to sound stages... Arriflex professional motion picture cameras are the dominant choice of filmmakers in science, industry, and entertainment. They're lightweight, rugged, tremendously versatile — uniquely suited to a range of applications virtually without limits. Here are some of the features that give Arriflex cameras their remarkable capabilities:

- MIRROR-SHUTTER REFLEX VIEWFINDER • REGISTRATION-PIN FILM MOVEMENT • 21°-DIVERGENCE 3-LENS TURRET • CONTOUR HAND GRIP • FRAMES-PER-SECOND TACHOMETER • COMPLETE ACCESSORY SYSTEM... lenses, standard and special-purpose electric drives, power supplies, time-lapse equipment, film magazines, sound blimps, tripods.

**THE EDITORIAL VIEWPOINT**

to be made in the past few years. It is a high priority to get the best of the best in the industry to help find the best ways to get the best of the best and to make the best of the best of the best. This is the only way to get the best of the best and to make the best of the best of the best.

**Super 8 Has a Useful Future in Industry**

We have noted the advent of "Super 8" in the industry as a part of the recent Product Review. This enlarged new dimension in 8mm motion pictures is making its debut at the International Photographic Exposition in New York in early May when many types of Super cameras and projectors for the home market will be exhibited. But "Super 8" will also come into the business and educational markets. Its viewing advantages are too significant to be ignored!

**65 Long-Time Employees of Movielab, Inc. Are Honored at Dinner-Dance in Manhattan**

15 per cent of all employees at the major New York city laboratory of Movielab, Inc. represent 840 years of service to the company which its president, Saul Jeffee, founded in 1930. On April 4th Movielab presented its first service awards at a dinner-dance held at the Chateau Madrid in New York. More than 150 guests including dignitaries of the organized crafts of this field, were in attendance as

65 employees of the lab who each have more than 10 years of service to their credit were inducted into that company's Service Club.

President Jeffee said it well when he noted, "The significant contribution of efficient and dedicated people to Movielab's growth. Without experienced manpower we could not at-

National Committee Honors to

## The Year's Best Pictures for Safety

THE NATIONAL COMMITTEE on Films for Safety, representing all leading organizations in the United States concerned with occupational, home and traffic safety education, has named the winners of 11 bronze plaques and 14 awards of merit for the "outstanding motion pictures, sound slidefilms, television spots and short subjects created for safety education in 1964."

The Committee's top bronze plaque awards went to three motion pictures and one sound slidefilm in the field of Occupational Safety; three bronze plaques were given to the year's best films for Traffic & Transportation safety; only one bronze plaque was awarded in the field of Home Safety. Two plaques were awarded in the "General Safety" classification and one television spot subject won a bronze plaque award in the field of Television Films.

### AT&T Films Win Plaques for Parthenon, Audio

Parthenon Pictures of Hollywood won two bronze plaques to lead the field in award honors. *Slips and Falls*, produced for the Bell System, was a plaque winner in the field of Occupational Safety films; and *What'll You Do If . . . ?* was another bronze plaque winner for the same studio, which also distributes this 12-minute instructional film in the field of Traffic & Transportation safety.

The Bell System had another bronze plaque winner, *Before It's Too Late*, in the field of Traffic & Transportation entries. This 13½-minute color motion picture on the value of seat belts was produced by Audio Productions, Inc., of New York, and features a testimonial appearance by Dick Van Dyke.

### Four Plaque Awards for Occupational Safety

*The Roll of Drums*, sponsored by the Caterpillar Tractor Company and produced by Calvin Productions, won a bronze plaque in the Occupational Safety group. This 20-minute color film emphasizes unsafe attitudes and actions of workers on heavy construction equipment.

The third bronze plaque winner in the Occupational group was a 21½-minute color motion picture, *Three Minutes to Live*, sponsored by the Department of National Defense (Air) of Canada and produced by the National Film Board of that country.

*Supplied Air Means Safety*, a 15-minute sound slidefilm (color) produced for the Accident Prevention Committee of the American Gas Association by Morton Goldsholl & Associates, Chicago area producers, was the fourth bronze plaque winner in the Occupational Safety area.

### Altschul's "School Bus" Film Gets a Plaque

Gilbert Altschul Productions, also of Chicago, won the top bronze plaque award for the 28-minute black & white motion picture, *School Bus Safety—With Strings Attached*. This documentary report of an actual school

bus safety assembly (with simulated bus accidents) was co-sponsored by Journal Films and the National Safety Council.

The sole bronze plaque winner in the field of Home Safety was the Alfred Higgins Productions' 14-minute color motion picture, *The Babysitter*, which gives safety pointers to a babysitter and her employer. Higgins is a Hollywood-based film company.

### "General Safety" Honors to These Pictures

There were two bronze plaque awards in the field of films for General Safety. The outstanding 16-minute color film, *Breath of Life*, won this top award for its producer and distributor, Pyramid Film Producers, San Jose, Calif. This film illustrates the application of mouth-to-mouth resuscitation and demonstrates proper procedures for life-saving technique.

*Gun Mayhem*, an 18-minute color film emphasizing precautions in the handling of arms, won the other bronze award in the field of General Safety. It was produced by a group for its sponsor, the Directorate of Space Safety, Deputy the Inspector General, Norton AFB, California and its distributor, Cameron Studios, of Seattle, Washington.

The Aetna Life Affiliated Company awarded the sole bronze plaque given in the field of "TV Shorts & Spots." Their only b&w spot, *Stop Home Falls*, won the top award in the field of Television Films. Another Aetna subject, *Safe Driving*, won an Award of Merit among slidefilms in the field of Traffic & Transportation.

### Awards of Merit in All Five Contest Categories

The other merit awards were well-distributed through the five awards categories in the annual competition. The two Awards of Merit given for Occupational Safety films were:

*Prescription for Safety*, 18½-minute color film, sponsored by the Ortho Division, Ortho Pharmaceutical Co., and produced by Calvin Productions.

*Your Responsibility for Safety*, 17-minute color film, sponsored by the Pacific Telephone Telegraph Co., and produced by R. Soltys Productions.

### Four Share Traffic & Transportation Awards

Sharing the four Awards of Merit in the field of Traffic & Transportation safety were:

*Footprints 4*, a 27½-minute color film, sponsored by the Goodyear Tire & Rubber Company and produced by Pilot Productions, Evanston, Ill.

*Freewayphobia* (series of two 12-minute color films) produced and distributed by Disney Productions.

*To Kill a Wedding Belle*, 13-minute color film, sponsored by the Ontario Department of Transport, Canada, and produced by Educational Associates.

*Your Child and Traffic*, a 12½-minute color film (also b&w), sponsored by the A.A. Foundation for Traffic Safety and produced by Calvin Productions.

### Two Citations to National Rifle Association

The one merit award winner in the Home Safety classification was *At Home With Guns*, a 13-minute color film sponsored by the National Rifle Association of America and produced by the National Rifle Association of America. (CONTINUED ON THE FOLLOWING PAGE)

# Autoload<sup>®</sup>

You're a businessman, not a projectionist. That's why we came up with Autoload<sup>®</sup>.

Autoload takes over the job of threading film . . . does it for you completely, automatically. Means you're guaranteed perfect adjustment every time.

It also means you can stop on a single frame for

discussion, reverse back to a scene fast, enjoy a brilliant picture even in lighted rooms, set it up in seconds.

Features like this have made the Bell & Howell Specialist Autoload Filmsound the largest selling 16mm sound projector anywhere. May we suggest you take a moment and see why?

# Bell & Howell

builds photographic instruments a little better than they really have to be

**SAFETY FILMS OF THE YEAR:**

(CONTINUED FROM THE PRECEDING PAGE 16)  
 duced by Norwood Studios, Inc., Washington, D. C.

The National Rifle Association and the same producer received another Award of Merit for the 21½-minute color production, *Sure As Shootin'*, in the General Safety group. The two other merit award winners in this category were:

*Take Your Choice*, a 12½-minute color film sponsored by The Detroit Society for the Prevention of Blindness and produced by The Jam Handy Organization.

*The USAF Safety Story—A Case for Survival*, 35½-minutes, color, sponsored by the Directorate of Aerospace Safety (previously named) and produced by the 1352nd Photo Group, MATS, at Lookout Mountain AFS.

There were two final merit awards in this year's contest. These were shared by television spots. A series of six spots, titled *Elmer, Our Hero*, won an Award of Merit for the Ontario Department of Transport, Canada and the producer, Lesser Studio, Ltd., also of Canada.

A seat belt spot, *Habit*, won the last merit award. This went to the National Safety Council and the producer, Lukas Film Productions, Inc., of Chicago for this one-minute television subject.

The Committee completed its deliberations in Washington, D. C. on April 22nd, following several intensive days of review of finalists. Previously, all entries in the 22nd national contest had been reviewed by specialists in the various fields for which they were submitted. William Englander is secretary of the National Committee on Films for Safety.

**National Football League Clubs Announce NFL Films, Inc., With Ed Sabol as the Chief**

The National Football League has announced the creation of NFL Films, Inc. as the exclusive producer and distributor of motion pictures for all of its nationwide games next fall. NFL Films is the successor to Blair Motion Pictures of Philadelphia which, for the past three years, has produced the outstanding championship game color films. Blair also produced the annual season highlight films for 12 of the League's 14 teams last year and will produce them for all clubs in 1965.

**MUTSCHMANN FILMS**

**Fairchild 400  
 repeating sound  
 projector**

**the 8mm that's  
 better than 16!**

The Fairchild 400 is the most reliable rear-screen sound projector ever developed. Because it is the most efficient Take film life, for example. You get eight to ten times the number of plays you get with 16mm. Three thousand plays for a single print is not unusual! And 8mm dupes, printed from the same original as 16, cost less because they require only ¼ as much film. Think of the savings to your film program. The Fairchild handles up to 20 minutes of sound color film on a single cartridge, repeats automatically, and needs no maintenance except an occasional bulb change. The Fairchild 400 weighs only 17 lbs, easy to carry than a portable typewriter. It top flips up for front projection to large audiences. It goes anywhere and performs brilliantly in broad daylight. A tireless demonstrator, it takes less than sq ft of counter space, and runs absolutely unattended.

Write today for full information and prices.

**SPECIFICATIONS**

- Screen Size—8½ x 11"
- Dimensions—12 x 12 x 9¾ (closed)  
 12 x 12 x 19¾ (opened)
- Weight—17 lbs
- Amplifier—100% transistorized. No warm-up (high quality Fairchild silicon transistors)
- Frequency response—80 to 7000 cycles ±3d
- Overall Amplifier output—3 watts
- Speaker—4 x 6 oval P. M.
- Lamp—high efficiency 8V 50W prefocuser
- Lens—f/1.6 7mm coated lens
- Motor—induction type, constant speed
- Power consumption—100 watts
- Operates on 105-125 volts, 60 cycles A.C.

# My Leap into Space

Screen Writer Ira Kerns Shares His Adventures on the Aerospace "Team"

"WHILE MAN IS LEAPING INTO OUTER SPACE, I'm busy being sick to my stomach." That was the ignominious thought running through my mind as I stepped out of the Air Force's centrifuge chamber after a brief spin at four "G's."

"How was it?" asked the well meaning, but highly amused Ph.D. in the spotless white laboratory smock.

Staggering toward him with the world whirling inside my head, I replied with my usual aplomb, "It was . . . it was . . . I think I'm going to . . ." And then I did! All over him.

Somewhat aghast, the doctor gathered up the remains of his dignity and lunched off to change into a clean lab smock.

That's when I started asking myself how I ever got involved in this thing in the first place.

It all began late on a Friday afternoon a few weeks ago when Mr. Niles (Fred A. Niles, president of Fred A. Niles Communications Centers, Inc.) called me into his office.

"Ira," he questioned, "how would you like to belong to the Air Force for three weeks?"

"Huh," I replied, cleverly, backing anxiously toward the door.

"We've just signed a contract to do a film script on the U. S. aerospace program," he beamed, "You'll be in Washington, D. C., at 8 o'clock Monday morning to start your research."

As the office door closed behind me, I knew exactly why I'd agreed to go. I wanted to keep my job. Besides, who in his right mind could turn down a trip around the country, meeting astronauts, eating space food, and watching rocket launchings?

Little did I know that being a mere staff writer for a commercial and industrial motion picture producer meant that you also had to be a centrifuge test pilot, a guinea pig for dehydrated food tests, and a radiation test subject.

Bright and early Monday morning, I found myself at Andrews Air Force Base, staring at a mountain of film reels.

The polite major in blue was saying, "You will have to be given some indoctrination into the Air Force's research program, and the best

way to start is to look at these films. First we have films here on a hypervelocity projectile experiment on micro-meteorites and the electrostatic gyroscope, and the . . ."

As he spoke, I could detect the pity in his eyes.

Two days and countless films later, I popped my bleary-eyed way out of the screening room. My mind was reeling with re-entry velocities, phototropic enzyme dyes, molybdenum heat shields and whirling centrifuges.

"Major," I began.

"Ah good, I see you're ready for the next phase," he beamed, "Most people take four or five days to view those films."

He couldn't have told me that before.

At dawn the next day (we rise early in the Air Force) I was on an airplane heading for Wright Patterson Air Force Base in Ohio with an unbelievable case of advanced apprehension.

The last thing the major had said to me in Washington was, "Good luck." Then he added cryptically, "You'll need it." I saw the look of pity creep into his eyes again.

However, as we landed, I became more up with naive boyhood enthusiasm. Armed with notepad and camera, I advanced in my target . . . and was promptly disarmed by an eagle-eyed air policeman at the gate who confiscated my camera.

Making the appropriate squawks of outrage including an occasional reference to Secretary McNamara, got me only a very cold, handed from under the brim of a very highly polished helmet.

The day had begun on a proper note, clear.

My first stop was the Air Force Medical Laboratory where they're developing everything from phototropic liquids (enzymes which darken when exposed to ultraviolet light) for space helmet visors . . . to self-sealing putty for use in the "skin" of space vehicle as protection against meteorite particles.

In one experiment, they fire a microscopically thin particle of mylar at a speed of up to 30,000 mph at various metals. They test the metal's ability to withstand perforation from micrometeorites. The firing of the special "gun" is so energized that the gun actually disintegrates from the explosion, managing in the process, to deafen any unwitting spectators.

# F&B/CECO EXPECTS TO BE COPIED!

When you're a leader . . . in any field . . . you can be sure that ambitious competitors will imitate your style. But there's a difference. The copy is never as good as the original.

## PRO-JR. FLUID HEAD TRIPOD

with a secret that can't be copied

### THE FIRST ALL-NEW, ORIGINAL DESIGN IN FLUID HEADS.

The result of three years of intensive research and experimentation, it is designed for maximum smoothness in accommodating these cameras (up to 30 lbs. weight): Cinevoice • Cinevoice 400 Ft. Conversion • Arriflex 16mm & 35mm • Auricon 600 & 1200 • Maurer • Eclair • Kodak Reflex • Eyemo & Filmo With Motors • Cine Special • Bolex.

The silicone damped head utilizes the very latest formula of silicone fluid and will operate with 100% efficiency in temperatures varying from 20° below zero to over 120° Fahrenheit. Other new features including a positive grip locking device cancel all drift possibilities and permit absolute rigidity in the locked position. It also includes a new combination camera balancing and tightening lever never before used on any similar equipment.

MY LEAP INTO SPACE

(CONTINUED FROM THE PRECEDING PAGE)  
tators in the vicinity. Naturally, I was in the vicinity.

During that memorable week, I was amazed by a number of other interesting experiments.

There were the expandable structures formed resin and fabric constructions are so pliable that they can be folded into a small area, but will expand

predetermined shape and rigidize like cellophane when exposed to a vacuum. One of the preliminary preforms managed to harden around my finger for two hours causing no little contribution to my circulatory system.

The expandable structures come in all shapes and sizes—up to football field dimensions and larger, and will probably be used to build space stations, space laboratories, etc.

Then, I visited the famous "ion" engine. It took me close to an hour to get through the labyrinth of hallways, rooms and chambers which house these little jewels of space propulsion, and the floor was very hard.

Compared to the likes of the Titan booster rockets, the "ion" engines are minute—only six inches long. They operate by accelerating ion particles at high speed in space. The ion giants can actually operate far more efficiently in space than the larger chemical rockets carrying much greater payloads farther in considerably less time.

My overall trip, which took me from coast to coast and back again, like everything the Air Force does, was organized to the minute. Every minute was accounted for, soon metamorphosed into a human recording machine.

With Polaroid in one hand (when they would let me use it), tape recorder in the other (when they would let me use it), writing pen in one arm and pencil behind my ear (which was falling off), I advanced steadily through the maze of Air Force laboratories.

My TA (that's Government for chief advisor) would point me in the right direction by usually saying "Through that door."

"What's in there?," I'd ask.

"Electrostatic gyro."

In we'd go, and there would be still another Ph.D. in a white lab smock, de rigueur

## RACING FOR THE AMERICA'S CUP

Thomas J. Lipton Releases Film on Yachting Classic

IT'S EASY TO FORGET who won the America's Cup challenge races of 1899, 1901, 1903, 1920 and 1930, but it's not likely anyone will ever forget the valiant loser, Sir Thomas Lipton. Nor is the leading food company which bears his name—Thomas J. Lipton, Inc.—likely to let anyone forget.

Sir Thomas' doughty challenges are history, but the famous race with which he was associated goes on and on. On the occasion of each new race in recent years, Thomas J. Lipton, Inc., has presented a film documenting all the

W. Gardner Barker (l), president of Thomas J. Lipton, Inc. at preview with film's producer Agnew Fisher.

Robert Mitchell, president of Association Films (l) with Oscar J. Nickel, director of advertising for Thomas J. Lipton, Inc.

plans and preparations for the race and bringing the excitement of each day's events to millions of viewers.

Last year's challenge by England's *Sovereign* is the subject of Lipton's new film, *The America's Cup Races, 1964*, which was previewed on April 7 for crews of the winning yacht and members and guests of the New York Yacht Club in the Club's beautiful Model Room in New York.

The film features both the trials and subsequent races. One exciting

sequence shows the behind-the-scenes drama of the building of both *Constellation*, the defending yacht, and *American Eagle*, the leading contender. Another takes viewers along with one of the British contenders on a unique overland trek from Scotland to the south of England.

For the first time in the classic's history, trials were held in this country to select a challenging vessel. Both series of matches have been excellently filmed by Agnew Fisher, a well-known yachtsman and photographer whose close-up shots of the crews in action puts the audience virtually in the cockpit.

After eliminating all opponents, America's *Constellation*, sailed by Eric Ridder and Bob Bavier, faced the British *Sovereign*, manned by Peter Scott, in four action-packed races. The camera follows both crews as they handle the sails, work the "coffee-grinder" winches, and tack along the course to gain every possible advantage. Spectacular aerial views capture the streamline movement of these magnificent

(CONTINUED ON PAGE 51)

Racing yacht thrills are plentiful in Thos. Lipton's "America's Cup Races."

## **A Complete RCA Optical Film Recording System**

**Modular and Fully Transistorized — It Even Improves on Traditional RCA Reliability**

There's so much new about RCA's PM-80 film recording system. New solid state circuitry. New styling. Compact design. New conveniences for easier operation.

In all respects, a better value than ever in film recording. Yet, the most important feature of this new film recording system is that it continues to reflect RCA's traditional leadership in film recording — leadership built on superior reliability and long-term performance perfection — your assurance of quality.

You can buy the PM-80 with full assurance that it incorporates latest "state-of-the-art" features, that it is carefully built to stringent quality standards, that it will fulfill the most demanding recording requirements.

For details on the PM-80 and RCA's full range of quality recording equipment, write: Dept. 806, RCA Broadcast & Communications Products Division, 2700 West Olive Avenue, Burbank, California, or 36 West 49th Street, New York City.

**The Most Trusted Name in Sound**

## 's Multi-Screen Program Preview Work Shows Fall Season Fare to Sponsors, Agencies

AS ARE LOOKING way up at C-TV these days. Rebound- in a weak season last year (4), the network is now with arch-rivals NBC and the audience reports, and look at the figures on exact- right week, perhaps a little That's a big jump. With this story of progress people who really count — advertisers and their agencies C put on two big breakfast

scope-designed, Mondrian-like pat- tern of 26 "building blocks" con- structed of aluminum frames. These, besides having their own functional attractiveness, tied in with the network's "building blocks of success" theme.

### Programs Snap on 26 Screens

As he spoke, one-by-one the blocks were filled by 4 by 4 foot photographs which snapped up into place. These pictures illustrat- ed the current successful ABC

Tom Duffy, ABC vice-president in charge of Network Sales, is the lecturer as screens behind him take up the presentation theme that "current programming is a structure for success."

shows, in New York (Feb. 3) and Chicago (Feb. 10) for audi- ences of 1500 and 600 respective-

### Building Structure for Success"

The theme of the meetings was ABC's current programming and structure for success, and the momentum built up in this will send the network soar- ing next year.

President Thomas W. Moore, who stepped off the program, relied on a stage fully packed with highly integrated audio-visual presentation material which consistently brought rounds of ooh's and aah's from the audience.

### Different Projectors at Show

Designed and produced by Visualscope, Inc., of New York, the show utilized two 35mm arc- light projectors and one 16mm in- dependent motion picture projec- tor. The two "Gold Plate" and the Kane sound slide film pro-

jector was the first device to be seen. Mr. Moore, was a Visual-

scope shows, many of which will carry over to '65-'66.

Mr. Moore then took his audi- ence behind the scenes to show what was coming up next season. At this point, the "building blocks" set revolved on a turn table to re- veal a motion picture screen on which short sequences of the new programs for next year were shown.

While ABC will have relatively few holes in its programming to fill next year, the chief of that department, Ed Scherick, came on to present clips of such new shows as *F Troop* and *The Big Valley*, westerns, *Okay Crackersby*, a Burl Ives comedy, and other pilots, which drew a good round of ap- plause.

Visualscope, which had a crew of 32 people on the big show, worked in cooperation with ABC vice-president Jerry Zucker, who was responsible for the network's end of the proceedings, and Joel Cohen, of ABC, who wrote the commentary for the show. •

The Tower of Light pavilion is a cluster of 80-foot high aluminum prisms.

## Have a "Holiday With Light" at the Fair

Colorful Sequences on Electricity Are Set to Music

THE TOWER OF LIGHT, feature exhibit attraction at the New York World's Fair sponsored by electric utility companies, is displaying a new and lively musical review, *Holiday With Light*.

Fair visitors are transported on a giant electrically-powered turn- table while comfortably seated in newly-installed revolving seats as they view the story of electricity told in a fanciful, light-hearted way in seven different chambers. The show uses a variety of techniques, including spectacular lighting ef- fects, a toe-tapping musical score and three-dimensional animated figures.

### Show Was Produced by Wilding

*Holiday With Light* was produc- ed by Howard Hoyt, of Wilding, Inc., from a script by Sidney Brooks (who also wrote the lyr- ics). Composer Lee Pockriss fur- nished the musical score and sets were designed by Fred Fox.

Audiences first meet a familiar utility industry figure, Reddy Kilo-

watt, who is joined by Benjamin Franklin. Reddy brings Ben up to date on the progress made with electricity since that memorable kite-flying episode. The pair set out, with the audience, on a tour of America's most festive holidays.

### A Tour of Seven Holiday Scenes

In the show "chambers," the seven holiday scenes take viewers into entertaining moments of New Year's Eve, Labor Day, Thanks- giving, Mother's Day, Father's Day, the Fourth of July and Christmas. In one of these, a stir- ring Independence Day sequence is brilliantly illuminated with elec- trical fireworks; a music hall num- ber features Reddy Kilowatt and Ben as "the last of the red hot daddies;" and a charming Christ- mas episode is highlighted by the world's largest Yuletide orna- ments.

After this concluding episode, visitors descend to the ground floor of the pavilion where they view (CONCLUDED ON PAGE 49)

Reddy Kilowatt is the New Year Baby and Ben Franklin plays Father Time as second "Holiday With Light" scene takes audience to New Year's party.

At Borg-Warner's Science Hall in Chicago —

# A New Experience in Film Realism

Visitors Enjoy the Ultimate in Total Sensory Experience  
as They View Color Film in Unique Environment "Theater"

chamber where an 11-minute color-and-sound motion picture is accompanied by swift changes of temperature, humidity and aromas synchronized to the story line of the film. The picture enables each small group of viewers in the tightly-controlled chamber to literally experience its re-creation of the history of man's struggle with his environment.

### Would Be "Hit" At Any Fair!

Beyond any doubt, this is the most advanced use of a *total experience in film presentation*. It would be one of the "hit" attractions at the New York World's Fair or any other exposition.

Audiences literally *feel* the heat of the summer sun and the chill of wintry blasts, as temperature and humidity change swiftly to match the action on the color screen. They *smell* the odor of the musty cave that was man's first shelter,

scents a field of flowers, a violet and a girl's perfume. The scene of involvement is intensified by colors inside the "theater" hang from cool blues to hot reds as the temperature climbs.

It wasn't an easy task. The effects system for the chamber was engineered at the Borg-Warner Research Center and the company's New York Division, manufacturer of air conditioning and refrigeration equipment. The company's exhibition consultants designed other components to augment the total experience.

Behind the scenes are three rooms of equipment: in the first, an electronic memory drum handles changes in aromas, color, humidity and temperature have been programmed. These changes are controlled by notches on the drum itself.

The air-handling and "control"

Beyond these Borg-Warner Science Hall dimensional exhibits shown at left, visitors enter the glass doors (near) to the amazing environment chamber where they enjoy a totally new multi-sensory experience in which motion pictures are accompanied by swift changes in temperature, humidity, odor and lighting effects, all synchronized with scenes in a color-sound film.

WITHIN THE NEW Borg-Warner Science Hall (a permanent area set up by the Borg-Warner Corporation on the street level of its headquarters building in Chicago) a new experience in film realism awaits the countless thousands of visitors to this assemblage of over 80 colorful exhibits —

which include animated displays, pictorial science histories and a wide range of audience participation devices with levers, gears and push-buttons which turn scientific principles into operational realities.

But the most realistic experience of all these is provided within a unique environmental "theater"

At left: Dr. R. J. Kuchner, manager of environmental sciences at Borg-Warner Research Center, adjusts one of the many "control" devices used to provide viewing theater with a wide range of aromas. Above: Dr. Kuchner is shown with the electronic memory drum on which temperature, humidity, color and color changes are all programmed.

... much choice between the of hydrocarbons and that of "beef?" A scene from the Warner Environment Theater's sensory show in Chicago, hit in company's Science Hall.

... in a second room, has three air-conditioning systems: (1) a comfort system which maintains a clean and comfortable atmosphere; (2) a special system for rapid changes in temperature, humidity and aromas; and (3) an ionization system, using Purafil oxidant, that pulls the air out of the chamber, purifies it, and circulates it back again.

... aromas are provided by a variety of natural and synthetic scents enclosed in pressure pots and recharged with air after each projection and the materials recharged periodically.

**Minute Changes Within Seconds**  
... changes in climate, atmosphere and colors within the 12 by 20-foot environment theater are made in one to three seconds. Signals on the film signal these changes some 60 frames ahead of the camera to synchronize with the action. Biggest problem for Warner engineers was to make these atmospheric changes fast enough to keep pace with the film. At one point in the picture the temperature must drop from 110 to 50 degrees Fahrenheit and from 90 to 50 per cent humidity within two seconds. Although the change is plainly felt by the audience, the low temperature is maintained for only a few seconds, not long enough to affect the human circulatory system and cause chilling.

... amazing show was written, directed and production-designed by Chicagoans Selma and Gordon Weisenborn and produced by Wilbur Henricks Associates. Images

... At the right these viewers in the Science Hall's Environment Theater enjoy a wholly new experience as they literally scent flowers, feel the garden-fresh atmosphere while seeing film

... a few feet away, memories are warm and intimate. These walls shield us from the wrath of nature but also let us share her delights. The colors are "warm" and a scent of lavender fills the theater.

... and action have the "touch" of sheer genius which has marked the work of free-lance Weisenborn on many award-winning productions.

**Another Show With Nine Screens**

While this "experience in realism" is the big show in the Science Hall, there's still another sight and sound presentation of noteworthy interest. In still another theater, *The Sum of Its Parts* presents the story of Borg-Warner's contributions to the life of a fictional "average" family, the Homo Sapiens Smiths. This is a sound slidefilm show in which images leap across nine screens with the action and speed of a motion picture.

Also written and directed by the Weisenborns, this fast-paced (13-minute) color program shows how industry applies technology to raw materials and energy to satisfy so-

... We must count nose on the film's sound track, for what delights there and what irritates there. The odor of wet dog pervades the chamber as this scene unfolds on the viewing screen.

... city's material needs. DuKane sound-and-filmstrip projectors beam bright images on nine individual screens placed three across and three deep. At times, all nine images form one big picture, in other sequences, the picture moves from screen to screen in swift staccato sequences that induce a sense of excitement.

**Push-Buttons Start the Action**

Both Science Hall shows are push-button controlled by visitors. *The Sum of Its Parts* is viewed in a 28-seat theater. When the button is pushed, a programmer in the projection booth controls the nine synchronized projectors, sound and theater lighting. About 4,000 frames and 1,600 pictures are presented within the 13-minute period of this show.

Credit for the comprehensive

... That the weather is warm, the tone that is not, the color that is not, the sound that is not. Put in more sound, the color of cold air, the sound of the change of scene to a new scene.

... design of this highly educational Science Hall area must be given to Donovan Worland, formerly director of exhibits for the Chicago Museum of Science and Industry. Dr. Dan Q. Posin, physics professor at DePaul University and a well-known television personality was the consultant.

... Theme of the Science Hall show concentrates on the physical sciences with emphasis on matter, energy and environment. It should be noted that this program and all the exhibits comprise one of the finest examples of modern corporate public and business relations unveiled in recent years.

... For Borg-Warner creates, makes and sells a wide range of products with which both film showings and nearly every exhibit are involved. The show is free and open daily.

This after-dark scene of California Chemical Company's soft detergent alkylate complex at Richmond, California, on San Francisco Bay, filled a need for some dramatic background television footage.

# Glamorous, They're Not!

## Four Views of the Film Program at the California Chemical Company

### THE PRESIDENT'S MEDIUM LONG VIEW:

**JAMES W. KENT**, president of the Ortho Division of California Chemical Company, San Francisco, takes a very realistic view of the role of motion pictures in his company's overall communications program:

"We make 20 or more motion pictures a year — and glamorous they're not. At the California Chemical Company we don't treat any picture as some sort of monument to our corporate image. Our films are *direct communication tools* designed to carry specific messages to our customers, dealers or members of the sales staff."

Referring to a film library which now includes more than 80 pictures on agricultural, garden and industrial chemicals, Kent comments:

"The fact that some of our 10 to 15-year-old films are still in demand among garden clubs and agricultural groups only points out

that this was the right approach. Our films have proved useful beyond our expectations."

### THE ADMINISTRATIVE CLOSE-UP:

By Lou Czofin,

Manager of Advertising & Public Relations

Jim Kent covered the outlines of our attitude on the use of films. Now perhaps I can "color in" some of the specifics. This requires sketching in some history for background on our film program.

Around 1949, Ortho (then called California Spray-Chemical Corporation) was already a long-established leader among firms producing agricultural pesticides. But the company was still in the early stages of building a home and garden line.

That's when we found that one of the most impressive means of reaching the vitally important, interested consumer audience, was to have our representatives talk in person to established garden clubs. However, to talk

by Don Briese

about gardening techniques and products which must be *demonstrated* to prove their value soon exposed the limitation of oration.

Films were the answer. They depicted our sales points and showed proof of the results attained in using our products—unlike any other medium could. They proved highly economical in terms of cost per thousand impressions.

Also, you must consider (as we certainly have) the combined advantages of sight, sound, color and demonstration to an avidly-interested audience.

Our educational gardening film, *How to Grow Beautiful Roses*, proved its economic effectiveness among garden club audiences during its first year in circulation. We estimate that more than 116,000 gardeners saw this

Jack Davidson (left) and Fullick (right) set scene for an Ortho garden film on California with Jim Kerr (center), better known to eastern TV viewers as "The Scotch Gardener."

early picture and responded to it before its first anniversary.

When this *Roses* film was nine years old and had been viewed by more than 1,000,000 gardeners, we were satisfied that we had our money's worth. It was withdrawn from circulation for updating in 1960.

The remake of our rose film, titled *Living With Roses*, has proven to be even more popular with new generations of gardeners because it utilizes a wider variety of roses, showing a number of popular landscaping situations.

Newsreel authenticity is achieved with informal shooting techniques which give performers relaxed feeling. As Walter Schenk and Geoffrey Fullick set up scene for "Prescription for Safety," actor Bill Williams said he "felt like a farmer" when the only interruption was far-off song of a meadow-lark.

The Polymer Division of California Chemical Company shows customers, via motion pictures, how they can save time and money utilizing Chemon polypropylene plastic pipe in "Eleven Miles in Eleven Days." This scene was filmed a lot sooner with the aid of Texas foreman, willing labor

incorporating later products and techniques to assure maximum results. These improvements have also developed appeal among experienced gardeners who seen our earlier rose picture. Between experienced and novice audiences, we achieved a total of at least 432,000 individual viewers of *Living with Roses* within four years. And we expect the film to retain its popularity for another five years. All-film costs rise from year to year, the impression compared to other media is low in our particular sales program — each product demonstration plays a key

success of our early gardening films has sized to us the importance of using film combinations combined with expert speakers point our messages to important agricultural audiences.

1959, we produced one relatively high-agricultural film. The enthusiastic view-sales response dictated the need for such films. In fact, there were so many requests for films devoted to so many specific products, growing, feeding, pesticide and spraying techniques, that it became apparent that demonstrative motion pictures had become a major medium.

Faced this new potential without a major production budget. That's when we initiated a new film format proposed by our motion picture specialist, Geoffrey Fullick.

His proposal was designed to provide maximum exposure among growers within our film budget for that year. He called the format the *Ortho Agricultural Newsreel*. Let him give you the details on how he decided to crank out this series on location:

**Close-Up View:** by Geoffrey Fullick  
I am frequently asked, "How do you manage to turn out so many 10-minute on-location newsreel color films?"

My answer has to be: "We frequently shoot and ask questions later." Who's we? Myself and any one of a number of top film makers. Whoever it is, we keep our schedules fluid because we usually have four or five subjects to cover when we go out into the field.

Weather or crop treatment conditions aren't quite right in one place, we can go on to another field assignment after a phone check with our field offices. But were it not for this company's far-flung field offices and expert technical people, it would be impossible for us to operate this way and our location shooting would, in turn, skyrocket.

Another advantage we have in the field is that when the crew and I go out on location, we often see other farming action unrelated to our assignment. When we complete our original assignments, we pick up some more film and get back to the scene of the farming action. This may be useful in some future farm film subject. Burning up some extra 16mm film can often save us an entire location on a big project in the future.

A few months ago we were in Florida and shot some "before and after" sequences to

show the effect of Ortho Diquat — an aquatic weed control chemical — as it disposed of undesirable water vegetation. On the way through a suburb we passed some lawns being destroyed by Chinch bugs.

We went ahead with our original assignment and filmed the "before" sequence of the Diquat application, then headed back to where the Chinch bugs were doing their bit. We managed to put away an entire film on the subject of detection and control of this insect pest, knowing that this footage would soon be needed to help promote a new product about to emerge from our research and production departments.

Before Chinch Bug Control was released to the market, our film was in the can and ready for editing at Jens Frandsen's Unit One Productions in Hollywood. On that trip Jens and I both saved travel expenses and perhaps

Canal-clogging water weeds provided this before-and-after sequence, showing the effects of Ortho Diquat, herbicide for aquatic plant control. Scenes were made at 10-day interval.

months of waiting for the proper moment to catch these insect marauders at the height of their activity.

Just keeping our eyes open for shooting opportunities, then writing the script to accompany our footage goes a long way in producing working films economically.

As a matter of fact, Walter Schenk (a freelance cameraman who has shot about 70% of our field footage) and I filmed six agricultural newsreels on one trip last year. Plus that, we picked up valuable footage for other films. Walter has a special talent for transforming the prosaic into the dramatic. Recently, we had to shoot some scenes involving an airplane applying fertilizer on rangeland.

The usual limitation of aerial application scenes of this sort is that most such sequences look alike. You shoot the airplane from the

Screen star Carroll Baker appeared in a pep-up film for last year's Ortho sales meeting. Advertising and public relations manager Lou Czujin (standing) and film specialist Geoffrey Fullick engineered take as Walter Schenk fired the Arriflex for this publicity film.

ground as it flies toward you and makes its pass. An expensive scene would require hiring another plane to carry the cameraman over and around the subject aircraft, shooting it from all aerial angles as it does its spraying work.

Neither of us were content to settle for the standard fly-on scenes if we could help it. Then Walter tried mounting his trusty Bell & Howell just in front of the cockpit. With the pilot pressing the button, we got dramatic shots of the busy aviator at work and some unusual frontal scenes of the ground coming up as the plane dove toward its application passes.

Later on we simulated a close-up side view of the airplane in flight. The camera was angled from prone position on the ground while I rocked the wings. It projected like a scene from *Hell's Angels*, minus such timeworn props as scarves, square goggles and machine guns.

These *Ortho Agricultural Newsreels* have become a great source of satisfaction to me and, I'm sure, to every producer involved. We believe the same is true among our farm-group audiences, even when the effective life among these agricultural viewers may be as short as a year. Acceptance and response to these 10-minute, short-term productions has encouraged us to experiment with similar presentations for showing to our gardening audiences.

The other two types of pictures we produce are (1) the higher-budget, longer-lasting educational films for our garden club audiences

(CONTINUED ON THE FOLLOWING PAGE 44)

For the eyes of garden product salesmen and dealers only: a scene from one of latest 10-minute "instant" films to introduce and demonstrate new product

Cutting machine with a nine-foot blade like a giant chain saw moves into coal seam face in Franklin No. 25 mine at New Athens, Ohio. Machine cuts six-inch slot along the base of seam.

Complex modern machines like this huge shovel at work in a surface mine, are helping the coal industry to maintain a strong competitive position.

## REBIRTH of an INDUSTRY

research, technology, abundant resources have restored "the invisible power of coal"

**T**WENTY YEARS AGO, the coal industry in the United States was faced with serious trouble. Its burgeoning competitors, oil and natural gas, seemed about to completely take over the fuel requirements of the nation. The industry's public image was that of a dying giant, choking of dust in its old-fashioned mines.

But coal is in great abundance, and it is cheap. By developing some of the most advanced mechanized techniques in any industry, coal has not only saved itself from oblivion, but has aggressively forged its way to new successes in the expanding economy.

### How Bituminous Coal Is Mined

This is the basic story of *The Invisible Power of Coal*, a new 28-

minute color film which shows how bituminous coal is mined and used — and how it affects the daily lives of most Americans.

The film demonstrates that bituminous coal, though seldom seen by the average citizen these days, is an essential part of his life. It generates more than half the nation's electricity, is vital to steel production, and is an essential raw material for thousands of industrial plants which use it as fuel and raw material. Chemical by-products from coal make a wide range of consumer goods, from perfumes to plastics.

In striking color photography, the film shows how coal is mined underground by skilled men operating complex machines. The cam-

era shows an electric shovel 20 stories high, one of the largest machines on earth, laying bare a coal seam in a surface mine.

### Moving City Block of Earth

Other equipment shown in the film includes a giant excavating wheel which moves dirt more than a city block, and the Pushbutton Miner, which bores 800 feet into a hillside without a man going underground. Technical animation depicts the formation of coal from swamp vegetation 250 million years ago.

The picture also shows how the coal industry reclaims surface-mined land to create new farms, parks and wildlife areas.

The sponsor of this useful picture, the National Coal Associa-

tion, has achieved a much-needed result: broad coverage of a highly technical subject which still maintains strong viewer appeal. All of its 28 interesting minutes shows a few projects in this wide range of coal research as scientists develop better means of using and analyzing coal and seek big new markets, such as coal-based alcohol gas and gasoline.

### Film Was Created by Audio

*The Invisible Power of Coal* was produced by Audio Productions, Inc., directed by Sid Mandell and written by Sid Mandell. Prints are available for free public showing through regional libraries of Modern Talking Picture Service, Inc.

This orchard was once a surface coal mine. After the fuel was removed, the earth was replaced, planted to trees which now bear commercial crops of apples and peaches. Wooded area in background is also on reclaimed land.

Land disturbed by surface mining was planted to trees and grass as coal was removed from this section of the Fidelity Mine near DuQuoin. Soon it will bear profitable growth of timber like the land in back-

SUCCESS IN THIS WORLD has been short of phenomenal. In an environment that is at best inhospitable, he has managed not only to survive but to thrive. Endowed with relatively little in the way of natural strength or prowess, he has, nevertheless, managed to become the healthiest, strongest and wisest of earth's creatures. Not only how he has done it is the theme of *Man the Manager*, a lively and entertaining film produced by Henry Strauss & Co. of New York. And in the development of the main character, the manager's secret of success is revealed. As the film suggests it is his ability to control the environment around him, to work with and through other people in getting things done — in short, his ability to *manage*. He sets objectives; he organizes; he executes.

**Doesn't Diminish Validity of Ideas**  
 A subject as important as "The Principles of Management" can be treated with wit and humor that is noteworthy. That it can be handled so refreshingly as it has while taking time away from the significance or validity of the ideas set forth is remarkable indeed. This 16mm animated color film, together with three live-action case histories (each two minutes in running time) and supplementary booklet and discussion guides, presents a clear and concise analysis of the problems and procedures underlying modern management techniques in a format that should be welcomed by industrial managers — for that matter *anyone* concerned with the business of business — everywhere.

**Solving Problems Through Tested Methods**  
*Man the Manager* shows that a problem is not always what it seems — whether it's getting a mastodon's hoof and into the pot or supervising workers on an assembly line — and that the key to solve it is by the application of methods that have proved valid through the test of time and use. During the film's 14 minutes of running time, the development of the manager is traced from the caves of prehistory to today's modern industrial plants and executive suites. Whenever the film pauses to take a closer look at what man the manager is up to, a detailed section of the management process is revealed. The conference . . . the problems encountered in communicating . . . the manager's role in a retail breakdown! Who needs a study of one of the principals in "Making Problems," the case studied in "Man the Manager,"

"His sources of intelligence, intuition and courage alert him to advance to opportunity." — A scene from the award-winning film "Man the Manager."

## "MAN the MANAGER"

has achieved rags to riches on a grand scale...

concern with analysis and prediction . . . are some of the sequences that stand out.

This motion picture is *not* a simple, visualized explanation of "How To . . .". In firmly assessing the manager's role in a world he has done much to create, the film does more than inform. Aware of the complex interdependencies in our modern society, *Man the Manager* provokes its audience into considering the broad responsibilities shouldered by management at any level. The film stimulates rather than tells; suggests principles rather than rules.

### Case Histories Show Realistic Situations

Backing up the main ideas presented in the film, the live-action case histories offer three realistic situations in which a specific management principle has been ignored much to the distress of those involved.

The first case, "Making Problems," shows how a fuzzy objective leads to uncertainty and confusion.

The second case, "Anticipating Problems," points up the value of a subordinate's experience and the peril a supervisor risks in disregarding it.

The third, "Solving Problems," suggests that a manager's awareness of underlying causes is a prerequisite to effective action. As bases for

"Jack, when and if it becomes obvious that that extra people are needed. I'll get them." — Scene from case study "Anticipating Problems."

meaningful discussion or simply food for thought, the value of the case histories is hard to overestimate.

Originally produced for Pan American World Airways, the film's wide appeal was recognized by the Committee on International Nontheatrical Events and it has received a CINE 'Golden Eagle' award for general excellence. *Man the Manager* was also selected to represent the United States at the Fifth International Industrial Film Festival at London last fall. There, the normally staid FINANCIAL TIMES described it enthusiastically as ". . . a brilliant cartoon which demonstrates with much guile and humour the basic principles of management."

An illustrated study booklet and separate guides for the film and cases are provided.

### How Companies Can Obtain This Package

The 14-minute color film complete with study booklet and discussion guide is priced at \$195.00. The case histories with accompanying discussion guide is \$80.00. The color film, case histories and supplementary study material can be purchased together for \$250.00. Entire program is available for 3-day preview for \$15.00, applicable to the selling price. Henry Strauss & Co., 31 West 53rd Street, New York, City are the sole distributors.

"We could be running into major trouble. Let's get people from Warren. They can study about solving problems." — Scene from "Man the Manager."

Customers come in all types: timid, aggressive, hasty, argumentative, and charming — and also difficult!

One filmstrip shows that certain attitudes often are "masks" which are assumed to win attention of others.

Employees see that, though people are different, all respond favorably when greeted with friendly interest.

## People Helping People: Secret of Successful Banking

Complete Sales Training Program for Bank Personnel Is Helping Build Profits by Showing Employees Principles of Successful Selling to be Applied at Work

THE TWO BASIC COMMODITIES with which every bank deals are money and people. Ideas, carried over from ancient days when a bank's primary responsibility was to safeguard money, still influence many banking staff members to place money first in their thinking. Too often, there is a tendency to minimize the vital part played by *people* in the growth of a bank.

Unlike the department or specialty store, supermarket or florist, a bank has little opportunity to tell other people about the variety of bank services. Customers won't ask for services they don't know about and, because they don't ask, bank people often assume that the customer is not interested in additional services.

### They Forget the Other Services

This spotlights a truth, recently pointed out at a banking conven-

tion: too many customers go into banks today and leave with just the one service for which they entered the bank. Year after year, a customer can make a deposit or cash a check, and never hear mention of the many other services the bank is equipped and eager to supply.

Profits walk out bank doors every day, because bank personnel fails to mention additional services. Bank employees are almost invariably courteous, but courtesy is not enough in today's intensely competitive banking atmosphere . . . it is necessary also to *ask for the order*.

### Employees Must Be Motivated

If the bank is to add to its earnings and offer employees increased opportunities for promotions and job security, every employee must be motivated to feel a responsibility for promoting the sale of bank services.

Stopping long enough to give specific directions to a customer requires little time, makes friends.

Pointing out to the customer advantages of additional services a prime way to build bank business.

Personally introducing a customer to a bank officer is another courtesy which fosters good relations.

Employees learn where by pleasing customers . . . lead to referral business.

Below: Better Selling Bureau president Dick Weston, executive vice-president John Russo and vice president in charge of production Don Bartelli, check script and color negatives for "How to Succeed in Banking" program.

Aware that bank employees, as a class, have been seldom confronted with the need for selling — though such indoctrination is a pressing bank problem — the Better Selling Bureau did a vast amount of research, collaborating with outstanding bank authorities. The result is: *How to Succeed in Banking* — the first complete sales training program for bank personnel. This new course has a double purpose:

For the bank, it is designed to build profits by stimulating great-

er employee interest in selling — showing how successful selling can be achieved along with the employee's regular work.

A Principle for Selling Shows For the employee, the shows, first, what selling is: *helping other people*. It shows selling opportunities exist in most every contact with a customer but that such contacts are limited to contacts with customers in the bank. It emphasizes many chances occur outside the bank . . . at parties, with friends and neighbors, at casual meetings even over a cup of coffee. It stresses that a true interest in people develops a friendly and personable personality that *pays dividends* — the employees not only succeed in personal and social activities as well.

To achieve maximum results from this sales training, the principles are presented as an integral part

of the day's work. The course or limited program approach is avoided. Not: "We are studying selling for the next three months" but: "We are learning how to do a better job of helping people, and enjoying it. We shall see how to consider our jobs from a creative angle. In this way, we will attain personal development and become more interesting individuals."

Four Essentials to Success *How to Succeed in Banking* incorporates the four basic

people learn best: motivation — the trainee must have a reason for wanting to learn. To apply the ideas and principles presented.

Participation — by discussions and questions, the individual must participate actively in the sessions. Application — trainees must be shown by typical scenes and in workshops, how the lessons learned are to be applied.

Measurable Progress — by using questionnaires and taking part in the discussion sessions. Satisfaction — as well as the trainee must be able to measure the employee's progress.

Employees See How They Gain — These meetings and workshops show employees how they profit from their efforts, when they make a sincere effort to sell bank services. Often, employees are told they must do certain things, but they are not given reasons why they should do them, or how they initially will benefit.

How to Succeed in Banking — These 30-minute sessions half feature color sound filmstrips. Five workshop meetings — scheduled to alternate with the visual sessions — provide opportunity for reviews of the filmstrip meetings, and for discussion of problems relating to daily work in the bank.

Learning to Know Their Views — Open discussions reveal the employees' points of view and help in their acceptance and understanding of the training. Emphasis is focused on the opportunities where the selling of additional bank services can be accomplished with only a little

extra thought . . . and without neglect of the regular work.

#### Vital Impact of Audio-Visual

The five meetings which feature color sound filmstrips stress the nature of "selling" — on which most business and personal success depends . . . the value of courtesy . . . how to present benefits . . . who profits by "selling" . . . what every customer most wants to know . . . how customer types differ . . . and the parts played by tact and courtesy in handling complaints, referring people to other bank departments, choosing words that avoid customer-resentment, dictatorial demands like: "You'll have to see Mr. So-and-So." . . . "You entered this on the wrong line!" . . . "Your total is different from ours!"; etc.

#### Titles Cover Actual Situations

Actual banking situations and the filmstrip titles:

*What Do You Call It?*

*Who Benefits Most?*

*What Will It Do For Me?*

*Are People Different?*

*Is It Worth While?*

These titles stimulate interest and introduce vivid variety into this dramatic training, which never loses sight of its main objective — "Selling" additional bank services to present customers, and attracting new customers to the bank.

#### Meetings Easy to Direct

All information for the resultful direction of *How to Succeed in Banking* sales sessions is contained in a *trainer's manual*. Each step is charted, and full text is furnished for introductions, discussion subjects, and summaries . . . plus rating scores for marking the ques-

These meetings place emphasis on how employees can benefit by developing a friendly personality, winning customers in the bank and achieving social success and popularity outside its doors, wherever they may go . . .

tionnaires which accompany the filmstrip meetings.

"Ask a computer to solve a problem in human relations and it will fall flat on its gears," a bright wight recently remarked.

Even in this computerized era, people are the priceless ingredient in banking growth. But they must be trained people, aware of the selling aspect of their human relations work. It's been said before, but it bears repeating: It's better to bind customers to your bank with three, four, or five services than by just one.

#### Proving Its Value in the Field

One of California's largest banking institutions — which matches its colorful early history with modern sales-mindedness — uses *How*

to Succeed in Banking in its nearly 200 statewide branches, as well as in its main office.

#### Medico's Work in Malaysia Told in "The Greatest Gift"

A CARE, Inc. film about MEDICO personnel in Malaysia has been released to television stations for free showings through film libraries of Modern Talking Picture Service.

The 13½-minute film is called *The Greatest Gift*. It shows how the doctors and nurses of MEDICO, a service of CARE, meet the medical challenge of a country where superstition and the medicine men and herbalists must be overcome before the sick can be properly healed.

In addition to healing, MEDICO helps in the education and training of local medical personnel and has brought to the people themselves the basics of personal hygiene and good health.

#### Grocery Manufacturers Give Shoppers Budget-Saving Tips

Food shoppers can stretch their budget dollars and still enjoy convenience products, if they learn a few good shopping habits.

A new sound slidefilm, available to home economics classes and women's organizations illustrates these habits and gives other tips on getting the most for every food dollar.

The 14-minute 35mm color sound slidefilm is presented by Grocery Manufacturers of America and distributed on the East Coast by Association Films, Inc.

Workshop meetings enable employees to relate the training to actual problems met in their work each day.

Employees gain ability to handle complaints with tact, avoiding expressions which create resentment.

Listening carefully, to understand a customer's wishes, is shown as a valuable attribute toward success.

# Sound Quality Control

Complete Control of Every Phase of Sound Production  
Step-by-Step Testing Are "Keys" to Consistent Quality

by James Dickert, Recording Director, Wilding, Inc.

Unique backprinting feature of Kodak sound recording tape, which discloses type, base material and thickness details at 30-inch intervals for quick identification, is discussed by Jim Dickert (right) and Bill Koch, chief engineer in Midwest for Kodak's Motion Picture and Education Markets Division. Positive brand identification and series of production control numbers are included to help assure quality. Wilding now uses this 3/4-inch tape for much of its original recording work on business film productions.

**S**OUND CAN MAKE OR BREAK a sound picture.

Unfortunately, this is all too often a thought which occurs after poor, and in some cases unbelievable, sound quality has robbed a motion picture of its effectiveness.

Everyone has had the unpleasant experience of viewing a film in which the sound did not compliment the scene. You might even have chuckled if the mistake occurred in a serious scene in a theatrical film. But think of what an unpleasant experience it would be if it were your film — perhaps, a film about a product or about a company.

At Wilding, we have long recognized the importance of sound to a motion picture film, and we have learned from many years of experience how to consistently maintain good sound quality.

## We Control All Sound Phases

The key to our sound operation is in our internal handling of every phase of sound production, including original recording, duplication, pre-mixing, editing, re-recording, and finally transferring to optical negatives, and printing on positive stock.

In addition, our ability to control quality is enhanced by having four sound stages in Chicago, two in Detroit, one in Hollywood, along with leased facilities in New York and San Francisco.

## Testing Helps Get It Right

Testing is another important factor in our operation. Only the manufacturer can provide com-

plete scientific laboratory testing of the magnetic tape and film materials used in the production of sound; however, we are able to make certain tests which we feel are important. For example, we periodically check for such things as output, signal-to-noise, print through, and quality deterioration.

We also test to be sure we are recording with optimum bias, and we check intermodulation distortion at normal recording levels. Steadiness of motion is frequently

checked on the recording equipment. We could mention many other things that must be avoided to ensure good sound, like flutter, wow, reel wind deformation, etc.,

## Many Variables Affect Quality

However, the point to remember is that many variables affect good sound and some kind of efficient testing procedure is necessary to maintain high quality, uniform sound production.

In regard to procedure, we are currently using four types of magnetic materials in our sound operation: 1/4-inch magnetic tape and 16mm, 17 1/2mm and 35mm magnetic film.

## Use Varied Sizes of Tapes

The 1/4-inch is used on location and the 17 1/2mm film for original recording on the sound stage. We use the 17 1/2mm film rather than 16mm film because the difference in speed between the two makes a difference in sound quality. (17 1/2mm runs at 45 ft. min, while 16mm runs at 36 ft. min.) In addition, the 17 1/2mm film has twice as many perforations as 16mm and

thus provides better steadiness and resistance to wear.

Good "takes" are transferred to 35mm stock for editing. A film and tapes, including sound effects, music background, narration, and synchronized sound, are then edited and re-recorded onto either 17 1/2mm or 35mm magnetic film which becomes the "master mix."

The master mix is used

## A Word About the Author

- Mr. Dickert started his career at the American Telephone and Telegraph Company, where he worked on the trans-Atlantic telephone. Later, he moved to MGI at a time when sound recordings for films were being made on wax disks and, then to Warner Bros., where he worked on the development of the first optical sound.

Following this, he helped develop vertical disc recording for the World Broadcasting System and did research for Decca Records at the time the first long-playing records were introduced. He has been with Wilding for 18 years. An active member and manager of the Chicago District of SMPTE, he holds several patents in the field of electronics.

At the left: sound stage mixer Henry records sound for a Wilding commercial. 17 1/2mm, rather than 16mm, magnetic film used at Wilding for this sound stage work. The greater speed of 17 1/2mm is said to help improve sound quality. The film tracks later transferred to 35mm magnetic film from which sound editors make up the work print tracks. These are then combined with sound effects to make the optical negative which become part of the finished product.

Mixer Raymond Esh handles re-recordings in this transfer room at Wilding. Equipment includes a narration mixer panel and 1/2 inch, 17 1/2 mm magnetic tape and film equipment, provides for transfer from any pair and medium to any other — as well as making optical recordings.

Supervising editor John Cook handles re-recordings in this transfer room at Wilding. Equipment includes a narration mixer panel and 1/2 inch, 17 1/2 mm magnetic tape and film equipment, provides for transfer from any pair and medium to any other — as well as making optical recordings.

magnetic dupes or optical

the sound production  
problems in maintaining

sound quality from the original recording to the final positive print are many. At Wilding we minimize

the problems by handling every step in sound production while using only the highest quality mag-

netic materials for transfer and duplication and maximum

Below: in this room Jim Dickert re-records all tapes and films, including sound effects, music, background narration and synchronized sound on 17 1/2 mm or 35 mm magnetic film which becomes the master mix. This is then transferred to 16 mm or 35 mm optical negatives for composite print

This procedure was essential for complete customer satisfaction in the 175 sound films that we completed in 1964.

That's the goal we constantly strive toward in our recordings.

Vast acres of orange groves produce golden flood which moves to market.

## Minute Maid: a Look at the Leader

Major Grower and Processor of Citrus Shows Operations from Trees to Market Baskets in 18-Minute Color Picture

THE WORLD'S LARGEST single grower and processor of citrus fruits is taking the story of its operations to its employees, food brokers and their staffs, distributors, retailers and the consuming public in a new 18-minute color motion picture.

The film, *A Look at the Leader*, amply lives up to the image of leadership for its sponsor, the Minute Maid Company, Orlando, Florida. Produced by The Jam Handy Organization, its scenes take audiences through the complex operation which results in millions of tons of juices and concentrates.

### Rewards Depend on Consumer

The reward of enlightened leadership, the company emphasizes in this film, comes when Mrs. Consumer selects its products, decides that she prefers them and buys them again and again. But this leadership demands a constant philosophy of product excellence.

"All down the line," they say at Minute Maid, "excellence must be practiced daily, from the maintenance of citrus groves to the delivery of the product to the market basket. And leadership must be won anew each day."

### Nature Sets Time of Ripening

Sequences in the picture carry through from the planting of new groves to the purchase of end products at the shopping center. Because millions of oranges and other citrus fruits ripen at one time, the task of processing this

golden flood from both the company's own groves and from those of other growers calls for a remarkable transportation and handling operation.

*A Look at the Leader* includes informative scenes of mechanized tree culture, complex automated processes used in the blending, freezing and packaging of juices and little-known but vital operations required for frost protection and grove maintenance.

### First Shown to All Employees

The prime audience for the new color picture is the company's own employee family and the distributive industry, from food brokers to store managers and their staffs. But the film is also being made available for free-loan to civic and community organizations, churches, schools and other groups. It will serve an especially useful purpose among classes in distributive education. Write The Jam Handy Organization, 2821 E. Grand Boulevard, Detroit, Michigan 48211 for details on obtaining loan prints.

### Robert E. Doyle to Supervise Film Bureau at U. S. Steel

Robert E. Doyle, former assistant in motion picture distribution for the U. S. Steel Corp. in Chicago, has succeeded Frank Greenleaf as supervisor of that company's film bureau at 208 So. LaSalle Street, Chicago. He is a member of the city's Film Council.

## MYSTIK SHOWS THE WAY TO SALE

A Comprehensive Eight-Hour Training Program is Filmed to Equip Tape Salesmen With Real Knowledge of Product

THREE YEARS of rapid growth gave Mystik Tape, Inc., division of The Borden Chemical Company, a major marketing problem—and the opportunity to solve it ingeniously. How do you effectively help train a force of distributor salesmen which has multiplied at an explosive rate?

Last fall, Mystik's president and marketing vice-president met with the top management of Blake, Moffitt & Towne, a division of Kimberly-Clark Corporation. B, M & T had decided to distribute Mystik's products, but before making any commitment they wanted to know how Mystik intended to train B, M & T's 240 salesmen—quickly and profitably.

### He Sells Products He Knows

The philosophy behind Mystik training programs has always been that a salesman talks most about and sells more of the product he knows best.

Milton Stohl, marketing vice-president, suggested that Mystik would film a comprehensive training course in color and sound, and have it ready in two months. And B, M & T took him up on it.

With obstacles such as time, a modest budget, limited facilities, and only a few people with any experience in this type of activity, Stohl set out to assemble a sales training program which could be presented effectively in a single eight-hour session to groups ranging from 500 to eight men.

### Shared Responsibility on Script

Stohl and William Miller, director of sales personnel and training, wrote the script. They used

Sales personnel and training Bill Miller (left) discusses sequence with Dick Kane, Mystik industrial advertising manager.

good professional photography but the entire project was produced and directed by Stohl, assisted by Richard Kane, Mystik industrial advertising manager.

Actors and narrators are all Mystik personnel with two exceptions: Robert N. DeWilde, general manager of B, M & T, and a professional actress who was used in one sequence for comedy relief. A change of pace. Company president Robert Leander introduced the film and does the epilogue.

### Eight Long Weeks of Hard Work

After eight weeks of working 16 hours a day, the staff was ready to preview "The Magic of Mystik." Mystik executives tested the results "gratifying beyond expectations." And the Mystik marketing team was convinced they have a new secret weapon—they intend to fully exploit it.

They point out that the cost of the sales training staff is substantially reduced; the program (CONCLUDED ON PAGE 5)

Marketing v.p. Milton Stohl is "on camera" in this Mystik film sequence.

## Conference Opens June 3rd

Special Advance Program Details for National Conference June 3rd to 5th at Ambassador Hotel in Los Angeles

ADVANCE DETAILS for the Sixth Annual National Conference of the Industry Film Producers Association are now beginning to take shape. This year's meeting will be held at the Ambassador Hotel in Los Angeles on June 3, 4, and 5.

people who have successfully produced low-budget films for child groups will be joined by Mrs. Hattie Dyrenfurth, moving spirit of the "Youth Films Foundation" and a long-time proponent of more and better films specifically made for children's groups.

Social festivities will be highlighted by the traditional "Welcome Home" party at the Ambassador. Final details of the program will be given in these columns, just prior to the Conference itself, next month!

### Northern California Chapter Hears Reports on State Films

☆ Bay Area members of IFPA's Northern California chapter held their February meeting in Sacramento where they joined members from that area in a discussion of the State of California's motion picture activities.

The group met in the new Resources' Agency auditorium for an a-v presentation by Dick Jones, audio-visual specialist in the Division of Highways and by Clay Dudley, Chief, Graphic Services Branch, California Department of Water Resources.

Jones summarized State agency activity in the film medium and presented a recently-completed

Dick Jones, audio-visual specialist in Calif. Division of Highways.

color picture, *Heritage*, which showed the reconstruction of early California adobe buildings.

In describing motion picture operations in his department, Dudley screened *California's State Water Project*, a picture created to inform the public about the controversial State water program. He also conducted members on a tour of the new photographic facilities in the Resources Agency building.

An additional feature of the meeting was the screening of a Russian atomic energy film, *Siberian Center of Nuclear Research*, which Ray Jaeger of the University of California's Lawrence Radiation Laboratory showed as an example of behind-the-Iron Curtain industrial film techniques.

For the March meeting of the

Clay Dudley leads graphic services in the Dept. of Water Resources.

Chapter, members visited San Jose, at the southern extreme of the area, where they heard Dr. Jerry Kemp describe audio-visual activities at San Jose State College.

Panelists who discussed "University Film Training" are pictured above (l to r): producer Ralph Hall, Acropet-General's Henry Martin; moderator Ray Ussery; Dr. Bernard Kantor of USC; and John Young, from the USC faculty.

## Are the Universities Preparing Our Filmmakers?

Educators and Industry Men Present Views at Chapter Forum

☆ The Editors bring you a condensation of an IFPA Chapter program on the topic "How Large is the Gap Between University Film Training and Practical Film Production?" held by the Southern (Los Angeles) California Chapter on March 24, 1965.

Moderator of the forum was Ray Ussery of San Diego. Gene Keefer of Convair, San Diego, who was to have been one-half of the industry team, sent word that he was held up on an assignment in Fort Worth, so Ralph Hall substituted for him.

\* \* \*

John Young, Head Motion Picture Division, Department of Theater Arts at UCLA:

I shall proceed from the assumption that there is a gap between university training and the non-theatrical film production ex-

perience. Of course, I am not quite sure why one is called "training" and the other "experience"; in my opinion, university training is also an experience of some kind.

Hindsight is always better than foresight, and many of you who have gone through the U.C.L.A. training may say now: "Why didn't they teach me this, instead of that?" In the light of what you know now about your work, you would be right.

But university training, because it, too, is a kind of experience, must allow for a certain amount of stumbling around and feeling one's way. I've been up since 7.00 this morning watching a group of students shoot a movie and, believe me, I am well aware that there is a "gap." It's fantastic!

Students, for some reason, always seem to think of jobs and

## Are the Universities Training Filmmakers?

(CONTINUED FROM PAGE 39)  
careers only at the last moment — a few weeks before graduation. Then they come to me and ask: "Well, what do I do now?"

Of course, they have all been told that this is the most ridiculous field to go into from the point of view of getting a job — but they don't believe that because they want to express themselves. And when you express yourself you don't want to be bothered by such things as making a living.

\* \* \*

*Henry Martin, Head, Motion Picture Department, Aerojet-General Corporation, Azusa:*

A motion picture graduate who wants to go into the industry, whether in the entertainment field or the industrial field, must decide what he wants to be: writer, editor, cameraman, director, producer, or whatever. I suspect that most university motion picture graduates want to be directors and producers. Most of them do not come from the university with the humility of their leader, but they think of themselves as little de Milles — not de Mille as he started out, but at the height of his career!

There's the problem. They come from the university with degrees, and because they have the degrees they have a feeling of superiority.

In motion pictures you must start at the bottom, doing everything — sweeping the floor, carrying film cans — anything! That's the only way to start out. Therefore, before the university graduate can be of any value in industry, most of what he had learned at the university has to be knocked out of his head.

Much of the teaching about film is done by showing films — good films with a lot of technical tricks. But the problem is: which trick do I use *where and when* to tell *my story*? The young aspiring film maker is much too concerned with these tricks and gimmicks. What do we want of a young man in industry? We want him to be a junior editor — we want him to know about trims, so that when we need five frames out of reel 30 we can get these five frames a few minutes later.

In Hollywood a man is supposed to pass an apprenticeship of eight years before he even gets past the bottom rung of the ladder. Why? Because everything costs so much that they just cannot take a

## THE INDUSTRY FILM JOURNAL

chance. The frills and the gimmicks and the fame come much, much later — if at all.

Summing it up, I might say that I think the university training aims far too high. The university trains film critics, rather than film makers, who lack the humility that is needed in film production. They must learn that the gimmicks and the tricks they have learned are

Panelist Henry Martin (left) is pictured with moderator Ray Ussery at discussion of university film training.

good only if they contribute to the art of story telling — and the art of story telling is basically the same for any kind of film, industrial, documentary, or entertainment.

\* \* \*

*Dr. Bernard Kantor, Head U.S.C. Department of Cinema:*

☆ I am frank to admit that there is a gap between university training and industrial film making — the gap is large and we *want* this gap to be there. The ideal young film maker we just heard described sounds to me like he comes from a vocational school.

We are supposed to be an educational institution giving a rounded education. A motion picture major spends only about a quarter of his four-year curriculum on film. But we gain a few other things: we hope we have trained a man or woman to be a citizen, a thinking human being who can make decisions, a rounded individual. If you want someone who can find a piece of film at the right time, go to a vocational school.

Perhaps I should give you a breakdown on where our students go, based on about 12 years of experience. About 20% drop out of film — they come to the conclusion that it is not for them. But most of the other 80% stay. We can't even claim the females who marry and leave the field, because out of 250 majors we have had a total of five girls.

Out of that 80%, about 35% go into theatrical films, and seem to advance much more rapidly than you indicate. A young woman went to Columbia as an assistant to Roger Corman a year ago, now she is directing second

What about the other 35% who go into non-theatrical films? Most of those who come to university have illusions about getting into the film business — maybe they would like to, but they know pretty well they won't make it. What you are getting, in other words, is not the cream of the crop. The top 10% goes to Hollywood — you are getting what's left. Another graduate of ours is an excellent cinematographer — non-union, but very good — he is working for Wolper, now getting \$400-\$500 a week. You can't afford him.

As for the student who is interested in history and criticism of film, he usually goes on to a higher degree. He wants to go to another college or university. The American Council on Education is now advocating a course in film history and appreciation at all colleges and universities. So if you have a student with an interest in going into this field,

But the majority of our students stay in production. I think they are probably capable of doing more than you allow them to do. I am tired of educational show's where a gray teacher teaching gray students on a gray tube. Maybe our young film makers can do a little better given a chance.

All we want to do is to get our students *ready to learn* to make a film. I think we can shorten learning time by several years. That's about all we can hope to do.

\* \* \*

*Ralph Hall, of Ralph Hall Productions:*

I agree with Dr. Kantor. We should give the film student a greater chance to express himself, but very often the nature of the work is such that we cannot give them that freedom because we don't have it ourselves.

I hate to think that all the good ones are going to Hollywood. Many Hollywood people have gone into industrial film, many of us here are originally from Hollywood — precisely because industrial films often allow the

expression which is de-  
m in Hollywood.

tain thing the young mo-  
re graduate lacks is plain  
sense. I don't mean this  
gatory manner — I'm just  
ithful. It's just their lack  
ound knowledge of the  
of industrial film making.  
ould investigate what it is  
make up their minds if  
nt to get into it. And if  
get into it, then they must  
the way. They should get

**T**HE SALE OF A JET aircraft such  
as the Douglas DC-8 involves  
much more than just delivering the  
plane to the customer. The manu-  
facturer must also supply complete  
spare parts, test equipment, in-  
structions for proper operation and  
maintenance, and assistance in the  
design of advertising materials for  
promoting the new jet.

One of the "extras" offered to  
foreign airlines by the Douglas Air-  
craft Company is the services of its  
motion picture department. Dou-  
glas cameramen will travel to the  
area served by the airline and film  
the company's facilities, air termin-  
als, cities, scenic locations, and ob-  
tain other footage. Then, in coop-  
eration with the airline, Douglas  
will produce a travelog that can be  
used for informational and promo-  
tional purposes.

#### Joint Venture of African Nations

A recent project of Douglas' motion picture department was a 16mm sound-color movie made for Air Afrique, the new airline organized as a joint venture of thirteen independent nations\* of West Africa. Concurrent with the delivery of two 120-passenger DC-8 jetliners to the airline's headquarters in Abidjan on the Ivory Coast, Douglas photographers set out on an African "cine safari" that lasted four weeks and took them over an area of land larger than the continental United States.

Traveling overseas on film assignments is nothing new to Douglas photographers since this giant aerospace company has literally dozens of installations overseas. For example, Douglas film people within the past two years have journeyed to Spain and Holland to work on travelogs for other airlines. For the Air Force, they have gone to missile tracking stations in the Pacific and even to the South Pole. Thus the company's motion picture department is thoroughly experienced in the techniques of making movies under difficulties indigenous to remote locations. But West Africa, even in the mid-twentieth century, presented problems of climate, language and transportation more complex than ever encountered before.

#### Itinerary Covered 18 Countries

The African film assignment was the responsibility of Ben Marble, Director of Douglas' Marketing Communications, and his associate, Bill Gibson, Assistant Director of the department. According

\*Mauritania, Senegal, Ivory Coast, Dahomey, Niger, Upper Volta, Chad, Republic of Central Africa, Congo, Brazzaville, Gabon, Cameroon, and Togo.

Film took the Douglas Aircraft Company's medium-sized transport, the DC-8, to overseas buyers. Centered by camera crew are (left to right) company president Donald Douglas, Jr., chairman of the board Donald Douglas, Sr.; and vice-president Jackson R. McCowan, as they introduced the new jet.

## Films Aid Sales of Jet Aircraft

"Winds of Change" Produced by Douglas for Air Afrique  
Was Lensed on Cine Safari Which Covered 18 Countries

to Ben Marble, "Preparations for the trip were almost as complicated as the journey itself. We knew we would want to travel in and photograph some eighteen countries."

The problem of selecting camera equipment while keeping weight to a minimum was the task of Bill Gibson. A veteran of overseas film assignments for the aircraft manufacturer, Bill is a firm believer in being prepared and never assuming supplies will be available on location. For the African trip, he selected two motor-driven, 16mm reflex cameras; miscellaneous lenses ranging from wide angle to telephoto; a rugged but lightweight professional tripod with panhead; portable lighting equipment and ten thousand feet of Ektachrome Commercial film.

#### All Climates and Modes of Travel

To many, Africa is an "either, or" place — either blazing desert or dark, wet forest. It has both and much more. Considerably larger than North America, it has an equally variable climate but the accent is on the hot and wet, especially in West Africa. In descending order of facility, travel can be accomplished by air, water, rail and road. The Douglas filmmakers got a taste of all four.

The first African stop for cameramen Marble and Gibson was

the ancient city of Dakar. Here they shot sequences of the bustling seaport and its teeming population. Next they visited Abidjan, headquarters of the Air Afrique airline and capital of the Ivory Coast, one of the newest nations carved from the sprawling desert and jungle that was once French West Africa.

Abidjan offers some of the best tourist facilities to be found in West Africa, including a first-class hotel. Using this city as the base of operation, the two cameramen fanned out over the vast territories of the other new nations.

"Dust was our biggest headache

Ben Marble (left) and Bill Gibson (right) plan camera strategy before take-off on overseas assignment.

## Films Help Sales of Douglas' Jets:

(CONTINUED FROM PAGE 41)

during the trip," said Bill Gibson. "In the dry areas such as Cameroon, it was everywhere and got into everything. We kept cameras and equipment in plastic bags as much as possible. But still the fine red dust managed to find its way into the cameras. Almost every night we had to strip them down for a good cleaning."

Another problem was finding reliable mail service. Rather than entrust to the infrequent mail schedules of the "bush," the photographers decided to keep all exposed footage with them, even though they were planning to travel through some very hot and wet places. The 16mm Ektachrome Commercial, after exposure, was stored in the original tin cans of the manufacturer and it survived the ten-thousand-mile ordeal with no ill effects.

### A Visit With Albert Schweitzer

A highlight of the African cine safari was a visit to the outpost hospital at Lambarene made famous by Dr. Albert Schweitzer. Cameramen Marble and Gibson found the eighty-nine year-old humanitarian-doctor still actively managing the affairs of the settlement and consulting daily with his staff. After obtaining Dr. Schweitzer's consent, Marble and Gibson took several hundred feet of film of life at the hospital, including sequences of the grand old man himself.

Ben Marble and Bill Gibson went on to film the variety of life and environment that is West Africa — the people, the native villages, the emerging cities, the wild-life and the wealth of its scenery. Although limited by time, the men

attempted to capture the mood of the new nations as it exists today.

### "Catching Up With the World"

Reflecting on the recent trip, Bill Gibson says, "the most pronounced characteristics of the new African nations is their desire to change, to catch up with the modern countries of the world in a hurry. I guess that's why they're buying jet airliners today instead of waiting to go through a normal evolution of their transportation systems.

"Even the people are rapidly changing while making some attempt to hold onto the traditions of the past. One night in Brazzaville, we had the opportunity to film and sound record some Congo dancers. At first we just assumed that these performers were from the bush. Later we found out their leader, a handsome young man, was a garage mechanic during the daytime, and a good one."

Once back in the United States, production work on the Air Afrique travelog began immediately. All footage used in the film came from the cameras of Ben Marble and Bill Gibson; no stock library scenes were added. The film was written by Ed Lyon, a Douglas staff writer; editing by John Nash; musical score by Edward Norton, who used tapes made by Marble and Gibson combined with library music.

### Title is "The Wind of Change"

The film's title is *The Wind of Change*. It is twenty-eight minutes long and is available in English and French editions. In addition to distribution by Air Afrique and the Douglas Aircraft Company, the film is receiving national distribution to television stations through the Sterling-Movies U.S.A. libraries. Also, *Wind of Change* has been selected for overseas distribution by the United States Information Service."

## Cargo Handling at New York's Port

**T**HE LATEST CONCEPTS, techniques and equipment used in handling and moving freight at the sprawling New York-New Jersey Port are pictured in *Containers and Cargoes*, released this month for showing to interested group audiences on request. The film is sponsored by The Port of New York Authority.

The new 25-minute color picture was written, photographed and produced by members of the Port Authority staff, under the direction of Robert F. Unrath, Port Promotion Manager. It will be used

principally by the Port Authority's nine Trade Development offices in the United States, Europe and Latin America for showings to shippers, exporters and importers.

### Joins Two Previous Port Films

The new motion picture will supplement two previous Port Authority-produced films. *The Fabulous Decade*, made in 1959, emphasizes the development of terminal and transportation facilities in the bi-state Port District. *Sixty-Seven South*, which was produced in 1961, details the activities of the people who handle the goods and

process the myriad papers to the efficient flow of international trade in the bi-state port.

Showings of these two films have been attended by some 750 shippers and other business throughout the free world, in addition to the many millions who have watched them on numerous telecasts in the United States overseas since they were produced.

### Latest Innovations Are Shown

*Containers and Cargoes* illustrates innovations in cargo handling such as the New York City System's Flexi-Van; the Pennsylvania Railroad's Truc-Train; the container operations of the Line, Sea-Land Service and train Lines. Self-unloading for gypsum rock and fast shore movement of ores and print also are shown. The film focuses on new developments in the handling of air cargo, including Seaboard World Air's "swingtail" aircraft and American Airlines' "Astro-Loader."

The film was written and produced by Mr. Unrath. It was photographed by William Samenik Jr., Supervisor of Photographic Services at the bi-state agency. Port Authority photographer Peter Eckel, Theodore Ross, and otho C. Sheehan and John H. tenborg, Arthur Truss, Picture Editor in the World Trade Department, served as Special Assistant to the producer.

### How to Obtain This Picture

Prints of the film are available without charge to export-trade and civic groups and interested audiences. Showings may be booked through the Port Authority's regional Trade Development offices or the Port Commerce Division of the Port Authority, its main office, 111 Eighth Avenue, New York 10011.

### Safety Role of Highway Signs Shown in 3M's "Silent Guide"

Safe driving is one of the nation's greatest problems. Important aids to safe driving are the new types of highway signs featured in *The Silent Guide*, a new film produced by the 3M Company's Reflective Products Division.

The historical background of this film shows the evolution of guideposts and what we are doing today to make our highways safer for both day and night driving.

Countryman-Klang Film Productions produced the 27-minute color film, which is available from Modern Talking Picture Service.

# AV Tools from Kodak help you keep costs controllable

**KODAK K-100 Turret Camera.** Professional, yet light in weight. Will handle all your shooting assignments. Turret holds three KODAK Cine EKTAR Lenses. Choose from many . . . from wide-angle to telephoto. Lenses coupled to corresponding viewfinders. Powerful spring motor gives up to 40 feet of exposure in a single winding. Film speeds can be varied from 16 through 64 frames per second . . . plus single-frame shooting. Magazine holds 100 feet of film.

**KODAK PAGEANT 16mm Sound Projector, Model AV-126-TR.** This may be the least expensive to own of all projectors. The sound system is transistorized because transistors can last a lifetime. The exciter lamp is operated below its rated voltage so that it, too, should last for the life of the projector. Mechanical parts have been designed so that they not only run gently and last longer, but cost much less to replace or maintain. The film-transport system has been designed so that neither the picture portion nor the sound portion of the film comes into contact with stationary parts. This makes sure your inventory of films will be well protected. And, if you need a P.A. system, the KODAK PAGEANT 16mm Sound Projector, Model AV-126-TR, has it. All you need to buy is a microphone. The 12-watt amplifier packs plenty of power for small rooms or auditorium presentations.

## The Film Program at California Chemical Co.

(CONTINUED FROM THE PRECEDING PAGE 31)  
which were described earlier and (b): our low-budget "Instant Films" which demonstrate new products as they emerge for marketing. These are shown only to our sales staff and dealers.

When the company develops five to ten new products a year, we find that we must frequently work with hand-drawn labels and just the bare outlines of a script, as a difficult deadline approaches. These are the times when the unspoken rapport between director, cameraman and talent proves its real value.

We've been to the point where we had to produce a workable, sound-on-film communication piece *within three hours*. Cutting in the camera, searching for an exciting musical score to zip-up the salesman's enthusiasm for the new product and other details really takes some extra creativity on everyone's part. This kind of last-minute scripting, though, has spawned some unexpected, humorous approaches.

A three or four-minute film of this type may sometimes have a "home movie" look about it. But at an important sales meeting, this is better than no look at all. This "home movie look" is what we ended up with once in Jayne Mansfield's back yard, but it made a big hit a few days later at our annual sales meeting.

Lou Czufin quietly introduced the film as "an interview with just another Ortho garden products customer." It turned out to be Jayne in her heart-shaped rose garden! Yes, we had a glamour subject but you could hardly call it a glamorous production. But the few hours we spent shooting over the head of our still photographer proved to be an excellent investment as a focal point in making our sales meeting a bigger success.

### Exterior Long Shot: by Our Correspondent

☆ After several days in the California Chemical Company's projection room, we had a few observations of our own to add to these incisive reports.

First of all, Ortho's "Instant Films" are obviously working film tools without flourishes, except for the occasional injection of humor. But even the least-refined of these productions can't help but communicate new product development and to provide demonstrations more capably than would be possible through any other medium at a sales meeting.

Secondly, the *Ortho Agricultural Newsreel*

series belies that commonplace title. For instance, *Pre-Planned Harvest*, produced by Productions of San Francisco; and *Seeds of Harvest Date*, produced by Davidson also of the Golden Gate city, are anything but what you'd expect a "newsreel" to look like.

These films, like the 25-minute feature, *Pellets of Plenty*, also produced by Davidson, were most refreshing in their economy of production, the delicacy of product promotion and are lavish in memorable music and editing. Their intriguing pacing, artistic film editing and camera work frequently venture into the more advanced areas of cinematic art.

A third view of Ortho's film program concerns the *Gardening* film series previously mentioned. Films in this group were produced by both Ingraham Productions and Davidson.

### Honors to "Prescription for Safety"

☆ Since this report was prepared for publication, the Editors have received word that the recent Ortho film, *Prescription for Safety* (18½ minutes color), has been nominated for a "Golden Eagle" award by the Council on International Non-Theatrical Events to whom it was submitted for possible overseas festival showings.

And the National Committee on Films for Safety has given the same title an Award of Merit in its 1965 Contest for outstanding safety films. The picture was produced by Ingraham Productions.

Films for years of viewing among consumer audiences. Some of the extreme close-ups of flowers and insects could be viewed daily without fatigue.

In *The Great Garden Search*, produced for Ortho by Imagination, Inc., of San Francisco, gardener-audiences are exposed to the truth behind the problems of scientific research and product development in unforgettable and understandable terms. This is accomplished in just 15 minutes of vivid sight and sound exposition.

These films appear to deliver a fresh and enriching experience even after a second look at the same subject. Perhaps Mr. Kent's company didn't intend to have its product image enhanced by the substance and quality of much of its film work, but it's a pleasant surprise to report that extra-dividend on behalf of millions of gardeners and growers, both amateur and professional, who will benefit from Ortho's useful motion pictures in the years ahead.

VISTA is proud to serve California Chemical Company  
as a producer in their successful film program

**Sundial TV Productions, Inc.  
Is Formed by Carl Ragsdale**

Carl Ragsdale, president of Sundial Films, Inc., New York, has announced the formation of a new subsidiary, Sundial TV Productions, Inc., of New York and Washington, D.C.

The parent company was organized in 1944 and has produced many award-winning motion pictures throughout the years. The new company will produce industrials and TV commercials in both New York and Washington and offers complete studio, cutting and projection facilities in both cities. In addition, each facility has several complete location production units for both 16mm and 35mm work.

The new division has just completed a series of TV commercials for Black & Decker Mfg. Co., which were shot on location in Miami. In addition, it is currently producing groups of commercials for the Maryland National Bank and the Equitable Trust Association.

Sundial TV Productions, Inc., has offices at 200 West 57th Street, New York, and 1032 33rd Street, N.W., Washington.

\* \* \*

**Color Service Company Gets  
First Quad-8 Optical Printer**

The first model of its new Quad-8 Optical Sound Printer has been delivered to Color Service Company, New York City, by Andre Debric of New York, U. S. distributor for the French equipment concern.

Printing in the "Maurer" 8mm format, the machine is a combination 8mm picture and sound printer. It uses 35 8mm-5R stock and prints four 8mm images simultaneously from a 16mm original and four 8mm tracks simultaneously from a 16mm track negative.

In a single pass through the processing equipment, the raw stock is printed with both picture and track. These are multiplied optically by the machine so that each exposure of the original results in four images on the receiving stock.

\* \* \*

**Turvey Talks to Brooks Grads**

Irv Turvey, western manager of S. O. S. Photo-Cine-Optics, Inc., was recently invited to address the graduating class of the Motion Picture Dept. at Brooks Institute of Photography, Santa Barbara, Calif. Turvey's topic was "What to Expect From a Production Equipment Dealer."

**Colorvision System Installed at the Consolidated Film Lab**

CONSOLIDATED FILM INDUSTRIES has announced the installation of the newly-developed Colorvision system color separations printer, now fully in operation at this Hollywood, California laboratory after extensive and exacting tests were successfully concluded.

The new Colorvision system, invented by Lionel H. Wheeler, consists of a dichroic beam-splitter and complementary optical system, mounted on a standard optical printer. All three color components are recorded simultaneously during a single pass through the printer in three separate areas within the confines of a single 35mm full aperture frame.

Three-color exposure control is also accomplished during this single pass through the special printer, with overall contrast control obtained during processing. (The conventional separations system requires three separate passes to be made through the printer.)

According to CFI president Sidney P. Solow, the Colorvision system provides archival-type protec-

tion with major savings to customers in terms of reduced laboratory costs and reduced storage space requirements. The results show that color prints from color dupes made by the new separations system are superior in terms of color fidelity and image sharpness compared to results obtained by the intermediate color positive system.

The new Colorvision system employed by CFI, requiring only a single pass through the special separations printer, is priced at 25¢ per screen foot; a single-strip color separations positive made through the Colorvision system is said to cost approximately 40% less than a color master positive (intermediate).

New economies made possible through this system should encourage film producers to insure valuable color material by making positive three-color separations, according to CFI experts. They note that the new process will be of special interest to producers of color television films and among

motion picture installations operated by government, military, scientific and educational institutions who are especially concerned about the retention of original color values for long term test evaluation purposes.

In addition to the new Colorvision single-strip separations system, CFI will continue to provide conventional three-strip color separations and color master positives for those customers who desire these processes. Clients are advised to specify in advance if they wish to have separations made through the new Colorvision process.

**Craven to Produce Publicity  
Films on "Zhivago" for MGM**

Thomas Craven Film Corporation, of New York City, has completed arrangements with Metro-Goldwyn-Mayer for the production of publicity and promotion films in connection with *Doctor Zhivago*.

According to Bill Robinson, production director, there will be several wide-screen color films following a pattern set by similar Craven work for *Lawrence of Arabia*, *Barabbas*, *The Devil at Four O'Clock* and *Joy House*.

Location units will be set up to cover spectacular production operations in Spain and in Finland where winter scenes are to be filmed on a location 100 miles from the Russian border.

Meeting recently in Spain at London with *Zhivago* director David Lean and writer Robert Bolt, Tom Craven worked out details of his latest "film maker to film makers" assignment.

\* \* \*

**William Morris Agency to  
Represent Concepts Unlimited**

Concepts Unlimited, Inc., producer of industrial shows, has signed with the Industrial Division of William Morris Agency.

Principals of Concepts Unlimited are Gaby Monet, Robert Deubel and Richard Barclay. Miss Monet is a director, performer and choreographer and has created shows for such organizations as Chen strand, Beaunit, Bulova, Lowenstein and National Cash Register. Deubel is a costume, set and industrial designer. Barclay has appeared in countless industrials and on Broadway as the lead in *Carnival*.

Miss Monet, Deubel and Barclay have just returned from a 10 city tour introducing Whip 'n Chisello, a new General Foods' product. Show is live and on film.

Paul Kramer previews Front Projection System at Philadelphia studio.

**Front Projection System Is Demonstrated in Philadelphia**

Members of the Society of Commercial Photographers of Philadelphia filled the large studio of Lawrence Williams in that city last month to witness a preview demonstration of the Front Projection Background System, presently being marketed by sales manager Paul Kramer and chief technician Ivan Gottlieb of Front Projection Corp.

The group witnessed the setup of a background projection unit in the new portable Retro-Rescreen. The System produces instant composite photographs as easily as regular photography. Further details can be secured from George D. Margolin, Front Projection Corp., 404 Park Avenue South, New York City 10016.

**Lowest Visual Equipment in Midwest Downtown Chicago Center**

Improved, expanded Chicago downtown rental and service facilities of the Midwest Visual Equipment Company at 571 W. Randolph St. have been announced. The Chicago-based audiovisual dealer has a large rental inventory of late-model a-v equipment. Service, repairs and overhauls are handled by factory-trained specialists. Call this new Midwest office at 263-5076!

**Pathe, Humphries Labs Form a New International Combine**

The consolidation of the two firms was announced jointly by Lawrence I. Weisman, Chairman of Pathe, and Paul Adorian, Chairman of Humphries Holding, Ltd. ☆ Pathe Laboratories, Inc., of New York and Hollywood, and Humphries Laboratories, of London, have agreed to form a joint company operating in the United States, Great Britain and the continent.

\* \* \*

**A.J. Bradford Now President of Audio-Visual Requirements**

☆ A. J. "Brad" Bradford has been elected president of Audio Visual Requirements, Inc., Chicago. He plans to expand the operations of the firm to include the supplying of stage and projection equipment to the industry and display builders, on sale or rental basis.

Bradford was former manager of the Customer Service Division of Wilding, Inc., and is the founder and past president of Commercial Picture Equipment Co.

\* \* \*

**New York Ad. Film Executives Form Focus Presentations, Inc.**

☆ Five veteran advertising executives and film makers in New York have formed Focus Presentations, Inc., which will specialize in live action and animated film commercials and programming for television. Offices are at 400 Park Avenue.

President of the new company is Eli Feldman, who for the past seven years was a vice-president at Pelican Films. He had previously spent four years at Dancer-Fitzgerald-Sample in commercial production, and for the two years prior to his joining Pelican he was in charge of sales at UPA.

Chris Ishii, vice-president and director, was formerly co-creative head of UPA's New York office.

**NOW IS THE TIME! LET US COLLABORATE!**

**TO PRODUCERS OF FILMS FOR U. S. COMMERCE AND INDUSTRY:**

U. S. industry is seeking effective ways to comply with L. B. J.'s request for cooperation in meeting the "balance of payments program." Now is the time to suggest to your clients conversion of their films into multi-language versions for foreign market operations.

Slight departures in story treatment and production — at little extra cost — will make these films effective, acceptable ambassadors abroad. Many U. S. firms are:

- ★ Boosting export sales and income
- ★ Promoting license agreements
- ★ Acquiring valuable facilities and mergers,

and

- ★ Outselling their competitors

by increasingly using multi-language film versions which we helped to produce.

*Let us collaborate to serve U. S. commerce and industry better. He profits most who serves best.*

# BUSINESS SCREEN EXECUTIVE

NEWS OF STAFF APPOINTMENTS AND A-V INDUSTRY DEVELOPMENTS

Da-Lite exec Elmer Danch

## Danch Heads Up Promotion at the Da-Lite Screen Company

Elmer J. Danch has been appointed manager of advertising, sales promotion and public relations for the Da-Lite Screen Company, Inc.

Danch joined Da-Lite after 21 years with Studebaker Corporation where his responsibilities covered the administration, management, and supervision of merchandising, advertising, public relations, sales promotions and publications. He was also editor-in-chief of the Studebaker News, a dealer publication, and the Studebaker Wheel, a consumer magazine.

## McShane, Orr Join the Staff of Pelican Films, New York

Two major additions to Pelican Films' staff have been announced by Thomas J. Dunford, president of the New York production firm:

John McShane, for the last two years a producer at Young & Rubicam, and before that a director in Chicago, has joined Pelican as a staff director.

John Orr, for nine years a production and studio executive for such firms as Sarra, Klaeger and most recently, Arco, has become Pelican's studio manager.

The appointments follow the recent naming of S. William Aronson as vice-president in charge of sales, and Jack Daniels of ABC-TV as a sales production executive.

## Animation Graphics Opens New Facilities in San Francisco

Animation Graphics reports newly-opened facilities at Pier 5 North San Francisco, specializing in new sight-sound images in TV advertising. Bob Mills, whose production techniques and concepts have earned national awards, is in charge of production.

## Gleason Named Vice-President of the Jamieson Film Company

Chester D. Gleason, project manager of Manned Spacecraft Center support operations in Houston for the Jamieson Film Company, Dallas, Texas, has been appointed a vice-president of that firm. A veteran of 20 years in the film business, Gleason joined the Jamieson staff as a director-cameraman in 1952.

He served as manager of the company's Atlanta, Georgia office from 1955-58 and as production manager in Dallas until 1962. His new duties involve complete supervision of the Houston operation as well as over-all executive responsibility in firm.

## Three in New Executive Posts at Pathe Laboratories, Inc.

Thomas R. Howitt has been appointed executive vice-president and general manager of Pathe Laboratories, Inc., New York; Kenneth J. Coleman has been promoted to vice-president and general manager of sales and services; and Bartholomew Gallagher has been appointed assistant vice-president of operations.

For the past eight years Mr. Howitt was manager, management controls at Peat, Marwick, Mitchell and Co. Prior to that, he was assistant director of Research and Development, Fairchild Camera and Instrument Corp. and was responsible for cost controls of the

This photograph was made in an undarkened room. Notice the brilliant clarity of the film being shown.

## AV rear projection cabinets immediately improve your audio-visual program

A typical owner reports that AV rear projection cabinets gave his audio-visual program new vitality and effectiveness. It's because this new teaching aid makes using films so much simpler and more economical.

Users frequently find that they can afford more and better films when they must bear no longer the expense of fitting out darkened visual aids rooms. Directors of audio-visual programs notice that teachers are more willing to schedule films when they can use this compact, easily managed projection equipment.

The AV cabinet is completely self-contained with your projector installed and a big speaker built in. It goes into action quickly, and, just as quickly, stores away. Since it operates anywhere, instructors are able to preview films well in advance and at their convenience.

"Custom-made" quality for reliable performance

The AV rear projection cabinet

gives you a distortion-free, 22" x 28" picture on a new Polacoat non-glare screen. Cabinet accommodates most projectors. Exclusive Buhl built-in lens (optional) provides full-screen presentation from projectors with two-inch lenses and larger, including slide and film-strip projectors. Cabinet rolls easily from room to room on 5-inch casters.

Risers available to accommodate Bell & Howell projectors. All modifications made at the factory prior to delivery.

Send for free folder containing complete information and specifications. Order direct from factory or your AV supplier.

## Ruth Ratny Becomes Head of Washington Video Productions

A well-known writer-producer of motion pictures, Ruth L. Ratny has become president of Washington Video Productions, Inc., a 24 F. Street, Washington, D. C. Her appointment to that post was announced on April 20 by Mrs. George F. Johnston, chairman of the board at WVP and widow of the company's founder, who died on March 21.

The former vice-president and creative director at Fred A. Meser Communications Centers in Chicago began her career in 1945 with the J. Walter Thompson Co. In 1947, she became one of the first writers of television commercials while on staff at Ruthraff & Ryan. A native of Chicago, Miss Ratny attended DePaul University and is a member of the Screen Writers Guild, East; the Academy of TV Arts and Sciences; American Women in Radio and Television; and the Broadcast Advertising Club of Chicago.

Washington Video is currently producing motion pictures and slidefilms for industry and government. It will begin to produce television commercials for Washington and Baltimore advertising agencies.

\* \* \*

## Beckman & Whitley Appoint Brown as Chief Cine Engineer

Beckman & Whitley, Inc., an Anaheim, California company, has appointed Les Brown to the newly-created position of chief engineer for new products. He had been chief engineer at Mitchell Camera Co.

Brown will report to Lawrence R. Feeple, manager, cine products and will direct engineering of all motion picture products. His major initial responsibility concerns the radically-new CM6 newsfilm camera which B&W photo-instrument engineers have developed to American Broadcasting Company specification for the ABC news department.

\* \* \*

## Coronet Films Appoints Creke Media Development Director

The newly-created post of director of media development at Coronet Films has been filled by the appointment of Richard P. Creke according to John M. Abraham, vice-president and general manager of this Chicago-based educational film production company.

K & H Exec: Don Lusby

### Don Lusby to Direct National Sales of Keitz & Herndon, Inc.

Don Lusby has been appointed national sales manager of Keitz & Herndon, Inc., according to an announcement by Larry Herndon, president.

Lusby, who has been with the Dallas-based firm for a year, will represent his company nationally, visiting major market areas to call advertising agencies, manufacturers and business concerns. Keitz & Herndon specializes in the production of television commercials and films for business and industry.

Before joining K&H, Lusby was in sales and communications.

### Marc Asch to Modern Graphics as Executive Vice-President

☆ Bernie Farbman, president of Modern Graphics Productions, Inc., New York City, has announced the appointment of Marc S. Asch as executive vice president.

Asch had been executive vice-president of Van Praag Productions Inc. for the past 14 years. During this period he has directed TV commercials for advertising agencies.

\* \* \*

### FAIR'S TOWER OF LIGHT: (CONTINUED FROM PAGE 27)

the source for the 12-billion candle-power Tower of Light, the World Fair's "welcome beacon." On this floor, they also see a new research exhibit on electric power.

Using a dramatic new "Technamation" technique, this research exhibit is showing how investor-owned electric utility companies are finding new ways to create, transmit and use electricity. Such "future" conveniences as an all-electric automobile, all-electric highways and electrically-controlled climate in the cities of the future are depicted in this exhibit.

Production and design of *Holiday With Light* is credited to Wilding, Inc. Kenny Delmar provided the "voice" of Ben Franklin.

## The Speed of Kings at the "500"

Drivers in the Indianapolis 500 used the same track — except for resurfacing — in 1964 as they did in 1911. Although speeds have increased every year to the present-day 185-190 mph, the thrills are the same.

The excitement and danger of the 500, beginning with the first one in 1911 up to last year's, are captured in a top-notch racing film recently released by Humble Oil & Refining Co.

*Gentlemen: Start Your Engines* also includes tips from some of the drivers on safety, the safety precautions they take, and different parts of their cars which are designed for protection.

The film points out that actually, the racing car is the proving ground for improvements on regular cars. Careful studies are made, and these contributions are passed on to regular car owners in the form of improved styling, safety and efficiency. In the 1911 scenes the mechanics even rode along with the drivers.

Other scenes show how many a race is won or lost in the pit. Training is rigorous, and each man is assigned a particular job. In just 17 seconds one pit crew changed 4 tires and refueled the car with 50 gallons of fuel.

Trial qualifying runs, and a high-speed ride with Rodger Ward, winner of many races, are other highlights in the 23-minute color film. Producers were Keitz & Herndon, Inc. National distribution for all films in the Humble Film Library is handled by regional libraries of Modern Talking Picture Service.

Close-up on a pit stop during the grueling "500" at Indianapolis.

### DuPont Sponsors NCAA Film, "Best Football Plays of '64"

A documentary film entitled *Best Football Plays of 1964* has been released by DuPont for the National Collegiate Athletic Association.

Ten outstanding plays of last fall's collegiate season were chosen by a panel of judges consisting of Delaware's Dave Nelson, who narrates the film; Ara Parseghian, Notre Dame; Darrell Royal, Texas; Frank Howard, Clemson; and Jack Curtice, University of California at Santa Barbara.

They also served as judges for Du Pont's 1964 "Play of the Year" contest for high school and junior college coaches. The winning play and award presentation are included in the new film.

Other top plays in the film are from the Princeton-Columbia, Michigan State-Wisconsin, Northwestern-Illinois, Georgia Tech-Clemson, Duke-Army, Missouri-Colorado, and Oregon-Penn State

games. The ten plays are shown once in slow motion and again in regular speed.

The sound film, running 19 minutes, can be obtained from the National Collegiate Film Service, 1030 W. Chicago Ave., Chicago, Ill. 60622. There is no charge to NCAA member institutions. •

\* \* \*

### "Search Without End" Shows Quest for Life-Saving Drugs

Crawley Films Ltd. has released *Search Without End*, a sound color film which dramatizes the problems of finding new life-saving drugs, then producing and marketing them.

Filmed entirely in Canada, *Search Without End* depicts the story of cortisone and its derivatives. The 16mm, 14-minute film shows the importance of synthetic drugs to the national health and provides answers to questions about drugs frequently asked by Canadians.

Typical of many synthetic drugs in use today, cortisone cost millions of dollars to discover, isolate, synthesize and market. Although it was outdated within three years, as cheaper, improved processes were developed, its discovery led to an entirely new, highly specialized family of pharmaceuticals.

*Search Without End* emphasizes the need for testing drugs, and for

keeping doctors, hospitals and pharmacists informed of the developments.

It is available without charge to service clubs, education groups, film libraries and for television showings from Pharmaceutical Manufacturers Assn. of Canada, Royal Bank Building, Ottawa.

\* \* \*

### Take Porcelain Enamel Face to Appliance Sales Personnel

An interesting sales training informational film has been released by the Porcelain Enamel Institute, especially for major appliance merchandisers at the wholesale, retail level and their sales personnel.

*Porcelain Enamel for Enduring Beauty*, 17-minutes long in color, was produced by Time Productions. It presents all the background information a dealer should have in order to understand and sell porcelain enamel appliances. Beginning with the history of porcelain, this film shows modern production processes and describes five impressive demonstrations which sales people can use to prove the superiority of porcelain enamel over other finishes.

The film is being distributed by the Professional Audience Department of Sterling Movies U.S.A. for sales training purposes. It is available to appropriate companies.

### Slidefilm With a "Special" Look

SPONSOR: New Jersey Bell Telephone Company

TITLE: *Contractor's Specifications*, 15 min, color sst, produced by Rossmore Productions.

This is a new slidefilm designed for presentation on the Salesmate projector. It will be shown to all deliverers of the telephone directories for the New Jersey Bell company.

It has a special look to it, in that the usual slidefilm art is relegated to the background. All the characters are played by three-dimensional puppets, photographed to give a great feeling of depth, and a "live" quality.

The film, an up-to-date version of presentations that several of the Bell companies have used successfully for training directory delivery contractors, stresses that "you'll be doing an important job, representing a great service organization. By delivering up-to-date alphabetical and Yellow Page directories, you'll be helping your friends and neighbors carry on their business successfully."

... *Specifications* then goes on

to document just how to go about the job — what to say when delivering the directories, where to leave the book when the customer is out, what to do when faced with a "Beware the Dog" sign — "write 'dog' on the delivery card and don't worry — you'll still be paid for the delivery."

"Your job," the film says, "is an important link in modern communications, and the courtesy, efficiency and safety with which you carry out your job is equally important, because you may be the only person from the Company that many of your customers will meet!"

**Bethlehem Steel Has Updated  
on Golden Gate Bridge**

Bethlehem Steel has released a 16-minute, 16mm color remake of the company's 25-year-old film, *Building the Golden Gate Bridge*. The film was redone because the demand for showings from engineering societies, and students in engineering colleges has increased even though the old film was deteriorating in quality.

Made on nitrate base, the original film was shrinking and losing quality, and couldn't be adapted for reproducing fresh prints on high-speed film printers in use.

The new film is quite different from the old one. Bethlehem released some less important engineering details have been deleted, new color footage has been added. Photo libraries also turned in interesting stills that help give the film continuity.

The film traces the monumental engineering task from its inception through steel fabrication; shipping bridge components by rail and the erection of the soaring steel towers; spinning of cables; hanging the roadway with its record 4,200-ton main span; paving the deck; and the opening-day celebration on May 28, 1937.

The production of the film was by Bethlehem Steel Art Pictures, Inc., Pittsburgh. Intended for adult group showings, it is distributed through the Bethlehem Talking Picture Service.

\* \* \*

**Fashions for Men's Wear Shown  
in Fashion Horizons U.S.A.**

The new 23-minute color motion picture has been jointly sponsored by the American Institute of Men's Wear and Esquire Magazine.

The film *Fashion Horizons* — the film tours the country and reveals the modern American man's wardrobe for Spring and Summer, 1965.

The fashions displayed are colorful, functional, and designed (as

the commentary points out) "to give him the look of success and the look of a man getting more fun out of life."

Director Dan Horan achieves some startling film effects with his use of color, humor and imaginative camera angles. His crew travels from New York to Fort Worth, Tucson, Phoenix, Los Angeles, San Francisco, and Chicago to capture the highlights of these cities as settings for styles ranging from formal attire to beachwear.

Producer of the film is Aegis Productions, Inc., New York. Narrator is radio and TV announcer Dick Shepard and original music was composed and conducted by Tony Mattola. Sterling Movies U.S.A., Inc., is handling distribution of the film to TV stations and Esquire is handling distribution to retail stores throughout the country.

Max A. Hankins, vice-president of Mole-Richardson Company, demonstrated proper "Lighting for Color," using full range of lighting equipment

## CFI Hosts Seminar on Advanced Film Techniques

Participants Share Latest in Color, Lighting and Film Processing

**T**HREE DAYS OF DISCUSSION and demonstration covering the latest techniques in motion picture and filmstrip production and processing brought 45 participants from all parts of the U. S. to a Film Seminar in Advanced Film Techniques sponsored by Consolidated Film Industries in Hollywood on March 24-26.

Seminar guests were welcomed by CFI president Sidney P. Solow at the opening breakfast session in the Hollywood Knickerbocker Hotel, where most sessions were held. His greetings were promptly followed by a first session on "What Are Filmstrips All About," conducted by Lou Livingston of the Filmstrip Department, Title & Optical Division of CFI.

This session featured a graphic demonstration of production methods in filmstrip making as well as discussion of the uses of this medium as a communications tool.

The seminar's first guest lecturer was Edward P. Ancona, Jr., color coordinator of the top-rated NBC-TV series, *Bonanza*. This color expert discussed "Color Vision" and presented a special slidefilm demonstration on the subjective nature of color perception.

The Mole-Richardson Company's Hollywood facility was the scene of two subsequent sessions. Max Hankins, vice-president

Edward P. Ancona, Jr., color coordinator for the NBC-TV series, *Bonanza*, discusses the subjective nature of color perception at Seminar

Seminar participants get Certificates from CFI president Sid Solow (standing). Seated (l to r): guest lecturers Harry Teitelbaum, Hollywood Film Company; Edward P. Ancona, Jr., NBC-TV color coordinator; and Fred. Berger, supervising film editor at Filmaster Prods.

of M/R, talked on "Lighting for Color" with a demonstration of the range of available motion picture lighting equipment. His talk was followed by a session on "Camera" conducted by cinematographer Charles Clarke (ASC). Clarke used the "working" lights from Hankin's previous demonstration to actually "light a set" as he explained in detail the function and effect of each type of light.

The first day's sessions ended with talks on

Ted Fogelman, CFI laboratory superintendent, talks on the "Preparation of 16mm Original Material for the Lab and Volume 8mm Printing."

"Current Reversal Color Materials" by Witkowski, Eastman Kodak Company, and Francis Gerhardt, General Aniline & Fredrick W. Berger (ACE) spoke on "Editing." He is supervising film editor at master Productions.

Sid Solow's opening lecture on the second day of the Seminar program took up "Some Useful Theory." Drawing on his 19 year experience as an instructor in the Department of Cinema, University of Southern California as well as his lab work, he reviewed the relation of photographic theory with special emphasis on the nature of "gamma" as a photographic concept.

Ted Fogelman, CFI laboratory superintendent, followed with a lecture on "The Preparation of 16mm Original Material for the Laboratory and Volume 8mm Printing." This presentation also described the new single-pass, area-sharing Colorvision separations system recently installed at CFI.

John Flory, Advisor on Nontheatrical in the Eastman Kodak Company, presented updated facts and figures on "The Business of Film and Its Use." Seminar participants also visited Universal Studios where Walter Berger, director of engineering research, discussed "Reversal Material v.s. Negative as an Original for 16mm Color Work."

Following the conclusion of Sid Solow's lecture on "Some Useful Theory" which began the third day of Seminar sessions, Dale Ryder, manager of the lab's Title & Optical Division, presented a discussion of "Title" styles and effects, using a film to highlight his points. Another "tour" program took the participants to Ryder Sound Services where president L. Ryder addressed the group on the theory and practice of "Sound Recording."

Harry Teitelbaum, vice-president of Hollywood Film Company, spoke on "Handling Equipment" at the final Seminar session which followed a CFI-hosted luncheon and tour of the laboratory, conducted by chief engineer Edward H. Reichard.

Leonard Kroll, who recently joined CFI, in charge of the Film Seminar program, was assisted by Dan Carter of the company's engineering department. All programming arrangements had been made by Jack Goetz, CFI's director of public relations, who was stricken by illness just before the opening

Guest speaker John Flory, Eastman Kodak (left) discusses his lecture at Seminar with president Sid Solow, who hosted the program

power drill, which allows a man to drill holes  
 in space hardware without being spun around  
 himself like a top.

Space nutrition is another subject of vital  
 interest at the Aerospace Medical Laboratory.  
 Apparently, astronauts receive quite a gastro-  
 nomic treat when they break open their rations.

Though Air Force nutritionists have de-  
 hydrated and condensed the food, it still re-  
 mains extremely palatable. I can personally  
 recommend the compressed quarter-inch pound  
 cake cubes and the dehydrated beef chunks.

One scientist told me that they are thinking  
 about an edible instrument panel in space  
 vehicles to save space and weight. Just break  
 off a chunk, and nibble between meals. "What  
 about brushing," I asked? But they've even got  
 that one figured out too!

Air Force volunteers are constantly being  
 tested on vibration tables, dropped from  
 heights, baked in thermal ovens, whirled in  
 centrifuges and generally being given a hard  
 time in the name of space research.

I have already described my own bout with  
 their diabolical centrifuge. However, the one  
 I rode was only the baby brother to a "super  
 centrifuge," which is nearing completion. This  
 giant DeSade diabolique not only whirls a  
 man around, it also twirls him inside his cap-  
 sule while the "arm" spins — forcing the sub-  
 ject to move in six axes simultaneously.

While this is proceeding, the capsule itself  
 is being vibrated to simulate buffeting, and  
 is heated or cooled to simulate re-entry.

Top this off with realistic stereo sound ef-  
 fects inside the capsule, and you've got the  
 perfect mechanism for tearing man apart, and  
 minutely recording the process at the same  
 time.

Just writing about it gives me that "old feel-  
 ing."

Up to my experience with the centrifuge, I  
 had volunteered to take part in some of the  
 experiments, feeling that it would give me real  
 motivation.

Even after the centrifuge experience, I volun-  
 teered; but my offerings did not meet with the  
 same enthusiastic acceptance that they did b.c.  
 (before centrifuge).

For example, the TA who accompanied me  
 into the centrifuge laboratory, and witnessed  
 the resulting mess, (no pun intended) also ac-  
 companied me to inspect the plane the Air  
 Force uses to train astronauts in a gravity-  
 free environment.

I asked the major if I might not go up in  
 the plane with the boarding astronauts.

The major thought back a moment, winced  
 slightly and said:

"Fella, you're not going anywhere!"

And so, loaded down with volumes of notes  
 and utterly confused, I headed back to Chi-  
 cago to attempt to make some sense out of all  
 that I had seen.

As soon as I do, I'll let you know what it  
 is.

"Talk on Recording Tape Is Available from Eastman Kodak" ☆ A useful new 24-page booklet about sound recording tape has been published by the Eastman Kodak Company.

*Some Plain Talk From Eastman About Sound Recording Tapes* written in explanatory language designed also to help tape users better understand the magnetic recording process and to achieve better recordings.

The publication specifically treats such subjects as the recording process; sound brilliance; bias; sensitivity and frequency response; print-through; output signal-to-noise ratios; surface area and other characteristics of materials and tensile values.

The fully-illustrated booklet explains such subjects as the difference between low-print, general purpose and high-output performance; how tape surface smoothness relates to high frequency response; and what tests reveal about break strength.

Single copies may be obtained at no cost from Magnetic Products Dept., Eastman Kodak Co., State St., Rochester N.Y.

\* \* \*

**Collburn Booklet Shows How to Mark Work Prints for the Laboratory**

☆ Industrial film makers can obtain a useful folder which explains the most effective ways of marking work prints to direct the processor in preparing the final prints.

The folder describes various defects such as fades, dissolve, wiper and irises, and tells how to attain them through proper exposure on 16mm work prints or original using either wax pencil or adhesive tabs.

The folder also suggests the best means of transmitting instructions to the laboratory, recommendations for techniques and suggestions for avoiding pitfalls.

*Preparation of 16mm Film for Printing* will be sent free upon request to the Geo. W. Colburn Laboratory, Inc., Dept. BS-410, N. Wacker Drive, Chicago 60601.

**THE EDITORIAL VIEWPOINT:**

(CONTINUED FROM THE PRECEDING PAGE 14)

held in Atlanta recently under the auspices of the Communicable Disease Center. Too lengthy to be cut, they will be shared with our readers as informed useful commentary on "Production Methods and Problems." Other material is presented by such participants as Dr. Franklin Huber, of the Temple University School of Medicine; Graham Heid, film director of this Public Health Service audiovisual facility; J. E. Markee, Duke University School of Medicine, to name a few of these contributors.

*Academy of Motion Picture Arts, Sciences Honors Scientific, Technical Contributions*

The Academy of Motion Picture Arts and Sciences also shared its "Oscars" (and plaque awards) with some of the more unsung people who have contributed to the success of the film medium. At that well-publicized awards ceremony in April, these scientific and technical contributions were so honored:

The Class I Award (statuette) was presented to Petro Vlahos, Wadsworth E. Pohl and UB Iwerks "for the conception and perfection of techniques for Color Traveling Matte Composite Cinematography."

The Class II Award (plaque) went to Sidney P. Solow, Edward H. Reichard, Carl W. Hauge and Job Sanderson of Consolidated Film Industries "for the design and development of a versatile Automatic 35mm Composite Color Printer."

A plaque was also given to Pierre Angenieux "for the development of a ten-to-one zoom lens for cinematography."

Class III Awards (certificates of honorable mention) went to Milton Forman, Richard B. Glickman and Daniel J. Pearlman of Color-Tran Industries "for advancement in the design and application to motion picture photography of lighting units using quartz iodine lamps."

Sharing this Class III honor was the Stewart Filmscreen Corporation "for a seamless translucent Blue Screen for Traveling Matte Color Cinematography."

*Dallas' Ad League Honors Betty Whitlock; Here's Toast to the Women of Our Industry!*

A much-deserved salute to the ladies of our profession! A growing number of them are coming into their own as top executives of important film companies, as at Vista Productions, Inc. in San Francisco where Florence M. Fowler is president; in Dallas, which claims Linda Shuler and where Betty Whitlock, owner-president of Carlocke Langden, has just been named "Advertising Woman of the Year" by the Dallas Advertising League.

This issue also discloses that Ruth Ratny is the new president of Washington Video Productions, in the nation's capitol. Another woman of note is Avalon Daggett who heads her own production company in Baton Rouge, La. Anne Koller heads Rossmore Productions in New York City. There are many others holding key positions within this vibrant field of communications and we need them all!

*A Name  
with a Purpose*

★

The objectives of Comprehensive Service Corporation are as the name implies, to render the most comprehensive and satisfying service, with complete understanding of the needs of all who require motion picture equipment, accessories and supplies.

We point with pride to our long list of large and small customers all over the world, who have been coming to us, again and again, over the many years. Our ever expanding business is proof of their confidence in the quality of our products, our dependability and expert knowledge.

## NVPA Looks to "Day of Visuals"

**P**RELIMINARY DETAILS of the 12th Annual Day of Visuals, sponsored by the National Visual Presentation Association, were outlined at a press meeting in New York on March 31 by William W. Walton, president of the Association, and manager, Graphic Services, International Business Machines Corp.

The Day of Visuals opens at the Hotel Commodore, New York, on Tuesday, June 8, and continues through the following day.

"At its inception," Mr. Walton said, "the Day of Visuals was just that—a one-day session for discussion of problems and techniques in a young and growing industry. Now, 12 years later, it has grown to a two-day meeting with an equipment display backing up a program of seminar discussions interspersed with workshop sessions.

### Serve an Expanding Industry

"The growth of the industry and of the interest of those who comprise it, from the equipment supplier through producer levels up to and including consumer-user, has dictated the expansion of program and activity to meet the wide-ranging interests of a rapidly growing industry."

A highlight of the meeting will be the Visual Presentation Awards banquet at which VP plaques are awarded in 15 classifications and three categories within those classes. John P. Tierney, Standard Oil (NJ) and George R. Jacobsen, New York Telephone Company, are co-chairmen of this phase of the Day of Visuals Program.

### Theme is "Wide, Wide World"

Built around the theme of "Wide, Wide World of Audio-Visuals" the four segments of the overall meeting program have each been held to a single interest area.

The opening session, the morning of June 8, will discuss Media and Equipment; the afternoon session will be confined to Audio-Visual Applications in Marketing. The two sessions of June 9th turn attention to production techniques (in the morning) and, in the afternoon, to Public Service Applications of Audio Visuals.

### Program Guided by Jack Moss

Development of the program has been guided by Jack L. Moss, a partner of Turteltaub, Moss, Together with three co-chairmen who will serve as moderators of the individual sessions he has developed a unified program which will cover

Leon Luxenburg (left), president of NVPA's New York chapter, discusses "Day of Visuals" with national president William Walton.

major areas of current A-V interest.

In the opening session the outstanding film, *Talk Is Not Enough*, produced by the National Audio-Visual Association, will appeal to a comprehensive segment of the industry's total audience, both theoretical and practical.

### A Multi-Screen Presentation

An electrically - programmed, multi-screen presentation, it is creative, interesting and to the point. Dealing with effective communication, it traces the growth of knowledge from early civilization into the space age by informal glimpses into the audio-visual programs of several industrial giants, stresses for businessmen and producers the scope of the techniques. Moderator of the session will be Dominick Albi, of the NEW YORK WORLD TELEGRAM.

The afternoon session, at which Kerney Hurst, Ethyl Corporation, will serve as moderator, will deal with audio-visual applications in marketing. Presentations are to be made by a major advertising agency, stressing the internal and external applications of audio-visuals in its overall marketing activities.

### How Major Company Uses A-V

This will be supplemented by a major corporation presentation of the uses of such techniques in its total marketing activity.

The session will wind up in two workshop segments discussing a group of four marketing presentations and the problems involved in them.

One of the more challenging areas of the audio-visual field is that of production. Depth discussion in this area will be guided by

Mr. Moss, general program chairman. Four aspects, in logical sequence, will view the development of the activity from first discussions of costs, talents and technique, through the sight and sound potentials, and on to the modes and methods of production and, finally a panel discussion reviewing the client-producer relationship and what may be expected, encountered and encompassed.

### A Session on Public Service

Closing session of the two-day program will deal with the extensive use of audio-visual techniques in the field of Public Service. Under the guidance of Moderator Stanley S. Merrill of the Boy Scouts of America, A-V applications in educational and non-profit

activities will be surveyed. News, sports and entertainment applications evaluated and the problems encountered in production of public service films examined. Finally, the distribution patterns and logical outlets for such films will be discussed.

To round out the program, so far as filling the needs of those who are a part of the audio-visual industry at any level, an interesting sponsored exhibit of equipment and A-V services available to those in the industry is presented concurrently during the two-day meeting. Open throughout the meeting, and with admission free to all who are interested, the exhibit in equipment, techniques, and services may be seen and discussed.

## Films Are Helping to Sell Travel

Seven out of ten travel agents recently surveyed reported that ticket and tour sales result from showing travel films.

The survey of 1,500 agents, by Association Films, revealed that nine out of ten agents put on film showings locally and that 87% are "satisfied that travel movies do an effective job in encouraging people to travel."

Based on responses to the survey, Association Films is planning a special service to provide agents with catalogs for local mailings, news releases for travel and club editors, and suggested letters to be sent to program chairmen.

83 per cent of the agents said they would be interested in such a service. Although 85% of them

contact local organizations to put on programs, 93% of those organizations come to the agents "to provide travel programs."

The survey showed that agents attend the showings to introduce the film, answer questions, pass out brochures and other literature.

The major source for borrowing travel films is transportation companies, according to 93.5% of the agents. Forty-eight per cent rely on "professional distributors" and 7 1/2% go to public libraries and other sources.

Only 29% of the agents own 16mm sound projectors, but 71% rely upon the local organization to provide it or borrow the equipment from schools, libraries or stores.

## Sylvania Exhibit a 3-Time Winner

### Sylvania Exhibit Wins Three Awards at Electronics' Show

Sylvania Electric Products' exhibit at the Annual Industrial Electronic and Electrical Engineers exposition in New York last month won three awards for Design Con-

cept. Presentation of Product Performance of Personnel awards were presented by the Electronic Sales and Marketing Association.

The exhibit was one of a few which utilized anything other than static means of attraction. With strict regulations concerning noise levels in each exhibit and with only three feet of stage space available, Sylvania still able to put on a most successful live show at frequent intervals using a fully programmed set of projected visuals.

The presentation was conceived and executed by Bob Hills and his staff. Three well-trained spokesmen described the company's latest electronic equipment while actuating various pieces of audio-visual equipment, lights and electronic devices.

## and more to come

11,989,450 theater-goers saw "The Three-Minute Hour," a 15-minute Eastmancolor, wide-screen motion picture produced by The Jam Handy Organization and distributed theatrically by over a nine-month period last year.

This exciting motion picture establishes commercial values dramatically, lucidly and economically—selling people the way they enjoy being sold.

To get your message to America, in wide-screen and color, ask for help from—

## Does she? OR doesn't she?

As one of your banking staff, does she know the importance of selling additional services to the present customers?

Is she alert to her obligations to the bank, in winning new customers?

It's easy to show bank personnel how individual job progress is directly related to bank growth . . . when you train staff members with

### HOW TO SUCCEED IN BANKING

Ten 30-minute Meetings

This new sales and personality course builds profits by stimulating the employee's interest in selling. It brings you five 15-minute color film-strips with curiosity-stirring titles:

WHAT DO YOU CALL IT?  
WHO BENEFITS MOST?  
WHAT WILL IT DO FOR ME?  
ARE PEOPLE DIFFERENT?  
IS IT WORTH WHILE?

Plus five sprightly workshop sessions, and a Trainer's Manual with every word needed for conducting each of the ten Meetings.

### FILMS FOR EMPLOYEE TRAINING

SKILLS . . . MORALE . . . SELF  
THE PARTHENON APPROACH—  
IDENTIFY—MOTIVATE—  
THEN TRAIN

### "MAY I HELP YOU?"

As with most jobs of a repetitive nature, the Employee respects himself and the importance of his work has to be motivated before specific "skills" training can be effective. (AT&T; Color; 25 min.)

### "EVERYBODY HAS TWO JOBS"

To promote off-the-job loyalty the company in out-of-hours activities. Used by many industries. (U.S. Ind. Tel. Assn.; Color; 25 min.)

### "SLIPS AND FALLS"

The new film on Office Safety, with overtones for shop and off-the-job. Fast and pungent, with strong "it's you" identification. (Bell System; Color; 10½ minutes)

### "LOCKED ON"

Since "Reliability," "Quality Control" and the like are spit-words of hourly-wage factory workers, Parthenon's assignment was to identify sympathy with same, this film required special techniques of identification and persuasion. (Used by many industries; Ford, G.E., et al.; G.D./Astronautics; Color; 45 min.)

At Byron, we are proud of our Sound. Our Westrex 8-channel mixing console uses graphic equalizers to correct defects in the original sound recording track. New dynamic equalizers give a fuller music track under voice. An electronic echo chamber makes a "dead" narrator's voice come to life, a trio sound like a 10-piece orchestra. □ Byron offers every accessory known to the art of motion picture sound recording. All facilities for magnetic or optical recording and dubbing. Speedy transfer from any material to any material . . . 35 mm, 17½ mm, 16 mm, and ¼" tape or film (negative or direct positive). □ Byron's Sound Studio and the Byron Motion Picture Laboratory are closely coordinated for complete control . . . a big reason why film producers the world over get the best 16 mm and 35 mm sound recording and exclusive Color-Correct® prints from Byron.

### 126 U.S. Entries to Compete at Ad Film Festival in Cannes

20 of the largest U. S. advertising agencies and 23 leading television and film production companies have entered a record number of films in the 12th International Advertising Film Festival, taking place in Cannes, France from June 14 through 19.

According to Peter Taylor, director-general of the London-based Screen Advertising World Association which sponsors this event, the U. S. entries represent a 71 per cent increase over last year's participation from America.

The bulk of these entries will compete for television commercial honors (120) while the remainder (six) are entered in the cinema division. Food and automotive products lead the list of product types in the tv. commercial entries, with a combined total of 50 per cent. Automotive accessories account for another four per cent of the entries.

Alfred M. Scott, group head of the international broadcasting department at the J. Walter Thomp-

son advertising agency, is the American juror serving on the television section. 1,500 delegates are expected to view the more than 1,000 television and cinema advertising films submitted by agencies and producers in more than 30 countries worldwide. The event will be held for a full week at the Palais des Festival in Cannes.

### Outstanding Film on Expo 67 Previews Canada's World Fair

National and international distribution of *Expo 67*, said to be an "exciting and different" color film, has been arranged through the offices of Expo 67, heading up Canada's 1967 World's Fair, the National Film Board of Canada and Traders Finance Corporation Limited.

Produced by Crawley Films, the film was directed by Paris-born Rene Bonniere and covers every aspect of the Exhibition from its "theme" pavilions to the huge "fun" area, from Habitat '67, the new concept of living, to the modern new means of transportation

planned for the exposition in '67.

His Excellency, Pierre Dupuy, commissioner-general of Expo 67 presents the Fair's theme: "Man and His World" in a filmed preface.

Expected to be one of the most-screened, non-feature films to be shown in the next two years, *Expo 67* is being translated into 17 language versions. It will be shown in the board rooms of thousands of top-level decision makers around the world to encourage governments, corporations and other groups to participate in this 1967 World Exposition, located on a man-made island in the middle of the St. Lawrence River, at Montreal. Traders Finance Corporation and its subsidiary companies underwrote the cost as a contribution toward Expo 67.

## newsreel:

### Modern Names Richard Hough as Vice-President for Sales

Carl H. Lenz, president of Modern Talking Picture Service, Inc., has announced the appointment of Richard M. Hough as vice-president for sales of the national film distribution company.

Dick Hough, who has been vice-president in charge of West Coast sales for the company since 1959, has been transferred to Modern's New York headquarters for the assignment.

He is a veteran of the distribution field, joining Modern in 1940 to open a Chicago sales office and remaining in the midwest until he assumed the Los Angeles-based position. He was made a vice-president of the company in 1953.

Hough's first film experience was with Warner Brothers in Hollywood, where he was a sound engineer. He later established Allied Film Exhibitors in California and when he joined Modern in 1940, he took Allied with him and the company received a blanket franchise to represent Modern on the West Coast.

During World War II he served as photo intelligence officer on the aircraft carrier Randolph in the Pacific Theater.

### Frank Paine is President-Elect of University Film Producers

Frank R. Paine, head of film production at Southern Illinois University, has succeeded Oscar E. Patterson as president of the University Film Producers Association for the coming year.

Paine is the former vice-president of the association, which draws its membership from over 90 schools and educational film units in the U. S. and abroad. He is a member of the board of directors of the Educational Media Council.

Other officers-elect include Jesse L. Senn, head of motion picture production, Purdue University, serving as executive vice-president; Robert W. Wagner, director of the motion picture division, Ohio State University, now editorial vice-president; and William A. Drake, production manager, motion picture division at Ohio State, conference vice-president.

Luella Snyder, educational consultant, Winnsboro, La., was re-elected secretary. Serving as treasurer is J. Sol Wrenn, assistant supervisor of film production in the Virginia Department of Education.

President-Elect Dean Peterson

### Elect Dean Peterson President of Canadian Producer-Lab A

The Association of Motion Picture Producers and Laboratories of Canada has elected S. D. Peterson, president of Peter Productions Limited, Toronto, its 1965-66 president.

Also elected at the 17th annual gathering of the 65-member association in Toronto last month was Roger J. Beaudry, Pathe-Luxe of Canada, who is now vice-president. Frank Young remains executive secretary of group.

Peterson will lead the \$15 million private motion picture production and laboratory industry in Canada into what is expected to be its most exciting period. A financially successful breakthrough into the international feature film market is anticipated. Interest in this area was heightened by the recently-announced Canadian government intention of encouraging the production of feature films in the Dominion.

The new president's own contribution to this country's expanding industry is his recent acquisition of the Kleinberg, Ontario studio complex for the production of entertainment films for theatrical and television release.

US TO REPRESENT the United States abroad in 1965 at various international film festivals selected in Washington, D.C. Month by the Council on International Nontheatrical Events (CINE), the national organization has undertaken this service half of the factual film indus-

tration pictures deemed worthy of Festival participation awarded "Golden Eagles" at special screening events held in an auditorium of the National Education Association's headquarters building in the nation's capital. In addition, 13 CINE awards will go to adult and amateur films.

**Juries Are More Selective**  
Increased selectivity on the part of regional screening committees in the finals brought the total number of Golden Eagle awards down to 111, less than last year's record number of 125. Subject matter ranged from the most popular to extremely technical and scientific subjects. There were fewer but a much higher percentage of business-sponsored pictures among the 1965 selections.

Willis H. Pratt, Jr., CINE president, commenting on the judging, said: "The quality of these films is outstanding in many cases, and is particularly true of the films in the medical, dental and scientific categories. We seemed to have a higher percentage of experimental and avant-garde entries, however."

**Films Cover 38 Subject Areas**  
The 1965 Golden Eagle selection covers 38 different subject areas. Topics with the most titles represented were: business-institutional films, 20; health films, 13; drama, 11; science, 10; history, 9; medicine, nine; art films, eight; ethnographic, seven; and service themes accounted for seven pictures.

Over 500 films were submitted to CINE this year, up from last year's 350 entries. Several thousand hours during a two-month period were spent in screening films by 198 CINE jurors who met in 23 committees across the country, followed by the final judging in Washington, D. C.

**Present Awards on Nov. 10th**  
The Golden Eagle and CINE award certificates will be presented to the winners at an invitation-only ceremony to be held at the NEA headquarters building on November 10. As is traditional at this affair, representatives of foreign governments will present interna-

tional prizes, if any are won by U. S. entries submitted to these overseas events.

The full list of Golden Eagle winners, their producers and sponsors (where sponsored) is given in alphabetical order:

**Agriculture, Research & You.** Producer: Star Informational Films. Sponsor: Chas. Pfizer & Company.

**Wilding, Inc. Announces New Posts for Its Top Management**

H. Williams Hammer, formerly president of Wilding, Inc., has been elected chairman of the board of this national communications company in Chicago. Succeeding him as president and chief executive officer at Wilding is Robert C. Ausbeck, formerly assistant to the president.

Ausbeck previously served for many years as executive vice-president of the E. F. MacDonald Company, Dayton, Ohio before affiliating with the Wilding organization.

Daniel B. Gallagher, formerly vice-president in charge of the company's Detroit operations, has assumed the post of executive vice-president.

William R. Winn, also a former vice-president and executive producer at Wilding, has been moved up to the newly-created position of senior vice-president and corporate creative director.

All new positions were made effective on June 1st.

**Elect Chisholm as President of Engineer's Club of Toronto**

Jack Chisholm, veteran Canadian film producer, has been elected president of the Engineer's Club of Toronto. This is the first time in the 100-year history of the 1,000

member club that a film man held this post.

Chisholm has been producing films for the mining and heavy industries for several years. He just recently returned from Northern Ontario where he was shooting underground in four of the large Canadian mines.

## Honor 20 Pictures at Canadian Film Award

CAPACITY AUDIENCES watched the presentation of the 17th Annual Canadian Film Awards in the Westbury Hotel, Toronto, Saturday evening, May 15. The awards (20 Canadian-produced motion pictures, including four amateur films) were presented by Max Ferguson before a more-than-capacity audience which overflowed into the Hot St. Club's quarters at Maple Leaf Gardens while the proceedings were carried by closed-circuit television.

Three national associations of producer-directors and cameramen held meetings in Toronto preceding the awards program; immediately prior to the evening ceremonies May 15, the Association of Motion Picture Producers and Laboratories of Canada hosted a reception at the Westbury. Awards festivities concluded with the Canadian Film Awards Dance, sponsored by the Directors' Guild of Canada.

### Special Medal to Canada's Film Industry

Around 500 guests, including producers, directors, distributors, film users and other industry representatives from across Canada were on hand to applaud the winning film makers. Dr. Robert Kidd, president, International Co-Operative Year (Canada) presented a special medal to the Canadian film making industry. The medal was accepted on behalf of the industry by Roy Tash, dean of Canadian cinematography, now in his 50th year behind the camera.

Among the several award-winning independent production companies honored at the ceremonies were Chetwynd Films Limited (for *Some Are Sunfishers*); Williams Drege & Fildes Ltd. (for *A Solid Investment*); Morelar Latchford Productions Ltd. (for *Upper Canada Village*); and Master Films (Alberta) Ltd. (for *Something Personal*).

### Best TV Commercial of the Year Cited

The best filmed television commercial was Robert Lawrence Productions' Rose Brae Pickles' sponsored spot, *Obsession*, with Frances Galloway as a kinky but endearing heroine who confuses pickles and roses.

Best among films for Television Information at this year's Awards was *Summer in Mississippi*, a profoundly-moving report on the integration drama in the southern United States, written, produced and directed by Beryl Foster.

The winner of the trophy of the Association of Motion Picture Producers and Laboratories of Canada for the best amateur film was Jol Stratton, whose *Portrait of Lydia* presents an unusual, Freudian-inspired excursion into the world of a young girl's changing relationships with men. The film won honors at Cannes during the past year.

The Canadian Broadcasting Corporation again dominated the television categories. The much-awarded film by Ron Kelly, *The Open Grave*, headed the field of Television Entertainment "for its bold, fresh treatment and for its startlingly convincing realization of a much-told story." (Continued on page 14)

SCALPEL!  
SUTURE!  
SCOTCH TAPE!  
**SENSITOMETRY!**  
**CHEMICAL CONTROL!**  
**COLOR RENDITION!**

**AT CFI, WE TREAT FILMSTRIPS LIKE MAJOR SURGERY.** Any good surgeon demands the best back-up staff he can get and the vast facilities of the modern hospital complex. At CFI, we do for filmstrips what the hospital staff and equipment do for the surgeon. Our labs are staffed by trained technicians backed up by the most precise laboratory equipment. Sensitometric control insures proper color correction and exposure balance; Chemical control gives consistent color balance and density; Accurate color rendition and minimum contrast gain is assured by special lighting equipment. At CFI, our experts take the worry out of the operation. *Delivery problems?* In our business, one week is normal for a complete filmstrip, but on tighter deadlines, we'll work with you to meet your schedule. *Emergency? Like need a special piece of artwork?* Our art department will design and complete original frames with just the right touch. Or we'll photograph your flat art up to 24" x 32" (32 field). *Worried about getting the message across?* We set type on cells for superimposure or give you special handlettering. *3-dimensional packages?* We can shoot them against a colorful background right into your filmstrip. *Different size transparencies?* We shoot directly from 35mm through 8 x 10 with no intermediate reduction step to cause loss of detail or color. And at CFI, no matter how delicate the problem, our unique continuous-loop printing equipment assures you absolutely uniform filmstrip prints from scratch free negatives. Our experts are ready to solve your problems right now in our labs. *Hopeless case?* Call Lou Livingston at HO 2 0881.

*Your filmstrip benefits from the superior facilities and technology that have been developed to meet the high standards of the motion picture industry.*

# ARRIFLEX® 35

## NEW!

### MODEL 2CV with VARIABLE SHUTTER

When your filming assignment calls for *maximum control of exposure, depth of field and image sharpness*, you need a camera with a Variable Shutter. This important professional control is now available in the new Arriflex 35, model 2CV. The Variable Shutter has a range from 0° to 165° opening, easily adjusted in 15° increments and reads directly through the taking lens opening.

Arriflex 35 2CV with Variable Shutter permits the cinematographer to control *exposure* without changing F-stop... control *depth of field* without changing selected exposure... and control *image sharpness* of a fast moving subject. Avail yourself of this important control with an Arriflex 35 2CV on your next assignment.

## with completely new reflex viewing system

The Arriflex 35 2CV has the improved reflex viewing system of the new Arriflex 35 2C camera series. Features: ■ New quick-change ground glass ■ Brighter, clearer image ■ New larger field (.868" x .735"—2.35:1 Scope ratio) ■ New detachable eyepiece ■ Accepts Arriflex Periscope Finder Attachment ■ plus many other important advances. **WRITE FOR COMPLETE LITERATURE.**

THE 17TH CANADIAN FILM AWARDS  
(CONTINUED FROM THE PRECEDING PAGE 12)

Norman McLaren's name rejoined this year's list of prize-winners as his experimental short, *Canon*, won honors. The National Film Board of Canada received a total of six awards this year.

Crawley Films' Feature Picture a Winner

The Canadian film industry is keenly aware of its potentialities in feature film production, further spurred by the prospect of early government aid in this direction. There were four nominees for the annual Canadian feature film award. The winner was *The Luck of Ginger Cotter*, produced by Crawley Films Limited and directed by Irvin Kershner. Adapted by Brian Moore from his own novel (which has enjoyed considerable critical acclaim) the film was cited "for its remarkable overall cinematographic values, ably supported by an excellent script and for the brilliant interpretations by the principal and secondary actors."

Another feature, *Nobody Waved Goodbye*, produced by the National Film Board and directed by Don Owen, received the Robert Flaherty Award given annually by the British Film Academy.

Three Groups Sponsor the Canadian Awards

Canadian Film Awards program is sponsored by the Canada Foundation, the Canadian Association for Adult Education and the Canadian Film Institute. In the past 17 years, well over 1,000 films have been adjudicated and some 300 have received awards.

Christians Face a Challenge

No Passive Role for "Almost Neighbors"  
Showing in 60,000 Protestant Churches

SCHEDULED FOR SHOWING in some 60,000 Protestant churches this year is the National Council of Churches' important new motion picture, *Almost Neighbors*. The 30-minute b/w photoplay, produced in Hollywood by Klaeger Associates, Inc., is keyed to the Council's 1965-66 study theme, *Mission: The Christian's Calling*.

The film is designed to emphasize that Christians cannot remain passively uninvolved in life around them, but must actively follow Christian principles in all their daily lives.

A Neighbor's Problems Are Ours to Share

While racial problems are perhaps at the core of this year's theme, they are but part of the overall idea that our neighbors—in the fictional Easthill of the film, or in Selma, or Harlem, or on the other side of the tracks in any town in the country and of whatever skin shading—are our brothers, and their problems are *our* problems.

In the film, a typical middle-class businessman and his wife, return from a trip to South America during which they witnessed a violent political riot. Back home they find that trouble is not always just on the other side of the world but often right in their own community. Shall they and their neighbors band together in a tight little nest against "those people in Easthill?" Shall they buy guns to protect them-

John: "You know when I invited you to our church? That wasn't an invitation to slumming. I wanted you to see something I think you're missing. That's a people living with a spirit inside them . . . learning to deal with their problems . . . with despe-

selves? Or shall they stop being just "Sunday Christians" and start living the full Christian life and become involved in the problems Easthill's people?"

Powerful Aid to This Year's Study Theme

With a well-directed cast of excellent actors to provide insights into the problem, the film should serve as a powerful tool in probing this year's study theme. Heading the cast: Margaret O'Brien and Keith Andes as (CONTINUED ON THE FOLLOWING PAGE 4)

**51 SHARE BLUE RIBBON AWARDS**

Seventh Annual American Film Festival Sponsored by Educational Film Library Association in N. Y.

**B**LUE RIBBON AWARDS voted by American Film Festival juries of audio-visual specialists honored 41 films and 10 filmstrips at a sold-out Awards Banquet on April 23 at the Biltmore Hotel in New York. Sponsored again for seventh consecutive year by the Educational Film Library Association, the 1965 Festival attracted 1,000 producers, distributors and film users from all over the United States and Canada.

During three days of competitive screenings there was standing-room only in screening rooms assigned to Festival competition categories ranging from "Film as Art" to "Public Relations — Non-Commercial." Capacity audiences also attended both the Awards Banquet and a luncheon sponsored by EFLA and the New York Film Council at which George Stevens, Jr., Director of Motion Picture Service of the U.S. Information Agency, reported on the U.S.I.A. film programs.

Awards were presented by Carol Hale, of the Girl Scouts of the United States, James L. Limbaecher of the Dearborn Public Library, Ted Malone of Ted Malone Productions, and Frederick A. White of the University of Wisconsin. Presiding at the Banquet was Galon R. Miller, President of EFLA and Audio-Visual Director of the South Bend, Ind., Community Schools.

**Association Honors Paul Reed**

The Board of Directors of the Educational Film Library Association accorded its highest honor to the late Paul C. Reed, Supervising Director of the Rochester, N.Y. Public Schools and longtime editor of EDUCATIONAL SCREEN & AUDIO-VISUAL GUIDE.

Mrs. Reed was present with her daughter, Janet, to accept the Award from the 1964 winner.

George Stevens, Jr., *USIA Motion Picture Service* chief, pictured April Festival luncheon with EFLA executive director, Emily Jordan, film producer Julien H. Bryson, who cited Reed as "an unforgettable exemplar of the creative and imaginative efforts he demanded for the audio-visual field" and presented Mrs. Reed with a check for her husband's personal charity, the Rochester Children's Memorial Scholarship Fund.

**Special Guests at N.Y. Fair**

On an evening visit to the New York World's Fair, Festival registrants were special guests at the General Motors *Futurama* and a special screening at the Johnson's Wax Pavilion of *To Be Alive* introduced by its producer, Francis Thompson.

Another evening program introduced a panel of university film producers who showed recent films. Led by Wilbert H. Pears of the U.S.I.A., participating panelists were William Drake, Ohio State University, J. E. Ogleby of the Virginia State Board of Education and Frank R. Paine, Southern Illinois University, president-elect of the University Film Producers Association.

**Winners Will Tour the Nation**

The Blue Ribbon films were screened for Festival audiences on the final day of the assembly and the Blue Ribbon circuit will make them available to viewers in cities. (CONTINUED ON THE NEXT PAGE)

## How do you measure quality in film transfers?

You know it when you see it! Your eye is our judge. That's why we demand perfection in clarity, definition and true grey scale. We get perfection by complete control. All of our work is done under one roof... a unique way of operating in our industry. And we feel the results are worth it. So do our clients — companies like AMERICAN MOTORS, MGM-TELESTUDIOS, MCA-TV, HEATH DE ROCHEMONT, even AMPEX. Their names

tell you a lot about our standards. But there's a better way to find out. Try us. We offer "in by 9—out by 5" processing—with your transfer jetting back the same night. And optimum quality is guaranteed (backed by two decades of expert Hollywood technology). If you believe your eyes call Acme Film Laboratories, Inc., Hollywood, 1161 No. Highland Avenue, Hollywood 1-7171; New York, 100 Madison Avenue, HA 1-3100.

## THE EDITORIAL VIEWPOINT

### NUMBER ONE GOAL: JOBS FOR YOUTH

THE NATION'S PARADOX in this decade concerns the urgent and growing need for more professionals, skilled and semi-skilled workers at a time when the rate of unemployment of our young people is already *high and growing*. Figures show that in this decade the demand for well-educated, trained professionals in such fields as education, medicine, etc. will increase about 40 per cent. Skilled workers in many occupational fields and trades will fall short by nearly 25 per cent. Semi-skilled workers are needed to cope with an expected 15 per cent shortage in the years ahead.

Will the national job training (and retraining) program help meet this need? If there's been a really thorough search for *already available* skill and guidance films to help speed this program, we've yet to hear about it! There are rumors of a major government purchase of projection equipment for job training.

The task of converting untold thousands of almost totally unskilled young people into useful workers has begun; it should have resulted in a keen demand for films on career guidance. *Motivating teen-agers and "drop-outs" to real interest in any kind of job is a basic first step.* They're getting paid to "practice" welding, repair auto engines and the like. *But making them care about something in the way of a life career is even more important!*

Financial columnist Sylvia Porter has called for a campaign to recruit "sub-professionals" to take some of the burden off the pros. The nursing profession has already made good use of such people as aides; extending this idea would be another good way of introducing the unemployed to useful work for which they could be more quickly adapted — in engineering, education, social work fields as well as in factories and offices.

Always mindful of the tremendous program of audiovisual aids for war training which came out of the U.S. Office of Education in another era of crisis, this publication believes that Federal training people should enlist the services of "idea men" within our film companies, let them study the blueprints for national job training and ask their help in devising the means and the media to help solve America's most critical problem: job training now and in the future for the constantly rising tide of unemployed young people.

\* \* \*

### San Francisco's Pioneer Advertising Club Hosts Well-Attended "Business Films Day"

Last month, the San Francisco Advertising Club held a "Business Films Day" (April 28) and while the pictures arrived a little too late for this issue, we're certainly proud of the co-operation shown by film distributors and producers in that wonderful town! The Ad Club

(oldest in the land) has a specialized Business Films Departmental, which meets the 4th Thursday of every month for luncheon/workshop discussions. Tom Fraser, head of San Francisco film company by that name was this year's Chairman.

Principal speaker on April 28th was W. H. Pratt, Jr., Film Manager, American Telephone & Telegraph Co. His three-part, illustrated talk covered the potential of business films for the advertiser ("business films should be considered for a part of any comprehensive media buy"); he also discussed the extensive research conducted by AT&T on its films. Finally, he reviewed the recent Association of National Advertisers' report on member film programs and practices.

"Business Films Day" was well supported by the Ad Club, whose president John Brickman presided at the luncheon. Some 200 advertising agency executives and local film people turned out. Exhibits were in charge of Bob Kellogg, Gordon Reynolds (Modern Talking Picture Service) and Vin Agar of W. A. Palmer Film Publicity for the day was well-handled by D. Fowler (Vista Productions), Pat Derby (Cann-Erickson) and Al McNay (Standard of California).

To further show the extent of local cooperation, attendance and reception details were arranged by John Magnuson (Imagination, Inc.), Erica Wilson (Butler Productions) and Jack Karski (Motion Picture Services).

Arrangements for the speaker were delegated to Bill Hynes (Pacific Gas & Electric) and Martin Hansen (Bank of America) who assisted chairman Tom Fraser on this important program detail.

Production and distribution people in other major U. S. cities could well emulate this good idea! Are you represented in your local club? Have you asked them to set up a department within the club? Why couldn't you promote a "Day" in Denver, Phoenix, Dallas, Atlanta, Miami, New Orleans? Oh, you already do! Well, tell us more about it.

\* \* \*

### Marked Increase in Film Awards Reflects Growth of Field, Requests from Overseas

It's getting harder all the time not to win some kind of film award, what with 111 "Golden Eagles," 51 "Blue Ribbons," and 75 "Clips" to mention just 227 bouquets which were recently tossed to sponsors and are reported on other pages of this issue.

Actually, there's a pretty good reason for those CINE "Eagles" because the U. S. now participates in numerous overseas film festivals throughout the world and each one wears something wearing our flag. The American Film Festival awards (page 16) cover a whole field of factual motion pictures of film strips from the kindergarten to old age benefit and films for schools, churches and discussion groups are proliferating at a pretty good rate.

As for television commercials, well, who would all that entertainment be without them? Los Angeles has its competition; New York gets bigger and better. And the commercials do seem to have improved considerably.

*Film Theater at Cincinnati Air Terminal  
 Opens Up New Audience for Business Films*

Having completed a 10-month test program in which it showed free travelogs, sports films and other business-sponsored pictures in a daylighted theater in the Greater Cincinnati Airport, Modern Talking Picture Service is currently negotiating with several other major air terminals to establish additional free waiting room theater facilities.

W. F. Wilkerson, director of operations at the Cincinnati Airport, says, "the free movie theater here has made a real hit with our passengers because the films are quite entertaining. Also, the theater fills a particularly important need on the rare occasions when heavy fog causes temporary delays. We had a call from one man the other day who was so impressed with a film he saw that he wanted permission to bring a group of 20 people over to view it."

Modern vice-president Bill Oard notes that airport passengers spend an average of one hour and five minutes watching these free films. 70% of the people waiting in the airport spend a portion of their time watching the films. More than half of these viewers are executives and professional people.

This is the easiest way to  
make slides and copies in 10 seconds.

This is why. The Polaroid Copymaker has everything you need for copying: two fluorescent lights for uniform illumination; close up lenses for pictures down to 1:1 magnification; and a built-in electric timer for exposure and development timing. The easel is marked off into eight field sizes to show exactly what will appear in the picture for various camera settings. Teamed with a Polaroid Model 160 Land Camera, the Polaroid Copymaker allows you to make on-the-spot close-ups of anything that will fit into an 11" x 14" space—charts, maps, books, small objects.

You'll make prints or line copy slides in just 10 seconds, continu-

ous tone slides in two minutes. With no trouble. Just load and shoot the transparency film the same way as standard film. Push a button, pull a tab, wait a moment, remove your transparency. After a quick hardening, put it in a snap-together frame and it's ready for projection.

Whether you want slides or prints, you'll see your results immediately. No waiting. No expensive darkroom. And the Polaroid Copymaker is so simple, practically anyone can learn to operate it in no time. If your school, office, laboratory or drafting room needs quick, quality copies, why not get them the easiest way? With the

MEMBERS OF THE Industrial Audio-Visual Association, professional society of the men who manage audiovisual production and utilization within leading U.S. companies, concentrated on an annual spring meeting program with the basic theme: "Planning for Profits." With the effective use of the full range of audio and visual tools and techniques within their respective companies as their prime interest, the topic ran through the three consecutive meeting days in Chicago on May 3-5th.

Keynote speaker for this 20th Annual Meeting was Frank Bauder, president of the City National Bank of Chicago, who stressed the importance of "analysing what we are doing for today and what we are also doing today for tomorrow." Picking up the theme of "Planning for Profits" were such members as Jack Duffy, sales promotion manager of Kraft Foods Company; R. P. Hogan, divisional advertising executive within the same company; and Don Glassell, Montgomery Ward & Company audiovisual

#### Morris Was Program Chairman

Program chairman for the meeting at the Ambassador West in Chicago was William E. Morris, of General Laboratories, who previewed the meeting theme at the opening session on Tuesday, May 4th. The association also inaugurated a new "internship" program with two Chicago area university students who were accepted as associate members for a full year's participation in regional program activities terminating in 1966. Richard Robertson, of Rochester, New York, and Howard W. Schuth, of Peoria, Ill., are IAVA's first "interns" and both are enrolled at Northwestern University's School of Speech, majoring in radio, TV and Film.

#### Benefits to Industry, Schools

The purpose of this student program, according to project chairman Albert Schlachtmeyer, is to promote closer cooperation between industry and the college community in this vital field of audiovisual communication. We believe that IAVA will benefit from the ideas, while these students are afforded an opportunity to bridge the gap between the classroom and business."

The three-day anniversary program included visits to the new Borg-Warner Science Hall on Chicago's Michigan Avenue, where members and their wives were entertained by the company's manage-

Members of the Industrial Audio-Visual Association in session during recent 20th Anniversary meeting in Chicago.

## Industrial A-V Executives' 20th Anniversary

ment on an intensive tour of the exhibits, including the revolutionary new "environmental theatre" where the first total-sensory use of color film has been achieved. They also witnessed a nine-screen automated filmstrip showing of the total Borg-Warner corporate set-up.

#### A Visit to Argonne Laboratory

A trip to the audiovisual and other facilities of the Argonne National Laboratory preceded the association's annual banquet on Wednesday evening, May 5th, at which president-elect Harold W. Daffer (Honeywell, Inc.) received the gavel of office from retiring president Robert C. McCaslin, Caterpillar Tractor Company's supervisor of sales training.

O. H. Coelln, publisher of BUSINESS SCREEN and one of the founders of the association, served as toastmaster and speaker of the evening. Other new officers introduced to members and their wives at this banquet event were: Lawrence W. Warnock (Link Belt Company), first vice-president; William H. Buch (Lederle Laboratories), second vice-president; John T. Hawkinson (Illinois Central Railroad), vice-president for Illinois; Fredrick J. Woldt (Illinois Bell Telephone Co.), treasurer;

President-elect Harold Daffer (r) receives gavel of office from retiring president Robert McCaslin.

and Frank Stedronsky (A. B. Dick Co.), secretary.

#### Introduce Regional Directors

Regional directors for the association introduced at the banquet were: H. D. Johnson (3M Company), northern region; William D. Davis (E. I. du Pont de Nemours), eastern region; Don L. Glassell (Montgomery Ward & Co.), central region; A. A. Smith (Humble Oil & Refining Co.), southern region. Vincent Hunter (Union Pacific Railroad) was

named western regional director.

Albert S. Schlachtmeyer (Link Belt Co.) is the new publicity chairman and Donald J. Benjamin (Columbia Gas Co.) will serve as IAVA's assistant secretary.

Among the new members present and introduced at the meeting were Gerald L. Johnson, manager of audiovisual services, Panhandle Eastern Pipe Line Co.; Robert E. Doyle, film supervisor in Chicago for United States Steel Corp.; and Robert D. Fuller, director of photography for the Pillsbury Company.

#### Butler is Membership Chairman

Gordon W. Butler, Dixie Cup Division, American Can Company, continues as IAVA's membership chairman; and James Craig, General Motors, retains his role as the association's longtime historian. Heading the past-president's committee is Robert C. McCaslin.

Henry F. Stolte, Chas. Pfizer Co., will serve as technical chairman and Jack G. Hansen, Johnson & Johnson, is chairman of the constitution committee.

The fall meeting of IAVA will be held in Boston later this year and Harold N. Read, Liberty Mutual Insurance Company, is program chairman for that event. The 1966 annual spring meeting pro-

Wide-angle look at one of lighter moments during IAVA's annual Spring meeting at the Ambassador Hotel in Chicago. Members and wives are pictured at reception which preceded Association's 20th Anniversary banquet.

IAVA officers and directors pictured above (front row, l to r): Lawrence Warnock (Link-Belt), first vice-president; Harold Daffer (Honeywell); Bill Buch (Lederle), second vice-president; John Hawkinson (Ill. Central RR), v. p. for Illinois. Back row (l to r): F. J. Woldt (Illinois Bell), treasurer; Frank Stedronsky (A. B. Dick), secretary; Albert Schlachtmeyer (Link-Belt), publicity chr.; Don Benjamin (Columbia Gas) assistant secretary, and W. D. Davis (Du Pont), eastern regional director.

gram will be handled by central regional chairman Don Glassell, in Chicago.

Other program events at the Ambassador included demonstrations of "Super 8", the new Kodak film base, presented by that company's Gene Weber, representing the Education Markets and Motion Picture Sales Division, Arnold Coty of Porta-Tel Productions, also presented an equipment demonstration.

#### Highlights of 1965 Program

Member program events were highlighted by a symposium, "Management, Music and Money" chaired by Frank Stedronsky, with Don Benjamin, Harold Daffer and Richard Prasecki (Allis Chalmers Mfg. Co.) as panelists. Howard Williams, Edward E. Johnson, Inc., introduced a film, *The Heart of the Well*, and another IAVA member from the Twin Cities, Marshall E. Hosp of General Mills, showed his company's recent picture, *Motivation for Living*.

A most useful talk on "Standards for Periodic Evaluation of Film Library Plans" was presented by member Jack Borland, Smith, Kline & French Laboratories. A fitting conclusion to this report of IAVA's 20th Anniversary annual gathering is the event which epitomizes the spirit of this organization's inter-member-ship cooperation and unity. Climaxing the annual banquet

was the presentation by O. H. Peterson, American Oil Company (a past president of IAVA), of the president's plaque. It was given, with a highly-appropriate salute for his many years of service to the organization, to past-president Bob McCaslin.

#### Open Roster to New Members

In answer to the call from many companies who have presented candidates for membership in the association, IAVA members accepted a constitutional amendment which now permits 120 active members. The previous maximum was 100 and this had resulted in

IAVA members were guests of Borg-Warner on a tour of that company's fascinating new Science Hall with its "environmental theater" and nine-screen automated sound slide film show; producer Gordon Weisubow is at the left.

a waiting list. IAVA's present membership includes many of the country's largest business organizations, including such giants as American Telephone & Telegraph, General Motors, Ford, Du Pont, International Harvester, Deere, American Oil, Caterpillar Tractor, Chrysler, General Mills and many others.

It was founded in Chicago by a small group of men representing International Harvester, Standard Oil of Indiana, Swift & Company, U. S. Steel, Kraft Foods, and the Illinois Central. The first annual meeting was held in that city just 20 years ago in 1945. Host for the informal gatherings preceding the invitation to that first annual gathering was O. H. Coelln, publisher of BUSINESS SCREENS. •

Above: Bob McCaslin (r) receives past-president's plaque from O. H. Peterson. Below: Bill Morris was chairman of annual program.

#### McCall's "Stretch Revolution Herald's New World of Fabrics"

Combining promotion with public relations, McCall's Magazine has sponsored a 14-minute motion picture, *The Stretch Revolution*, to herald the new world of stretch fabrics. Animatic Productions, Ltd. was the producer.

The film is being made available to advertisers, department stores and related groups as a venture of the magazine on behalf of the new "stretch" industry. The film is a quickly-paced, clever montage of old historical prints drama the background of the "stretch revolution. The film uses cartoon animation to describe the scientific basis of stretch fabrics, followed with live photography of fabrics in action to provide proof of performance.

#### "Holiday" Color Film Series Sponsored by American Oil

A series of brief public-service color films for television release produced by Parthenon Pictures for the American Oil Company now includes a new 4½ minute title, *Let's Go to the Many Michigans*.

Two similar short-shorts on the advantages of automobile travel are *Destination: Fun*, with highlights for family vacation travel; and *Let's Go to Washington*, with highlights of the nation's capital.

Modern Talking Picture Service, Inc. is distributing the series as well as three 28½-minute color films titled, *Happy Holidays Along the Potomac*, *Happy Holidays in the Land of Lincoln* (Illinois), and *Happy Holidays Anywhere in Michigan*.

\* \* \*

#### Atom Absorption Spectrometry Described in Jarrell-Ash Film

The highly-technical field of Atomic Absorption Spectrometry is the subject of a new color motion picture of that title available on free loan to qualified groups from the Jarrell-Ash Company.

The film covers the origins and principles of atomic absorption spectrometry as is applied in agriculture, biology, food chemistry, geology, medicine, metallurgy and petrochemistry. The makeup of atomic absorption instruments is shown and details provided on how analyses are run.

Both 16mm optical-sound and 8mm magnetic-sound color prints are available in either English or Spanish versions on 60-day advance notice. Write: Jarrell-Ash Co., Waltham, Mass. 01254.

# LAND

# LEGACY AND PROMISE

Space capsule scene (at right above) "and man has ventured into this mysterious region himself" says narrator in opening sequence.

crops are carried away from the fields (above) . . . and along with them goes what plant food they have drawn from the soil."

## Increasing Profits on America's Farms

"Honest, Warm and Cheerful Picture"  
from National Plant Food Institute

Bob Manners: "I got 90 bushels of corn out of this field last year. Hank Lillyby got over 100 on his. Maybe I ought to have my soil tested . . ."

the modern testing laboratories of America (millions of soil samples from farmers everywhere . . . turning to better ways of analysis."

**H**OW CAN THE FARMER increase his crop profits? The National Plant Food Institute, an association of leading fertilizer producers, is telling the true-to-life story of one farmer who achieved that goal through improved soil fertility and better farming efficiency.

In *The Land — Legacy and Promise*, the most recent release in this association's extensive film program, thousands of farm film audiences can now share the successful experiences of one of their own. The 27-minute color motion picture, produced by Audio Productions, Inc., was two years in the making.

### Soil Testing First Step to Crop Profits

Like all wise farmers, Bob Manners knew that soil fertility levels must be replenished to insure high crop yields. That's why he considers soil testing a must. The film shows how he samples his fields and sends these samples to the soil testing lab. He gets help from local specialists in analyzing soil test results and fitting them to his crop yield goals.

Then, with sound fertilizer recommendations and good farm records, Manners finds his banker ready to furnish the additional capital he needs for expanded operations.

The payoff comes at harvest time. Higher yields return greater profits. Manners' investment in soil testing and additional fertilizer use is returned many times over.

### Technical Animation One of Film's Assets

The color film is a major production for the growing NPEI Film Service. Besides thorough coverage of the actual Manners farm at all seasons of the year, and other scenes made in eleven states across the nation, the film includes some outstanding technical animation sequences and time-lapse photography of growing crops.

Producer-director Hans Mandell, of Audio Productions, has made it into an honest, warm and cheerful film that will win many friends among its intended audiences of farmers, county agents, vo-ag teachers, youth groups and schools and colleges. It will be available on loan through member companies of NPEI, or through the Institute's Film Service at 1700 K Street, N.W., Washington, D. C.

Manners arranged to have a copy of the lab report sent to Jack Baisley, his fertilizer dealer, to find out cost of extra feeding for his fields.

automatic lab equipment analyses soil samples. Below: "a farmer is like any business — he borrows money to make money"

Above: "I figure it will run you \$15 more per acre. But your crop will bring \$7,000 more." Manners: "That's a good investment."

National Cotton Council films are promoting

# Nature's Wonder Fiber!

This Active Film Program is Bringing Fashions, Facts About Cotton to Millions of Viewers • by Bob Ward, Manager, Audio-Visual Services

Boom shot setup in cotton field for a film on techniques of producing quality cotton for mechanical harvesting.

OVER A THOUSAND TIMES each month cotton's message is carried by film to the eyes and ears of millions. Showing that cotton really is nature's wonder fiber is the task of the Audio-Visual unit of the National Cotton Council and this assignment is being fulfilled by our motion picture program.

Already firmly committed to audio-visual techniques by the early '50's, it was the rise of television that gave impetus to Council film work in a big way. There was then and still is no other means of reaching such large audiences at so little cost. Television bookings alone account for an annual audience of over 75 million for our films. And this does not include the audiences being reached through schools, civics clubs and hobby groups.

#### Our Product: Tools to Inform and to Train

Tools for informing and training are the main products of our unit of four men and two secretaries. In addition to six or more films made each year, we also make occasional SOF and silent film clips, turn out thousands of still photos in color and black and white, produce and distribute 17,000 radio tapes and handle all of our own film booking and distribution.

This emphasis on pictorial promotion is one result of the Council's goal of increasing consumption of American cotton by intensive efforts in research and promotion. As the only

central organization representing the raw cotton industry, the Council's promotion dollar is stretched to cover direct advertising and special promotions.

#### Extending Other Promotional Campaigns

As a result, our film and audio-visual assignments are fashioned not only to gain extra mileage for other promotions, but are designed to be vital extensions of direct print and television campaigns to consumers and industry. Council films strengthen cotton's selling messages and reinforce product campaigns while dovetailing into local TV programming, classroom studies, and club programs.

Naturally, captivating subject matter is the inducement needed to create demand for films. This program is carefully planned to offer a variety of titles that will make available motion pictures on topics of the broadest possible appeal.

#### The Big Picture of the Cotton Industry

The only film anywhere that shows the entire breadth and drama of the cotton industry. *Cotton — Nature's Wonder Fiber*, is one of the Council's most heavily-booked films. It combines information and entertainment — and relates the impact of cotton on our economy and daily lives so well that demand often exceeds the supply of prints available. It is already booked well into the spring of 1966 and soon there will be only limited dates available in the fall. This is not an uncommon occurrence among the more popular of the Council's 35 films.

An effort that has proved to be well worth sending a crew to Europe, is a series of films featuring each year's Maid of Cotton. The magnificent antiquity of European cities and the picturesqueness of Old World hamlets are

perfect backgrounds for the jet-age creations of the world's best known designers. It is the wonder that a beautiful young woman, the exciting eye-appeal of high fashion and the eternal magic of Europe combine to make successful celluloid sale for cotton everywhere.

While films made in Vienna, Bruges, Paris and on Spain's Costa Brava enjoy enviable booking success, the filming crews do not always find the going so easy. The rugged coast of Spain was an unexcelled location

"The Sporting Life" shows the current men's sportswear fashions for bowling, polo, archery and sailplaning, too!

filming, but an exhausting one in which work. Heat, dust and literally miles on foot for crew and models alike made the shooting extremely taxing. However, the rewards were ample. An attractive finished product and 21 television bookings attest to that.

#### The Glamorous World of Cotton Fashions

Cotton fashions are most often our subject — from the Maid of Cotton in a Dior gown, standing in the ruins of an ancient monastery, the Pyrenees and Mediterranean shimmering in the distance, to an agile young man sporting the latest in resort wear as he stands at the helm of a sleek sailplane.

Mixing travel with interesting, style-setting clothes is a formula that has worked and kept right on working with men's, and youth apparel. But cotton figures in many aspects of our lives, not only the clothes we wear. So do Council films. Home decoration, camping, boating and home sewing are some of the other subjects. A lot of mileage can be obtained from any good "how-to" film. An what better, gentler way to show cottons to best advantage? *The Trouble With Windows* features Dinnie Carter, editor of "1,001 Decorating Ideas" showing unique methods of decorating ordinary problem windows, such as

Below: Window treatment styled by Dinnie Carter, editor of "1,001 Decorating Ideas," for a scene in film "The Trouble With Windows." This was one of easier problem windows in her home.

Above: a studio department store set used for a recent sales training film which accents domestics in cotton . . .

re windows, glass-sliding doors and un-  
ed windows. She even tackles and solves  
problem posed by a window set at an  
! All with cottons, of course.

pping Out With Cotton in "High Country"  
e tremendous family camping boom is  
without a Council film to show how cotton  
s "roughing it" a thing of the past. *High  
try Holiday* follows a family to the great  
y Mountains National Park to learn how  
camping is today. Response to this film  
good that plans are being made to pro-  
another, possibly next year in the Grand  
s.

all Council films booked as well as *High  
try Holiday*, we could take a holiday of  
own! Most plug along over a period of a  
years — diligent effort is made not to  
films so that they cannot be circulated  
ree or more years — reaching millions  
uilding for cotton the appreciation, con-  
e, and markets for which we aim.

Most of Council Films Shot on Location  
hough most of our filming is on loca-  
we have studio facilities in the main  
eil office in Memphis. Here we film ses-  
es taking place in department stores,  
ns, living rooms, and whatever else can  
ed into a studio.

r largest audiences are reached primarily  
gh local television's women's programs.  
of our shows are run in public service  
and most of this is available during the  
ne hours — again when the holders of  
ation's purse strings, housewives, are  
ing. This explains our emphasis on fash-  
nd home decoration.

ictures Also Aimed at Men in Audiences  
wever, we do not style our motion pic-  
exclusively for women; films of interest  
en are well received on many of these  
programs and are widely used by schools  
ivies clubs.

ools provide an audience of almost un-  
d scope — assuming one has good films.

Above: fashion shot from "Assignment  
/indjammer," lensed aboard a sailing  
ip near the Virgin Islands. Right:  
Tori-Richard high-waisted gown is  
e subject of this film scene photo-  
graphed on beautiful Marina Cay . . .

all that is needed is enough budget to buy  
prints and get them distributed. We especially  
like booking films to schools because here we  
have an opportunity to show cotton's virtues  
to tomorrow's buyers. For that matter, the  
size of today's teen-age market is worthy of  
special attention even without considering that  
in a few years these same people will be home-  
makers and consumers!

#### Effective Medium for Sales and Job Training

Films offer an effective and inexpensive  
method of sales training, of instruction in tech-  
niques of cotton production and of introducing  
manufacturers to new products of research.  
The Council's Audio-Visual Services produces  
films in each of these categories to meet spe-  
cial requirements as they arise. A critical  
stage in the development of a new product or  
technique is the transition from laboratory to  
factory or field, where it begins to have dollar  
value. Films help speed this movement, pro-  
moting the benefits of research.

All of the films in our library are available  
on a free-loan basis with the user paying re-  
turn transportation charges. We have found  
many advantages in handling this entire pro-  
gram with our own facilities and personnel.  
The most important, and probably least ob-  
vious, is that including all costs and overhead,  
cotton's message is being effectively delivered  
to a mass audience at a cost of about 35¢ per  
thousand.

What "projection" is there for the Council's  
film program? To continue producing motion  
pictures which instruct, entertain, inform *and  
make friends for cotton is our goal.*

Role of plant breeder in develop-  
ing new varieties of cereal grain  
is told in North Dakota's picture

## North Dakota Shows Quality of Its Wheat

**H**IGH-QUALITY WHEAT is one of North Dak-  
ota's principal exports. Durum wheat,  
used almost solely to produce macaroni and  
spaghetti and hard red spring wheat, the basic  
ingredient of quality bread products, are the  
prime products with which that state's Wheat  
Commission is concerned.

The Commission took careful note of the  
lack of first-rate motion pictures about the  
utilization, development and marketing of wheat  
and bread products and, in fulfilling its basic  
goal of promoting North Dakota wheat prod-  
ucts throughout the world, set out to do  
something about it.

#### First Film Was Widely-Honored "Durum"

A first film, *Durum, Standard of Quality*,  
was produced by Bill Snyder Films of Fargo,  
North Dakota, in 1961. The Commission got  
quite a bit more than an ordinary film expo-  
sition of this grain staple. *Durum* was not only  
hailed by educators as a superior teaching  
film—it won a Blue Ribbon at the 1962  
American Film Festival, a special award at the  
U. S. Department of Agriculture's Centennial  
Film Festival, the Gold Medal at Parma, Italy  
Food Packaging Show and a Chris Award from  
Columbus.

It was also selected by the Council on Inter-  
national Nontheatrical Events (CINF) for  
showings at the Vancouver, Venice and Berlin  
Agricultural Film Festivals and the film has  
since been in constant demand, circulating  
widely throughout the world. Five foreign  
language versions have been made. In the U. S.,  
the film is distributed by Sterling Movies U.S.A.

#### Latest Picture on "Hard Red Spring Wheat"

Joining this award-winner is the current  
Snyder production, *Hard Red Spring Wheat*.  
This 30-minute sound and color motion pic-  
ture deals with the growing, harvesting and  
processing of quality bread wheat. It takes the  
story of bread products from farm acres to  
the table. Its primary aim is to assist the pro-  
ducers of quality bread products.

*Hard Red Spring Wheat* was produced in  
cooperation with the Cereal Technology and  
Agronomy departments of North Dakota State  
University and, with the help of experts there,  
affords a penetrating insight into how  
cereal grains are improved, resulting in

## 'Little' Accidents We Can't Affo

"Slips and Falls." One of Year's Best Occupational Safety Pictures. Aimed to Alert Bell System Employees to Hazard

**O**FFICE AND SHOP JOBS, like working around the house, would appear to be among the least accident prone. But comparing these apparently "safe" tasks to hazards encountered by skyscraper steelworkers results in some startling facts. As the steelworker says, "up here, we know we're in a hot spot, so we turn on our eyes — and keep them turned on." In sharp contrast, familiarity breeds inattention in offices and shops and homes.

A new and widely-useful color motion picture (10½ minutes) has just been released by the Bell System Companies. Already the recipient of the highest award bestowed by the National Committee on Films for Safety (a bronze plaque), *Slips and Falls* covers this area of occupational safety which accounts for a vast amount of lost time and cost and needless human suffering.

### Traps and Hazards Distilled

Based on the file of accident reports from the Bell Companies (which totalled hundreds of pages), these have been distilled by the film's producer, Parthenon Pictures, into categories and then into a tightly-condensed body of fundamental traps and hazards which face Mr. and Mrs. Average American.

In planning this film, it was recognized that the primary objective had to be *motivation*. Since nobody intentionally asks for six months in a cast, the film motivates in the sense of *awakening*, of vivifying hazards which everybody "knows" about but has pushed into the field of the overly familiar.

### The "Familiar" Can Hurt You

*Slips and Falls* turns on its "alarm clock" awakening effect through the steelworkers' sequence as it drives home, hopefully, the realization that the causation of an injury isn't necessarily a "dramatic" hazard. All too often it's the familiar object one doesn't notice and fails to avoid.

What's the cure? *The answer is not to be dulled by tamharity, no matter how apparently normal and routine the environment; to keep alert, to keep aware and to keep "turned on."*

Production technique is note-

worthy. The "steelworkers' sequence" looks simple in the leased version but picture-maker will spot some of the problem. No stock footage here . . . an edited blend of sequences, specially lensed at different times in New York, Chicago and Beverly Hills.

### Shock Footage on "High Iron"

That first "look down" where the plot requires "must kick viewer hard in the stomach." Try #5 in City #3 — it had to be shot from out on the thin edge of an open steel structure stories up. So, first, the producer trained a pro steelworker to get out on the iron with an Arriflex camera on a special chest harness. The result was the standard amateur's wavery pans and sudden tilts. Eventually a pro cameraman (Parthenon's Guy Adenis) teed off along the spidery girders to bring in the shock footage.

In the U.S. upshots of steelworkers in action, the "actors" previously had to be professional stuntmen, so they worked in slow motion . . . with multiple cameras picking up their high-iron action. Don Livingston directed this sequence, using a wall talkie to steel superintendent Fred Lipsis, up top. The high-iron action, as a result, is authentic and probably as exciting as anything of the sort filmed.

### Falls Had to Be Convincing . . .

Numerous "falls" which dramatize the hazards on the job are in the home presented other production "problems." The 10½ minute picture takes in nine falls on camera and ten near misses.

These had to come off naturally or the picture would lose the force of the lesson. Credit has to be shared by stunt men and women (who incidentally make completely convincing office and shop workers) and by the director and his crack crew. None of the scenes were "faked" or "processed" and the stunt people had to bruise to prove it.

### To Be Shown in Bell System

*Slips and Falls* is destined to be used internally by the Bell System Companies. A "working" picture like this should pay real dividends in helping cut waste.

In the pictures: these scenes from "Slips and Falls" make vivid the hazards of Junior's skateboard (top), and those piled-up cartons in a storeroom

Those rug tripped this hapless heiress into a nasty fall down (Scene in "Slips and Falls")

in and material resources, requiring needless accidents. The covered has been notably in recent years, indicating need for the subject.

at need is general and, when resources permit, it is to be the Bell System will find it able to share a very useful re with other companies and organizations throughout the land. keep you informed of the ability of *Slips and Falls* in columns.

#### Training of Stewardess Corps Served by United Air Lines

A new United Air Lines color describes the preparation of stewardesses and the exacting responsibilities required of them as members of today's jet-age flight

The picture opens with a stewardess applicant being interviewed and then portrays, in detail, the dress of a stewardess class through United's modern Training Center near Chicago.

Other scenes depict the life of an airline stewardess, both aloft on the ground. *Stewardess*, a 20 minute color film, was directed by Cate and McGlone

is available from Modern Picture Service libraries throughout the U.S.

Scene from "Stewardess Story."

**T**HE WONDER-WIDE EYES of a tow-headed 12-year-old will be a window on the World's Fair for millions of film viewers during the next few months. In a new General Motors-sponsored motion picture produced by MPO Productions, the day-dream adventures of Chris Meredith as he wanders through the fantasyland that has sprung up on Long Island are painted into a vivid portrait of the New York exposition.

Produced to help increase public interest during the final season, the picture enables those who have visited the Fair to relive a colorful memory while encouraging those who have not attended to do so.

#### Will Get Wide Distribution

Some million persons are expected to see the film before the Fair closes October 17. It will be shown here and abroad on television, in theatres and before various organizations through the General Motors Film Library. 440 prints were in the initial lab order.

Chris Meredith makes his first—and possibly last—theatrical appearance as the star of the picture.

His father, a New York motion picture photographer, is not overly eager for his son to pursue a professional acting career.

"If, when he grows up, he wants to become an actor, that's fine with me," Mr. Meredith said, "but right now school, a normal childhood and the chance to choose what he really wants to do are the most important things."

#### Chris Likes Picture Business

A stocky, quick-moving boy with laughing blue eyes and an apple-shine complexion, Chris romped through the weeks of shooting the film all over the Flushing Meadows Fairgrounds.

"Making the picture was a lot of fun," he said. "I saw everything at the Fair and I got out of going to school." That he did, but a tutor kept him abreast of his schoolmates in Pleasantville, N.Y.

The script was tailor-made for a venturesome boy with a bent for athletics, which Chris—a Little League baseball player, avid swimmer and winter sports fan—surely is. He bounced on a trampoline, slid down a curving banister, ran pell-mell around the edge of the Unisphere pool, climbed the rigging of the *Santa Maria* and drove an antique auto about the Fairgrounds.

Chris was suggested for the part by Director Vic Solow who has known him since his birth. Chris'

Christopher Meredith plays Columbus on voyage of "discovering America" in film sponsored by General Motors to help publicize the Fair.

## The Fair Through a Boy's Eyes

Sharing the Wonders of the New York Show With Millions—General Motors Pictures "Fair Today, Futurama Tomorrow"

Chris relives a voyage of exploration aboard replica of the *Santa Maria* at New York World's Fair

parents agreed because they felt the film would be a good one-time experience and because the salary would help pay for his education.

"I think Chris could become a highly successful performer," Mr. Solow said. "He has a world of natural acting ability, a tremendous amount of enthusiasm and—unusual for a boy his age—a lot of creativity. He suggested how he should play a number of scenes and that was the way we shot them."

#### Film Follows Boy Through Fair

The film follows Chris as he daydreams through the Fair, sav-

oring the sights and sounds of some of the principal attractions. He watches the dancers and drummers of the African Pavilion, sleeps in Christopher Columbus' bed aboard the replica of his flagship, joins in a Japanese tea ceremony, soars aboard the Swiss skyride and takes the General Motors Futurama "ride into tomorrow."

The Futurama was the most popular pavilion at the Fair last season, playing host to more than 15½ million persons and setting a one-year attendance record for an industrial exhibit at a world fair.

Producer-director Vic Solow shows Chris Meredith how to set up a scene for the GM "Fair Today, Futurama Tomorrow"

United Air Lines has continuous rear-screen projection of a sailing film in the Transportation Building.

Churches of Christ exhibit uses a Cinabox, showing 10 three-minute sermons — just push a button.

West Berlin shows industrial progress via a continuous film within this wall of still photographs.

Methodist Church exhibit has continuous slides, being viewed by visitors to the Protestant Pavilion.

## Audiovisuals '65: Camera at the World's Fair

There's Less Waiting, Speedier "Rides" and the Same Hit Shows of the Past Year Plus a Liberal Education in Audiovisual Techniques at New York's Colorful Fair

THE 1965 VERSION of the New York World's Fair opened on April 21 with clear skies, high hopes and a record attendance. After a good first week the number of fairgoers has dropped considerably and is now running about 30 per cent below last year. But Robert Moses, president of the Fair, says "wait until school lets out."

Most of the commercial exhibits, which were the only attractions on the Fair grounds to draw crowds last year, are continuing on with their successful shows practically unchanged, but with much shorter waiting lines, or frequently none at all.

### Few Changes in Major Shows

General Motors and Ford, which were first and second in attendance in 1964, are again offering their popular rides; General Electric's Progressland Carousel revolves around the same Disney Animatronics on center stage to the lilt of the same catchy tune; DuPont has made but few changes

This picture wall in Vatican Pavilion has screens with continuous slides.

in its combined film and live musical comedy; and the Johnson's Wax film, *To Be Alive*, goes on, unchanged, as the real "hit" of the Fair.

Film, in the exhibits where it is featured as a principal attraction, seems to be more successful than ever. But some over-gimmicked, poorly prepared and badly presented film exhibits have

left the scene, won't be missed.

Johnson's Wax, right from the opening hour, has continued to draw good crowds, many of whom seem to be repeaters from last year who "couldn't wait to see it again." Francis Thompson's three-screen epic looks as good as ever!

International Business Machine's multi-screen film presentation, *The Information Machine*, by Charles

Eames, has been trimmed, tightened in a few spots, but the same crowd pleaser as last year. New, is a "ticket office" where reservations may be made for shows at various times during the day. Free-ticket holders must then show up at the proper time and be ushered to their seats at the "People Wall" without waiting.

### Bell System Improves "Ride"

The Bell System's 1000-second ride, featuring four or five dozen motion picture screens, has been re-edited, speeded up, and many early visitors seemed much improved over last year's show, which somehow failed to live up to expectations.

Chrysler's "Show-Go-Round" is a brand-new production this year, although again featuring the Balloons and Puppets and a revolving stage. The filmed part of the show kids in the automobile industry with old clips of Keystone Kop "chase" scenes and "get-a-horse" footage.

Chrysler now has new shows starting every nine minutes — a day of the 20-minute comedy. This is accomplished by staggered starts in three separate theaters surrounding the revolving stage.

Eastman Kodak again has S

Fairgoers move up the ramps into GE Pavilion where they'll see Disney Animatronic show . . . New York's Port Authority is drawing crowds to its 360-degree film produced by Niles . . . A Fair has "wait-ers and view-ers". This is waiting to see Du Pont's multi-stage show . . .

Company film "Rendezvous in Space" is climaxed by mock-up of spacecraft in action. The animation sequences in the movie were created by Graphic Film Corporation, in collaboration with Capra for Martin Marietta.

The Searching Eye in the Circle Theater, a Filmex production for Eastman Chemical in the fall, and a Herb Shriner film scheduled to open shortly in another Circle Theater, which were "made-up" when the Fair opened last year, now have seats — and it has been proved that there is nothing a tired Fairgoer wants more than a chance to sit down. Since the Fair opened, Greyhound

was not operating its revolving Circle Theater.

**New Shows at Festival of Gas**

Festival of Gas has replaced the small stand-up theater, where a puppet film was shown last year, with two new visual presentations. The House of Energy features a 12-screen slide show in a small stand-up room demonstrating the effectiveness of gas in air-conditioning. The Festival Theater has continuous showings of motion pictures on French, Italian, Pennsylvania Dutch and Chinese cooking. The ladies love it!

Among the Transportation Building holdovers from 1964 — KLM and Graphic Films' *To the Moon and Beyond*, United Airlines and Saul Bass' *From Here to There*, the Navy and Marine Corps' *Cine Globe Cruiser* and the Army's *Man on the Moon* are noteworthy attractions, while the Coast Guard has added continuous films on two Moviematic projectors.

**Films in the Hall of Science**

In the Science Building, not open early in the season last year,

Up the escalators to the speeded-up "film ride" in the Bell System Pavilion at New York World's Fair.

Signs lead to film showings at the Fair: at left above entrance to *Cine-Globe Cruiser* (Navy-Marine Corps' film). Right above: the Festival of Gas theater is showing films on unusual cookery. Left below: this little theater is showing U. S. Atomic Energy Commission's film. Right below: poster heralds *Jam Handy Cine-Globe Cruiser* show in the Transportation Building.

Martin-Marietta is showing Frank Capra's film *Rendezvous in Space*, featuring Danny Thomas, to enthusiastic audiences in a beautiful 300-seat hall with stained glass windows in curving walls. At the climax of the show the film cuts off on the 50-foot wide screen and high overhead two real spacecraft meet as if in mid-space (see illustration)

In the lower level of the Science Building are displays with films of Abbott Laboratories, the U. S. Atomic Energy Commission's *Tomorrow's Power Today*, and the American Cancer Society film —

*Time for Life*, featuring Gregory Peck.

The Electric Industries' Tower of Light has removed the continuous-loop film segments of its show, which has been revised considerably from last year. But it is still rather heavy-handed propaganda with little audience appeal.

Triborough Bridge and Tunnel Authority is presenting a new production made by Tom Costigan and Richard Milbauer called *Here to There*. Showings are continuous in the New York City Pavilion.

The City of Berlin's novel

... waiting for is the film show in Kodak Circle Theater. It was produced by Filmex ...

These ladies will see *Clairol's* five-minute film in what is called "world's smallest movie theater."

Christian Science Pavilion is also featuring a film, being viewed intently by this audience.

## WORLD'S FAIR REVISITED:

"globular" motion picture is no longer operating. A continuous film is projected within one display wall.

Hawaii's Aloha theater is now presenting a giant screen show of volcanic eruptions and surfing as part of its Hula Show which goes on at regular intervals.

Christian Science has two new films — one, in a small 10-seat theater, is on the nature of God; another, in a continuous projector on a wall screen, has testimony on the curative powers of Christian Science belief.

Clairol now features a new five-minute film which is shown to individual viewers in booths on the Carousel — the "world's smallest movie theatres." Produced by Dolphin Productions, it is based on the experience of four 1964 pavilion visitors who changed their appearances with hair coloring.

### Best of Last Year's Shows

Other pavilions carrying on successful film presentations of last year are: The Mormons' twin

Girl pantomimist acted out talk on advantages of Agfa's "Rapid" system of 35mm cartridge-loading as IPEX visitors listen in on telephone receivers.

## Photo Industry Holds World Trade Fair

Debut of "Super 8," Other Products for Industrial Use, Adds to Lure of International Photographic Exposition

THE INTERNATIONAL PHOTOGRAPHIC Exposition, held at the New York Coliseum, May 1-9, attracted over 25,000 visitors, representing photographic companies and dealers from all over the world, to attend the Exposition and the annual national conventions of five major photographic associations which took place in New York that week.

The IPEX show, held in New York for the first time, and for the second time ever in the United States, is said to be the greatest display of photographic equipment ever to be seen in one place.

Although most of the exposition was concerned with purely popular and amateur aspects of photographic equipment, there was much among the exhibits of over 200 manufacturers, importers and distributors to interest the industrial sponsor and producer.

### Kodak Introduces "Super 8"

The biggest story of the exposition was probably the official introduction of the new Super-8 size 8mm film and related equipment by Eastman Kodak, and by almost all other manufacturers in the 8mm field, including Ansco, Argus, Beaulieu, Bell & Howell, Bolex, DuJur Amseco, Honeywell Elmo, Keystone, Pathe, Richmond, while editing equipment for the new size was displayed by HPI and Kalart's Craig Division. Reels by Goldberg and special lights and projection lamps were

unveiled by General Electric, Sylvania and Westinghouse.

Kodak occupied a dominant position at the entrance to the exhibition. The exhibit had a central garden of large transparencies on pedestals surrounded by booths devoted to various branches of photographic equipment and materials. Prominent among items displayed in addition to the Instamatic line of Super-8 cameras and projectors, were 16mm high speed sound film systems, including camera and Viscomat processors.

Paillard Bolex had a new model 18-5 8mm Super-8 projector, and a new 400 foot magazine and synchronous motor for the H-16 Reflex 16mm camera.

Technicolor was showing the

Below: handsome Eastman Kodak exhibit area was centerpiece of show; booths surrounded a garden.

full line of cartridge-loading 8mm projectors, including a new mo-700 Automatic Display Projector System which can be actuated pushing a button and is intended for display and point of purchase use.

Hudson Photographic Industries demonstrated the unique Contour A-Show system which programs two slide projectors with sound tape, dissolving from one image to another. Also on display were Solo System desk top slide projector and screen, and a Super version of HPI's Quik splicer.

Sickles Sales and Service Company showed a line of automatic slide mounting machines, plus the Circle S Copy/Filmstrip stand.

Kalart's principal attraction was its unique Soundstrip projector featuring sound-on-film.

### Arriflex Cameras and Projectors

Both the Siemens Double projector and the full line of Arriflex cameras were drawing crowds to the Arriflex Corp. of America's section of the Berkeley-Kalart exhibit.

Viewlex had the "Viewtalk" slidefilm projector on the front table, and in the back, unannounced, a much-rumored-about 8mm optical sound projector.

Fairchild had several Mark 8mm projectors in continuous operation and a new Model 90 8mm sound-on-film camera.

One of the more interesting exhibits at the exposition was that of Front Projection Corporation demonstrating a background system for very realistically simulating "on location" photography.

### Exhibitors Use Audiovisuals

Audio-visual presentations were featured at three of the major exhibits.

Agfa-Rapid had a girl delivering a pantomime performance while viewers listened to a voice on telephone receivers extolling the advantages of the Rapid film loading system. Perfect synchronization between the girl's lip movements and the canned voice was achieved by use of an invisible hearing-aid size receiver in the girl's bouffant hair-do.

Sylvania's show, *The Fleeting Moment*, was produced by Martin W. Swithbank of Visual Enterprises. The presentation used eight Carousel slide projectors programmed on an electronic control device.

General Electric had a stand-up theater showing a Vitaphone produced three-screen motion picture extolling the merits of its bulb photography.

Bahamas Police Band was on hand for the opening of the Hallmark exhibit of Churchill mementos.

theaters, Protestant Pavilion's *The Parable*, Continental Insurance's *Cinema '76*, General Cigar's *Patterns in Sports*, Billy Graham's *Man in the Fifth Dimension*, Ireland's wide screen slides and movie in a "well," United Arab Republic's battery of continuous projectors, Sermons from Science's *Moody Bible Institute films*, United States' *Challenge to Greatness*, West Virginia's radio-telescope film, New England's *Faces of New England*, New York's 360-degree *A Round New York*, Sonoma's *Economy Run* game, Maryland's *O'er the Rampart* and the Port Authority's 360-degree film, *From Every Horizon*.

## FOCUS ON IPEX SHOW

Bob Seymour's camera captures exhibits of interest to business.

At top left: Vic James, Ariflex sales manager, demonstrates the magazine for an Arri 35 camera on display.

At inner right: Kodak 16mm sound camera and Viscomat Processor attracted many professionals at show.

Top, outer right: Bell & Howell showed Super 8 cameras and Canon 35mm still cameras at show.

At the left: Kalart had splitters for Super 8 and the Soundstrip System with its sound-on film principle.

At inner right: Technicalolor exhibited latest models of cartridge-load 8mm "Instant" film projectors.

Outer right: Polaroid demonstration of MP-3 Industrial View camera attracts show visitors.

At the left: a view of Da-Lit, Screen Company's exhibit area with latest models of projection screens.

At inner right: Viewlex showed slide and filmstrip projectors, also company's Viewfax copy machine.

At the left: Hudson Photographic demonstrated its Solo System and new HPI "Controlashou"...

At inner right: photo show visitors study latest developments in Anscochrome film at exhibit.

Outer right: Bolex showed a new synchronous motor, 400-ft. magazine for H-16 Reflex Camera.

At the left: IPEX exhibit floor was thronged with dealers and professionals throughout its stay.

At inner right: Sick's Sales & Service was on hand to show its automatic slide-mount equipment.

Outer right: Radiant Manufacturing Company also exhibited latest models of its projection screens.

PHOTOS BY BUSINESS SCREEN

A smiling voice can be as important as a skyscraper in shaping the company's image.

## "IMAGE"... a Film for Today

Every One of Pan American Airways' 25,000 Employees Has a Key Role in Upholding the Image of the Company

**I**N THE FEROCY-COMPETITIVE business of international air travel an airline has to be *better than good*. Not only that but it has to look as good as it is to an awful lot of people in an awful lot of places.

In the case of Pan American Airways where past performance has resulted in a growth to more than 25,000 employees, the danger of any one individual marring the look of the "world's most experienced airline" is understandably high.

### Each Person Is Part of Image

Pan Am's problem? How to get every one of those more than 25,000 people to recognize the importance of the company's image and, in the process, to realize his own importance in creating and maintaining it. Not just in how he looks, but in the way he acts, the way he speaks, the way he does his job. In short, in the way he

really is — all 25,000 of them.

Pan Am's approach? A training package centered around a 22-minute, 16mm color film produced by Henry Strauss and Company of New York City, the purpose of which being not just to show what Pan Am is like but to make the significance of the company's image meaningful to every one of its employees.

### Truly, a "Cast of Thousands"

*Image* is that film, a happy result of the working relationship between forward-looking management and an imaginative producer.

Originally intended for the exclusive use of Pan American, *Image* nevertheless is an ambitious film by any standards. It has a "cast of thousands," literally. As its setting it has the world, nothing less. Its subject is a picture, a thought, an intangible thing and how it grew. The film is both a reflection and commentary

Even in far-off Tahiti, with its Pan American office in Papeete, this international air line has an image to maintain and protect.

— reflecting the tenor and pace of modern life, commenting on the demands made by it on those who choose to meet its needs.

That *Image* does all this while never losing sight of its primary purpose of motivating, explaining, and ultimately training people in the care and preservation of a corporate image is evidence of the growing maturity of the industrial film as a medium of communication.

### An Assault on the Senses

As the focus of the training package prepared by the Strauss

senses are assaulted. He learns to discriminate — to see in a dreary way of life, to hear in a voice the assurance of calm competence. He lives in a world of speed and makes his judgements quickly on the basis of what he sees and hears. He has much to choose from a little time in which to choose. The idea that appearances count for much begins to take shape.

Through the camera eyes of Joseph Pennel Roberts, *Image* shows a modern world and a wide one. People are many and strange. Things are different, constantly

Pan American office in Frankfurt: ... "A symbol of certainty in a changing world." One of the ideas developed by "Image."

company for Pan Am, *Image* sets the stage. By means of a subjective camera, the viewer becomes a certain Joseph Pennel Roberts, "reasonably intelligent, unquestionably sane," who boards a Pan Am jet, "... calmly putting his life in the hands of people he doesn't even know" to be flown high out and over thousands of miles of open ocean.

Why does he do it? How can he do it with such apparent unconcern? Because, the film suggests, of an image, a thing as insubstantial as air, an idea of which he is probably not even conscious and yet which has the power to create an unquestioned confidence. Joseph Pennel Roberts is today's international air traveler, a citizen of the world. The camera shows how his mind associates sights and sounds with events in his own life and with ideas about the value of things.

Montage sequences selected from footage shot in four continents are cut to show the pace of his life, the tempo with which his

changing. There is a seeking for certainty, a need for sureness.

The film's buildup to the value of Pan Am's image in a world on the move is deliberate. With a sparse narration that is a model of effective understatement, and a muted jazz score apt and elegant, *Image* creates before the eyes exactly what it means to — an image, a picture in brilliant color of today's world and Pan Am's place in it.

And in the process, the idea is redefined. The concept of an image and the purpose it serves is relieved of whatever faint touches of hokum it may have picked up along Madison Avenue. It is seen for what it really is — a promise to be honored, a covenant to be kept.

### Winner of a "Golden Eagle"

The effectiveness of *Image* in communicating an idea was recognized at the recent CINE screenings to select films to represent the United States at festivals abroad. It was awarded a Golden Eagle for excellence earlier in the year.

THE 16MM SOUND continues to be the basic means of projecting tens of thousands of existing film titles and their 35mm prints now available to the half-million owners of this kind of equipment in business, schools, churches, schools and community centers. To name a few, the burgeoning new dimension of 8mm film, both sound and silent, has brought the industry another useful means of communication.

8mm film is a *tool*. Compact, lightweight, cartridge-loading projectors serve the salesperson, the demonstrator, the training representative, the pharmaceutical sales agent, the county agent, the servant and innumerable others for whom this automatic "re-in-a-wink" equipment is opening new horizons.

8mm films can travel by first class or airmail, breaking down barriers to domestic and overseas use for introduc-

## New Horizons for Business Films

Cartridge-Loading, Greater Portability and Larger Image Are Key Factors as 8mm Promises to Expand Use of Film

ing new products, explaining new techniques and service points. Reductions from top-quality 35mm or 16mm original production present no problem to the experienced film laboratory.

At many companies, it is becoming commonplace to create a new film for 8mm demonstrations of each new product. Manuals, promotional literature and other print media are being supplemented or replaced by this sim-

ple, most vivid and compelling means of delivering information from the factory to the field.

The 50 per cent greater image area provided by the new Super 8 film introduced by Eastman Kodak last month at the International Photographic Exposition in New York (see page 36) adds still another string to 8's bow. While this development is presently concerned with *amateur products*, it will soon have an effect on

professional aspects of the 8mm projection medium.

Sound capability of Super 8 is indicated by the area for a 30 mil magnetic sound stripe. Super 8 film will accommodate reductions from 16mm originals or masters at a reduction rate of 1.8 to 1. This reduction rate applies to perforation spacing as well as frame height and width, thus facilitating the transfer of existing 16mm films to Super 8 for economical reduction prints from the 16mm films.

The picture on this page tells the story of Super 8 better than words. And, after all, that's why the picture medium is being used.

What's great about Super 8? Simulated film strips below provide comparative study between regular 8mm motion picture film (at the left) and the new Kodak Super 8 image (on the right). Super 8 image area is 228 mils wide, utilizes 63 per cent of the film area for the centered picture image, as compared to only 47 per cent in conventional 8mm film. New and smaller perforations, closer to the edge of film; guiding surfaces on both edges are noteworthy features. Super 8 provides 50 per cent more picture area.

Popcorn vendor Wally Cox gazes in awe as he enters the Ohio state capitol. Yes, that's a red carpet in this scene from picture "Invitation to Ohio."

## Industry Gets a New Look at Ohio

Ohio Invites Business Viewers to Join Wally Cox On Light-Hearted But Highly-Informative Tour of State

**H**ow Do You Sell 41,222 square miles of rolling farmland, great industrial complexes, recreational parks and cultural opportunities in just 30 minutes?

Simple. You make a 30-minute color movie featuring nationally known movie and television personalities and call it *Invitation to Ohio*.

This is what the Ohio Bell Telephone Company did in cooperation with Ohio's Development Department.

### Shows Advantages for Business

The film was designed to sell industrialists both large and small on the advantages the Buckeye State has to offer.

Starring Wally Cox and Joh Dehner, the film is presented in a manner that is not only informative but entertaining as well. With a light touch it reveals the quali-

cations which have earned Ohio the titles of "Heart of Industrial America" . . . and "Gateway Between East and West."

The film proves that these titles are not just worn cliches. It graphically portrays the facts. Within a 500 mile radius of Ohio live more than 60 per cent of all the consumers in the United States and Canada. This area contains over 75 per cent of the United States population.

Several hundred scenes from every corner of the state appear in the film, capturing the diversity of Ohio's resources and industrial strength illustrating its sprawling steel industry, and the manufacture of jet engines and telephone equipment. Other scenes exemplify

Ohio's spiritual life and recreational facilities. From open heart surgery at the famed Cleveland

*The behind-the-screen story of a good new state picture as told by Gerald Minnery, Ohio Bell Telephone Company*

Clinic to tugboats on the Ohio river, the film offers a veritable kaleidoscopic view of Ohioans at work and play.

### A Case of Mistaken Identity

As the movie unfolds, a portion of the WALL STREET JOURNAL ad headlined, "Profit Is Not a Dirty Word In Ohio," is read by Wally Cox. Cox is being forced to move his popcorn wagon — he, too, suffers from highway re-location problems — and is impressed with the Ohio claim as outlined in the advertisement. He visits Ohio and is given the grand tour when the development director mistakenly believes that he represents a major out-of-state corporation.

In the end Cox decides to locate in Ohio along with his authentic 1880 vintage popcorn wagon, which was leased exclusively for the film from an Ashland, Ohio, collector of antiques.

### Film Made by Professionals

Working on the movie was an impressive group of professionals. The script was written by Frank Siedel, the man who created *The Ohio Story*, a popular radio and television program sponsored by Ohio Bell for many years. The musical score was prepared by Zoltan Rozsnyai, a former assistant to Leonard Bernstein of the New York Philharmonic Orchestra. Julius Potoesny directed the picture.

According to Ohio Bell, the film is expected to serve a two-fold purpose: State officials and industrialists will be able to use it in their efforts to attract new industry to the state, and to encourage existing industry to ex-

pand; schools, service clubs, similar groups will find it an excellent medium with which to acquaint Ohioans with their ever-changing state.

### USIA Will Show It Overseas

The picture was recently selected by the United States Information Agency as part of its world-

The Honorable James A. Rhodes, Governor of Ohio, is "on camera" for the introductory sequence.

wide library of films for overseas distribution.

In the short time since its release late last year more than 33,000 persons have attended 70 showings. Ohio Bell reports that requests are pouring in at the rate of 20 to 25 per day.

### How to Obtain This Picture

Arrangements for local showings can be made through Ohio Bell's film libraries in Cleveland and Columbus, or Ralph E. McGeorge of the Cleveland Chamber of Commerce and the Ohio Department of Development.

Below: Wally Cox rolls down one of Ohio's superhighways, towing an authentic 1880 popcorn wagon, rented for this scene in "Invitation to Ohio"

**T**HE 6TH NATIONAL CONFERENCE will be "history" by the time most IFPA members receive this issue of the JOURNAL (published just prior to Conference opening on June 3rd at the Ambassador Hotel in Los Angeles).

But 1965 "Cindy" awards competition was showing great strength during the weeks preceding opening date, with numerous and varied entries. There were 75 films slated for competition this year, all of them non-commercial and they were divided into the following six awards categories:

1. Public Information
2. Technical Information
3. Sales Promotion
4. Training
5. Indoctrination and Orientation
6. Special Documentaries

The final category was so named by the IFPA Board, after considerable reflection, in an effort to create a "catch-all" classification broad enough to include any non-theatrical film not appropriate to the first five groups.

Entries were at hand from the following companies and producing units: Sandia Corp., New York; North American Aviation (Los Angeles Division, Autonetics Division, and Space & Information Systems Division); and Boeing, Seattle.

Both the Air Force Motion Picture Unit at Lookout Mountain (Los Angeles) and the Air Force Motion Picture Squadron at Orlando, Florida were represented. Rounding out the USAF entrants was the Motion Picture Squadron at Wright-Patterson Air Force Base, Dayton, Ohio.

Other "service" entries were noted from the Documentary Film Branch, U.S. Naval Ordnance Testing Station at Pasadena and from KNOTS, Naval Ordnance Testing Station at China Lake, California. NASA headquarters (AFEE) was represented from Washington, D. C.

Lockheed California Company (Burbank) and Lockheed-Georgia, from Marietta, Ga., had films in competition, as did Douglas Aircraft (Santa Monica); General Dynamics (San Diego) and the Martin Company (Orlando, Fla.).

JOURNAL editors noted film entries from Los Angeles County Schools and from the California (state) Department of Water Resources, at Sacramento. The University of California (Berkeley campus) also submitted for competition.

Running through the list of

# IFPA JOURNAL

INDUSTRY FILM PRODUCERS ASSOCIATION, INC.

## Films Compete for Cindy Honors

75 Pictures Entered in Six Categories as Jurors Select Winners to Be Honored at the Sixth National Conference

business entries, there was a film from the Link-Belt Company, Chicago; Bell Helicopter Co., Fort Worth, Texas and from United Air Lines, San Francisco. Pacific Outdoor Advertising had a film in competition and so did the Lawrence Radiation Laboratories, University of California at Livermore, Calif. The Jet Propulsion Laboratory, Pasadena; Hughes Aircraft Co., Culver City; and the Westinghouse Science Center, Baltimore, Md. were other notable competitors for this year's honors.

Among the producer entrants were Chapman 5 Productions, Los Angeles; Sound & Scene, Inc., Palo Alto, Calif.; Girodi Productions, Hollywood; and Webb Associates, Inc., of New York City.

Three judging committees, com-

prised of members from the San Diego, Southern California and Northern California Chapters, pre-judged the entries and narrowed down the competition to two finalists per category, or a total of 12 films. From these a jury composed of non-member judges will select the winners at the final screening session held during the Conference.

In addition, the full membership of IFPA in attendance at the Conference will vote on "Individual Achievement Awards" for: Best Writing, Best Photography, Best Editing, Best Art Work, and Best Music/and/or Sound, in the 12 films screened during the annual meeting at the Ambassador.

We'll bring you the full details on the winners in the next issue.

## IFPA Has a New Chapter in San Diego

San Diego members of IFPA, weary from trekking to Hollywood for meetings, recently founded a chapter of their own. There were 15 members present as their first recent meeting attracted other professionals from that area. Five of these "first nighters" signed on as new members of the association.

Acting chapter chairman Mike Reese reports a potential membership of about 50 in the new chapter. His council includes: Dick Crawford, program chairman; Ray Ussery, treasurer; Bob Montague, publicity; and Frank Willey, membership. Reese plans to expand (CONCLUDED ON PAGE 58)

San Diego's Chapter leaders (l to r, below): Frank Willey (Copley Productions), membership chairman, Richard Crawford (Convair), program chairman; Michael Reese, Jr., chairman of chapter, Ray Ussery (Gen. Dynamics Convair), treasurer; Robert Montague (G. D. Convair), publicity chairman.

## Honors to 75 as Best of American TV Commercials

SEVENTY-FIVE "CIOS" WERE AWARDED ON April 30 at the Sixth Annual American TV Commercials Festival, held at the Waldorf Astoria Hotel in New York. This climaxed several months of intensive judging sessions by 158 prominent advertising executives in several cities across the country.

The Festival luncheon, which capped a full day of screenings of the year's outstanding advertising, drew a capacity audience of over 1,000 advertising and production executives to this always professional and thoroughly well-managed film event.

### First of New Achievement, Service Awards

In addition to 39 product category winners from a record number of 1,511 entries, the Festival introduced several innovations — one, an International category, contained 20 outstanding examples of technique from abroad, from an entry total of 103 Australian, French, British, German, Japanese and Puerto Rican submissions.

Another event was the Technical Achievement Award sponsored by the Film Producers Association of New York. This was presented to Eastern Effects, Inc. for the development of the Emell Camera — which permits live shooting with intricate zooms and pans in the camera, thus reducing production costs.

### Cite Joyce Hall for "Distinguished Service"

Joyce C. Hall, President of Hallmark Cards, Inc., was presented with a special award for distinguished service to television advertising. His CIO contained this citation:

"Guided by the strong personal convictions of its president, Hallmark has proved to all advertisers that the sponsor can make a contribution to taste and style . . . and that sales can move up through quality advertising. Hallmark commercials, appropriately integrated into its brilliant television series, have intrigued, informed and inspired viewers to buy and send greeting cards — to a point where some seven million are now purchased every day."

### Four Special Category Citations Are Added

In addition to top awards in each of the Festival's product categories, the winners included four special category citations this year: for ID's 20-second length, "Premiums" and overall series, regardless of product classifications. There were also 15 special citations for technique and craftsmanship and seven spots were cited as "regional bests" in 1964.

Four of the craftsmanship citations were presented by major suppliers who serve the field: RCA for "best in color cinematography" (to Polaroid); Eastman Kodak Company, for "best in black and white cinematography" (Gulf Oil); the 3M Co., for "best video tape production;" Movielab, Inc. for "best editing" (Newport Cigarettes); the New York optical effects industry, for "best visual effects;" and New York sound recording studios.

(CONCLUDED ON THE FOLLOWING PAGE 57)

Goodyear's "No Man Around" series tied as "Best, Overall Series" and "Best, Automotive Accessories." Agency: Y & R. Producer: Filmfair.

The Great Cole Scandal Suit

Cole Swimsuits' "Scandal on the Beach" won a "Best, Apparel" award. Agency: R. M. Klosterman. Producer: John Urie, both of Los Angeles.

Manufacturer's Hanover "Sponge on Wheels," the "Best, Banks & Finance" winner. Agency: Young & Rubicam. Producer: NPI Productions.

Alka-Seltzer's "Stomachs" was cited as "Best, Pharmaceuticals" spot. Agency: John Tinker & Partners. Producer: TeleVideo Productions.

Gulf Oil's "Rolling Tire" tied for "Best" in Auto Accessories; won Cinematography award. Agency: Erwin Wasey Adv. Producer: MPO, N.Y.

Erik Cigars' "Erik is Here" was judged "Best Tobacco Products." Agency: Grey Advertising. Producer: TeleVideo Productions, Inc.

Knickerbocker Beer's "Flip of the Finger" won "Best, 8-10 Second ID" award. Agency: Gumbiner-North. Producer: Audio Productions, Inc.

Democratic Nat'l Committee, Eastern Seaboard, spot was cited as "Best, Political." Agency: Doyle Dane Bernbach. Producer: TV Graphics.

## Good slides, good presentation, on a low budget

Even if you've been boxed in by a do-it-yourself kind of budget, there's still a way for you to make *good slides*, and a *good showing* too. Here's the equipment:

With the **KODAK INSTAMATIC 800 Camera**, you can take good slides easily. Everything that's critical about picture-taking is controlled automatically by the camera, including compensation for flash. You just aim it and shoot. Even the film advances automatically.

This camera uses Kodak film in a **KODAPAK Cartridge**. It drops in for loading, drops out for unloading. You never have to thread film or rewind at the end of a roll. You have a choice of two types of Kodak film for color slides as well as films for prints in color or black and white.

To present the smoothest, jamproof slide showings, use the **KODAK CAROUSEL AV-900 Projector**. Its round tray holds 80 slides for long-play convenience. The tray fits on top of the projector where you can get at it for easy slide interchanging and editing. Slides don't jam in this projector because they're gravity fed. Slides can be shown by re-

mote control, manual control, or automatically at 5-, 8-, or 15-second intervals. To add to your showmanship, this projector is equipped to work with the **KODAK CAROUSEL Dissolve Control unit**. Also the **CAROUSEL Programmer**—that lets you integrate taped sound with your slide presentation

New **KODAK CAROUSEL Universal Slide Tray**—handles 80 2x2 slides **IN ANY MOUNT** within the ASA specification of 125-inch thick

North Dakota farmer pauses during harvest to enjoy a sandwich.

**NORTH DAKOTA'S WHEAT STORY**  
(CONTINUED FROM THE PRECEDING PAGE 31)  
products for the flour miller, the baker and ultimately, the consumer.

Time-lapse photography probes the seldom-seen process of flowering wheat and the destructive action of rust. Animation and close-up photography clarify the job of the plant breeder in the intricate work of cross-pollinization. Snyder's camera also peers into the absorbing world of the cereal chemistry laboratory where thousands of different wheat varieties are put through continuous testing.

In a lighter vein, the film portrays the farmer-producer in his "off-hours" as it shows that farming remains the "good life." A harvesting sequence, cut to strongly-accentuated musical punctuation, swiftly transforms into a montage of the many ways in which bread products can be utilized. It closes with a quick trip through a completely automated bakery.

This film has wide audience appeal, is done in a brightly-entertaining style. "We try for visual stimulation," says Bill Snyder, "our concept of film making is to entertain with facts. We believe there is no dull subject... that almost anything can be interesting if it is made visually exciting."

Part of the credit for the pace set by *Hard Red Spring Wheat* goes to film editor John McDonough. Art director Norm Selberg was responsible for the animation, title design and set decoration.

The North Dakota Wheat Commission is handling distribution of this second subject while arrangements are being made for professional service. A number of foreign language versions are planned to help in market development work throughout the world.

# UNILOCK

---

## A COMPLETELY NEW UNIVERSAL INTERLOCK SYSTEM FOR SYNCHRONIZED PLAYBACK OF TAPE AND FILM DEVICES

**UNILOCK** is a new RCA-developed electronic interlocking system which permits tape and film devices to operate synchronously, with the same degree of accuracy as sprocketed mechanisms.

**UNILOCK** adds a new degree of playback ease and efficiency to radio, television and film recording assignments — "on location" sound recording, field interviews, editing and updating audio tracks on television tapes or film material. With **UNILOCK**, interlocked playback of any audio tape recorder, television tape recorder, sound film reproducer or television film projector from standstill to synchronous speed is a workable reality instead of a production problem.

**UNILOCK** permits maintaining a locked condition by comparing pulse counts on tape or sprocketed devices connected to the system. A difference signal is obtained and

correction is made by controlling the speed of one of the machines. A special feature of **UNILOCK** is its memory storage capability of  $\pm 100$  frames. This non-volatile memory stores errors indefinitely, without regard to power removal or "start-stop" operation.

**UNILOCK** is a reliable, fully transistorized system of plug-in modules which occupies just 5¼ inches of space in a 19-inch rack. Installation is easily handled since few connections are required to make the **UNILOCK** system operative.

**UNILOCK** will substantially improve your tape, film or sound operation... at a surprisingly modest cost. To learn how, call or write: Dept. 806, RCA Broadcast and Communications Products Division, 2700 West Olive Avenue, Burbank, California 91505; or 36 West 49th Street, New York, New York, 10020.

## A CHALLENGING CHURCH PICTURE:

(CONTINUED FROM THE PRECEDING PAGE 14)

leads, and Jeff Donnell, Herbert Rudley and William Marshall as featured players. Robert Klaeger, who also produced the Academy Award-winning film *Project Hope*, was the man responsible for this challenging new addition to the National Council film program.

### 13 Denominations Concerned With Program

*Almost Neighbors* was made for the National Council's Department of Education for Mission, which is composed of representatives of 13 different denominations interested in this specific program and including all the larger denominations in the Council. Supervising production was the Council's Broadcasting and Film Commission under its Director of Programming, Robert Currie, and with the cooperation of the Church Consultant on this theme, C. A. Weesner of the Disciples of Christ.

The film will go into the curriculum of the various denominations involved for in-church study use. Production expense is borne by the interested denominations and prints are distributed at cost to these groups. In addition, many other organizations will find extensive use for the film.

### Big Audience for These Council Pictures

National Council films are regularly added to the Armed Forces' libraries, to various educational film libraries and are also purchased extensively by non-member denominations. An average of 3000 prints a year of the five or six new subjects produced annually are sold to non-member organizations. The initial print order for *Almost Neighbors* is 425 prints—to satisfy first demands of the participating denominations.

In previews to the sponsoring denominations response has been excellent. The film was formally presented to a full meeting of the De-

Dr. Steele: *Every city in this country its Easthill. Every town, I imagine. Maybe ghetto or side street or shanty town. A side that nice people stay clear of and don't know anything about until it gets restless, and then they get scared.* ("Almost Neighbors")

partment of Education for Mission late in August at a conference in Buck Hill Falls, Pa.

### "Resort Cinema" Showings Keep Film Active Throughout the Summer Months

☆ Of special interest to business film sponsors is the widening use of their short subjects at vacation resorts this summer. Modern Talk Picture Service launched a program called "Resort Cinema" in 1961. In the past year, the company accounted for well over 100,000 showings at vacation spas.

A typical program includes one 30-minute picture, a quarter-hour film and two five-minute shorts, providing interest to men, women and children in these family audiences. The average group has 50 viewers; of these nearly 60% are adults, according to Modern.

Available now! Case histories explain . . .

## HOW 3 COMPANIES USE FILMSTRIPS TO HELP SALESMEN SELL

Filmstrips can help train your salesmen — can help you sell a product, a service, an idea.

Here are three case histories that explain how filmstrips have been used successfully — by Field Enterprises Educational Corporation to train book salesmen — by Dodge Manufacturing Company to interest distributor salesmen in a unique flexible coupling — by Iowa Manufacturing Company to sell prospects on the benefits of a paving machine.

Each case history is brief, to the point — tells, (1) objective of filmstrip, (2) how objective was accomplished, (3) results, and (4) total cost. For copies, write or telephone . . .

*An invitation to an extraordinary event...*

THE FIRST INTERNATIONAL CONFERENCE & EXHIBIT ON  
**THE IMPACT OF EDUCATIONAL TECHNOLOGY**

... July 12-16, 1965 / The Americana Hotel, New York City

Created by the American Management Association in cooperation with top-level advisors from business, government, and the academic community, this Conference will provide:

1. The first joint industry-education-government open forum on the nation's key problems in education, training, and retraining.
2. A major opportunity to chart practical plans for cooperative action—utilizing the best of mutual resources and the dramatic new tools of educational technology

**A FEW FEATURES OF THE CONFERENCE:**

- Over 100 acknowledged leaders in education, business, and government serving as speakers and panelists.
- An extensive exhibit of the actual hardware, software, and services of educational technology—presented by more than 70 of the best-known names in the knowledge industry...many of whom will premiere entirely new products and services.
- Dramatic demonstrations especially prepared to show the practical application of new and far-reaching developments in educational technology.
- Arresting case studies from both here and abroad—many to be reported for the first time—that relate recent advances in education and training to a wide range of disciplines.
- Practical skill-building sessions in such areas of specialized interest as programmed instruction, audiovisual techniques, films, language laboratories, television, and computer-assisted instruction.
- Open house tours of outstanding educational and communications facilities in the New York area.

Hundreds of administrators from education, industry, and government will be convening in New York on July 12 for this unusual and significant event

*May we count you among them?*

*For further information on the Conference—including a free descriptive brochure—contact...*

**Hillary Expedition Saga Told in "High in the Himalayas"**

"Mountain-climbing is like a military expedition — you advance a short distance at a time, plotting your course carefully until you finally reach that last 500 feet. Then you make the final assault."

This is how Sir Edmund Hillary, noted conqueror of Mount Everest, plans his many mountain-

Sir Edmund Hillary's expedition up Mount Taweeche is film story.

climbing expeditions. Hillary, speaking at the New York premiere of a new Sears, Roebuck-sponsored motion picture documenting a recent Himalayan expedition, said that lack of oxygen reduces efficiency as much as 50 per cent at 21,000 feet.

The new film, *High in the Himalayas*, was filmed by Dr. Michael B. Gill of New Zealand, a member of the Hillary expedition up Mount Taweeche on the Tibetan border in 1963. Dr. Gill exposed some 10,000 feet of color film which has been edited down into the 27-minute sound motion picture.

According to Sir Edmund, the success of a Himalayan climb depends to a large degree on the knowledge and endurance of native Sherpa guides. Even with 60-pound packs these men never seem to tire as they inch hour after hour up sheer cliffs and across deep crevasses.

A look at the mountain homes of the guides reveals an existence that has not changed for generations. However, with the coming of men such as Hillary, things have improved. Ski and native craftsmen used blueprints brought in by the expedition to build schools, and waterpipes have been installed where natives previously carried water for one mile.

The film *High in the Himalayas* is non-commercial — note-

only in the end-title that camping equipment was supplied by Sears. It will be distributed on a free-loan basis to TV stations, schools, sport clubs and all adult organizations by Association Films, Inc. •

**Auto Dealer as Good Citizen Theme of "Group Portrait"**

The wide scope of public interests served by members of the National Automobile Dealers Association is the theme of *Group Portrait*, a recent 28-minute color motion picture produced by Roland Reed Productions in association with Film Counselors, Inc.

True situations depicted in case histories show dealers engaged in

such diverse activities as Little League baseball, therapy for mentally-retarded children, community highway planning, town charter revision, and development of a youth activities center.

Get-Out-the-Vote sponsorship and dealer efforts in the aftermath of the destructive Alaskan earthquake are highlighted in vignettes which help show how the NADA dealer-member is helping to make his community a better place to live, that he is a man of principle.

The film is the initial public relations venture of such scope undertaken by the NADA and the film is designed as a valuable communications tool for dealer use.

**Hazards of Fishing Pictured in New Color Film from A**

Safe fishing practices are dramatized in the timely color *A Fisherman's Notebook*, available from its sponsor, the A Life Affiliated Companies.

Hazards for the unwary are covered by the writer, fishing expert Jack Rowles (also featured in the film) as he takes viewers casting for rainbows in Vermont streams, deep sea fishing off Nantucket and surf-casting for striper from Cape Cod beaches.

Dangers in wading a river bottom stream, baiting a hook for surf-casting and fishing from a boat are covered in this second public service film on fishing safety produced by Aetna. *Hook, Line and Safety*, released in 1963, has been seen by 10 million viewers. Write: Information & Education Dept., Aetna Life Affiliated Companies, Hartford, Conn. Book this picture.

\* \* \*

**Emphasis on World Trade in a Hershey Chocolate Picture**

The Hershey Chocolate Company puts the emphasis on international trade in its new corporation motion picture, *Chocolate Creations of the World*.

The title describes the town of Hershey, Pennsylvania, where the company operates the largest chocolate factory in the world. As a purchaser of cocoa beans and sugar, it is a major factor in the foreign trade of many countries.

The film follows a group of rather special visitors, the children of United Nations representatives from the countries that sell supplies to Hershey: Ghana, Nigeria, Brazil, the Ivory Coast, Cameroon, the Dominican Republic, Ecuador, Venezuela, Mexico, Trinidad, Costa Rica, Jamaica, Haiti, Samoa and Java.

Additional footage shows the growing and harvesting of cocoa beans abroad, and scenes from the Hershey plant and community. Among the town's special features are an amusement park, the Hershey Gardens, and the Hershey Museum of early American history.

The 16mm sound-color film produced by J & F Productions of Philadelphia, runs 28½ minutes. It is being distributed on free loan by Modern Talking Picture Service libraries, nationwide.

## Small Miracle at Polaroid

### Link-Belt Film Tells the Story

Materials handling systems are a "way of life" to the Link-Belt Company. One of the highlights of these, a completely new parts-handling system recently designed and installed at a facility of the Polaroid Corporation (at its Waltham, Mass. film manufacturing plant) was unveiled on film for concerned business/industrial previewers at the Americana Hotel in New York City on July 17, 18 and 19.

### How "Team Approach" in System Design

The new system is the subject of this 18-minute motion picture, appropriately titled, *A Small Miracle*. The film traces the steps Polaroid took in defining requirements, moving delicate film pack components from fabrication to assembly and finished packs from assembly to storage to packaging. Then

Woman with Polaroid camera; shooting for "A Small Miracle" is Robert Young, camera, as Albert Schlachtmeyer directs.

The film explains the "team approach" taken by Link-Belt and Link-Belt engineers in designing the system to meet these complex parts-handling requirements.

The 16mm color-sound film also describes the capabilities of the system in light of such criteria as present and future production requirements and existing physical facilities. It focuses on a revolutionary case-handling system for in-transit storage and the means to load and unload the cases. Also shown are film handling devices, such as air turns, film reels and conveyORIZED storage chutes.

### Film Is Available to Technical Groups

Usually, the film explains the simple mechanical and electrical devices used to tie all the elements into an automatic, sequence-controlled system. Al Schlachtmeyer, assistant to Robert Warnock in charge of audiovisuals at Link-Belt, directed the picture. Robert Young is the man behind the camera. The 18-minute film is available to concerned business groups, engineers, etc., through the Film Library, Link-Belt Company, Prudential Plaza, Chicago, Illinois 60601.

**AV Equipment Trade Fair Next!**  
The Four of BUSINESS SCREEN, out next week will preview the latest in audiovisual equipment and accessories for projection and television in the Annual A-V Tradefair.

## Change films in 2 seconds flat!

Read how Fairchild's amazing new MoviePak cartridge multiplies the value of your entire sound film program

At last you can show any film, anywhere, anytime—without threading, film handling or rewinding.

Simply select the Fairchild MoviePak sound film cartridge you want, snap it into the Mark IV rear-screen projector, and play. In broad daylight. In a prospect's office. In showrooms. At trade shows. On sales counters. In training classes. In the boardroom. To switch instantly to another film, just snap out one cartridge, snap in another.

Every film you have can be easily converted to 8mm and threaded into the MoviePak cartridge. Duplicate prints are less expensive than 16mm, too. Now you can unleash the full power of your entire sound film program.

The Fairchild Mark IV projector is portable, weighs only 20 pounds and is always ready for action. No warm-up time required.

For display use, it will run without supervision, repeating automatically. It takes up to 22 minutes of film with a single MoviePak.

To see for yourself, just send in the coupon.

## A Tour of Historic Norfolk in a 24-Minute Color Picture

Norfolk, Virginia boasts the world's largest naval installation — and it was also one of the country's most important ports during colonial times. A tour through the city, then, can span centuries as well as miles.

A new color film, produced by Haycox Photographic, Inc., takes the whole trip in 24 minutes. Appropriately titled *Norfolk Tour*, it combines history with sightseeing, and is narrated by Commodore Norrie Martin of the Royal Navy.

Scenes of early settler days are recreated in some of the old, lovely Georgian homes. Well-preserved furnishings, authentic costumes and settings help illustrate colonial life.

An old landmark is St. Paul's Church, which was built in 1739 and was the only building in the town not destroyed by the British fleet in 1776.

Two more modern buildings on the tour are the Norfolk Museum of Arts and Sciences and the Hermitage Foundation Museum. In these, the film shows works of the old masters, historical paintings, and art from all over the world.

Another high interest point is the "Gardens by the Sea," 175 acres of gardens with canal boats for tourists, a special "fragrances" garden for the blind, and Treasure Island for the children.

Of special interest is General Douglas MacArthur's Memorial, an old courthouse which displays his uniforms, letters, medals, and other mementos.

The film's concluding sequences tour the naval yards and the Naval Air Station. *Norfolk Tour* is available from libraries of Modern Talking Picture Service, Inc. •

## "Electronics at Work" Films for Industry, School Classes

Important new aids for training are provided in a series of 90 half-hour motion pictures with supplementary texts in the *Electronics at Work* program — being sold and rented by Association Instructional Materials, 347 Madison Ave., New York City, N. Y. 10017.

Designed for use in industrial training, adult education and technical or vocational courses at the high school level, the course was created by John W. Wentworth, a licensed professional engineer and authority in the field of broadcast engineering. The course is organized into six units of fifteen lessons each. •

## WIDE WORLD OF CURRENT SPONSORED PICTURES

### "Open Your Eyes" Shows Service Work of Senior Girl Scouts

THE GIRL SCOUTS of the U.S.A. have long been active in the use of audio-visuals for both internal group and public informational purposes. Latest of the Girl Scouts' film ventures is a 28½-minute color motion picture, *Open Your Eyes*, illuminating the work of Senior Scouts on service projects which relate to problems being faced by many American communities.

The title of the new picture was derived from a statement by Dr. Albert Schweitzer: "*Open your eyes, and look for some man, or some work for the sake of men, which needs a little time, a little friendliness, a little sympathy, a little human toil. See if there is not some place where you may invest your humanity.*"

The film features eight projects, typical of the service which Scouts throughout the country have provided to their communities. The production crew traveled almost 13,000 miles across the United States to film the projects as they were taking place.

In Dayton, Ohio, Senior Girl Scouts are shown teaching mountain folk from Appalachia how to read and write. In Glen Ellyn, Illinois, the scene switches to Senior Scouts sharing their skills with teenagers from a depressed neighborhood of Chicago.

Close to the Mexican border, in Edinburg, Texas, a group of Girl Scouts were filmed as they helped school programs—teaching English to pre-school Mexican-American children. At a cerebral palsy clinic

Scout works with retarded child

in Miami, Florida, Seniors are shown working with handicapped children and young adults, saving valuable time for therapists.

Across the continent, in Sacramento, California, the teen-age Scouts are pictured preserving a 15-acre wildlife and conservation area in the center of a rapidly expanding community. Senior Scouts from Bemidji, Minnesota, are shown travelling 40 miles to give Chippewa Indian children the chance to be Brownie Girl Scouts. The children on this Indian reservation would otherwise be isolated from contact with normal American life.

*Open Your Eyes* also shows how a girl who attended a national Girl Scout encampment in Tennessee was able to share her improved camping skills with hundreds of girls in her Washington, D.C. council on her return home, by organizing a weekend camp, giving other Scouts new confidence living in the out-of-doors.

The town of Hoxie, Kansas, had no public library until the Senior girls undertook the project pictured in the film. They catalogued and repaired the books on hand and made the town eligible for library aid from the state.

*Open Your Eyes* will be made available by national Girl Scout Headquarters to non-Scout as well as the Scout audiences, in the hope that the projects it portrays will be helpful in setting up similar teenage programs in communities across the nation.

From the east to the west coast from the Mexican border to Canada, Senior Girl Scouts are "opening the eyes" of citizens to the many worthwhile and vital service teenagers can perform in their communities.

The 28½-minute film was produced for Girl Scouts by its Audio Visual Unit: Carol Hale, producer; Ed Schultz, director editor; and William Doherty, cameraman.

The AV rear projection cabinet comes as one compact unit.

Plug it anywhere. It's the simplest rear projection system you can own.

## 20 minutes after your AV rear projection cabinet arrives, it's ready to use

The instructions for putting the AV rear projection cabinet in operation consist of 14 short, simple sentences. They're all you need because the AV cabinet comes in one packing box, complete, ready-to-use once the lens is installed. Lens installation consists of inserting lens, and tightening four Phillips screws.

Then, you mount your projector and plug it in. The AV cabinet has a big speaker built-in. It's ready for action quickly and, just as quickly, stores away in a closet.

### Delivers reliable performance and effective presentation

The AV rear projection cabinet provides a distortion-free, 22" x 28" picture on a non-glare, non-breakable Polacast screen. Exclusive Buhl universal lens (optional) gives full-screen presentation of all 16mm, 8mm, 35mm films, including slides and filmstrips.

The furniture-quality wood cabinet and base is furnished in hard Zolotone plastic for durability. The cabinet rolls easily from room to room on 5-inch casters.

When needed, risers are available to accommodate your projectors. Also available, modification to allow use of individual headsets. All modifications made at the factory.

Send for free folder containing detailed information and specifications. Order direct from factory or your Audio Visual dealer. Prompt delivery guaranteed.

**Leagues Sponsor Film**  
**Drop-Out's" Job Problem**  
*Road Ahead*, a 16mm movie, dramatizes the problem that a Negro and a white youth face in looking for employment after automation has been taken over their jobs.

MacKenzie, who never attended high school, learns that opportunities are scarce with limited education. His friend, Tom Hooks, finds that his high school diploma opens the door to a promising future in a large electrical plant where he can receive job training for a skilled profession.

After shifting from one job to another, Tim begins to realize the importance of a high school diploma. William convinces him to re-enroll in school to complete his education.

The 28-minute film, presented by the National Urban League and the Urban League of Greater New York, is available to junior and senior high school students, church groups, community agencies, youth centers, and civic organizations.

It is distributed on free loan by Association Films, Inc.

**Art Featured in TV Spot**  
**Architectural Aluminum**

It is believed to be the first "art" TV commercial to be shown in the air has been produced by Architectural Aluminum Manufacturers Association, Inc., with Bronner & Haas, Chicago, and Key Schwarz Productions, New York.

According to Bronner & Haas, the assignment was to establish the Aluminum seal — and to make it important. The consumer often feels insecure about buying aluminum windows or doors with the Aluminum seal.

The problem was twofold. The commercials would have limited

exposure — once a week on the NBC "Today" show — so they would require exceptional impact and memorability to do much good. And the "product" — the seal — doesn't have high inherent consumer appeal, as would be the case with a new cosmetic or a new car. So the commercials would have to have high consumer interest in order to make viewers view.

The solution was to tell only what must be told — that this seal means something and that it is the consumer's only assurance of dependable quality in a product which he cannot evaluate accurately himself. In 60 seconds, the commercial would be doing well to communicate just this one idea, but strongly.

The technique utilized in the film is "pop art" in animation. It exaggerates the character of the man from AAMA, as well as the action. It is tongue-in-cheek melodrama, but it makes the point: the seal is hard to get — and important.

\* \* \*

**F&B/Ceco Set in Hollywood:**  
**Washington, Chicago to Follow**

Branches and agencies of F&B/Ceco, Inc. are planned for many U. S. cities in coming months. Joining the company's first branch at Hialeah, Florida, is a new agency opening on May 15th at the William Saltzman Motion Picture Enterprises, Inc., 6446 Santa Monica Blvd., in Hollywood.

Within the next month, according to president Arthur Florman, agencies will also be established in Washington, D. C. and Chicago.

**Adorney Joins Skyline Films**

Charles Adorney, a former vice-president and executive art director at Cunningham & Walsh, has joined Skyline Films, Inc., New York, as a vice-president.

**NOW IS THE TIME! LET US COLLABORATE!**

**TO PRODUCERS OF FILMS FOR  
 U. S. COMMERCE AND INDUSTRY:**

U. S. industry is seeking effective ways to comply with L. B. J.'s request for cooperation in meeting the "balance of payments program." Now is the time to suggest to your clients conversion of their films into multi-language versions for foreign market operations.

Slight departures in story treatment and production — at little extra cost — will make these films effective, acceptable ambassadors abroad. Many U. S. firms are:

- ★ Boosting export sales and income
  - ★ Promoting license agreements
  - ★ Acquiring valuable facilities and mergers,
- and
- ★ Outselling their competitors

by increasingly using multi-language film versions which we helped to produce.

*Let us collaborate to serve U. S. commerce and industry better. He profits most who serves best.*

**HPI "Controlashow" Automates 2x2 Slides With Stereo Sound**

A "palm size" black box which automates sound-synchronized showing of 2 x 2 slides was featured at the recent 1965 International Photographic Exposition display of Hudson Photographic Industries, Inc., of Irvington-on-Hudson, N. Y.

The new HPI "Controlashow," a trade-marked name, has these exclusive features:

1. It will synchronize sound from any standard stereo tape recorder with two automatic slide projectors.
2. It will dissolve one slide image into the other, smoothly and automatically.
3. The "Controlashow" system can be used to produce, as well as present, a completely automatic

HPI "Controlashow" with a Carousel

tape-cued slide dissolve program at the touch of a single button.

The HPI unit will operate with most stereo tape recorders and any Kodak Carousel 700, 800, or AV 900 slide projector without modification. Other automatic projectors can be used with a minor wiring change. It weighs less than four pounds and uses only five watts of power.

The standard model, designed for use with 500-watt projectors, is available from the company's educational/industrial dealers at \$199.50. Accessories include manual-remote cord of 50' length; projector and tape recorder connector cords; and a carrying case.

\* \* \*

**A Busch Communications Wall for Daylight Film Projection**

There's a new Busch Communications Wall (Design #1700) which features a patented daylight projection system that's ideal for training classrooms and similar plant, office or institutional film showings.

The latest design by this imaginative Saginaw, Michigan a-v company is a self-contained, free-standing unit which eliminates the

need for room darkening while it provides a compact and complete facility for showing of all projected media via either rear screen or front screen projection.

Built-in rear-projection screen has keystone eliminator, speakers and all plugs within this complete unit (27" x 37" screen area) and the Communications Wall requires only 12 1/2 square feet of floor space.

Write our New Products Desk or the maker, Busch Film & Equipment Co., 214 S. Hamilton St. Saginaw, Michigan, for further details on Communications Wall. •

**Da-Lite's New "Silver-Lite" Lenticular Projection Screen**

A lenticular projection screen, the Silver-Lite, has been unveiled by the Da-Lite Screen Company, of Warsaw, Indiana. The new screen features a patented silver-laminated vinyl lenticular screen

surface, developed by the company in conjunction with Illinois Institute of Technology.

This screen surface is said to be unsurpassed for true color rendition, even at wide angles in partially lighted rooms. It is available through all Da-Lite audio-visual dealers in the 40" x 40" and 50" x 50" sizes. Other features include a quick, six-second push-button opening device, automatic leg lock and tension control.

The Silver-Lite has a new hexagon-shaped case finished in baked enamel with removable end caps. Write the New Products Desk at BUSINESS SCREENS, 7064 Sheridan Rd., Chicago 60626, for additional product file and nearest dealer.

\* \* \*

**Buhl Template Helps Measure Rear-Screen Projection Areas**

To help answer rear-screen projector problems, Buhl Optical Company is now offering a scaled 1.4" projection beam template.

Screen size, projection distance, mirror size and placement, and enclosure size can be determined without complicated mathematics, when the template is used.

It is designed for use with the Buhl SuperWide 1.4" lens system that fits all 35mm slide projectors. The template and scaled grid sheet overlay are available for 25 cents from the company at 1009 Beech Avenue, Pittsburgh, Pa. 15233. •

Kalart EV Super 8 Editor-Splicer

**Kalart Unveils Complete Line of Super 8 Editors, Splicers**

A complete line of Super 8 editing and splicing equipment was introduced by the Kalart Company, Plainville, Conn., at the International Photographic Exposition (May) in New York City.

New products included the Kalart EV-Super 8 Editor/Viewer; Super 8 Splicer; and the Master Six Splicer which accommodates standard 8mm, super 8mm and 16mm. An example with all Kalart and Craig splicing is the "Dual Purpose" which permits splicing with either cement or tape.

\* \* \*

**A Better "Strip-O-Matic" Viewlex Filmstrip Projector**

An improved automatic film advance mechanism, the Strip-O-Matic, has been designed for use with a whole series of Viewlex filmstrip projectors, including V-27, V-22 and V-500. The

Viewlex' Strip-O-Matic in operation

Strip-O-Matic has a takeup which accommodates much longer film lengths.

The device can be interchanged in a matter of seconds with the film-strip or slide mechanism of the projector. Once inserted, filmstrip is threaded in one operation; thereafter, its operation is automatic and a slight pressure on the film advance button changes the scene.

Film advance button (see illustration) is at end of a 12' cord, for freedom of user's movements. Longer control cord optional. Price of the Viewlex Strip-O-Matic is \$44.50. Write our New Products Desk for details on this and other Viewlex projection equipment.

**"Triple-Combination" Splicer  
 Handles New "Super 8" Films**

Maier-Hancock Sales, Inc. has  
 a new "Triple Combination" hot  
 splicer that's all ready to handle  
 the new Eastman "Super-8mm"  
 film as well as all standard 8mm  
 and 16mm sound and silent films.  
 The Model 816-S splicer, accord-  
 ing to M/H vice-president Art  
 Bolt, features retractable registra-  
 tion pins especially designed for  
 the new Super-8 perforations, plus  
 standard 8 and 16mm pins.

A single-purpose Super-8 port-  
 able hot splicer, Model 816-ST,  
 has also been developed for film  
 laboratories to accommodate the  
 new format in 16mm widths be-  
 fore the film is split for reduction  
 printing and other lab work. This  
 unit splices Super-8 only, either  
 slit to 8mm or unslit in 16mm  
 widths.

Write the manufacturer: Maier-  
 Hancock Sales, Inc., at 14106  
 Ventura Blvd., Sherman Oaks,  
 Calif. for details on either model  
 noted in this column. •

NEWS OF STAFF APPOINTMENTS AND A-V INDUSTRY DEVELOPMENTS

Kenneth A. Ponte

## Studio Lighting Co. in Chicago Acquired by Kenneth A. Ponte

One of the nation's oldest production service companies, founded in Chicago in 1919, has a new owner. The Studio Lighting Company, headed by the late Bob Duggan since its origin in 1919 has been acquired by Kenneth A. Ponte.

Ponte, who was formerly art director of CBS affiliate television station WBBM-TV, is now president and general manager of Studio Lighting Company, Inc. He held his former position for 17 years and was responsible for the creation of all scenic design and effects in addition to supervision of all graphic art. While associated with WBBM-TV, he won one of tv's top honors, receiving an "Emmy" as "Art Director of the Year." Ponte is a graduate of Columbia College.

Studio Lighting pioneered in the design and manufacture of special light-weight lighting for film and tv production as well as handling large convention and trade show illumination. The late Bob Duggan was a pioneer cameraman, shot the first motion picture in sound for the Western Electric Company in the 20's. For the past five years, since his death in 1960, the business has been operated by his widow, Mrs. Floise Duggan.

## Sherry Joins Webb Associates

Eugene J. Sherry has been appointed assistant vice-president of sales administration at Webb Associates, New York City. He was previously associated with the International Divisions of Colgate-Palmolive and Borden Food Co.

## Keeslar at Wade Advertising

The former head of his own film production company, Donald E. Keeslar has joined Wade Advertising, Inc., Chicago as a television producer.

## Kodak's Gordon Tubbs Heads Education Market Development

Eastman Kodak's organization of its recently-formed Motion Picture and Education Markets Division was further advanced last month by the appointment of Gordon H. Tubbs as director of education markets development. Tubbs will report to C. R. Troutner, sales manager of the division.

Commenting on the appointment, Kodak vice-president for marketing Gerald B. Zornow noted that "the appointment for education markets development is an indication of the company's increased emphasis on providing products and services needed in these markets, in such varied areas

as more personalized classroom teaching, adult training and re-training, and the extensive programs of education taking form on a local, state and federal basis.

"Kodak's participation in the 'knowledge industry' is linked to the growing use of audiovisuals in all kinds of instruction — use of an audiovisual technology destined to increase substantially," he said. "There is evidence that the 'knowledge industry' is the largest and fastest-growing segment of our economy."

Tubbs is a 1946 graduate of the University of Rochester with a B.S. in chemical engineering. He obtained his B.B.A. degree in marketing from Pace College in 1950. He began his Kodak career

in 1941 in the film testing division at Kodak Park Works. In 1957 he joined the East Coast Division of the motion picture film company in New York City, returning to Rochester headquarters in the department at Kodak Office in 1951.

In 1963 he was appointed manager of engineering service, Eastern Division of the motion picture sales department.

\* \* \*

## Bob Jenness, Film Specialist Joins Audio Productions, Inc.

☆ Bob Jenness, a noted story editor and special effects director

Bob Jenness at Audio Productions, Inc.

has joined the staff of Audio Productions, Inc., New York.

Jenness has achieved a considerable reputation in this field as a result of his work with the Columbia Pictures Organization in Hollywood and, more recently, with the National Audio-Visual Inc., in New York.

\* \* \*

## Stevens Joins Wilding-TV

Maurice Stevens, formerly with the Leo Burnett advertising agency, has been named to head the television commercial film production division of Wilding TV Division, Chicago. He was art director of the agency's Canadian office and recently served as director and producer in its Chicago office.

\* \* \*

## Andy Costikyan Joins Staff of VPI Illinois as Camera Operator

Andrew M. Costikyan has been named to the staff of VPI of Illinois as staff camera operator, according to an announcement from Fred Olsen, president. With both stateside and overseas photographic experience, Costikyan was most recently in Sweden, Norway and Germany for the TV's *The Nobel Prize Awards*.

Costikyan began his film career as an Air Force officer in the United States with the First Motion Picture Unit, ETO. He is a member of the Society of Motion Picture and Television Engineers, and the Directors International Guild.

MARKETING MEN:  
ENJOY  
A BIG AUDIO-VISUAL PLUS  
WITH  
LENSCREEN REAR SCREENS  
by POLACOAT

16 mm. Cine-Educator by Busch

The advantages of rear screen projection in sales promotion, sales training, exhibits and displays are well established.

However, Lenscreen by Polacoat offers a valuable plus. The millions of tiny lenses on the surface of LENSSCREEN respond only to projected light. Lens response is unaffected by room illumination! So, with Lenscreen, your present projector can show sharp, clear pictures (even in full color) in fully lighted rooms.

You command greater attention. Your viewers take notes readily, assimilate faster, retain facts and sales points longer.

Eliminate the inconvenience and distractions occasioned by darkened rooms. Discover how only Lenscreens can let you enjoy the benefits of true "daylight" presentations. Reasonably, too.

Send for your free LENSSCREEN Idea Kit, today.

square-foot building as the com-  
puter equipment rental depart-

The new rental sound stage  
measures 50 x 75-feet. The key  
feature, disclosed by F&B/Ceco in  
its announcement, is that the com-  
pany's \$5 million inventory of  
equipment is not only available  
right on the spot.  
The rental policy calls for charging  
for equipment actually used

**AMERICAN TV COMMERCIALS:**

(CONTINUED FROM THE PRECEDING PAGE 42)

for "most effective use of sound effects" (Mattell Company).

The award winners for "best overall series" of television commercials (a tie) were: the Goodyear Tire & Rubber Company for its *No Man Around* campaign and Polaroid, for its *Color Pack Camera Series*. Goodyear's spots were produced by Filmfair, Los Angeles, through Young & Rubicam, of San Francisco. The Polaroid series was produced by EUE-Screen Gems, New York, for Doyle Dane Bernbach.

The Goodyear series also received a "best" in the Auto Accessory product category; Polaroid was the "best" in the Gift Items group as well as receiving the citation given for "Best Color Cinematography."

**Gulf's "Rolling Tire" Wins Two Awards**

Other multiple winners at this year's festival included: Gulf's *Rolling Tire* entry, which tied for "best" in the Auto Accessory group as well as winning the special citation for "Best Black & White Cinematography." MPO (Murray Lerner on camera) was the producer for Gulf's agency, Erwin Wasey, of Pittsburgh. Premium Saltines *Watertight Package* spot was "best" in the Baker Goods & Confections as well as being cited for "best demonstration." It was produced by VPI, New York, for McCann-Erickson, also of New York City.

Multiple winners continued with Salada Tea's *Full Line* commercial, produced by Rose-Magwood, N.Y., for Carl Ally Advertising, N.Y. It was best in the "Coffee and Tea" product group and cited for "Best Use of Humor" as well as "Best Spokesman-on Camera" honor which went to actor Paul Dooley. Another MPO production, the *Pack & Jingle* entry by Lennen & Newell, captured two special citations. One of these was earned for "Best Editing" when MPO's Cal Schultz received the Movielab award and another citation was given when this spot received a tie for "Best Jingle."

**Cite Other Winners of Multiple Honors**

The Wilding-Fedderson production, *Hot Rodder*, won the "best" award in the Toy & Game category as well as a special citation for "Best Use of Sound." This Mattell commercial was created for the Carson/Roberts advertising agency, Los Angeles.

Erik Cigars' spot won dual honors for "Best Tobacco Products" entry and a special citation for "Best Musical Scoring." It was produced by TeleVideo of New York and scored by Marc Brown Associates for Grey Advertising.

The foremost agency winner of "Clios" was Doyle Dane Bernbach, with nine awards, followed by Young & Rubicam, with eight. Benton and Bowles achieved four awards as did McCann-Erickson.

Among producers, the big winners were EUE-Screen Gems with nine "Clios"; VPI Productions with six awards; TeleVideo had five; John Urie Associates of Los Angeles took home four awards; Audio Productions, MPO, PGL and Directors Group received three awards apiece in this year's competition.

*A Name  
with a Purpose*

The objectives of Comprehensive Service Corporation are, as the name implies, to render the most comprehensive and satisfying service, with complete understanding of the needs of all who require motion picture equipment, accessories and supplies.

We point with pride to our long list of large and small customers all over the world, who have been coming to us, again and again, over the many years. Our ever expanding business is proof of their confidence in the quality of our products, our dependability and expert knowledge.

## Pharmaceutical Makers' Guide to 181 Free-Loan Health Films

A new catalog describing 184 motion pictures suitable for lay viewing and all pertaining to the health field has just been issued by the Pharmaceutical Manufacturers Association.

All listed films are available on a free-loan basis to both lay and professional groups. They cover such widely-discussed topics as accidents, alcoholism, allergies, artificial respiration, geriatrics, retirement, dental care, mental health, home safety and career opportunities in the medical and allied professions.

On the more technical side, the films view drug research, scientific agriculture, arthritis, open heart surgery, and the treatment of specific conditions of the digestive system, the heart, the lungs and the kidneys.

All of the films were produced by prescription drug companies but do not promote products. All are in 16mm sound and running times range from 10 to 60 minutes. Copies of the catalog are available on letterhead request to the Director of Public Information, Pharmaceutical Manufacturers Association, 1155 Fifteenth Street, N. W., Washington, D. C. 20005.

## Single-Concept Film Sources Listed by Technicolor Corp.

There's a new edition of the widely-used "Source Directory of Educational Single-Concept Films" available in Magi-Cartridges. The

Directory is published by the Commercial and Educational Branch of the Technicolor Corporation.

The second edition of this book contains numerous listings of educational, scientific, sports, accident prevention and other 8mm "Instant" silent films available from a wide range of domestic and overseas sources. The published price of the Second Edition (Catalog L-12E) issued in February, 1965, is 25¢. Write the Technicolor branch noted above at 1985 Placentia Avenue, Costa Mesa, California 92627 for your copy. •

## NEW SAN DIEGO CHAPTER: (CONTINUED FROM PAGE 41)

the programming function to include a committee of three.

An agenda of professional objectives has been developed to guide this enthusiastic new group. In outlining these, chairman Reese emphasized the need and ethical responsibility of every professional to belong to and support a professional society. "In this way," he noted, "the real pro achieves individual growth and contributes to the public image and stature of his profession as a whole."

### National Board Aids Chapter

At the kickoff meeting, held at Brown's Motion Picture Lab, national president Jim Wasson presented the group a check for \$100 to sustain them through the initial growth period. The San Diego chapter will represent all Southern California members in the area south of San Juan Capistrano. •

*Progress hasn't  
altered this  
guiding principle*

Inventive minds have provided a bewildering array  
of new tools and techniques for the communication of ideas.  
No longer is there likely to be just one "answer."

*Experience and Versatility*

grow more important as guides in determining methods to be used.

For over half a century

*"Without Prejudice As to Method"*

has been basic in our approach to getting across good ideas.

With the means of production right at hand, we're able  
to select or originate the method best suited to the job.

*Without prejudice*, we can help you with your  
communications problems.

# SELL BENEFITS TO DEVELOP MORE SALES FROM CALLS

Most salesmen logically focus their sales talks on needs. Yet people continue to buy what they want.

Here's a color filmstrip that shows how to cater to wants by selling benefits, answering the prospect's question: "What will it do for me?"

The importance of building presentations around "benefits" while stressing product or service facts is demonstrated in "Selling the End Result First."

It shows tested ways of presenting sales facts that motivate prospects to buy. One of a series of six color sound filmstrips:

## "SELLING IS MENTAL"

These provide dramatic material for 18 sales-training meetings, valuable in training and retraining.

## FESTIVAL AWARDS

Not all Festival Awards are equally significant. Hence Parthenon Pictures expresses its appreciation for the awards given its new films in three contests in which the judgment is done by qualified professionals in the relevant fields.

### "SLIPS AND FALLS"

(Bell Telephone System)

#### FIRST AWARD

"OCCUPATIONAL SAFETY"  
(Nat'l. Comm. on Films for Sale)

#### FIRST AWARD

"EMPLOYEE TRAINING"  
(Nat'l. Visual Presentation Assn.)

### "MUSCLES THAT THINK"

(Western Hydraulics Ltd.)  
(Borg-Warner)

#### MERIT AWARD

"INDUSTRIAL SALES"  
(Nat'l. Visual Presentation Assn.)

### "WHAT'LL YOU DO IF..."

#### FIRST AWARD STATUETTE

"INFORMATION-EDUCATION"  
Columbus Film Festival

#### FIRST AWARD

"TRAFFIC & TRANSPORTATION"  
(Nat'l. Comm. on Films for Sale)

If your firm wants films for art-film festivals, Parthenon is a very good bet. But if you need film tools to help train employees, inspire salesmen, inform customers, improve your corporate image, whatever, these professional evaluations indicate that Parthenon pictures are effective.

## New York Film Industry Sets Up a Labor-Management Group

An ad hoc committee, consisting of representatives of management and labor of the motion picture industry in New York, met last month to develop the framework for a permanent labor-management organization with procedures to govern and guide its activities.

The committee declared its major objective to be the cooperative development of activities designed to improve the climate for motion picture production in New York.

Steve D'Inzillo, Projectionists Local 306, was appointed temporary chairman, and Harold Klein, Film Producers Association, temporary secretary.

Also present at the meeting were: Clay Adams, Plautus Productions; Chuck Austin, Local 644; John Babb, F&B Ceco; Robert Bergmann, Filmex; Herbert Burstein, FPA attorney; John Francavilla, IATSE; Jim Gartland, Local 52; Sanford Greenberg, MPO; John Hall, Locals 798 and 764; Richard Long, Local 161; Lou Mucciolo, Gerald Productions; Jay Rescher, Local 644; Manning Rubin, Grey Advertis-

### University Film Producers to Meet at New York University

Members of the University Film Producers Association will hold their 1965 Annual Conference at New York University's University Heights Center August 15-21. Keynote address of the Conference will be given on Monday morning, August 16, by Dr. Roman Vishniac, Yeshiva University, following welcoming remarks by Dr. William E. Buckler, dean of the Washington Square College of Arts & Sciences.

A pre-conference special screening in the University's Hall of Fame Playhouse on Sunday evening, August 15th, is one of the featured events. Other program highlights include a talk by Lawrence Silverman of Wayne State University on "Service Films in the University" and a visit to selected exhibits at the New York World's Fair. An all-day discussion of research and science films

will be moderated by Jacques Van Vlack, Eastern Pennsylvania Psychiatric Institute, on Thursday, August 19.

Film instruction at the university level is the subject of Friday's discussions, moderated by Dr. Ray Fielding of UCLA. Hosts for the conference are Professors Richard J. Goggin and William C. Hodapp of New York University.

Saul Jeffee, president of Movie-lab, Inc., will handle prints of all university films to be shown throughout the week at evening screening sessions.

### Farm Film Foundation Honors Colorado State's Film Makers

The team which helped create the motion picture, *Waters From the Mountain*, has won the \$500 Professional Improvement Award of the Farm Film Foundation. Preston Davis and Kenneth Boltz of the Audio Visual Service, Colorado State University, Fort Collins, Colo., received the award at a dinner given by the Farm Film Foundation and the Foundation for American Agriculture during

the annual meeting of the American Association of Agricultural College Editors at Rutgers University on July 7th.

Both winners worked on Colorado film; Davis was responsible for production and editing; Boltz for direction and photography. It was a second honor for Preston Davis who also received the award in 1962.

Harold Claus, International Harvester Company film producer of Chicago, was the principal speaker and assisted Edith T. Nett, executive vice-president of the Farm Film Foundation, in presentation of award certificate and the \$500 check. Honorary mention certificates (and each for \$50 each) were presented to Fritz Albert and Keith Stamm of the University of Wisconsin (as a team entry); to Ralph J. North of North Carolina State University and to John Schmidt of Ohio State.

Judges who selected the winners were: Dr. Landis Bennett, in charge of audio-visuals, Agricultural Extension Service, North Carolina State University; Harold Claus; and James E. Gibson, chief of Agricultural Division, Office of Public Affairs, U.S. Peace Corps.

### Beatrice Honors Dr. Shadwick for "Distinguished Services"

Dr. George W. Shadwick, director of technical services for Beatrice Foods Co., and in charge of production of 27 motion pictures for that firm, including 16 films for its annual meetings, was the recent recipient of a special "distinguished service award" presented to him by president William G. Karnes at the dairy and food firm's annual meeting in Chicago on June 2.

Dr. Shadwick, who has been with the company since 1927, was presented with the "Beatrice Oscar" in recognition of "his many contributions to the welfare and progress of the company in the field of photography." Two of his films, *Milkman to Malaya* and *Johnny's Birthday Cake*, have won national honors and he has five prize-winning portraits to his credit. He has also produced films for the U. S. Public Health Service, the American Butter Institute and other organizations.

Virtually all of Dr. Shadwick's photographic work is done on his own time since his duties as technical director of Beatrice Foods require most of his working hours and involve considerable travel. •

Dr. Shadwick (right) receives his company's distinguished service award from William G. Karnes, president of Beatrice Foods Co.

### Nelson to Board of Managers of Broadcast, Film Commission

The Broadcasting and Film Commission, National Council of Churches, has named Warren D. Nelson, communications director for the Illinois Synod of the Lutheran Church in America, to its Board of Managers. Nelson will also serve on the Film Operations Committee of the Commission. •

### American Music Conference Honors "Holiday for Bands"

An unprecedented honor was accorded a sponsored motion picture in Chicago last month when the American Music Conference, holding its national meeting and trade show in that city, cited the American Oil Company for its nationwide distribution of *Holiday for Bands*. Sharing honors with this sponsor was the film's producer, Parthenon Pictures of Hollywood.

The first award of its kind ever given by the Conference to a non-music concern, American Oil was cited for its contribution by AMC president Edward Targ as helping "the objectives and philosophy of American Music Conference programs designed to motivate youngsters to participate in music activities."

Showings (via Modern Talking Picture Service, Inc.) have reached more than 1,500,000 students in 22,000 nationwide audiences since 1962. Based on the nationally-known tri-state high school band festival, the film is part of American Oil's youth activities program. •

### Aerojet-General Picture Will Represent U.S. at Air Festival

The Aerojet-General Corporation's motion picture, *Power for Propulsion* has been selected for showing at the Federation Aeronautique Internationale's Second World Festival of Aeronautics and Space Films to be held in Vichy, France.

It was disclosed by Henry Martin, IFPA member and head of motion pictures at Aerojet-General's Von Karman Center, Azusa, California, that this picture will be one of nine to represent the United States. *Power for Propulsion* has been selected to serve in the astronautics category, which is one of the nine groups at the Festival. \* \* \*

### Ann Getchell to Edit "News" and Serve the NAVA Council

Ann T. Getchell is the new editor of NAVA NEWS and executive secretary for public relations of the Jacksonville-Duval County (Fla.) Safety Council; was active in promoting the Haven Crippled Children's Hospital, the Jacksonville Cancer Casade and on p.r. work for area's Home Show. She is a graduate of Florida State University.

## Modern Opens First European Offices in Brussels, Belgium

The opening of its first European office has been announced by Carl H. Lenz, president of Modern Talking Picture Service, Inc. The company, which has 32 film libraries and five sales offices in the U. S. and Canada, has established a first foothold on the European continent with the opening last month of a branch in Brussels, Belgium.

Donald Lloyd, formerly TV sales representative for Modern in San Francisco, will head up the new operation in Europe. He will be responsible for sales of both Modern services and its division, Modern Learning Aids, and will handle liaison with ISFORFILM, an association of sponsored film distribution companies in 14 major world areas.

Modern is the designated member in the U. S. of this organization, whose world headquarters are also in Brussels. The new office will be located at 194 avenue de Tervuren, in that city.

## "Atoms-at-Work" Cooperation Wins Citation for Kalart Co.

Contributions and assistance to the "Atoms-at-Work" exhibit program of the U. S. Atomic Energy Commission have won a certificate of merit from that body for the Victor Animatograph Corporation, a division of the Kalart Company, Inc.

The exhibit utilizes Kalart Victor 16mm arc projection and the company's 16mm Moviematic repeater projectors. Continuous film showings are being presented during the show's present tour of

Central and South America and the theme "The Peaceful Uses of Atomic Energy."

Victor representatives throughout Latin-America are offering their technical services as the exhibit visits their respective lands and, in addition, factory representatives have travelled to South America as part of the company's contribution.

The specific citation was Victor's role in the San Salvador exhibition where 94,370 people attended until the show moved on to its next stop in Guatemala.

## MPO Videotronics' Sales and Earnings Climb in Six Months

MPO Videotronics, Inc., New York, has a sales increase of \$1,359,562 for the six-month period which ended April 30. Judd L. Pollock, president, also told shareholders that the company's earnings after taxes for the same period were \$187,780, or 40¢ per share, as compared to earnings of \$30,522 for the corresponding period in the last fiscal year.

Total sales for the six months were \$7,117,099 as compared to \$5,757,537 for the same 1966 period. The company's shares are listed on the American Stock Exchange.

In a letter to shareholders, Pollock noted: "The increase in sales and profits resulted from the highest volume of television commercial production in the Company's history. The practicality and efficiency of our new studio facilities were further demonstrated. Also during this period, the Videotronic-8 Repeater Division made a profit for the first time."

### DeLuxe Laboratories Spends \$250,000 for Color Equipment

DeLuxe Laboratories, Inc. has placed orders for more than \$250,000 worth of additional color printing and development equipment. In making the announcement last month, G. Carleton Hunt, president of the national film processing organization, noted:

"We expect the coming television season to show a much more rapid increase in the use of color than is reflected by the present fall schedules. This in turn will accelerate the increased use of color prints for television commercials as well as for program features, business, industrial and educational films.

"We are installing additional equipment well beyond the known fall requirements because we expect all three major networks to be close to 100% color by the end of the coming season."

More than 80% of the new equipment will be installed in the company's two Hollywood plants, General Film Laboratories and DeLuxe Western Avenue. Included will be 35mm and 35, 32mm A&B roll additive color printers, 16mm A & B roll reduction printers, additive color printing heads for existing printers, a color developing machine and speed drying devices of the latest type.

\* \* \*

### Modern to Pay Shipping Cost for Users of Free-Loan Films

In a move which is estimated to save schools and program groups more than \$300,000 annually, Modern Talking Service has announced that all free-loan motion pictures will be sent prepaid, starting immediately.

32 Modern film libraries distribute films throughout the U. S. and Canada and postage-free delivery will save its user groups a considerable sum; but the saving in time and trouble may be even more appreciated. Teachers and program chairmen will no longer have to keep cost records and pay charges to reimburse the distribution for repeated small postage expenses.

In effect, Modern president Carl Lenz notes, "films will be more easily available than ever before." During the past two years the company has worked out arrangements with individual sponsors to absorb these postage costs.

Audiences will still pay postage to return the films unless such deliveries are made in person, a frequent habit. But this custom involves no bookkeeping problems and Modern libraries are so located throughout the country as to keep return postage at a low minimum.

**Bonded TV Film Service Offers New Concept in Film Storage**

A new concept in the storage of commercial film production elements for advertising agencies has been introduced in New York by Bonded TV Film Service. A system of controls has been devised to provide unique advantages for advertising agencies and their production houses.

The electronically controlled system has been given the registered name — **BONDEDentification**.

Announcing the innovation of the new system, Chester M. Ross, president of Bonded Services Division, Novo Industrial Corporation, said "BONDEDentification was created to solve a specific problem which has plagued advertising agencies and producers since the advent of television — a problem which has multiplied each year as inventories of film and tape have pyramided.

"Time and time again, agencies and producers have faced the problem of trying to locate footage that had originally been shot for some previous campaign. Because of inadequate record keeping, this has meant the laborious and time consuming process of going through carton after carton of material to find the desired footage. Through **BONDEDentification**, it will be a simple matter to check through a computer-prepared inventory which will list, by element, the contents of each can of material."

Film cans are stored in a new plant at Bonded Park in Fort Lee,

New Jersey, where three grades of storage are offered; regular rack storage; temperature and humidity controlled vaults for color material; and new environmental controlled chambers for ultimate protection of color negatives. Storage fees depend upon the level of storage chosen by the client.

\* \* \*

**CFI Opens New Eastmancolor Lines in Expansion Program**

Consolidated Film Industries president, Sidney P. Solow, disclosed in July that this West Coast laboratory is nearing completion of a two-year, three-quarter million dollar expansion program. Motivated by increasing demands of color television and factual film requirements, the lab has now put into service additional negative and positive processing lines for 35mm Eastmancolor.

The new lines, designed by CFI engineers and constructed in its own shops, include the recent Academy-award winning color stroboscopic scene testers and A & B color printer, both specifically for the printing of 35mm Eastmancolor.

### Capital Film Labs Reports An Increase in Sales and Earnings

Shareholders of Capital Film Laboratories, Inc., Washington, D. C., have re-elected that company's officers and directors and approved a recapitalization plan at their annual meeting on June 9.

Officers re-elected were Alfred E. Bruch, president; William N. Brooks, vice-president-secretary; and Garland C. Misener, vice-president. Re-elected to Capital's board were Tinsley Adams, F. Elwood Davis, George M. Ferris, Jr., and George C. Webster, in addition to Bruch, Brooks, and Misener.

The company reported net profits after taxes of \$54,048.00 for the year ending March 31, compared with a loss of \$16,736.00 for the previous year. Sales rose to \$2,131,648 during the year, up more than 11 per cent from the previous year's total of \$1,925,087.

The substantial rise in net earnings was due largely to the company's "expanded sales and customer service efforts and the implementation of numerous technical improvements and time-saving devices," according to Bruch. He noted that during 1964, Capital invested more than \$140,000 in new machinery and equipment.

The company's shareholders also approved a plan of recapitalization designed to replace the present two classes of common stock with a single new class. The recapitalization, according to Capital's president, is designed primarily to strengthen the company's financial position and to enable the firm to expand its activities into new sectors of the film processing field.

EYE CATCHING LARGE SCREEN TELEVISION STARTS HERE

**TELE-BEAM** large screen TV Projection System brings the excitement of bigger-than-life television to education, industry, military and entertainment fields. Compact, light weight and modestly priced, Tele-Beam captures attention, magnifies detail, reveals all the action. First and Foremost in 16mm Motion Picture Equipment

**T**HE SIXTH INTERNATIONAL Industrial Film Festival, at which specialized motion pictures from countries throughout Europe, the United States, Canada and other lands will compete for honors in Rouen, France on October 11-16, is taking shape as finalist entries from participating nations are chosen.

First to announce the 15 films selected for Rouen was France. This year's French National Industrial Film Festival (the eighth) was held under the sponsorship of the Conseil National du Patronat Francais at the new and very handsome theater of the "Cinematheque Francaise" (Palais de Chaillot) with its near-perfect setup for all dimensions of film.

This versatile projection arrangement was fortunate because, for the first time, a 70mm industrial film was entered in competition. *Le Concorde*, sponsored by Sud-Aviation and produced by Societe Objectifs, relates the development of that country's "Concorde," the new Anglo-French supersonic jet transport.

#### 37 of 50 Entries by Specialized Studios

More than 50 of France's "best of the year" films competed for the honor of representing the republic in Rouen. Among the better-known film producers in competition were: Cinetest (three pictures); Objectifs (four); Les Analyses Cinematographiques (four); Caravelle (two); Son et Lumiere (two); Films du Centaure (one); and Les Cineastes Associes (one). 37 of the French entries were made by specialized producers; 11 by in-plant units (French National Railways submitted five

#### BUSINESS SCREEN INTERNATIONAL

##### France Selects 15 Pictures of Year for Sixth Industrial Film Festival

subjects); and three were entered by the French Army.

Here are the 15 "finalists" which will represent France in Rouen next October:

##### Category A: Industrial Subjects

*La Montagne de Fer* (Iron Mountain), sponsored by MIFERMA and produced by Ste CAPAC.

##### Category B: Industrial Products

*Projet 12* (Project 12), sponsored and produced by the Societe Anonyme des Automobiles Peugeot.

*Pompey Aciers Speciaux* (Pompey Special Steels), sponsored by Societe des Acieres de Pompey and produced by Les Films Caravelle.

##### Category C: Industrial "Image" Films

*Le Concorde* (The Concorde), sponsored by Sud-Aviation and produced by Societe Objectifs.

*Au Fil de la Soie* (Silk), sponsored by Commission Francaise de Propagande de la Soie and produced by Societe Nouvelle Pathe-Cinema.

##### Category D: Technical Information

*L'Agricoptere* (Agricultural Helicopter),

sponsored by Sud-Aviation and produced by Societe Objectifs.

*Le Soudage de L'Aluminium* (Aluminum Weld), sponsored by L'Aluminium Francais and produced by Les Films du Centaure.

*Diesels 67-68*, sponsored by SNCF (French National Railways) and produced by Section Centrale Cinematographique de SNCF.

##### Category E: Industrial Research

*Lacqen France* (Lacq in France), sponsored by Societe Nle des Petroles d'Aquitaine and produced by Cinetest.

*Atome Tilt*, sponsored by Commissariat L'Energie Atomique and produced by Parcite-productions.

*Le CO-2 Produit Noble* (The Good Carbon Product), sponsored and produced by Carbonique Francaise.

*Acier Sans Fumee* (Steel Without Smoke), sponsored by Compagnie des Ateliers et Forges de la Loire and produced by Garmont Industrie.

##### Category F: Manpower Training

*Passeport Pour Demain* (Passport for Tomorrow), sponsored by EURELEC and produced by Filmgep.

*Le Secretariat* (The Secretary), sponsored by Les Analyses Cinematographiques and Institut Pedagogique National; produced by Les Analyses. (Continued on Page 18)

Category G: Safety Pictures

*Ne le Prenez Pas a la Legere (Don't Take Easy)*, sponsored by Houillieres du Nord Pas de Calais and produced by Sony Lumiere.

☆ In a post-selection review of the awards, it was noted that a very good UNICEF-sponsored motion picture, produced by Cineastes Associés, was the victim of a jury disagreement.

Production scene at *Les Analyses Cinematographiques* studio in Paris during the making of "Le Secretariat," one of the French entries in the sixth International Industrial Film Festival.

Aptly titled *The Great Injustice* and dealing with the problems of youth in under-developed countries, this picture was discarded as "not in the industrial film category."

France was also having its problems with "category" classification and our correspondent notes the usual lack of information from both sponsors and producers as well as the ambiguity of category definitions as common causes.

*Le Concorde* appeared to be a unanimous choice of all jurors and members of the Awarding audience as one of this country's very good films of 1965.

**15 "Best of U. S." Films for Rouen Are Nominated by Special Committee**

THE UNITED STATES began its selection of this country's entries for the Sixth International Industrial Film Festival during final selections in Washington by the Council on International Nontheatrical Events. Recommendations of this group were sent to the special committee, headed by William Connelly, which serves the National Association of Manufacturers, officially responsible for U. S. entries at Rouen.

The consensus, at presstime, had narrowed down to these outstanding films and was subject only to a final "cut" before prints were

Murre & Nardich

Framing... focusing... composing — all the advantages of the famed Arriflex reflex viewing system are further dramatized in the new optical system of the model 2C. The Periscope Finder Attachment makes the "difficult" shot, due to cramped quarters, lack of head space and necessity for right and left eye viewing, not only possible but comfortable! It is easily and quickly mounted or removed from the camera and may be used on the Arriflex 16M and 16S models as well. With the Periscope Finder Attachment in place, headroom is increased and the cameraman can easily use either right or left eye head position for viewing. In tight quarters, the camera can be backed against the wall for maximum wide angle coverage and the camera operator can view from the side of the camera. In other situations, the camera can be placed at ground level for low angle shots — or high, over a microscope or copy stand — no matter how awkward the camera position, with the Periscope Finder Attachment the eye-piece can be positioned for comfortable, precise viewing. The Periscope Finder Attachment shows a large clear circular field of approximately 22mm.

The introduction of a new model in any well established product line always precipitates the question: can my present accessory equipment be used with the new model? The answer is "yes" for all the basic accessories in the current Arriflex line — lenses, motors, power supplies, magazines, matte boxes, blimps — all can be used interchangeably on the new model 2C. And the reverse is true for all those new accessories which were designed to complement the new Arriflex 35 model 2C. They will contribute to the improved use and operation of all model Arriflex 35 cameras.

A few of the newest accessories specifically designed to contribute to the advanced features of the new model 2C merit special consideration and are described as follows:

**NEW VARIABLE SPEED MOTOR** The new magazine (suitable for all Arriflex 35 models) is all gear-driven, uses ball bearings at all vital points and can be driven forward or reverse without special adjustment. There are no belts and no pulleys. New, adjustable, heavy-duty friction clutches have been incorporated so that load on the camera is minimal and uniform. The result is an important advance in controlled camera speed and rugged, dependable performance.

**ANAMORPHIC FINDER ELEMENT** A new manually operated closure mechanism is incorporated into the cover and finder assembly of the model 2C to cut stray light out of the reflex finder. As a factory installed optional extra, this mechanism can be replaced by an anamorphic element to provide an "unsqueezed" finder image when Ultrascope or other anamorphic objective

lenses are used. An external control knob swings the element out of the light path when normal spherical lenses are employed thus providing complete viewing selectivity.

**NEW VARIABLE SPEED MOTOR** The Variable Speed Motor (12-16 Volt DC) has been improved too. It is now equipped with a forward/reverse switch. The motor, when used with the aforementioned new forward/reverse 400 ft. magazine, provides new capabilities for filming special effects, photo instrumentation, X-Ray cinematography and other sophisticated applications.

**NEW GOVERNOR CONTROLLED MOTOR** The design of the Arriflex 35 Governor Controlled motor (12-16 Volt DC) incorporates a rugged heavy-duty transistor with an overload reserve of such sufficiency that no fuse is required in the circuit. Another significant contribution to controlled camera speed, for dependable location synchronous sound-recording and for trouble free filming.

**CHOICE OF MODELS AVAILABLE** Arriflex 35 cameras have earned an enviable reputation among professionals all over the world during the past 25 years. Now in the new model 2C series, Arriflex 35 cameras represent an even better investment in uncompromised quality, dependability and economy of operation. There are models and accessories for every professional filming assignment. All 2C models come equipped with the new and improved Reflex Finder, Detachable eyepiece and Interchangeable Ground Glass.

Except as noted in the following, Arriflex 35 2C cameras are supplied with Academy gate and ground glass marked for Academy Aperture. Camera models are as follows:

**Arriflex 35 camera model 2C**, with New Improved Reflex Finder showing Cinemascope Field, (0.735"x0.868"); detachable eyepiece and interchangeable ground glass, with film gate and ground glass for Academy Aperture (180 shutter): Without lenses, motor, matte box or film magazine.

**Arriflex 35 model 2CV**, same as above but with Variable Shutter (0-165).

**Arriflex 35 model 2C-GS**, same as model 2C, but with Control Signal Generator (24 FPS, 60 cycles) and Electric Clap-stick, factory installed.

**Arriflex 35 model 2C-S**, same as model 2C, but with specially balanced movement, special tachometer and special 32 volt DC motor, for operation to 80 FPS.

**Arriflex 35 model 2C-T**, same as model 2C, but equipped with movement for two-perforation pull-down and Techniscope film aperture (0.373"x 0.868"), 200" shutter and ground glass marked for Techniscope format. (Uses standard Arriflex 35 200 ft. and 400 ft. magazines.)

### Budd Picture Shows Design Progress on Bay Area's Rapid Transit System

THE BUDD COMPANY, which has been awarded an extensive development contract by the San Francisco Bay Area Rapid Transit System, has recently delivered to the Bay Area authorities a new motion picture describing its work on the project. The film was delivered concurrently with a revolutionary new rail truck, the Z-401, which may become the heart of the new system.

The development of the Z-401 truck was of vital importance to Budd. If successful, and it is expected to be highly successful, it will be a springboard for the company to penetrate the transit field to the same degree that it has in the railway passenger field.

Budd has a long history of successful design and construction of lightweight stainless steel passenger and transit cars. In 1934 Budd built the famous Burlington Zephyr, the world's first diesel powered streamlined stainless steel train. Since then the company has made many contributions to passenger comfort and safety through its lightweight stainless steel cars.

Since rapid transit is a new concept in San Francisco, it was important that the advantages of the Z-401 truck be fully documented. Budd believed that a color motion picture, with animation, was the best way.

The film, 15 minutes in length, is titled *A New Concept in Transit Trucks*, and was produced by Audio Productions, Inc., New York. It shows the Z-401 truck as lighter than conventional transit trucks and with air springs. This will provide a new level of quiet and comfortable riding quality. Greatly improved adhesion to the rails will allow fast safe starts and stops required by electronic train control for this ultra modern system.

In addition to its use in the San Francisco area, the film will be used by Budd to interest other cities in the new truck. And since only one Z-401 has been made so far, the motion picture represents a classic example of how to sell a new and revolutionary product that is not even in use yet. The motion picture is the only way to do it.

Budd feels that the film is not only a fine way to present its story to its customers, but that the Bay Area Rapid Transit District may find very good use for the film in furthering its educational program on rapid transit.

**Sells 'em. Stops 'em. Shows 'em. Sells 'em. Stops 'em. Shows 'em. Sel**

( This astounding talking box just sits there and sells the goods. All by itself. In broad daylight. Ask US Rubber. Ask IBM. Ask Fairchild. )

The Fairchild 400—probably the most talked about 8mm sound film projector ever made. (Ask Bristol-Myers.)

It takes just 10 seconds for anyone to put down, plug in, and have running. Color. Sound. The works. (Ask Union Bag, Brown Shoe or Tuff-Kote.)

It takes up to 20 minutes of hard or soft sell, and repeats automatically. Unattended. Demonstration films last over 3000 plays. (We're awfully sorry, but someone will have to change the bulb occasionally. It takes 15 seconds.)

There are tens of thousands out there already. In showrooms and paint stores, on drug and lingerie counters. In department stores and business shows. From Hartford to Honolulu.

Just sitting there. Selling people.

It weighs just 17 lbs and takes up only 2 sq ft of space. And because it snaps down to the size of a portable typewriter,

the 400 is showing off on desktops everywhere. Ask your salesmen. (Ask Brunswick. Ask Carnation. Ask Simmons. Ask Armour or Linde Star.)

If you have something to show that needs talking about, ask Fairchild.

**Science Answers a Critical Problem  
in "New Water for a Thirsty World"**

**T**HIRSTY CITIZENS and parched fields in the Eastern and Southern California areas of the United States, among others, will confirm the interest and importance of a new motion picture on the subject of conversion of salty and brackish water to fresh. Sponsored by the Office of Saline Water, U. S. Department of the Interior, *New Water for a Thirsty World* offers global hope for one of mankind's most urgent problems.

Growing populations and mushrooming industrial complexes help account for unparalleled demand for water. But the film also notes that industrial wastes and chemicals are reduc-

ing the available supply through contamination of streams and lakes. This Reid H. Ray Film Industries' production shows that man is turning to science and technology to protect and increase the nation's water resources.

Does the answer to vast arid deserts and sun-blistered lands lie in conversion processes? Experimental plants in North Carolina, full-size demonstration plants in New Mexico, Texas and South Dakota show progress that has been made in this direction. The 1952 cost ratio of \$4 to \$5 per thousand gallons will be compared to a plant now being planned which will produce 150 million gallons of pure water each day at cost as low as 30 cents per thousand gallons.

16mm sound prints of *New Water for a Thirsty World* are being distributed by Sterling Movies U.S.A., to television stations, schools, professional (scientific and engineering) groups and other adult organizations.

\* \* \*

**"The World's Biggest Sample Case"  
Shows How Slidefilms Help Salesmen**

All too seldom do film producers use the screen medium to sell itself. An exception to that unhappy "rule" is Chicago area producer, Pilot Productions, whose president Bob Iseley has made good use of visualizations to tell the story of its useful contributions.

This month he has come up with another 11-minute sound slidefilm titled *The World's Biggest Sample Case*, which vividly shows how this medium lets a salesman show or demonstrate tangible or intangible products and services, many of which he could not "bring in" any other way.

The subject, projected on DuKane "Flip-

## Just a few minutes from now you can tell your story with slides.

That's Polaroid Land transparency film. Load the film into a Polaroid Land camera. Start clicking. And in a few minutes you can have 8 slides ready for immediate projection.

There are two kinds of Polaroid Land transparency film for making two kinds of slides. One is for line copy work. In 10 seconds it gives you a sharp, high-contrast transparency of anything set in type or drawn in ink. The other is for making transparencies of continuous tone material (people, objects, pictures, etc.), and its development time is 2 minutes. It produces slides un-

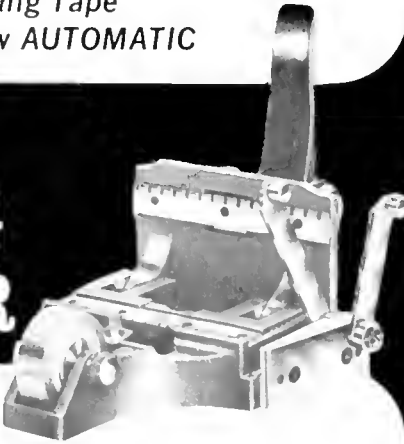

surpassed in sharpness, brilliance, and range of tones.

Both films are easy to use, so anyone can make slides with them. You just snap the shutter. Pull the tab. Wait for your finished picture. Dip it in a quick-drying hardening solution. Then slip it into a snap-together plastic frame and it's ready for the slide projector and your audience.

And what does this literally up-to-the-minute slide presentation cost? About  $\frac{1}{3}$  what you've been paying for the conventional kind. Here's the way to get your points across. Agree? Polaroid Corp., Cambridge, Mass.

F&B/CECO Offers You a Year's Supply  
of Mylar Splicing Tape  
Just to Try Our New AUTOMATIC

# GUILLOTINE PERFORATING TAPE SPLICER

**Q. How economical is the GUILLOTINE SPLICER?**

A. GUILLOTINE SPLICERS use non-perforated tape which costs only \$2.15 a roll, as compared to \$11.00 a roll for perforated tape. Save up to a nickel per splice.

**Q. How fast does GUILLOTINE splice?**

A. GUILLOTINE makes splices 35% faster than conventional pre-perforated tape splicers, because you don't have to fumble with sticky tape, placing it over the sprocket teeth.

**Q. How strong is a GUILLOTINE splice?**

A. GUILLOTINE SPLICER splices are far stronger because the act of perforating the tape bonds the Mylar to the film.

These are facts which you can easily prove by using the GUILLOTINE SPLICER. Other facts which you should know are that you can make butt, overlap, or diagonal splices on film or sound recording tape. You can rebuild torn sprocket holes and you can repair damaged film without losing frames.

That's why GUILLOTINE is easier, faster, more reliable, and the most economical film splicer on the market today.

Send your orders to

**F & B/CECO** INC.

## Honors to U. S. TV Spots at International Ad Film Festival

**T**HE GRAND PRIZE in television commercial competition and 22 additional awards (including one for cinema screen advertising) were given film entries from the United States at the 12th International Advertising Film Festival which concluded in Cannes, France on June 19.

Top prize for television advertising went to Doyle Dane Bernbach, Inc., shared with N. Lee Lacy Associates, the producer, for one of a series of two spots entered on behalf of Laura Scudder corn chips. The entry, judged by a panel of eight film experts as "the best of the festival for television" shows a woman shopping in a supermarket. She reaches the checkout counter to find that she's consumed the bag of corn chips she intended to buy.

Seven of the U. S. winners won major awards in their respective classifications and 14 earned diplomas of recognition for excellence. Among the major citations, U. S. entries won three firsts, two seconds, one third place and one fourth place award.

Winning first prize honors in the category covering live action (60 or more seconds), the Campbell-Ewald Company and VPI of California shared duplicate awards for the spot *Above It All*, produced on behalf of Chevrolet.

In the mixed technique class for commercials over 30 seconds long, the top winner was the Lennen & Newell agency with its *Pack and Jingle* spot on behalf of Newport Cigarettes and corporate sponsor, P. Lorillard.

The third "best of class" prize

Alfred M. Scott (left) head of international broadcasting at J. Walter Thompson Company, was sole U. S. judge at Cannes. Pictured with him is Peter Taylor (right), the director-general of the Screen Advertising World Association, sponsor of the festival.

went to Young & Rubicam for its live-action series for Eastern Airlines. EUE-Screen Gems was the producer.

Second prizes were shared by Ogilvy, Benson & Mather, Inc. for *Railroad Mileage:120*, sponsored by Shell Oil and created by Movietone and VPI and by Benton & Bowles with its *On the Rocks* spot for Byrrh Wine (Hueblin, Inc.). PGL Productions filmed this spot.

The one U. S. third prize winner was the Maxwell House coffee spot, *The Sleeping Man*, produced by Ogilvy, Benson and Mather, Inc. by Televideo Productions. McCann-Erickson took the fourth place honor at Cannes with its *Harry* spot created for Westinghouse Electric Corp. by EUE-Screen Gems.

European entries swept the awards lists in the field of cinema screen advertising films, where this medium is traditionally strong.

High over the Indianapolis Speedway track, T. Carroll (left) and William Sprague, director of photography complete shooting arrangements for the 30-minute color film soon to be released by Sportlite Films of Chicago.

# ARRIFLEX at work — ONE OF A SERIES \*

One Arriflex 16s and one Arriflex 16M, both fitted with Kiltitt telephoto lens are dual mounted amidship, positioned to shoot the sun.

## ARRIFLEX® CAPTURES SUN'S ECLIPSE FOR DOUGLAS AIRCRAFT

On July 20, 1963, the fast-flying DC-8, converted into a solar laboratory, took on board an unusual working crew—among them an impressive group of world renowned scientists with their complicated recording equipment, Douglas Aircraft's top communications expert, Ben Marble and cinematographer Bill Gibson, and two Arriflex 16mm motion picture cameras. So began "The Eclipse Of the Quiet Sun," one of the most unique and difficult full-color documentaries ever filmed.

In its entirety, the film runs 27 minutes, detailing the events aboard the plane, which trailed the path of the solar eclipse over Canada. The main purpose of the expedition—and the task of the Arriflex cameras—was to photograph the total eclipse of the sun at a flying speed of 600 miles per hour and at an altitude of over 40,000 feet, above 85% of the earth's atmosphere and 99% of the water vapor. Flying with the shadow of the eclipse, totality was extended from 100 seconds to 144 seconds. No time for error, no margin for mishap, no chance for retake.

The two Arriflex 16 cameras were dual-mounted amidships, shooting the sun through specially ground, optically flat glass windows. Fitted with Kiltitt telephoto lenses and neutral density filters, the film was shot at 24 frames per second on Commercial Ektachrome.

Today, "The Eclipse of the Quiet Sun," is in distribution here and abroad, representing the United States at various overseas film festivals and adding to early honors awarded by the American Film Festival and The Council of International Nontheatrical Events.

International, too, is the Arriflex motion picture camera... first choice of the professional cinematographer in the exacting fields of science, research and development. When perfection is mandatory, and performance counts, you can rely on Arriflex.

From the microscope to the missile range... from spot locations to sound stages... Arriflex professional motion picture cameras are the dominant choice of filmmakers in science, industry, and entertainment. They're lightweight, rugged, tremendously versatile—uniquely suited to a range of applications virtually without limits. Here are some of the features that give Arriflex cameras their remarkable capabilities:

- MIRROR-SHUTTER REFLEX VIEWFINDER
- REGISTRATION-PIN FILM MOVEMENT
- 21-DIVERGENCE 3-LENS TURRET
- CONTOUR HAND GRIP
- FRAMES-PER-SECOND TACHOMETER
- COMPLETE ACCESSORY SYSTEM... lenses, standard and special-purpose electric drives, power supplies, time-lapse equipment, film magazines, sound blimps, tripods.

Model 700 unattended traffic stopper sells and demonstrates products in store displays, windows and exhibits. Starts at touch of button; shuts off automatically.

ALL MODELS USE THE TECHNICOLOR MAGI-CARTRIDGE

### With built-in screen for full daylight projection

Requires no screen, no room darkening. Model 600 shows large, brilliant pictures in fully lighted rooms. \$199.50 complete. Ideal for exhibits, demonstrating, training.

Model 600 "Movie Vision" Viewer

... three-screen visualizations from the NAVA-sponsored presentation, "Talk Is Not Enough," which was featured at the "Days of Visuals"

THE ANNUAL "Days of Visuals" program sponsored by the National Visual Presentation Association brought 175 producers and users of audiovisual techniques to New York City at the Hotel Commodore on June 8-9. The two-day sessions featured a series of informative seminars on a broad range of audiovisual techniques with the traditional "V-P" presentation. Overall, the program was presided over by general chairman J. Craddock was "The Wide World of Audiovisuals." The program featured ceremonies on Wednesday evening, June 9, 22 motion picture filmstrips and slide presentations were cited for 1st, 2nd and 3rd place honors and awards.

**The NAVA Presentation**  
The opening talks by William W. Walton (IBM), president of NAVA and Jack E. Moss (Moss & Moss), one of the speakers at the meeting was introduced by Don White, executive director of the National Audiovisual Association. A fast-moving and comprehensive three-screen presentation, *Talk Is Not Enough*, the show is a dramatic illustration of multi-media techniques which reviews the ways in which audiovisuals are being utilized by business and industry. John Lord of the DuKane Corporation assisted Mr. White at the speaker's rostrum as he presented pictures, tape recordings, filmstrips and a slide were used to visualize this 55-minute multi-media application. The program's "hardware" the presentation required 11 pieces of equipment, four motion picture

Program Theme is "Wide, Wide World of Audiovisuals" as Association Presents 53 V-P Awards

projectors, three filmstrip and one slide projector, tape recorder and two electronic programming devices. A special crew of six men "worked" the show in addition to the two "live" platform speakers.

### A Project of Industry Group

The NAVA presentation was created as a project of that association's Industry & Business Council, under the chairmanship of A. F. Hunecke, DuKane Corporation, Robert P. Abrams, Williams, Brown & Earle, Inc., is chairman of the Council and James Hulfish, NAVA director of information, assisted Mr. Lord in its actual writing and direction.

Other speakers during the first day's sessions included Dale E. Wretling, producer, Audiovisual Programs, Advertising & Sales Promotion Department at the General Electric Co.; Dominick Albi, of the New York World Telegram & Sun; Tom Joerder, creative director in the Presentations Unit at Benton & Bowles; and G. K. Hall, manager, Marketing Services Department, National Cash Register Co.

### Suit the Medium to the Job

"Picking the right medium" was cited as a major consideration in any communications problem by Dale Wretling. He illustrated this thesis with examples of successful visual presentations recently used by General Electric, each carefully and objectively tailored to the task at hand.

Taking its theme from the cliches recently prevented by Benton & Bowles' Presentations

NVPA president William W. Walton welcomed members and guests at "Day of Visuals" opening session.

staff. Tom Joerder's talk was titled "The Case Against Visuals." In preparing audiovisuals for its clients, B&B successfully avoided 47 rocket launchings, 126 military analogies and 38 industrial shows and films based on *This Is Your Life*. His pointed remarks brought down the house. He concluded

Multi-media showing of NAVA presentation "Talk Is Not Enough" required 11 pieces of equipment, manned by crew of six, for this 55-minute program

that the visual presentation man's job involves a great deal of discipline to help prevent "the sins of self-indulgence" as well as indulgence of the client.

### NCR: Pioneer User of Films

A venerable pioneer in the use of audiovisuals, the National Cash Register Company began using the film medium in the early 1900's. One of its first producers, The Jam Handy Organization, served the founder of that company as far back as 1914. One of these films, *Troubles of a Merchant*, was among the earliest business-sponsored films with a dramatic plot.

Today, according to G. K. Hall's talk at NVPA, all 254 NCR branch offices are equipped with 16mm sound motion picture projectors as well as slide and overhead projection equipment.

The second "Day of Visuals" began with a panel on film production. Chairman Jack Moss in-

produced panelists Robert Bergmann, president of Filmex, Inc.; Harvey Plants, communications and training manager, Birdseye Division, General Foods Company; and Don Benjamin, manager of audio-visual media, Columbia Gas System.

**Cites Tasks of the "Key Man"**

Bob Bergmann presented his views on "Putting the Team Together" as he set forth the most important criteria for selecting a producer. "It is not so much size, extensive staff or equipment that counts," he noted, "but the ability of the one man who will actually produce the film and bring all its elements together effectively and harmoniously." He described both the advantages and the pitfalls of producing on location, particularly in Europe and the West Indies.

Harvey Plants gave an interesting presentation of the ways in which talent can be employed in creative production techniques that add to the effectiveness of audiovisuals.

**Teamwork "Makes" the Picture**

Chairman Moss cited "the new breed of scripter" who must work with the dozens of important facets of a film which cannot always be put on paper. He showed some brilliant examples of the important "writing" contributions played by the entire production crew when it works hand-in-hand with the scriptwriter.

The detailed case history of an original music score in a recent Columbia Gas motion picture was reviewed by Don Benjamin. This included the decision to use an original score, choice of the composer and dealing with the musicians. His showing of examples from the film pointed up the effective contribution of the music in this production.

**Discuss Public Service Films**

The final afternoon session, under the general topic of "The

Panelists discuss "Wide, Wide World of Production" (left to right): Don Benjamin, Columbia Gas System, moderator, Jack Moss, Tuttle & Moss; Harvey Plants, General Foods; and Robert Bergmann, president, Filmex.

Wide, Wide World of Public Service Films", brought together an authoritative group of speakers. These included Harry Alter, director of utilization, National Educational Television (NET); Willis H. Pratt, Jr., film manager, American Telephone & Telegraph Company; John Flory, Advisor for Non-Theatrical Films, Eastman Kodak Company; and Roger Cahaney, vice-president of Sterling Movies U.S.A.

The many opportunities for "truly public service" films spon-

Henry Alter spoke on "Public Service Films and Educational TV."

sored by industry among the nation's 92 educational television stations were cited by Harry Alter.

Bill Pratt cautioned the capacity

audience at this NYPA session that "many films billed as public service are far from that." Noting the very great opportunity for business-sponsored subjects to be used by television stations, in theaters and before adult groups, he cautioned that the sponsor "not delude himself with a purely quantitative evaluation of distribution statistics."

Explaining the criteria for sponsored films to be acceptable for widespread showings in the nation's schools, John Flory listed 20 points for serious consideration by the sponsor who expects his films to be used in classrooms.

"Many sponsors would find readier acceptance of their films among adult groups if they are designed to meet the particular demands of such viewers," according to distribution authority Roger Cahaney. He pointed out that some groups are anxious to use films on certain subjects and that in these areas "the supply does not nearly meet the demand." But purely "general" films are not always finding the audiences expected for them, he concluded.

**Winners of the V-P Plaques**

Top honors in the form of "V-P Plaque" awards went to such noteworthy motion pictures as *The*

Dominick Albi, N.Y. World-gram & Sun, helped present round-up of new a-v equip-

*Searching Eye*, Eastman Kodak sponsored motion picture curiously featured at the New World's Fair. This winner of public relations honors was produced by Saul Bass & Associates. H. Strauss & Co. won first honors with two motion pictures, a "first" among Recruitment subjects went to *Beyond Three De* produced for AT&T; and another "first" in the Employee Relations category went to *Image*, sponsored by Pan American Airways.

First honors among Employment Training motion pictures went to *Slips and Falls* (recent winner National Safety honors), produced for AT&T by Parthenon Pictures. Another Saul Bass production, *From Here to There* (for United Air Lines) was the winner Travel and Transportation film.

**These Pictures Won Honors**

Best among Sales Training motion pictures in these NYP Awards was adjudged to be *Secret*, self-sponsored by Per films and another self-sponsored film, *I Wonder Why?* won a plaque for Robert N. Rosen Productions, Inc.

The plaque winner of first honors among Sports and Hobby films was *Ski With Buick*, produced for the Buick Motors Division.

Informal get-together for program discussion brought together these industry executives: (left to right) Norman L. Bebell, president, Bebell & Bebell, Howard Turner, DuKane Corporation, and Donald G. Tracy, Ross Roy, Inc.

"Day of Visuals" officials who helped assure success of program are George R. Jacobsen, New York Telephone Co. (co-chairman of awards committee), and Kenney Hurst, Ethyl Corp., (co-chairman of program committee).

**Craddock, Moloney, Rowland, and G. K. Hall** were general chairmen of the 12th "Day of Visuals."

**Stanley S. Merrill**, Boy Scouts of America, served as co-chairman of NVPA program committee.

General Motors Photo-Department.

Film was another dual top honors as its Fundraising motion picture, *A New Jennifer* (produced for the Cran School for the Deaf) won that category.

pictures designed for product "Introductory Pre-ent" brought a V-P plaque honors to the *Dodge Announcement Film-1965*, by Kerbawy-MPO, Baym Productions' motion picture *How D.D. & B. Use the Camera*, brought that and producer the top long motion pictures used in Sales & Promotion.

**The City Has a Winner** winner of motion picture honors was *History Comes* sponsored by the Atlantic Press Bureau and produced by Film Productions. It was

adjudged the best of Travel-Location Sponsored films.

#### Pepsi Slidefilm Wins Award

A Pepsi-Cola slidefilm, *The Complete Call*, won first award honors for Sales Training subjects in NVPA's "Filmstrips & Slide Program" area. It was produced by Turteltaub & Moss, Inc.

Other top honors in this segment of the awards program were shared by *The Forest*, produced by the U. S. Department of Agriculture for the U. S. Forest Service; *Thank You, Mr. Rumplestiltskin*, produced by Film Fair for the Bank of America, N.T. & (CONCLUDED ON PAGE 63)

of NVPA Seminar program below are (left to right) **Elliot A. Rowland**, *Corporation*; **G. K. Hall**, *National Cash Register Co.*, and **Elwood**, *Telic, Inc.* Mr. Hall was one of speakers on program.

## The Winners of "V-P" Honors

### 1965 MOTION PICTURE AWARDS

#### Documentary Films

- 1st: "I Wonder Why" produced by Robt. N. Rosenthal Productions
- 2nd: "Path of Least Resistance" produced by Sanderson Films
- 3rd: "Atoms in Action" sponsored by U. S. Atomic Energy Commission and produced by Fred A. Niles Communications Centers, Inc.

#### Public Relations

- 1st: "The Searching Eye" sponsored by the Eastman Kodak Company Produced by Saul Bass & Associates
- 2nd: "A Sense of Anticipation" sponsored by Newsweek Magazine Produced by Peckham Productions
- 3rd: "The World Next Door" sponsored by the Pepsi-Cola Company Produced by Wilding, Inc.

#### Sports and Hobbies

- 1st: "Ski With Buick" sponsored by the Buick Motor Division Produced by General Motors Photographic
- 2nd: "The Great Marlin" sponsored by Alfred C. Glassel, Jr. Produced by Film Enterprises

#### Recruitment Films

- 1st: "Beyond Three Doors" sponsored by American Tel. & Tel. Co. Produced by Henry Strauss Productions
- Merit: "Who Needs You, Buchanan?" sponsored by U. S. Navy Produced by John J. Hennessy Motion Pictures

#### General Public Welfare

- 1st: "Breath of Life" produced by Pyramid Film Producers
- 2nd: "The Million Club" sponsored by American Cancer Society Produced by Roland Reed Productions

#### Fund Raising Films

- 1st: "A New Life for Jennifer" sponsored by the Lutheran School for the Deaf; produced by Portafilms

#### Travel & Transportation: Sponsored

- 1st: "From Here to There," sponsored by United Air Lines Produced by Saul Bass & Associates
- 2nd: "U. S. S. R.," sponsored by Pan-American World Airways Produced by Henry Strauss Productions

#### Travel — Location: Sponsored

- 1st: "History Comes to Life" sponsored by the Atlantic City Press Bureau; produced by PCS Film Productions

#### Employee Relations Films

- 1st: "Image" sponsored by Pan-American World Airways Produced by Henry Strauss Productions

#### Employee Training Films

- 1st: "Slips and Falls" sponsored by American Tel. & Tel. Co. Produced by Parthenon Pictures
- 2nd: "The Three Bosses" sponsored by the Texaco Company Produced by Skyline Films
- 3rd: "Impressions" sponsored by International Business Machines Produced by Peckham Productions
- Merit: "A Million Dollar Pantry" sponsored by Reader's Digest Produced by Fred A. Niles Communications Centers, Inc.
- Merit: "The Extra Payday" sponsored & produced by United Air Lines

#### Sales Training Films

- 1st: "Sam's Secret" sponsored and produced by Portafilms

(Continued on the following page 34)

## The Winners of "V-P" Honors:

### Sales Training Film Awards: Continued

2nd: "You Are a Team" sponsored by Sinclair Refining Company  
Produced by The Jam Handy Organization

3rd: "Man in the Star" sponsored by the Texaco Company  
Produced by Mini-films

### Industrial Sales and Promotion

1st: "First Impressions" sponsored by Magazine Publishers Assn.  
Produced by Morton Goldsholl Design Associates

2nd: "The Shape of Aerospace Marketing" sponsored by Aviation  
Week & Space Technology; produced by Muller, Jordan & Herrick

3rd: "The Prospects Before Us" sponsored by Bureau of Advertising,  
A.N.P.A. and produced by Nova Studios

### Introductory (Product) Presentations

1st: "Dodge Truck Announcement, 1965" sponsored by Dodge Truck  
Division, Chrysler Corp.; produced by Kerbawy-MPO

2nd: "No-Turn Broiling" sponsored by Westinghouse Electric Corp.  
Produced by The Jam Handy Organization

3rd: "The Armstrong World of Interior Design" sponsored by  
Armstrong Cork Co. and produced by Telic, Inc.

Merit: "Acapulco" sponsored by Jantzen, Inc.  
Produced by Homer Groening

### Consumer Sales and Promotion

1st: "How D. D. & B. Use the Polaroid Camera" sponsored by  
Polaroid Corp.; produced by Bay State Film Productions

Merit: "Safety Shoes" sponsored by the Lehigh Shoe Company  
Produced by Stars & Stripes Forever Productions

## 1965 AWARDS TO SLIDEFILM & SLIDE PROGRAMS

### Public Relations

1st: "The Forest" sponsored by the United States Forest Service  
Produced by the U. S. Department of Agriculture

### Employee Relations

1st: "Employee Insurance Program" sponsored by Boeing Company  
Produced by Jay B. Simpson

### Employee Training Slidefilms

1st: "Thank You, Mr. Rumpelstilskin" sponsored by the Bank  
of America, N.T. & S.A.; produced by Film Fair

2nd: "Let's Put It on the Line" sponsored by Phillips Petroleum  
Produced by Sanderson Films

3rd: "One Little Thing After Another" sponsored by Cadillac  
Motor Division; produced by General Motors Photographic

### Sales Training Slidefilms

1st: "The Complete Call" sponsored by the Pepsi-Cola Company  
Produced by Turteltaub & Moss

(Continued on the following page sixty-three)

## The Distribution of Public Service Film

by Roger Cahaney, Executive Vice-President, Sterling Movies U.S.

AS A FILM DISTRIBUTOR, I have become increasingly aware of the difficulty of reaching those men and women in key organizations across the country whom we regard as prime audiences for many of the films you make.

I'm referring here to those civic organizations operating at the local level in communities everywhere, which we think of, and correctly so, as opinion leaders or opinion molders. You know them as well as I — the Rotary, Kiwanis and Lions, the Chambers of Commerce, the influential women's clubs, and others. These key people just aren't using free films today on the scale they did only a few years ago.

### Articulate, Thoughtful People

We think of these people as leaders because they are the "articulators" — the people who give more thought to our economy, our social structure, our educational picture, and our business needs. They are important because they represent higher than average buying power for the products and services which finance your films.

Finally, they are held in high regard by us because each local group is part of a larger national organization whose numbers are impressive. All of us, as distributors, have claimed success for our efforts in the past, when we have reached them in substantial numbers with your films and we are aware today of your preference for them when we discuss distribution programs with you.

### They Want Films With "Meat"

I believe it is fair to say that the growth of the "public service" concept in business film-making can be traced, in some measurably high degree, to the existence of these groups, to the fact that they will show films at their weekly meetings and, perhaps more than anything else, to the fact that they want — prefer — film messages with *meat* in them.

Putting MEAT in a film's message might be said to be in theory a little like carrying coals to Newcastle. But I think that we know that it has some fairly precise implications. It doesn't mean that Swift and Company has an in-

"I'm not unmindful of the strides made in public service films," noted Roger Cahaney.

trinsic edge over the rest of in making a film — nor does mean that the essential self interest which underwrites the film you make can't continue to insure good public-service films.

What it does mean is that preferences in "meat" vary widely — what might be tasty to one group is hardly edible to another. As the film maker, this becomes a consideration when he produces a film for wide general audience distribution.

### Writing to Lowest Denominator

Somewhat like the advertiser he often finds himself in the position of writing to the lowest denominator of audience appreciation. Quite often, he successfully atones for this by combining his message production technique of a high order and he ends with an impressive total of numbers on his distribution reports. Missing on too many of these reports today, I believe, are the key people in those key organizations previously mentioned.

Let me note, as a distributor that I am not unmindful of the great strides made in this decade under the banner of "public service." A large proportion of today's business films are made with a circumspect awareness of the need to bring meaningful information — meat — to audiences.

### Significant Films Are Chosen

This fact is readily seen in recent films which have a public-service content, such as Grumman Aircraft's *Goblin*.

EDITOR'S NOTE: Several of the interesting talks at the recent "Days of Visuals" are presented "in abstract" on these pages. They included visualized material on the program. Where deletion was necessary, it is indicated by use of asterisks within these articles.

step; Upjohn's *With Care* and AT&T's soon-released *Beyond All Barriers* have come a long way from the stereotyped one-plant approach by giving viewers really significant information. Yet each of them has a close relationship to the sponsor's interest.

\* \* \*

They give you an indication of a wide range of ideas which the subjects of some of our leading organizations suggest as topics for the year in mind that while subjects are set down for a year or a time, many of them are repeated year after year. Let me point out that they are received by the parent offices of national and international organizations whose memberships range from 10,000 well up into mil-

**Presented by Youth Groups**

It would be well to point out that many of these organizations are youth groups operating at the high school level and the college level. Indeed, most of them work in cooperation with local high school authorities and the college campus.

There is a selection of major program topics culled from our research files on these key organizations:

- Debate in Local Elections
- Equal Standards in Unions
- Working with Business Companies
- Freedom and Respect for the Law
- Community Leadership
- Our Natural Resources
- Unity in Our Communities
- Enforcing Better Safety Laws
- Opportunities for Retired People
- Heritage of Freedom
- The Dignity of Man
- International Understanding
- Protection of Private Property
- Foreign Youth Exchange
- Opportunity for All
- Aid to the Handicapped

These are broad, general headings. On the local chapter level of these organizations, they are practical pursuits.

Subjects like these which run deep in the flow of social consciousness, which is all about us today, seem to be the next area for sponsored film to penetrate. The value to sponsors which may seem a questionable investment on the surface, would seem to be good on closer examination.

**Films Can Have Broad Appeal**

The returns from the exposure which can be obtained from these key opinion-leading organizations is in itself extremely high. But interest can also be developed by the distributor, once he has this kind of message to offer, among a much broader adult audience. In addition, high schools and colleges across the country will clamor for them to be included in classroom and assembly programs. Finally, television stations, with their appetite for good public service material growing all the time, will be just as eager for them.

\* \* \*

As a distributor upon whose shoulders falls the task of getting audiences for these films, I have briefly outlined what I believe is a necessary step in bringing both message and audience closer together . . . in advancing the value of the audience as a practical consideration of film making.

**Research to Help Sell Ideas**

Proper and thorough research of audience preferences, I believe, will help sell ideas and produce better films. It would help resolve the question which some film sponsors still hold about the value of "public service" messages to their businesses.

It holds the promise, I believe, of elevating the sponsored film to new heights of influence as an effective tool of business and a reliable interpreter of those values, actions and trends most important to our society. •

**Let's Define the Public Service Picture**

by W. H. Pratt, Jr., Film Manager, American Telephone & Telegraph Co.

**F**IRST WE MUST DECIDE on what we mean by this ambiguous term "Public Service." Just what do we mean?

Since a company undoubtedly believes its product or service is of value to the public, this qualifies almost all films on product selling as "public service" from the company's standpoint. However, I am sure that this is *not* what we mean and it certainly would not hold true if a canvass were to be made of audience opinion.

**Subjects in Public's Interest**

There are many films, however, that I think we all can agree are real public service subjects. These films cover such topics as aid to education, aids to social and economic progress, helpful hints on how to be interviewed for a job, the importance of a high school diploma, general information on better health, accident prevention in the home, safer driving, civic improvement films aimed at building better cities, attracting industry, and others.

These films hold commercialism to a minimum, often limiting sponsor identification to head and end titles. These are the films that in my opinion may truly display the words "Presented as a Public Service."

\* \* \*

The advantage and values of the public service film to the public are obvious. The sponsor, on the other hand, derives benefits largely in the area of company image. This benefit can easily be destroyed if the public service is actually "product sell" cloaked in public service garb.

It is understood, of course, that industry can seldom spend its money, particularly if publicly held, on purely philanthropic endeavors. There is usually a self-service objective.

**Promoting City, State Growth**

In the Bell System, the Telephone Companies have produced many films designed to promote growth in a state or city. These show the company only as a part of the entire enterprise. These are public service films under the definition although the term does not usually appear on the credit titles.

Even here, while indirect, we expect benefits to accrue. We expect better relationships with state and local authorities. We expect to obtain our share of increased

"There are many films that we all can agree are real public service subjects," said Willis H. Pratt . . .

business as a result of accelerated growth in the community.

The Bell System has produced nine films as a television series on science. You may have seen such titles as *Our Mr. Sun*, *Hemo the Magnificent* and *The Restless Sea*. These films are now available to schools without commercials. Our only identification is on the titles and through the educators who request these films.

**50 Million See Science Films**

Our annual attendance approximates 50 million, of whom probably 500,000 viewers are teachers. These films were made to interest young people and the public in general in science. At that time you will recall that we were concerned about the diminishing numbers of students majoring in this field.

Yet you could hardly say that these were offered as a "public service" for they provided the format within which our television commercials were presented.

Now, as offerings to the schools, they approach that definition and our benefits result from any improved position our nation may attain in the area of science. More young people in this field will increase the pool from which we may draw scientists, physicists, engineers and technicians.

Of great importance also are the contacts developed with educators and their appreciation for these aids to the curriculum.

**Theater and TV Distribution**

But there is another and more common interpretation of "public service" in the world of business films. This has to do, not with ob-

## Let's Define the Public Service Picture:

jectives, but with the method of distribution. This is the definition that I think most people refer to when they use the expression, "presented as a public service."

This definition would include any film, regardless of the amount of commercialism, that is so constructed that it is acceptable for showing free of charge on television or in theaters. These films are shown "as a public service" because the entertainment, interest or informational value of the content is considered sufficient to neutralize its commercialism in the opinion of the program manager.

Certainly he will *not* use a business-sponsored film if he suspects he may alienate his audience or generate complaints.

### Value to Industry and Viewer

With this definition in mind, let's consider some of the values of this type of public service usage to industry and to the audience.

If the objective of the film is to reach a general audience, then the added visibility obtained through television and theater distribution gives the sponsor access to a mass audience that he cannot reach in any other manner with his film.

The recent Association of National Advertisers' study ("Advertiser Practices in the Production and Distribution of Business Films") substantiates this with some interesting figures.

### Reach Much Larger Audience

Films using only non-television distribution channels averaged slightly over 10,000 viewers per year, with a high which barely exceeded two million viewers. However, films using the television outlet as well as other distribution channels average over two million viewers per year, with some totals exceeding 16 million.

It was also interesting to note that comparatively few of the sponsors covered by this survey were taking advantage of the theater outlet. Theaters constitute an important and surprisingly available channel for the distribution of business films.

### 45 Million Go to the Movies

Theaters have overcome the setback due to television. For all theaters are on the increase, particularly in suburban shopping centers. Recent reports indicate that more than 45 million people attend film theaters each week.

It is not difficult to produce a film containing the company mes-

sage and yet entirely acceptable to theaters and on television. In 1964, Bell System films were shown to a conservative estimate of 50 million on public service telecasts; another 40 million viewers were reached in theaters.

Conservatively, we estimate that this means the public gave us 25 million man hours of attention. This is substantial distribution and something which cannot be dismissed lightly. It is available to nearly any industry. However, our experience with films indicate the theater managers are usually more selective since theater audiences are "captive" whereas the television audience may select another program if dissatisfied.

To the sponsor who measures results in quantitative terms — cost per viewer — the mass audience obtainable through television and theaters results in a "cost per thousand" which compares favorably with other media.

\* \* \*

### Let's Respect Power of Film

The business film stands side-by-side with today's television program and commercial as the most powerful motivational and information force in the communications tool kit. This power should be treated with respect, remembering always that because of its power, it can do harm as well as good.

The only way to make sure that the business film is working on our behalf is by valid measurement. The combination of factors and delicate balance that determine motivation in the direction which we are seeking are difficult to ascertain without something stronger than untested experience or faith in our inherent abilities.

### Facts Hold Key to Progress

Public service distribution of business-sponsored films is by all means the best way of reaching the greatest audience — provided that we go forward intelligently on a basis of substantiated facts. •

## There's a "New Breed" of Scriptwriter

by Jack I. Moss, President, Turteltaub & Moss, Inc.

THERE IS A NEW BREED of scriptwriter in the audio-visual field. This scriptwriter is a hybrid. In fact, I'll go one step further and say he is a "combination."

He is a combination writer, artist, cameraman, soundman, director, musician, editor and lab technician. Now, understandably, a person with such talent would more than likely be an unbearable bore.

### Combined Work of Individuals

Actually, when I talk about a scriptwriter, in the sense of the "new breed of scriptwriter," I am describing the *combined* efforts of several individuals. It is *only* through the combined harmonious handiwork of talented people that the audio-visual medium can reach its full potential.

It is a potential, I am sad to say, that is *not* being realized in the majority of work being produced today.

What I am saying is simply this: the day is past when the scriptwriter can hand a completed script to the producer . . . who calls in an art director . . . and then puts everything before the camera . . . with a director directing . . . turns the raw film over to an editor . . . and then to a lab technician.

This step-by-step procedure is easy. But, invariably, it produced visualized *words* — not audio-visuals.

### Limited to His Own Concepts

Even the so-called "visual-thinking" scriptwriter (and I billed myself as such for several years) is limited to his *own* visual thinking. And, all too often, in step-by-step procedure, his words and picture suggestions are followed right down the line, with nothing added, nothing changed. Many producers rely completely on the scriptwriter for the creative content of their films.

This is folly. This is like putting together a set of monkey bars from printed instructions. *Anybody* can do it by following directions. And, when you're finished, your set looks no different than everybody else's. You've done an adequate job. But you've limited yourself. You haven't *added* anything to make your project *a little better, a little more useful, a little more effective*. And, after all, that's the name of the game.

The new breed of scriptwriter

"The scriptwriter is a hybrid," Jack Moss tells the audience during his recent NVPA seminar talk.

embodies every creative function of film-making. In other words, everybody, literally, gets into the act — at an early stage — where their contributions can help establish the basic structure of the film, whether it be a motion picture, slide tape or a slidefilm.

### Share Desire to Communicate

Their creativity doesn't spring from just the words of the writer. It delves into the concept and rests only on the basic necessity to communicate . . . as forcefully, dramatically and memorably as possible.

All that is required to gain an emotional response from the audience. There are creative aspects in narration, sound, music, photography, editing and technical effects. How exciting it would be if films could take advantage of them all.

(Followed by a showing of examples of areas where full utilization of the talents of the entire production team can appreciably increase the effectiveness of the finished product).

\* \* \*

### Additional Papers to Appear in Our First Fall Edition

These columns will continue to bring our readers selected papers from the recent "Days of Visuals" program. Scheduled to appear in Issue Five (our first fall number) is Dale E. Wretling's talk on "Selecting the Right Medium for the Message."

Don Benjamin's talk on "Music Hath Charms" and Harvey Plant's dissertation on "Getting the Most from Sight and Sound" are also being prepared for publication in these pages next month.

Modern vice-president Bill Oard, *Modern Talking Picture Service, Inc.*, discusses new distribution reporting methods for Seminar guests. *James Maull*, of *Pelican Films*, listens attentively at left in this picture.

Among producers attending the workshop at the Plaza were (left to right) Mrs. Larry Madison, *Larry Madison Productions*, James Maull, of *Willard Pictures*, and Walter Louendahl, vice-president of *Dynamic Films, Inc.*

## Seminar on Film Distribution

ern Headquarters' Staff Talks on Audience Potential  
 tional Distributor Hosts a Workshop for Producers

SEVERAL ASPECTS in sponsored film distribution were discussed at an all-day seminar for independent film producers held by the headquarters staff of Modern Talking Picture Service at the Hotel Plaza on

20 producer representatives took part in the discussions, which were held in a series of sessions in various branches of the film industry. The objective was to help producers understand the creative use of distribution techniques and the growing audience for sponsored films can help increase the producer's sales

"This is a typical day," said president Carl Lenz in his opening remarks at the meeting. "there are approximately 6,000 audiences for sponsored motion pictures in community groups and schools. With an average attendance of 100 persons in each of these groups, this would total 600,000 people. But in addition to this sponsored audience, some 300 million films are being telecast to 10,000 viewers per telecast. This will add nine million people to the overall audi-

ence. This is off with the attendance of several hundred theaters playing sponsored short films and it can be safely estimated that 10 million people on a single day are looking for sponsored films.

It is a mass audience by any standards. But Modern's

Carl Lenz, president of *Modern Talking Picture Service, Inc.*, noted that 10 million people saw sponsored films during the day on which this seminar was held.

"The program today is designed to show that it is not only a mass audience, but an audience of particularly high quality and influence," he concluded.

Other Modern staff members took active part in the seminar discussions. Bill Oard talked on community group audiences; Dick

Rogers discussed theatrical distribution; Ralph Del Coro spoke on television and its standards. Jim Witker described the potential of 8mm sound films and Dick Hough, who spoke on "new trends", helped to round out the background with cogent comments on expansion and development efforts in all facets of the distribution picture.

Facts were presented on research into the impact of films in influencing the viewer and on the potency of the burgeoning youth

market and how this is being served by resultant films. A review of case histories of some outstanding recent success stories lent ample evidence of the important role of distribution as a vital partner in the complete film story.

Slides, tape and film were liberally used to illustrate key segments of the seminar and many of the producers present took an active part in the discussions which followed each aspect of this informative program.

Dick Rogers of *Modern Talking Picture Service, Inc.* outlined the opportunities in theatrical distribution of sponsored films. *Modern's* sales chief Dick Hough is in background.

## A Look at "Light" from General Electric

Genesis and Service Role of Lamp Told in a Colorful Picture

**L**IGHT, according to a new 18-minute color motion picture recently sponsored by the General Electric Company's Lamp Division, is a lot more than mere illumination. Those bright spheres, large and small and getting constantly better, are contributors to safety and security; they warm and protect our surroundings; beautify historic landmarks and shrines; improve business performance; extend leisure hours; decorate homes; help capture precious moments on film; advance space exploration and aid medical science.

That's the picture of *Light* — the good *one-word all-embracing title* which leads the viewer into sequences depicting all these ways (and more) in which the lowly lamp enhances daily living.

On this colorfilm journey into the real world of light, the picture goes into the role of illumination in vital aspects of the nation's economy. Light is drying paint, growing plants, breeding chickens, melting snow, warming homes and offices, stopping traffic, exploring the universe and even improving our race through science.

The film pauses to trace its own progress from the oil lamps of a century past to the more than 10,000 types and sizes of lamps available today. It moves through the

fast tempo lamp production, showing how these commonplace bulbs are squeezed, pounded, measured, heated and evaluated (more than 100 separate tests in all) before millions of them reach distribution outlets.

The result: a lamp which costs about 25¢, gives 11 times more light than Thomas Edison's first bulb and is as easy to buy as it is to see by.

Intriguing developments now underway in GE lighting laboratories are shown to include lights that bend, twist and turn; lights without wires and lights to communicate and penetrate.

*Light* was produced for GE by Wilding, Inc. An original music score (by composer Elliot Lawrence) was recorded in Europe by the Paris Symphony Orchestra.

First distribution plans include premiere showings in motion picture theaters in major metropolitan areas, followed by scheduling for television and to adult community groups. Modern Talking Picture Service, Inc. is handling this mass audience distribution program.

Prints have also been distributed to GE Lamp Division sales offices and among Public Relations offices of the company throughout the country.

Pictured at New York preview of General Electric Company's film "Light" are (left to right) Dick Rogers, Modern Talking Picture Service, the distributor; Don Smith and Leon Kirgo, Wilding, Inc., the producers; and M. R. Kest, advertising sales promotion mgr., Large Lamp Dept., G.E.

## Widescreen View of an Association's History

Multi-Media Show Reviews 50 Years in the Bedding Industry

**M**ULTI-MEDIA Use of slides and motion pictures, using three screens and a stereo tape recorder, helped span 50 years of history for the National Association of Bedding Manufacturers. The association's Golden Anniversary Convention, held at Chicago's Hilton Hotel, featured this audio-visual presentation. *Footprints in the Sands of Time*, to convey the story of these 50 years of growth, services and personalities in a single program.

Six 2 x 2-inch Carousel slide projectors, two 16mm sound motion picture projectors, the screens and the stereo recorder were served by a high-fidelity stereo amplifier

similar to an automatic typewriter was used to correlate the visual devices.

When an action cue came to the sound tape, it was automatically transmitted to the projector, changing the picture on or all of the three screens.

Individual pictures of 97 years in the bedding industry shown; many more were seen in pictures of committee meetings and Board of Trustees' sessions in which they participated. The association's Vicki Lathom did fact and picture research.

The presentation was scored by Salasin with excerpts from various composers. He estimates that

Wide-screen sequence took members of the National Association of Bedding Manufacturers back through 50 years of history as slides depicted 50 years in the multi-screen presentation, "Footprints in the Sands of Time."

and high-fidelity speaker system. The entire program was knit together by a tape-recorded cueing system which also carried the narration and musical score.

The show, conceived and created by NABM's Alfred M. Salasin, lasted 35 minutes and required 400 slides, five motion picture film strips and a complete stereophonic tape for the full showing time. This included a 42-second overture, created to set the mood and develop a sense of anticipation while the auditorium lights dimmed for the screen images.

These decades of Association activity, 1915-1965, had offered very little in the way of dramatic pictorial material. To compensate for the lack of "drama," Salasin turned to design and to the versatility of multi-media presentation.

The six slide projectors were operated in three teams of two each, with a special dissolving arrangement. All projection equipment was carefully matched for image brilliance. The stereo tape carried the score, narration and equipment operational cues. But to send these cues to the one or more projectors to be activated another punched tape device, sim-

hours were required for scene preparation, the score and coordination. Two professional voices were used.

Suppliers who aided in the presentation included Friar Graphics of Silver Spring, Md., who created the artwork and slides; Partridge Studios, of Washington, D. C., assisted with the motion picture sequences; and Visual Technical, Inc., of Cleveland, furnished complex equipment. This firm re-recorded the stereo tape, the equipment and installed the presentation at the Hilton Hotel. The company's technicians operated the show.

Reception of the presentation was little short of overwhelming. On several occasions and especially when the images on the screens would "blend" to form a very wide picture, the audience broke into spontaneous applause.

And some 10 minutes of "intermission" developed on the occasion of the 35-minute program. All participating individuals were present were vigorously applauded. The subject remained a topic of conversation throughout the balance of the convention. In many letters from members

## Helping Retailers in "The Pursuit of Profit"

Procter & Gamble's New Picture Shows Store Managers How to Attain Profit Objectives

**Handy Motion Picture**  
*The Pursuit of Profit*, is a new  
 e color motion picture  
 l by The Jam Handy Or-  
 n. The picture is di-  
 all retail personnel from  
 ist level of management on  
 store. It is the second ma-  
 tribution Procter and Gam-  
 made to the food industry's  
 f management motion pic-  
 and a good one.

ighly-successful P & G  
 or, *A Coin With Two*  
 s still in wide use — in-  
 eople on the management  
 follow proven training  
 es.

**of Intensive Research**  
*The Pursuit of Profit* is an in-  
 lmi report based on more  
 ear of research into how  
 I supermarkets and inde-  
 food stores fare in the  
 ee, compared with others  
 s the profit target.

de range of businesses  
 mined; the research find-  
 umerous national organ-

izations was examined, and grocers  
 were interrogated in their stores —  
 as were top management people  
 of chains and other food market-  
 ing organizations.

The result of the extensive study  
 could have been an exhausting list  
 of statistics — but the screen pre-  
 sentation that came out of all this  
 digging is a sprightly, attention-  
 holding screen dramatization that  
 reaches both heart and head.

### Star Talent for Its Cast

In *The Pursuit of Profit* two  
 Broadway and Hollywood stage  
 and TV stars portray the situations  
 which every store employee faces.

Addison Powell, of *Lady in the*  
*Dark*, *Gunsmoke*, and *Playhouse*  
 90, and Stephen Bolster, of *North*  
*by Northwest*, *Route 66* and *Nak-*  
*ed City*, bring life and emotional  
 interest to the story on the screen.

They also bring to life the strug-  
 gle to balance income with outgo,  
 tipping the scales into the profit  
 bracket. This is not a "sugar-coat-  
 ed" story but is visualized interest-  
 ingly so that paramount ideas are  
 remembered by store managers  
 and their department heads. Addi-  
 tional motivation is supplied by  
 stressing the role of profit in our  
 free enterprise system and by  
 driving home the self evident, but  
 not always clearly realized, conclu-  
 sion that "each of us profits from  
 profit."

As with *Coin With Two Heads*,

Procter and Gamble is making *The*  
*Pursuit of Profit* available to all of  
 its customers through presentations  
 at headquarters offices of food  
 merchandisers, at area meetings  
 and within individual retail stores.  
 Local P&G district offices are the  
 contact point through which in-  
 dividual retail stores can obtain  
 showings for their people.

### Won Tribute at SMI Premiere

After its recent premiere at the  
 major Super Market Institute con-  
 vention in Chicago (where the film  
 received waves of applause),  
 Michael O'Connor executive head  
 of the Institute, cited P&G's picture  
 as "the finest ever made for our  
 business." The many creative peo-  
 ple at JHO who worked on this  
 project helped win that accolade. •

Michael Waller, trade relations supervisor at P&G (extreme right),  
 filmed at Chatham Stores, Inc., supermarket where interior sequences  
 of "The Pursuit of Profit" were filmed through the courtesy of Chatham's  
 Bernard Weisberg and vice-president Harvey Weisberg (at left).

Below: film, TV star Steve Bolster (seated right) as the grocery depart-  
 ment manager, reviews his weekly operating statement with Addison Powell  
 who performs as the film's on-screen narrator, commentator and philosopher.

Arriflex chief designer Erich Kaestner (at right) is glimpsed in the Arnold & Richter engineering department in early scene from "The Arriflex Story."

## "THE ARRIFLEX STORY"

As Told to Business Screen by Producer Kenneth Richter

**M**OST FILMS, I am told, begin with a phone call. Communicative people who make pictures have to get together to start the pot boiling. But this assignment was different! Paul Klingenstein, president of the Arriflex Corporation of America, knows that we have no phone so he wrote us, asking if we would be interested in making a film about the Arriflex.

Paul mentioned that he would be leaving for Hawaii the next day. Since my answer to his question was "yes", there was little time to lose. I fired up the plane which roosts on the front lawn of our place in the Adirondacks and a couple of hours later Paul and I worked out the details of his project in New York.

### Objectives Were Clear-Cut

The plan for the film looked like simplicity itself. The audience was to be film producers, cameramen and others within the film industry. Its objective: to tell these Arriflex owners (and potential users) how the Arri 16 was designed to meet their needs; how the camera was made; and some of the ways in which this extraordinary versatile instrument can be employed to make films.

Designs and construction sequences were to be photographed at the plant in Munich; the "in use" sequences were to be made up by "requests" from some of the many producers employing scenes of the camera in various ways all over the world.

By a fortunate coincidence we were to leave almost immediately on a trip to Europe, followed by a journey around the world. The trip had been scheduled to make a documentary film for the Eterna

Watch Company of Switzerland on the history of time-keeping and the present day production of fine watches.

It seemed that no two film projects could tie in more neatly: the Arriflex and Eterna plants were within a few hundred miles of each other. The Eterna round-the-world trip would enable us to "piggy-back" photography of the Arri in use around the world, supplementing the production scenes obtained from Paul's immensely varied list of Arriflex users.

### Years of Product Experience

So this looked like one of the most satisfying film projects we had ever undertaken. I had known the manufacturer of Arriflex cameras for years. In fact, I first visited there when the Arri 16 was little more than a gleam in designer Eric Kaestner's eye. I had used the first prototype in the field and had contributed my "ten cents" worth to its design. And I had bought what was, I think, the first Arri 16 ever sold and had used it for years.

*The "dream assignment" of a famed documentary film maker had its hours of trial but ended with a triumphant finale.*

And every year, as regularly as the swallows migrate, I had made my pilgrimage to Munich and, while my patient wife and partner sat outside and watched the new plant go up, brick by brick, I had talked, argued and cajoled to get the camera perfected to meet the needs of the working cameraman.

The film project, I thought, was a way of saying "thank you" for my interest in the camera through all these years. In fact, Paul told me, Arri in Germany had suggested me as the producer. I must admit that I was flattered; after all, it was no small professional honor to be tapped to produce the film which would "star" one of the most popular professional motion picture cameras ever made.

### All the Equipment at Hand!

The more I thought about the project, the rosier it looked. For instance, suppose a camera or lens needed adjustment, or a shot required a special piece of equipment? Just walk down the corridor to the 16 Arri assembly room or over to the stock department! There was even a film studio, owned by Arri, right next door.

In view of the fact that this ought to be a delightful film to produce, with everything on my side, I quoted Paul a contract price for the picture that turned out to be a mistake — in fact, a lulu of a mistake.

What I had forgotten was that, in film making, all is not as meets the eye. You may shoot Napoleon's retreat from Moscow in three days, on schedule and on budget all the way; but getting one lousy little shot of Joe Blow walking out of his house in Azusa, silent yet, may cost you three weeks, half the budget of your picture, and a feeling of general

inadequency so profound that you tell your wife she'd better go do and apply for home relief.

Arriving in Munich, I went to work with my wife (my secretary, writer, researcher, general right hand) to see every last detail of how the 16 Arriflex was designed and how it is made. Then I chose from all of this, the key sequences and techniques to tell the story.

### Camera Part of Complete Line

It was at this time I decided that in order to show the tremendous background of experience and know-how that make the Arri possible, we would have to demonstrate its place as a part of that most complete family of motion picture equipment, ranging the way from cameras to processing machines and printers.

Conferences with Dr. Arnold and Dr. Richter followed and the plan for the film was consolidated and accepted. I sent it off to Paul Klingenstein in New York for approval and started to organize a shooting schedule.

It was here that the first of the network of problems which were to impede the completion of the film began to rise to the surface and knit together. The biggest and most obvious of these was that the whole Arriflex plant was about to be completely rebuilt, on the same site and, generally speaking, under the same roof as the facilities then occupied.

Meanwhile, production had to continue and expand to meet the ever-increasing demand for Arriflex products. The result was that as the rebuilding program progressed, whole departments were sharply compressed in floor space, moved, or even briefly discontinued as construction workers in-

Inspection with special fixtures and microscope checks accuracy of Arriflex-16 pull-down pitch and precision of camera's registration movement.

Technician fabricating the pull-down cam for an Arriflex-16 camera, machine operation involves ultra high-speed grinding and precision tracing.

Richter craftsman is shown "tuning up" Arriflex reflex finder shutter on its pre-loaded bearings. Precise mirror-shutter must turn axis, with run-out of less than plus-minus 1/25,000 inches.

their areas. Thus, a certain on process in the filming ply might not be going on e wished to photograph it; likely, it would be in tem- cramped, unphotogenic a matter of a few days. to be obvious that much lming program would have place when the new plant mpleted — hopefully, in e, but, as it turned out, in e year later (after several Munich during the initial Europe during which all phy was to have been ed) we were back at Arri- take up the threads of *The Story*. We were light of d full of cheer for about s. is time, we realized that

not only was the building program incomplete, but we had other problems.

Everyone wanted Paul Klingenstein to have a useful film that would sell Arriflex cameras. The trouble was that making a film was — well, trouble. It took workers' time. It cluttered up the work-rooms with equipment that had to be walked around and stepped over. Once there was even a question that a proposed shot would betray a manufacturing secret.

#### Diplomacy Brings It Through!

Quite honestly, I can say that the fact that the film was finished at all was a feat of diplomacy as much as one of film production. That, however, is not unusual in our business. We feel, after all, that when we sign a contract to make a film we become an exten- (CONTINUED ON PAGE 54)

ans put a new Arriflex-16M through final test in this film scene. camera must produce test footage to highest standards of image sharp- picture steadiness before it is permitted to leave the factory.

## 20 New Pictures to Aid Fight on Cancer

### American Cancer Society Aims to Keep Physicians Informed

THE MOST AMBITIOUS program of education through films in its history has been launched by the American Cancer Society. The Society is undertaking production of more than 20 motion pictures presenting the latest information on detection, diagnosis and treatment of cancer to the physicians of America, along with films for the general public.

Films dealing with the major cancer sites will be available to every physician and medical student in the United States. The new program will help physicians to detect and treat promptly the more than half a million new cancer cases each year.

#### Keeping the "GP" Informed

Discussing the program, Dr. Roald N. Grant, ACS' director of professional education, observed:

"If the specialists complain of the difficulty of keeping abreast of the latest developments in their own specialty, imagine the plight of the general practitioner who must keep himself informed in the many special fields of medicine. It's our job at the Society to help him have at his fingertips, the latest and best knowledge of cancer diagnosis and treatment. For this reason, it will be the 'GP' who is our primary audience for these films.

"Naturally," Dr. Grant points out, "reaching medical students and specialists is also vital. The more of us who learn more about cancer, the better it is for everyone."

#### Subjects Approved for Camera

Among the 20 films for professional audiences which have been approved for production are those covering: chemotherapy (chemical treatment of cancer); cancer in children; the dentist's role in cancer detection; hormonal treatment of cancer; and the diagnosis and treatment of cancers of various vital organs, including: the thyroid, uterus, colon and rectum, bone, lung, breast, and oral cavity.

Funds have been set aside by the national office of the ACS for production of four professional education films and the Society's Divisions have been offered the opportunity to present grants for development of "films of their choice." To date, several Divisions have come forward.

The Wisconsin Division has arranged financing for a film on chemotherapy, while the Missouri

Division has announced a large grant for the production of a film on the dentist and cancer. The Florida Division is financing the film on skin cancer and the Texas Division has announced a grant to produce three films: on cancer of the breast, of bone, and of the lip, oral cavity and naso-pharynx (nose-throat area). The California Division of the Society has voted funds for collaborative production with the national office of a film on cancer in children.

#### Olesker in Charge of Films

Harry Olesker, ACS' director of films, radio and tv, will be in charge of the overall production program and will provide consultation services for Divisions making their own films.

Turning to the public sector, the Society released the film *Who, Me?* in April. Addressed mainly to adult viewers, this film por-

Scene from ACS' film "Who, Me?"

trays the dilemma of "George," devoted husband and father of two — and also a confirmed heavy smoker. During the imaginative 20-minute film, George learns that smoking is not only risky to himself, but can encourage the habit in son and daughter, too. This production was financed by the Society's New Jersey Division.

Younger school children comprise another important ACS' audience. Realizing that smoking habits are established early in life, the Society produced a cartoon feature aimed at these young viewers, *The Huttless, Puttless Dragon*. Created by Ernest Pintoff, this film tells the story of a clean living, non-fire-breathing dragon who does not smoke. Scorned at first by his companions, he emerges victorious at the end of an Indian-wrestling match with the chain-smoking leader of the local crowd. Set to a background of "cool" jazz the film is bright with color, ideas

and food for thought. A grant from the California Division made this film possible.

Sophisticated adults are the viewer-target of *Breaking the Habit*, another cartoon subject produced by the California Division. In semi-surrealistic style, the film reveals the danger and the essential silliness of smoking as it

shows the antics of two supposedly "grown up" American males who discuss how easy and sensible it is to give up smoking. Unfortunately, they do so while puffing away!

Soon to be produced is a film on leukemia (for the general public) which reveals progress in research and treatment. It is being financed in New York state. •

## Lively Review of a Year's Advertising

Hamm's Showed Its Centennial Year Promotional Program in a Well-Designed Film for Distributors and Salesmen

**T**HIS IS HAMM'S Centennial Year and the brewer from the "land of sky-blue waters" began sharing its 100th birthday with the firm's distributors and driver-salesmen during March and April, 1965 advertising and sales promotion programs for Hamm's Beer were dramatized in a motion picture which glittered with bright choreography, entertained with original music and delivered the "message" at 36 meetings scheduled around the country.

Four geographic versions of a 16mm color motion picture were produced by Fred A. Niles Communications Centers, Inc. so that each of the company's divisions would share those sales promotional materials which served their special interest. The 35-minute film opened with a history of the brewing firm, featured music and costumes symbolizing the mid-1800's and later decades.

But primary interest was focused on a review of promotion. Color television commercials were cut

into the picture; radio commercials were aided by visual inserts of Nancy Wilson, who performs the vocals. New billboards, magazine ads and point-of-sale material were revealed in sequence.

Dancers worked in and around studio "limbo" sets depicting Hamm's outlets, including a supermarket, a package store and a tavern.

"The film gave us a great deal more flexibility in scheduling our meetings than would have been possible with live presentations utilizing the same theme and format," says Joe Sullivan, assistant ad director for Hamm's. "And film proved to be the best medium for telling our Centennial story."

The picture was scripted by Niles' staffer, Ira Kerns. Jim O'Reilly directed and Jack Whitehead, B.S.C. was head cameraman. James Miller was the editor and Niles' musical director, Sid Siegel, composed and conducted the original score. The film was lensed at Niles' Chicago studio. •

Limbo sets depict Hamm's Beer outlets in this color sequence from the company's 1965 sales meeting film which was lensed at Niles' Chicago studios.

A scene from the Jam Handy production "Adults in a Hurry"

## Help for Drop-Outs: Adults in a Hurry

A Widely-Used Film Documents a Successful J. I. Case Work Learn Program to Help Keep Youths in Classrooms

**H**OW CAN INDUSTRY help meet the problem of the potential high school "drop-out?" Numerous causes have been cited and more than a few "answers" provided, both by governments and by concerned business organizations. Often, the "drop-out" is a victim of economic necessity; sometimes these boys just lack a goal in life and the satisfaction of working with their hands.

The president of the J. I. Case Company, Merritt D. Hill, knows something about the "drop-outs" thinking. He became one himself but made a quick recovery to work his way through high school and college. As a successful businessman he has since made notable contributions toward youth work among Future Farmers, 4-H Clubs, the Boy Scouts and in Junior Achievement.

### The President Had an Idea

The idea for a school work experience program came to him while recovering from a mild coronary several years ago. Early in 1963, he asked the company's vice-president of corporate relations, R. W. Dugger, to contact the local school system, suggesting that the Case Company employ potential "drop-outs" on half-day basis while they continued school in the remaining hours. The work program would count toward graduation credit.

Racine United School District No. 1, headed by superintendent John Prasech, welcomed the idea and seven boys started the program in September, 1963. They were selected by the schools as individuals who were most likely

to drop out in their senior high school year.

All except one finished the schooling and the program has proven so interesting and successful that it has been documented in a widely-popular motion picture, *Adults in a Hurry*. The aim of that picture is to interest other schools and business organizations to emulate the program. The film was shot on location in Racine. The Jam Handy Organization. Every single individual within is the actual person who participated in the program, including the "drop out" who didn't finish his course.

### 100 Prints in Constant Use

*Adults in a Hurry* has already reached hundreds of thousands of viewers throughout the U. S. 100 prints are constantly on the move, and earlier this year, bookings were three and one-half months behind schedule. Jam Handy is also handling the distribution of the film for Case.

The point is made that the school work experience program developed at J. I. Case can be operated by any combination of school system and business firm at virtually NO cost. The government program in the same field was set up for billions of dollars. Above the only real expense to the company thus far is its modest budget for the film which is helping "spread the word."

### Experience Proved Its Value

How has the program gone since its inception? In the school year just completed (June), a total of over 40 students were involved.

SIXTH ANNUAL Industry Producers Association Conference, held June 1-3 at the Ambassador Hotel in Los Angeles, introduced a new class of officers for the coming year at the inauguration of a new "Cindy" award citations for individual contributions to audiovisual media and the presentation of "Cindy" statuettes for outstanding industrial films entered in this year's IFPA Awards Competition.

During IFPA through 1965-66, the association's new president-elect, Dr. Harald O. Dyrenforth of the Systems Division of North American Aviation, a dynamic personality and a driving force in making the coming year a standing one for the association was the citation which honored his introduction to the ship.

**Dr. Harald O. Dyrenforth** has been elected president of IFPA. His dynamic personality and driving force should be instrumental in making the coming year a standing one for the association.

**Dr. Harald O. Dyrenforth**

the Conference. He introduced Bill Gibson, Douglas Aircraft Company, who spoke on "Worldwide Film Production" and Leon S. Gold, president of the independent producer company, Roundtable Films. Gold described the "Use of Pretesting to Determine a Potential Market for a Production."

Jack Long, Space & Information

Officers-elect of IFPA for the coming year (left to right), Robert R. Canon, Lockheed-California Company, executive vice-president; Vin Agar, W. A. Palmer Films, chairman, Northern California Chapter; Raymond Jaeger, Lawrence Radiation Labs, executive vice-president, Western Section; Dr. Harald O. Dyrenforth, Space & Information Systems Division, North American Aviation, president; James R. Swift, Hughes Aircraft, chairman, Los Angeles Chapter; Paul DeMello, Hughes Aircraft, financial vice-president; Michael Joseph Reese, Jr., General Dynamics Astronautics, chairman of the San Diego Chapter; and Roy L. Deets, Space & Information Systems Division, North American Aviation, editorial vice-president. Lt. Jack Barry, Eastern Section, was absent.

# IFPA JOURNAL

INDUSTRY FILM PRODUCERS ASSOCIATION, INC.

## Awards to Films and Individuals Highlight 6th Annual Conference

Membership Elects Dr. Harald Dyrenforth As President Heading a New Slate of Officers for the Coming Year

Systems Division, North American Aviation, gave a briefing on Project Apollo, using slides and motion pictures, and Lt. Colonel Alterio Gallerani, commanding officer of the 1352nd Photo Group, USAF, talked on "Aerospace Audiovisual Service."

**Present "Cindys" at Banquet**

The final night of the conference brought the traditional awards banquet and the long-awaited presentation of annual awards. As guest presenter of these honors, IFPA members and banquet guests had the pleasure of meeting the noted Broadway and Hollywood actor, Robert Strauss, well-known for his "badman" characterizations and his chilling performance in *Stalag-17* on the stage and screen.

Former officers were saluted

and new officers introduced at these banquet ceremonies.

A highlight of the ceremonies was the presentation of the Jay Gordon Memorial Award to Neal Kechn, national vice-president for sales, DeLuxe Film Laboratories. The award was named for the late Jay Gordon, a founder and past president of IFPA, and is donated annually by Allan Gordon, president of Gordon Enterprises (not related). It is presented to "the individual who has an outstanding record for long-term contributions to the art of filmmaking."

Neal Kechn merited the honor as the founder and conductor of the popular Calvin Workshops. While at that company he also founded and edited (for many years) the company's publication, *APERTURE*. This editing experi-

ence and talent has continued during his association with Deluxe General Film Labs where he edits the informative *REWIND*.

Many years of service as a writer-director of industrial and business films have added to the background of the man who has achieved this high sales executive post in the industry. "His outstanding contributions to the training and inspiration of our nation's young filmmakers, place Neal Keehn as a logical recipient of this award" read the citation which accompanied the Jay Gordon Award to this industry leader.

**Honors to a Past President**

Another high spot on the annual banquet program was the awarding of honors to past president H. Eugene Burson, who received a gold honorary life membership card in IFPA from another past-president and "founding father" Bob Gunther, North American Aviation.

The association also cited its much-beloved and tireless recording secretary, Elaine M. Dolnick. She received a special plaque from retiring national president James Wasson, Jr., as "a token of IFPA's gratitude for her meritorious services through the years."

**"Cindy" Plaques to Winners**

The winning motion pictures (and their happy recipients) of this year's "Cindy" honors were as follows:

In the category for "Public In-

H. Eugene Burson, Jr. (left), one of the founders and a past-president IFPA, receives gold honorary life membership card from Robert Gunther of North American Aviation, also a founder and past-president of IFPA.

Elaine Dolnick, the association's beloved recording secretary, received a special plaque in "gratitude for her services through the years" from IFPA's retiring president, James L. Wasson, Jr.

formation" films, two films tie for first in the opinion of the judges. *Angel by the Hand*, produced by Los Angeles County, brought a "Cindy" to Don Hoster. *USAF Aerospace 10th Anniversary*, produced by the 1352nd Photographic Group, USAF, was the other "Cindy" in this category. The award was accepted on behalf of the group by Alex Ciurczak.

**Best of Training Category**

In the "Training" category, *Sea Survival-Hygiene and Body Care*, produced by the 1365th Photographic Group, USAF, was the first award winner. The statuette was accepted by Jay Sedlik. Winner of second place honors in this

Judges of "Cindy" award films check their final selections (left to right) Dan Donner, independent producer and former IFA officer, Robert Dickenson, sales manager, Magnascope Corp., Julian Eby, independent producer, Norman Duncort, famed leader of American expedition which conquered Mt. Everest, and Joseph Mascelli, editor of ASC Handbook

ipient Ken Webb. Second place honors were accorded *SSI — Challenge of the '70's*, produced

by the Lockheed California Company. Betty Williams claimed the statuette on behalf of her firm

#### Technical Information Awards

First award honors in the "Technical Information" category went to the multiple-award winning film, *Speed and Heat*, produced by the Los Angeles Division, North American Aviation. James Driskell accepted the statuette. Second honors in this group were taken by *Electric Propulsion*, produced by Electric Communications, Inc. for NASA President Leon Viekmann of this studio received the citation.

In the final Awards category, for "Indoctrination and Orientation" films, the top honor was given *The Extra Pay Day*, produced by United Air Lines. The "Cindy" was accepted by United's Ira Thatcher. Second place went

Alex Sedlik, USAF 1365th Photographic Group, presents "Cindy" for "Sea Survival-Hygiene & Body Care" in Training Film group.

Alex Ciurczak, USAF 1352nd Photographic Group, presents "Cindy" to Betty Williams, Los Angeles County, who received "Cindy" for their Public Information

THE IIPA CONFERENCE REPORT

(CONTINUED FROM THE PRECEDING PAGE 45)  
to the Sandia Corporation's motion picture, *Wherever You Go*. Charles Cockerleas claimed the plaque award on behalf of his company.

Leon Vickman, president, Technical Communications, received second award for his NASA film, "Electric Propulsion" in the "Technical" category.

Charles Cockerleas accepts citation for Sandia Corporation's film "Wherever You Go" which won second honors in "Indoctrination & Orientation."

Individual Emmy award went to Robert Hecker for writing screenplay of "Angel by the Hand," recently produced for County of Los Angeles.

Gerry Hibbard, of North American Aviation, received a citation for scenes used in the award-winning motion picture "Speed and Heat."

# IT'S ALWAYS NOW

The Prudential's Anniversary Film  
... a Story of People With Purpose

IT TAKES 49 MINUTES to tell this story of one company, 55,000 people and the millions of lives affected by them. The company: the Prudential Insurance Company of America. The people: the employees of Prudential, from home office clerk to sales agent to investment analyst. The lives: the millions of families and individuals for whom Prudential has come to mean the foundation of a better life.

Henry Strauss Productions, Inc., of New York City, has put together a motion picture that translates the statistics of "bigness" into the dramatic incidents which are, after all, what the insurance business is all about. Struggle, romance, humor; hopes and dreams for the future; they're all in *It's Always Now* ... and all are a part of the workaday world of 55,000 Prudential employees.

### Based on Experiences of Policy Holders

This black and white motion picture is based on three case histories which are composites of the millions which comprise Prudential's list of policy holders. They show the involvement of the company and its personnel — not only in the lives of individuals, but in the communities of which they are a part.

Carefully blending the *cinema verite* technique with recreated dramatic vignettes, this unique film succeeds in being vividly real. A modest life insurance policy is seen to become the lever with which a sympathetic Prudential agent manages to lift a family from near despair.

A mortgage loan engineered by Prudential representative plays an unwitting but humorously effective role in a romance that appears to be getting nowhere. Finally, an elderly manufacturer, with some helpful Prudential advice, forges a new beginning out of a situation that seems to be pushing him, unwillingly, into retirement.

### A 90th Birthday Present to Its People

As a kind of a 90th anniversary present to itself, Prudential's decision to portray its daily

Director Robert Wilmot (left) discusses scene for Prudential film "It's Always Now" with Lt. Van Rosten, Michael Higgins, members of cast.

life via the medium of the motion picture proved to be a good one.

Mindful of the thousands of faces a company the size of Prudential must necessarily show in the course of its manifold activities, the Strauss film still manages to convey a unity of function, singleness of purpose, that makes each of those 55,000 jobs important ... and rightly so. Tying together these incidents are montage sequences showing the administrative complex required to bring order and direction to the huge enterprise that is the company.

### Drama in Ordinary, Romance in Routine

Shot on "location" at Prudential offices and skillfully edited, the footage is integrated into the film in a way that brings drama to the ordinary, romance to the routine. For behind the mountains of paper and miles of electronic tape are always people, ... people with purpose, people with pride in their daily tasks.

This is the Prudential story. In 49 minutes it tells, simply and honestly, about men and women doing a job. More than that, it reflects the results. As producer Henry Strauss says: "It is often difficult for an individual, doing what many other individuals are also doing day after day, to think of his role as important and dramatic. But it is — especially at Prudential". *It's Always Now* proves his point.

"You should have seen her face when I told her she'd get a check for \$2,000." Thomas Carlin and Patricia Bosworth in a scene from the picture.

Actual company offices were used for the 90th anniversary picture as well as special sets built at Strauss Productions' New York studios.

# AudioVisual Equipment TradeFair

Today's LATEST and BEST for Projection

DESIGN & ENGINEERING PROGRESS in all types of projection equipment appears to be achieving a long-sought business and industry goal of *greater individual, personalized use* of these sight sound tools. To paraphrase, it's now easier to achieve the "one-man, one show" objective, to reach smaller groups of key decision-makers with today's lighter, brighter, automated projectors. Paradoxically, familiarity with these new tools is bringing more multi-screen presentations to larger audiences, often involving a complexity of motion picture, slide and filmstrip sequences, cued and controlled by electronics. The cardinal rule remains: *specify proven quality and assured service on all your equipment purchases.*

"Pageant" 16mm sound film projector.

## Kodak Puts Quality into "Pageants"

Eastman Kodak "Pageant" line of sound projectors features a unique, fully-transistorized sound system. There are *no* electronic tubes, no fragile photo cells or lamps. Engineering quality was carried throughout, into sound power and fidelity. "A-V" models also have single-lever controls and, because they are transistorized, no waiting to "warm-up" before putting to action and images on screen.

## With AV-400: the Show's on the Road

In 10 seconds, the Fairchild AV-400 continuous 8mm sound film projector is ready to show up to 20 minutes of color film. This 17-lb. transistorized portable projector uses a continuous loop cartridge, never needs rewinding. Good reasons why thousands are now in use.

The company's Mark IV and Mark V projector models (also 8mm continuous) use the MoviePak cartridge system—if you have to select various pictures in the field. Also fully-automatic, they put images "on screen" in seconds.

## Tru-Flector Lights Up Movie-Mite

The new Model LV-250 of the Movie-Mite now has the low-voltage, high performance and cooler Tru-Flector lamp as its primary light source. This 250-watt lamp is very bright and provides 100 hours of longevity. Other Movie-Mite features remain unchanged, with evolution rather than revolution the maker's maxim. It's also budget-priced and very compact for field use (8" x 12½" x 15½"). Weight: 32 lbs. LV-250 is a single-case model with good film transport and film protection.

B & H "556" Specialist Autoload projector

## Powerful Amplifier, Matched Speaker for Specialist Autoload Filmsounds

When it's a *big*, important show, consider Bell & Howell's Model 556 in the Specialist Autoload line of 16mm sound motion picture projectors. It has a powerful 10-watt amplifier with a matched 12-inch Orchestricon speaker available for extremely high-fidelity sound reproduction. The Model 556 also has all the other features of its line, including 3-second automatic threading. Controls are conveniently located on a vertical panel; 2" f 1.4 lens is standard on the Model 556.

Movie-Mite's new Model LV-250 projector

Technicolor Model 600 8mm Console viewer

## Technicolor's Model 600 Console for 8mm "Instant" Film Cartridges

Slip one of the Technicolor 8mm "Instant" silent film cartridges into that company's new Model 600 Console Motion Picture Viewer and the show's on. No darkening of rooms. The Viewer has three controls but only the on-and-off button will be frequently used. Two other controls provide fine tuning: the picture framer and a focus control.

Viewer's special mirror system is another feature. It uses three optically-perfect front-surface mirrors to "fold" the light beam within the housing, giving the effect of a long projection throw on its self-contained screen.

Point-of-purchase use of "Instant" films is at hand: check Technicolor's 8mm Automatic Display Projection system (pictured). It has a new wide-angle lens and a 50-hour lamp.

Above and below: Technicolor's 8mm Automatic Display Projection system in two operating positions.

# AudioVisual Equipment TradeFair

PROJECTING THE SOUND MOTION PICTURE:

Movie-Mate: 16mm "Convertible" Projector

## The 16mm Movie-Mate Is Convertible

The rear-screen motion picture projector is widely used for display and exhibit presentations. Movie-Mate Corporation's Movie-Mate 16mm "convertible" rear-screen model takes that need into account by providing the machine with the low-voltage, Tru-Flector lamp. This maker notes: "other benefits include longer lamp life and cooler operation, most desirable for continuous projection situations." Literature is available. •

## Jayark-8: a Cartridge-Load Repeater

The Jayark-8 is a recently-introduced portable, self-contained and cartridge-loading repeater type 8mm sound motion picture projector. Features include: 11 1/2-inch built-in non-reflecting rear screen; 7.5mm f/1.4 coated lens; 150-watt pre-focused lamp. Amplifier is solid-state type, completely transistorized and replaceable as a "plug-in" unit. Audio output: 3 watts, R.M.S.

Jayark-8 operates at 24 frames-per-second, using 8mm magnetic sound film, with a 35 frame sound-to-picture separation. Total weight, 16 lbs. Height: 13". Cartridge capacity: 2 to 28 minutes b&w; 24 min. color. Continuous operation; automatic cue for cutoff. •

Jayark-8: an 8mm Repeater Sound Projector

## We Call Them Sound Slidefilms

Highly Effective for training and selling, the sound slidefilm has been further advanced by engineering and design improvements. Lighter, more versatile models from such well-known makers as DuKane, Execugraf, LaBelle Industries and Viewlex stress portability; the battery-operated models go into action within seconds. Cartridge-load and "lever-action" picture change are noteworthy. •

## "Courier" Has Its Own Power Source

Business users have found LaBelle's lightweight, battery-operated Courier a fine instrument for field or plant shows. Weight: only 13 lbs. This tape sound filmstrip projector handles up to 10 showings per day from a single battery charge (recharge overnight). The snap-in loading of both tapes and 35mm filmstrips make it trouble-free for the salesman, demonstrator or a training director. Entirely self-contained with screen within its attache-type carrying case. •

Self-contained DuKane A-V Matic projector

## Good Design Plus Engineering Quality Are Features of DuKane's "A-V Matic"

The DuKane Corporation's A-V Matic sound (on disc) filmstrip projector was enhanced in design by the wood vinyl cover of its durable metal case. But beneath that sturdy exterior there's also engineering quality. Features: fast-loading operation (auto or manual) bright image and continuous picture focus.

## "Lever-Action" for Picture Changes in the Budget-Priced "Mite-E-Lite"

Another DuKane product is that company's newly-designed Mite-E-Lite sound filmstrip projector in the budget-price range. Flip the "lever" for a picture change while frame and focus holds steady. Features include powerful cooling system to prevent film damage and increase amplifier and tube life.

There's a built-in screen inside the cover of the vinyl-covered carrying case; prefocus high-intensity lamp gives a brilliant picture image. A single knob controls the lamp, film and phono motors and sound level. Filmstrip threading has been made simple; after the "lever-action" helps the user put on a truly professional a-v presentation.

DuKane "Mite-E-Lite" for sound filmstrips

## The Versatile "Executive" Model 303 Combines Filmstrips With Taped Sound

The Execugraf Corporation, makers of several tape sound/filmstrip projectors, have featured a new "Executive" Model 303 design which is highly versatile. The 303 contains an automatic drop-in film cartridge with up to 100 35mm picture frames synchronized with its Fidelipac tape cartridge for instantaneous slide/tape presentation with inaudible automatic sequencing.

Sound tape is continuous loop; interchangeable film cartridge can be reversed to any picture in seconds. Presentation can be stopped at any point to insert a new film cartridge without further synchronization.

500-watt light source puts bright image on 10 x 7 1/2-inch rear-projection screen; a flip of switch provides for large screen projection. Solid state electronics are a construction

New "Executive" Model 303: from Execugraf Corporation. Rear projection feature; light (13 lb.) weight has real appeal for the men in the field.

## Slide and Filmstrip Projectors Automated and More Flexible

FILMS AND FILMSTRIPS have been automated; there's random-access to all slides; dissolve-control and synchronization elements as well as "auto-load" threading basic filmstrip medium.

In addition to its effective dissolve control mechanism for Carousel slide projection (see picture at right), Eastman Kodak has introduced new A-V 900 Carousel model weighing 10 1/2 lbs. It has a 2,000 hour motor. The 900 also has complete remote control and automatic operation. It uses a 500-watt DEK lamp and offers a wide choice of lenses: 3", 4" f/3.5; 7" f/3.5; or 4" to 6" f/3.5. Other models are available.

# AudioVisual Equipment TradeFair

Kodak Carousels with the Dissolve Control.

### Project Filmstrips With the Autoload

Bell & Howell's Specialist Autoload filmstrip projector had a fine first year in the field. Pre-loaded tear-drop shaped cartridge holds the filmstrip until it is threaded automatically through the projector by means of a remote control button or a winding crank (according to model selection).

The Autoload filmstrip projector will also accept 35mm (standard or single-frame) slides either singly or in a B & H Semimatic changer. Model 745A (5-inch, f/3.5 lens) has a 500-watt reflector lamp; other models with a f/2.8 lens and 750-watt reflector lamps. Open aperture, jet-stream cooling are features.

Specialist Auto-Load Filmstrip Projector.

### Miller's Latest in the Selectroslide Line

Miller & Sauppe Selectroslides are in use throughout industry and for many top-flight permanent installations. This maker's line includes the Model SL X-750 (in the picture); Model SLT-750 projector has a new control shown first this summer. The company has also introduced a new two-channel Remote Control System and a Universal Assembly for rear-projection applications. Technical data is available.

Model SLX-750 of the Selectroslide line.

### HPI Introduces the "Control-A-Show"

Synchronized tape sound combined with the versatility of 2 x 2 slides (which dissolve smoothly and automatically) are key features of Hudson Photographic Industries' Control-A-Show mechanism. Here's what it provides:

Images of one projector dissolve into the images of its matched counterpart without disturbing black intervals or white flashes.

Sound from a stereo tape recorder is synchronized with the dissolving image changes.

The touch of a single button starts the completely automatic, tape-cued slide dissolve program. Carousel Models A-V 900, 800 and 700 may be used without modification; other remote control projectors require only minor lamp rewiring. Control-A-Show also can be used without a tape recorder for manual, repetitive or "live" commentary. Entire unit weighs only four pounds.

### Television: a Tool for Industry

INDUSTRY'S USE of closed-circuit television for internal communication interlocking its plants and offices with sight/sound networks, has made some noteworthy strides. This year, the unveiling of new low-cost, slow-moving videotape recorders from such makers as Ampex and Sony will lead to expanded use of television. New video recorders deliver good images; hooked up to vidicon cameras or film chains, they widen the programming opportunity. Closed-circuit networks can deliver relevant news, promote safety, improve employee relations and serve wide range of similar uses.

New Sony Videocorder uses slow-moving tape.

### Tele-Beam Large Screen Television Projector System Is New at Kalart

There's a real "big picture" potential in the Tele-Beam (large-screen television projection) system recently acquired by the Kalart Company. This video signal projector throws sharp, bright images (up to 8 x 12 feet) on a screen, using "off-the-air" VHF or UHF broadcast sources or plant closed-circuit camera or videotape recorder signals.

Projector head and control unit (see picture) are portable; head can be ceiling mounted for either front or rear projection and remotely controlled from up to 400-feet. Acquired by Kalart in June, Tele-Beam will widen the business application of video programs.

Tele-Beam: big screen television projector.

The HPI Control-A-Show mechanism in a Carousel and a stereo tape recorder.

# AudioVisual Equipment TradeFair

The Wilson Model 2200 Overhead Projector.

## Overhead and Opaque Projectors Are Getting Brighter, Lighter to Carry

Companies, large and small, have learned to use transparencies for a wide variety of internal use: corporate meetings, training, promotion, etc. These users of overhead and opaque projectors are benefiting from lighter weight models such as the General Aniline Porta-Lite and Beseler, Buhl overheads.

One maker, H. Wilson Corp., has also put 2200 lumens of light on screen from its new model 2200 overhead projector. This 16½ lb. overhead uses quartz-iodine light source to get even distribution all over the image. No hot spots or dull edges to the picture.

Coolness of operation is another trend in this type of equipment. Moving the lamp to the rear of the case in a wind tunnel housing solved heat problem on the Wilson 2200. Heat generated by the lamp is immediately carried away by the machine's powerful jet air stream.

Da-Lite's Model V A-V projection screen.

## Helping Business Get the Picture

There's also overhead and opaque projection equipment to consider for business and industrial needs; new models of projection screens are available. Two items on this page are related tools for audiovisual production.

Polacoat rear-projection screen installation in a U. S. Army training and presentation facility.

## Polacoat Rear-Projection Screens Deliver Bright Image in Lighted Room

There are significant advantages in the use of rear-projected pictures, especially when rooms may be kept *lighted*. Putting the equipment behind the screen also concentrates its operation and control, avoiding distraction. But it takes the *right kind* of rear-screen projection material to handle these images, keep the picture bright and sharp at all angles.

Such installations are persuading the user of rear-projection equipment to specify permanent Polacoat Lenscreen panels. This type of panel can be made in the in-wall type sizes up to 10 feet high and 22 feet long. For smaller training room situations, popular Lenscreen sizes range from 6 x 12 feet up to 8 x 16 feet. Larger sizes are made on ⅜" or ½" thick plate glass. The body of the glass provides complete isolation of the projection area.

There are also Plexiglas rigid plastic rear screen panels and tough elastic flexible Lenscreen materials for lace and grommet mounting. Write Les Heath at Polacoat, Inc., Blue Ash, Ohio for technical data on Lenscreen.

## Improved Surfaces, Easier Operation for Today's New Projection Screens

In the field, today's (6-second) pushbutton opening tripod screens, like the latest Da-Lite Model V A-V, really help. Da-Lite features a White Magic, Chemi-Cote glass-beaded surface which is noted as providing brilliant color reproduction even at very wide viewing angles.

Other models of note: the Electrol, a permanent-mount screen for electric operation and a full range of sizes for other tripod, ceiling, and wall mounts. Radiant Manufacturing Corp. has three types of screen fabrics for an equal number of tripod models: Microcollect (fine glass beading); Velvet White or Lenticular Optiglow may be specified, as needed.

Polaroid's MP-3 Industrial View Camera.

## The MP-3 Industrial View Camera Has Wide Range of Applications

Polaroid's multi-purpose MP-3 Industrial View camera converts instantly from making on-the-spot Polaroid Land prints and transparencies to shooting conventional 4 x 5 color and black-and-white films. This completely self-contained unit features five available interchangeable lenses and shutter combinations for a wide range of industrial and technical applications, including small object photography, photomicrography, chart copying, etc.

## A New 35mm Slide-Filmstrip Stand

Since the IPEX show, Sickles Sales and Service (Scottsdale, Ariz.) has won wide acceptance of its Circle S Slide-Filmstrip Stand. The versatile 35mm camera with 80mm compound lens will print quantity runs of slides (automatically); create filmstrip masters, and has reflex viewing, projection focus and framing, single or double frame and other features. Camera can reduce a 30" x 40" image to 35mm. Write for technical literature.

Below: Sickles' Circle-S 35mm slide-filmstrip stand is meeting wide acceptance among producers.

## U. S. Manufacturers of Projection Equipment and Their Product Lines

**American Optical Co.,** Instrument Div., Eggert & Sugar Rds., Buffalo, N. Y.  
Products: Overhead Delineascope and Opaque Delineascope; slide projector.

**Arriflex Corp. of America,** 257 Park Ave. South, New York, N. Y. 10010.

Product: Siemens Double Sixteen 16mm optical-magnetic sound projector.

**Audio-Sell,** 311 E. Liberty, Ann Arbor, Michigan 48106.

Products: 8mm sound equipment; 35mm sound equipment; pulsing units and tape playback equipment.

**Audio-Visual Research, Inc.,** 205 E. Kingsmill St., Pampa, Texas.

Products: Rear-projection cabinets, universal rear-angle lens to accommodate all projectors.

**Bell & Howell Photo Sales Co.,** 7100 McCormick Rd., Chicago, Ill. 60645.

Products: 16mm auto-threading Filmo-sound projectors; auto threading filmstrip projectors; 16mm cameras.

**Charles Beseler Co.,** 219 So. 18th St., East Orange, New Jersey.

Products: Salesmate automatic sound slide-film projectors; overhead and opaque projectors, slide projector.

**L. A. Bohm Co.,** 3525 W. Peterson Ave., Chicago, Illinois 60645.

Products: Sawyer Roto Show projection cabinet; Eumig Mark "S" 8mm sound projector.

**Buhl Optical Co.,** 1009 Beech Avenue, Pittsburgh, Pa. 15233.

Products: overhead projectors and special wide-angle projection lens.

**Busch Film & Equipment Co.,** 214 So. Hamilton, Saginaw, Michigan.

Products: Audio-visual projection systems and continuous self-contained 16mm sound projectors.

**J. O. C. Industrial Div. of Industrial Timer Corp.,** 23-53 Steinway St., Long Island City, New York 11105.

Products: Rotator portable automatic projectors; filmstrip and slide projectors, including point-of-sale projection equipment.

**Da-Lite Screen Co., Inc.,** Box 629, Warsaw, Indiana 46580

Products: Electric and manual screens in all standard dimensions; larger sizes and special installations to order.

**Decision Systems, Inc.,** 1490 W. Tryon Ave., Teaneck, New Jersey.

Product: DSI Dial-A-Slide random access projector.

**DuKane Corporation,** St. Charles, Ill.

Products: sound slidefilm projectors, including Mite-E-Lite, A-V Matic, Vista-Sell cabinet model and filmstrip viewers.

This useful source listing of the principal U. S. manufacturers and distributors of projection equipment supplements the preceding Tradefair pages where many of these products have been reviewed. •

**Eastman Kodak Co.,** 343 State St., Rochester, N. Y. 14650.

Products: 8mm, 16mm and 35mm projectors; Carousel slide projector; processing equipment, cameras, etc.

**Electronic Audio-Visual Devices, Inc.,** 8022 N. Monticello Ave., Skokie, Ill.

Products: Port-A-Matic Sound 8, rear-screen 8mm repeating sound projector.

**Execugraf Corporation,** 113 N. San Vicente Blvd., Beverly Hills, Calif. 90213.

Products: Executive Model 303 front screen and wall projector with tape sound, filmstrip and sound tape in cartridges; Porta-Viewer Model 101; Counter-Salesman, Model 200, for continuous point-of-sale use.

**Fairehild Camera & Instrument Corp.,** 221 Fairehild Ave., Plainville, N. Y.

Products: 8mm repeater sound motion picture projection equipment, including AV-400, Mark IV, V (cartridge-load) repeater projection models.

**Genarco, Inc.,** 97-04 Sutphin Blvd., Jamaica, New York 11435.

Products: 3,000-watt slide projector and electric slide changers.

**General Aniline & Film Corp.,** 140 W. 51st St., New York, N. Y. 10020.

Products: Porta-Lite overhead projector and accessories.

**Graflex, Inc.,** 3750 Monroe Ave., Rochester, N. Y. 14603.

Products: Graflex 16mm sound motion picture projection equipment; sound filmstrip (slidefilm) projectors, etc.

**Hudson Photographic Industries, Inc.,** So. Buckhout St. and Station Road, Irvington-on-Hudson, New York.

Products: Group-Show, Solo System and Control-A-Show projection accessories and folding rear-projection screens; desk-top projection equipment.

**Information Machines, Inc.,** 470 E. St. S. W., Washington, D. C. 20024

Product: self-contained rear projector.

**Jayark Instruments Corp.,** 733 Third Avenue, New York, N. Y. 10017.

Product: Jayark-8 sound motion picture projector.

**Kalart Company** (Kalart Victor), Hultenius St., Plainville, Conn. 06002

Products: 16mm sound motion picture projectors, including rear-screen "repeater" models; 35mm filmstrip projectors; Soundstrip system; and Tele-Beam, large screen television projector.

**LaBelle Industries, Inc.,** 510 S. Worthington St., Oconomowoc, Wis. 53066.

Products: Courier, a battery-powered sound slidefilm projector; Tutor and Maestro sound filmstrip equipment.

**McClure Projectors, Inc.,** 1122 Central Ave., Wilmette, Illinois.

Products: sound slidefilm projection equipment, portable speaker's lectern.

Products: overhead projector; mobile rear-projection cabinet equipment.

FILM/TAPE PRODUCTION EQUIPMENT & SOURCES WILL BE REVIEWED IN AN EARLY FALL TRADEFAIR SECTION

# THE MANAGEMENT FILM GUIDE

These brief listings of current and useful films for management and supervisory use (with sources) initiate a continuing feature:

## MOTION PICTURES

**Critical Path** (16 min) Color. Purchase: International Film Bureau. \$135. Rental: \$12.50.

- Illustrated by a simple example, the building of a gas station, this film is designed to demonstrate an efficient technique used to plan, schedule and control the many operations necessary for on-schedule project completion. Most valuable on large, complex projects but the logic and methods can be applied beneficially to simple projects and to almost every industry.

\* \* \*

**How Good is a Good Guy?** (22 min) Purchase: Roundtable Films. Black & white: \$140; color: \$240. Weekly rental: Black & white: \$25; color: \$45. 3 day preview: Black & white: \$5; color: \$15.

- Designed to strengthen leadership, this film's purpose is to develop awareness and understanding of the responsibilities of a leadership position. Primary focus is on hidden problems caused when supervisors are more concerned with their own needs than with the needs of their men and company.

\* \* \*

**Imagination at Work** (22 min). Purchase: Roundtable Films. Black & white: \$140; color: \$240. Weekly rental: Black & white: \$25; color: \$45. 3 day preview: Black & white: \$5; color: \$15.

- In an original and entertaining manner, this film illustrates how to overcome the most common obstacles to individual creative thinking and dramatizes the application of the factors which psychological research has shown are necessary for the creation of new ideas. May be used in leadership, management, engineering and sales training programs as well as in courses dealing with industrial psychology and design.

**Man, the Manager** (14 min) Color. Purchase: Henry Strauss & Co. \$195 including study booklet and discussion guide. \$250 includes film, three case histories and supplementary study material. 3 day preview: \$15, applicable to selling price.

- A cartoon film which demonstrates with wit and humor, the basic principles of management. Presents the problems and procedures underlying today's modern management techniques. Backing up main ideas of film, three live-action case histories offer realistic situations in which a specific management principle has been ignored much to the distress of those involved.

**Manager Wanted** (29 min) Purchase or rental: Roundtable Films.

- Story line explores questions of concern to executives concerned with the selection of supervisors and executives and their upgrading, such as why men of real ability often fail to make the grade as managers; how does a man come to "feel like a manager, want to become one?; how much responsibility does a man have for the development of his replacement?

\* \* \*

**Pattern for Instruction** (22 min) Purchase: Roundtable Films. Black & white: \$140; color: \$240. Weekly rental: Black & white: \$25; color: \$45. 3 day preview: Black & white: \$5; color: \$15.

- This film carefully relates the steps in job instruction training to the principles of learning. Not only teaches what every supervisor should know about instruction techniques, it develops a positive attitude toward the supervisor's training job. Designed for use with new supervisors or as a review of the JIT program. Valuable to any type of training group regardless of business or activity.

\* \* \*

**Who Wrote That?** Loan: Association Films.

- As part of its campaign to improve business letter writing, Connecticut Mutual Life Insurance Company has released this useful and entertaining film to the general public. Pelican Films has combined live action in a typical business office and animation to get the point across.

## SOUND SLIDEFILMS

**The Executive Development Series: Evaluation: A New Integration of Management Theory; Self-Analysis for Executive Success; Your Inner Dynamics as a Communicator; New Frontiers in the Motivation of Others** (20 min sound slidefilms) Color. Purchase: Executive Development Inc. Preview: no charge.

- Each film in this four-part series management orientation program provides deep insights into vital management theory, illustrates dynamic applications. Each program session includes extensive collateral material.

**Handling Grievances** (sound slidefilm), one of series, "Supervisor Training on Human Relations." Purchase: Rocket Pictures.

- Designed for the Supervisor — key man to explain and clarify company policies. In this filmstrip he sees conditions which breed grievances and slowdowns; what can be done to avoid or correct them.

**Induction and Job Instruction** (sound slidefilm), one of series, "Supervisor Training on Human Relations." Purchase: Rocket Pictures.

- How to impart instruction in a systematic, organized manner; how to stir the new employee's interest; how to develop a conscientious effort toward superior performance are among the subjects pictured.

\* \* \*

**The Supervisor as a Representative of Management** (sound slidefilm), one of series, "Supervisor Training on Human Relations." Purchase: Rocket Pictures.

- This film demonstrates practical methods, intensively tested and proved effective, for building better two-way communication between management and employee.

\* \* \*

**The Supervisor's Job** (sound slidefilm), one of series, "Supervisor Training on Human Relations." Purchase: Rocket Pictures.

- Places emphasis on careful induction of new people, precise delineation of job requirements and clear job instruction. Results in better work, reduced employee turnover, closer cooperation.

## Sources of Management Films Listed on This Guide Page

Other sources of available films for management programs will be provided in subsequent editions. This continuing Film Guide Library service will cover such important sources as the Bureau of National Affairs, Industrial Education Films, The Jam Handy Organization, Modern Talking Picture Service, and others. •

## Problems of Negro Youth in Unsparring Film "I'm Sorry"

The Ecumenical Film Foundation has released its first motion picture which dramatically depicts the cruel problems faced by Negro youth in slum areas of big cities. It is designed for use by humanistic and educational groups. The film was made, by Courtney and Blaine Hafela, under grant from several denominations, ecclesiastical groups and individuals.

*I'm Sorry* is the story of Gene, an older teen-age boy, living in the slums of Jersey City — could be any city. It isn't a political picture, it rudely and honestly brings you into the life in the big ghetto. But . . . it is a positive picture, one likes and respects Gene as he faces the world to be a man in spite of the world would emasculate him. Issues everywhere, his home life with mother and little brother, the pressures of joining the gang, the pressure of escape into early life, the pressure of trying to find a way without being educated, the pressure of black chauvinism, the doubts about Mr. Charlie (the white man's) Church.

Hard hitting and pungent stars Rob Jackson, a young actor who normally thrives on Shakespeare. His portrayal of Gene comes off the screen like a punch in the stomach. Realism with all the pent-up feelings of four hundred years.

It is a story with no happy ending. Gene is left with the plea to the Church and the racist. Will he go the way of love or hate? The kind must decide.

16mm prints of the 30-minute b/w film are available at \$1.00 each from Communications Associates, Inc., Bernardsville, N.J. Rental rates on request.

\* \* \*

## American Cancer Society Says Use "Sense in the Sun"

An elderly fisherman, who for years has worked long hours in the sun, develops a sore on his cheek. When it does not heal, he does not delay in consulting a physician.

Because of his early action, the sore is removed by a simple surgical procedure in the physician's office. Laboratory tests confirm that it was skin cancer.

This alert fisherman is the central figure in *Sense in the Sun*, a new film released by the American Cancer Society. It is intended for public showing and is available through local ACS offices.

**This new  
KODAK CAROUSEL  
Universal Slide Tray  
accepts all standard  
slides...even your  
thick glass ones**

Kodak has just developed a new universal slide tray for all models of the KODAK CAROUSEL Projector.

This new tray holds 80 slides. The compartments are roomy enough to accept any slide up to .125 inches thick. The slides drop down as easily as ever. No jamming. No "popping." Nothing but smooth-as-silk operation.

**New projector models with improvements**

Now KODAK CAROUSEL Projectors are lighter and more compact . . . quieter and slimmer. And new models offer a variety of optional features ranging from completely automatic operation to remote manual control. Model AV-900 is the newest of all . . . with components designed for continuous month-after-month unattended operation.

Auxiliary equipment includes a programmer that lets you synchronize slides with sound from any standard tape recorder. A dissolve control lets you dissolve dramatically from one slide into the following one. Special lenses let you meet a variety of projection needs.

May we tell you the complete story? Our new bulletin on the CAROUSEL Projector, Model AV-900; provides details on the system and on auxiliary equipment for more effective slide presentations. Just use the coupon.

Machinist checks aperture plate for surface imperfections in a scene from "The Arriflex Story."

## THE ARRI STORY:

(CONTINUED FROM PAGE 41)  
sion (and a very conspicuous extension at that) of the company for which we are producing.

Our first obligation to that firm is to do a good public relations job among its employees, its customers and the world at large. We are engaged not only to produce a film to do this, but to gather good will for our client as we go along.

Without the good offices of Mr. Schutz and Mr. Bergmann of the Export Department, the help of Mr. Kaestner and Mr. Zeintl, the good will of Dr. Arnold and Dr. Richter, and the above-and-beyond-the-call-of-duty cooperation of hundreds of Arriflex employees the film could never have been made. We thank them all warmly, and hope that they in turn think kindly of the Kenneth Richters.

During and after the factory photography, which was completed during trip after trip to Munich while the factory was being rebuilt over our heads and under our feet, we were working at the job of getting the "Arri-In-Use" sequences.

This was part of the film that we and Paul Klingenstein thought would be duck soup. After all, think of the varied and fascinating ways the Arriflex cameras are used and the kinds of pictures they have made! Nothing, it would seem, could be easier than to enlist the aid of fifteen or twenty of the world's best and most imaginative film makers to collect the visual material needed: shots of Arriflex cameras in use, paired with "what the camera saw" shots.

Our around-the-world trip gave us the bare bones of this compelling sequence. We tried our best filming the Arri at work on the San Blas Islands off Panama and chilled our toes getting a sequence

of it at work in an experimental cold chamber in Tokyo. A sweltering crew on a Calcutta movie set, working at night, provided us with a studio Arriflex sequence in an exotic locale.

We also talked with a number of producers and left behind caches of raw stock with people who said they would photograph their Arris the very next time they went out. We got, from all this, one sequence, from Bill Kozan, in Panama.

I sympathize with every hard-pressed producer and cameraman with whom I left film, and take this opportunity to tell them all that if their consciences are still pricking about that Richter deal, forget it! If they still have our film, it is long since out-dated; if they used it for something else, we hope the stuff was good.

One shot in the film is a scene that someone gave Arriflex in New York a long time ago, but no one could remember the genius donor. Another sequence — the Cypress Gardens under water material — was shot twice for us by very patient people: the first lot of film was lost on the way to the lab.

Walt Disney Productions responded to our importunate requests for material from some of their releases, McDonnell Aircraft gave us a glorious end shot, as a print, but couldn't locate the matching original, and tried again.

Many producers went to a lot of time and trouble helping us. Many others tried without success to help us. We kept telling ourselves that the reason they were film makers whose work we coveted for *The Arriflex Story* was that they were the sort of people who were good enough to be very busy indeed. In the end, we got our "Arriflex-in-Use" sequences.

The project turned out to be extremely costly to us — in time, money and ulcers. I'm sure that Paul Klingenstein and Vic James, like us, often wondered while it was being born what ever had made it seem like a good idea in the first place. Knowing what we know now we wouldn't undertake making *The Arriflex Story* for twice the budget in time and money. But, on the other hand we wouldn't have missed doing it for anything!

### How to Obtain This Film

• *The Arriflex Story* is offered on loan without charge for screening anywhere in the continental U.S.A. to the following groups: Profes-

sional producers and cameramen, professional associations and affiliated chapters, institutions teaching motion picture production, Government Agencies and services concerned with motion picture

production. Please send for a film on your organization head directly from the Corporation of America, 200 Avenue South, New York, New York 10010.

## Previews of Useful New Factual Pictures

### "The Way I See It" a Useful Film for Supervisory Relations

Latest of the useful supervisory relations films available from Roundtable Films is a new "attitude training" motion picture which relates the effects and influence of perception on what a person hears, sees or otherwise senses.

The 23-minute b&w film is designed to stimulate open-end discussion on such questions as:

• the extent to which perceptual differences influence job performances;

• why people see themselves so differently from the way others see them; and

• how a manager can know what his subordinates think of him.

The film and an accompanying discussion leader's guide present a typical supervisor-employee situation where a conflict stems from perceptual differences. The differences in the film sequence lead to the questions, "Should I quit?" and "Should I fire him?" Within this context, the audience is prompted to discuss the meaning that this case poses for managers and supervisors of people.

The film was written by Richard Sanville and directed by Jack Denove, from detailed research by consultant Dr. Oliver Fowler, a clinical psychologist. *The Way I See It* is available in color or black and white for preview to purchase or to rent. Write: Roundtable Films, Inc., 321 S. Beverly Drive, Beverly Hills, Calif. 90212.

### Young Asthma Patients "Star" in Good Fund-Raising Picture

It is one thing to deal with normal, healthy youngsters in film production, even if they're temperamental. But it's quite another matter to work with children who are intractable asthmatics. That was the task facing producer Marshall Faber of Denver, Colorado, in preparing the 13-minute color motion picture, *Mommy, Save Me*, for the Children's Asthma Research Institute and Hospital.

Based on the life of a child who has entered the Institute for help, the film required the use of these children for all of its roles. So

Planning scene for asthma film.

Faber's production scheduled to be manipulated around treatment and therapy routine hospital shooting had been accomplished when hospital was at low-ebb. Extremely taken to see that the "asthma" neither overworked or

cited. Kyle Pence, chose to "lead" for the picture. Reaction admirably but very short for the youngster were, very short. Treatment sequences were spaced between shots to relieve

To emphasize the fact that asthma is a killer disease, Grunman, another patient at the hospital, played the role of the child who succumbs to the disease. He gave a convincing performance simulating a serious asthma

*Mommy, Save Me* was a certificate winner at the Children's Film Festival. But its key as a fund-raising vehicle for the Institute, through neighborhood

## "Love That Car" Uses Humor to Point Up Safety to Drivers

Nearly every second of the five-minute, 16mm color film featurette, *Love That Car*, will bring reminiscent chuckles to viewers of its many funny incidents. This brief but very pointed Parthenon film mourns the misadventures of eight motorists who learn the hard way "How to Drive Their Cars and Love Them."

Between the laughs, *Love That Car* delivers some very compelling safety motivation through its vivid visualization of the need for "heads-up" car care. Eight typical sequences feature Mr. Truesdale and his broken fan belt; Mr. Baxter and his stopped stop lights; Mrs. Baxter and her beat-out battery; the Joanna Jacksons and their mountain-road blow-out; Mr. Poppins and his sub-level brake fluid; A. H. Capella and his deferred tune-up (which, after stalling on the railroad tracks, he now won't be needing;) teenager Randy Wright and friend, and their leaky muffler . . . and a most unexpected victim of an empty gas tank.

Production was underwritten by the Public Relations Dept., American Oil Company. Their worthy objective seems to be to keep their customers alive by maintaining their cars in safe condition.

Prints of *Love That Car* may be purchased outright at \$32.50; a preview charge of \$5 is deductible from the purchase price. Order from: Data Films, 2625 Temple St., Los Angeles, Calif. 90026. Better yet, phone 385-3911, area code 213, to order that print now.

\* \* \*

## "It's the Top" Shows Use of Concrete Vermiculite Roofing

A functional new film "tool" is being made available by the Vermiculite Institute, Chicago, in a 16mm color motion picture which shows pumping and spraying techniques used in applying vermiculite on concrete roof decks.

Titled *It's the Top*, the film features on-the-job scenes as the material is applied on a variety of roof systems and irregularly-shaped decks such as the barrel hyperbolic paraboloid, etc. Mixing, placing and the physical properties of the concrete material are presented. Viewers share a tour of a typical plant which processes vermiculite ore.

The 18-minute film is available on free loan to relevant groups from Institute headquarters. •

## WIDE WORLD OF CURRENT SPONSORED PICTURES

The Norton Company's latest film "Adventures in Abrasives" involves not only scenes in and out of the company's plants but also aerial sequences. Pictured beside helicopter used in shooting are (l to r): John Dunleavy, Bay State Film Productions' cameraman; pilot Joe Green; Milton W. Sebring, manager, audio-visual services at Norton (producer); Clarence W. Daniels, Norton's superintendent of plant services; and Enfried T. Larson, editor of the company's technical publications, who assisted in direction.

## World View of Communications in "Beyond All Barriers"

A FAR-REACHING new Technicolor motion picture, *Beyond All Barriers*, will have its television premiere later this summer. Sponsored by the American Telephone & Telegraph Co., it dramatizes the new era of worldwide communications, reflecting a new dimension for civilization as it shows how modern science is breaking down old barriers of distance and time that have separated peoples, nations and cultures.

Produced by Larry Madison on extensive location journeys (three trips to distant lands and one trip around the world), the color film was shot in 35mm and will be available in both 35mm and 16mm color versions.

Egypt, Greece, India, Japan, Peru, Cambodia, Guatemala, Ethiopia and Nigeria are among the film's "distant places" where the air is filled with messages — with the sound of people communicating with one another.

The film explores deserted

temples and stone images deep in the Cambodian jungle; then climbs high in the Andean mountains to record scenes where adult Peruvian Indians take their weekly exercises in elementary reading via a radio program.

Over 4,000 years ago, Egyptian engineers built the great pyramids and other structures by which they have communicated with the future about their lives and times. Today, men struggle knee deep in mud in Thailand to raise a telephone pole which will bring the outside world to their remote villages.

Radio schools of the air, the telephone, television, instructional films and transistor radios — all these are reaching out and gradually changing the face of the world as they aid the peoples of under-developed lands. By dramatically pointing up the world's contrasts between the old and the new, the advanced and the primitive, this compelling film shows how the science of communication is helping backward people everywhere, even in "the distant, silent places" to an awareness of their role in the 20th century.

*Beyond All Barriers* features an original music score performed by Donald Voorhees and the Bell Telephone Orchestra. It is being distributed by Sterling Movies, U. S. A., Inc. •

## "The Seed and Sinew" on a New Turkish Steel Plant

Dramatizing the joint effort of the U. S. and Turkey in financing and building of a 500,000 ingot ton integral steel plant at Eregli, Turkey, Koppers Associates has just released an eight-minute color and sound picture titled *The Seed and Sinew*.

The brief film report shows people of both countries, government, industry and financial interests operating in the building complex. It was dedicated on May 15. Koppers Associates is a consortium formed by Koppers Company, Westinghouse International and Blaw-Knox, which shall have responsibility for the design and construction of the plant.

Free loan prints are available to relevant groups from the American and Community Relations Dept., Koppers Co., Inc., Koppers Building, Pittsburgh, Pa. 15219; Public Relations, Blaw-Knox Co., 300 Ave., Pittsburgh, Pa. 15201; Public Relations, Westinghouse International, 200 Park Ave., New York City.

\* \* \*

## Lehigh Shoe Turns on Lights to "Sell" Safety to the Worker

"There's nothing funny about a broken toe," notes the spokesman of a new 22-minute color film which is helping persuade industrial workers to use protective wear.

"But we have found that a more effective way to educate is to entertain," concludes general manager Ray Codrea of the Lehigh Shoe Company, "so we have to do that in our new picture *Safety Shoes, Positively Our Neglected Article of Clothing*."

The film combines sales pitch and safety in a humorous approach which features double-talk artist Al Kelly in an incomprehensible sales pitch for safety shoes. Kelly ends his monologue by throwing away both tradition and his demonstration shoe.

What follows is a series of vignettes in cartoon, straight stills and film clips, all designed to make the point that safety shoes are essential and that Lehigh is a good brand to buy.

Produced by Stars & Stripes Productions Forever, Inc., in cooperation with Lehigh's advertising agency, Hicks & Greist, the film is being shown by safety directors to their employees, as time permits. •

# F&B/CECO Slashes EASTERN RENTAL PRICES!

But price reductions are not the whole story at F&B/Ceco. We also offer:

Years ago there was a reason why Eastern Rental prices were much higher than those of the West Coast. The reason simply, that there was much more production in California, and equipment got more rentals—earned more money per year.

In recent years, New York and Florida have emerged as major film production centers. So, it makes sense to us now, that we can, at long last, reduce our rental prices to match those now prevailing in California.

Our new rental catalog, just off the press, reflects this new idea, so you will find hundreds of price changes, all lower!

We have also decided to apply some rules of logic to our new pricing system—and have corrected what we felt were inequities, and illogical pricing.

- 1 The largest stock of rental equipment in the world.
- 2 The best maintenance and repair shop in the country, insuring that you will get only top-notch, like-new equipment, always in perfect working condition.
- 3 Fastest and most efficient service anywhere, with plenty of equipment to back up any you rent and plenty of technicians to provide expert advice and immediate service.
- 4 Exclusive new equipment available nowhere else; BNC, NC and Standard Mitchell Reflex cameras, hospital-zone quiet 1500 amp generators, new helicopter anti-vibration camera mounts, exclusive new and accurate camera power supplies and remote controlled wireless sync systems.
- 5 Camera cars, location trucks, portable dressing rooms. Anything and everything for location shooting, plus the world's largest inventory of lighting equipment—perfectly packaged to travel.
- 6 And—at Myerberg Studios, Stage 54 West Inc. in New York and F&B/Ceco Florida Studios, as well as any other studios where the equipment is supplied by us, YOU PAY ONLY FOR WHAT YOU USE.

Clearly, your best deal is with F&B/CECO, INC.

If, for some reason you have not yet received your new F&B/Ceco Rental Catalog, please write or phone. It will be in the mail immediately.

Jerry Kovanda: sales v. p.

**Paillard Directors Confirm Four as New Vice-Presidents**

Directors of Paillard Incorporated have elected company executives as vice-presidents of Linden, N. J. firm. Lawrence L. Viarengo was named vice-president and treasurer; Jerry J. Kovanda has been slated vice-president and general sales manager of the Photographic Division.

Walter Braun is now vice-president for advertising and sales pro-

Walter Braun: advertising v. p.

motion and George W. Haag is vice-president and general sales manager, Hermes Division.

Kovanda was a regional manager in the Photo Division for three years before becoming sales manager in 1956. Braun has been associated with Paillard since 1959 as advertising and sales promotion manager.

**Lieberman to Head A-V Sales for Genarco, Inc., New York**

J. P. Latil, president of Genarco, Inc., Jamaica, N. Y., has appointed Earl Lieberman as the company's audio-visual sales manager. The new a-v executive was formerly products manager for Robins Data Devices, Inc. Genarco is a subsidiary of Robins Industries.

NEWS OF STAFF APPOINTMENTS AND INDUSTRY DEVELOPMENTS

**Filmack Appoints Siegel as TV, Industrial Ad Director**

Jerrold Siegel is now advertising director for the TV and Industrial Film Divisions of Filmack Studios, Chicago. In confirming the appointment, president Bernard Mack noted that Siegel formerly headed his own Chicago-based advertising agency.

**Kroll to Title, Optical Division, Consolidated Film Industries**

Leonard Kroll has joined Consolidated Film Industries' Title and Optical Division as assistant to manager Dale Tate. Kroll was formerly post production supervisor (since 1958) for Ziv, UA-TV and Rapier Productions.

**Parthenon Pictures Appoints Glazer as V.P. for Marketing**

Norman Glazer, former associate producer on Parthenon Pictures' AMPAC film program, has been appointed vice-president for marketing of the Hollywood-based production firm.

The new post, according to executive producer Charles (Cap) Palmer, carries special responsibilities on work for governmental agencies, including a current film, *Flaming Gorge*, for the U. S. Bureau of Reclamation.

**Four Join Staff at Filmex, Inc.**

Bert Cadwell, Chris Herfel, Stephen Kambourian and Rene K. Oulmann have joined the staff of

Filmex, Inc., at its New York studio.

Cadwell, prior to his position, was a television producer of two commercial film houses, Hill, Kacin and Heimann, Wyld Studios. He will be producer at Filmex.

Herfel, now a staff director, held a similar position at Klaeger Productions, Kambourian was also at Klaeger Productions is now a Filmex vice-president in charge of completion.

Oulmann was formerly head of his own firm, Arco Film Productions. He will be a producer at Filmex.

**Key Posts at VPI of Illinois to Bud Langhardt, Ken Drake**

VPI of Illinois' president Frank Olsen has named William B. Langhardt as general manager of the Evanston-based studio. He is a 20-year veteran of production operations for the Alexander Company, Colorado.

Also confirmed on this date was the appointment of Ken Drake as sales manager.

Ken Drake: VPI sales executive

be responsible for VPI operations throughout the midwest. He formerly headed the Chicago offices of Hanna-Barbera Productions, Hollywood, and has been production manager, producer, animation director as well as a national magazine photographer.

**Houtz to Direct Midwestern Sales, DuPont Photo Products**

Kenneth H. Houtz has been named field sales manager for the Midwestern district, Photo Products Dept., E. I. du Pont de Nemours & Co. He succeeds Edgar Kerrick, transferred to the company's headquarters at Wilmington, Del.

Houtz has been a supervisor at Du Pont's photographic products sales in Germany and Switzerland for the past two years. He is a native of Burnham, Pa. and joined the company in 1950 after receiving his B.A. degree in chemistry from Gettysburg College.

**MARKETING MEN:  
ENJOY  
A BIG AUDIO-VISUAL PLUS  
WITH  
LENSCREEN REAR SCREENS  
by POLACOAT**

16 mm. Cine-Educator by Busch

The advantages of rear screen projection in sales promotion, sales training, exhibits and displays are well established.

However, Lenscreen by Polacoat offers a valuable plus. The millions of tiny lenses on the surface of LENSSCREEN respond only to projected light. Lens response is unaffected by room illumination! So, with Lenscreen, your present projector can show sharp, clear pictures (even in full color) in fully lighted rooms.

You command greater attention. Your viewers take notes readily, assimilate faster, retain facts and sales points longer.

Eliminate the inconvenience and distractions occasioned by darkened rooms. Discover how only Lenscreens can let you enjoy the benefits of true "daylight" presentations. Reasonably, too.

Send for your free LENSSCREEN Idea Kit, today.

 manager for EUE Screen Gems,  
 commercials and industrial film  
 division of Screen Gems, Inc.

**NOW IS THE TIME! LET US COLLABORATE!**

**TO PRODUCERS OF FILMS FOR  
 U. S. COMMERCE AND INDUSTRY:**

U. S. industry is seeking effective ways to comply with L.  
 B. J.'s request for cooperation in meeting the "balance of  
 payments program." Now is the time to suggest to your clients  
 conversion of their films into multi-language versions for  
 foreign market operations.

Slight departures in story treatment and production — at  
 little extra cost — will make these films effective, accept-  
 able ambassadors abroad. Many U. S. firms are:

- ★ Boosting export sales and income
  - ★ Promoting license agreements
  - ★ Acquiring valuable facilities and mergers,
- and
- ★ Outselling their competitors

by increasingly using multi-language film versions which we  
 helped to produce.

*Let us collaborate to serve U. S.  
 commerce and industry better. He  
 profits most who serves best.*

### Kodak Hosts First of Series of Television Film Seminars

First full-scale version of a projected series of television film seminars, aimed to help TV station personnel to achieve higher-quality results in processing black-and-white reversal film, was held on June 17th in Hollywood by the Eastman Kodak Company. Programs are scheduled for 50 major cities.

Deemed "a working example of the marketing philosophy of Kodak" by one of Seminar's two hosts (Walter Farley, sales manager, Pacific Southern Region in Kodak's Motion Picture and Education Markets Division), the agenda included a demonstration of the new Eastman Tri-X Reversal, a film base designed to yield sharp, glare-free images under the adverse lighting conditions encountered by TV news cameramen.

Lectures, filmed presentations and discussion at the seminar were geared to help station technicians get maximum results from stations' own reversal film processing machines. Careful control of such variables as processing time, temperature and chemicals was stressed.

Vaughn Shaner, supervisor of sales and technical services in the region, was in charge of the technical sessions.

### Add to Studio Facilities. Staff at Turteltaub & Moss, N. Y.

Turteltaub & Moss, Inc., New York, has added studio facilities for "table top" photography as part of its continuing expansion program. (A projection and conference room, film editing room, art studio and art director were recently added.) The facilities are being used to film stills of combinations of three-dimensional art, objects, products, backgrounds and lettering for use in its slide shows, filmstrips, industrial shows, theatre trailers, TV commercials and motion pictures.

Robert Horrall, formerly at Creative Arts Studio, Washington, D.C., has joined the staff as production manager of all film projects. He will also be in charge of the new "table top" photography activities.

T&M Associates has been formed to handle the design and production of training manuals, meeting guides, take-home booklets and other collateral printed materials.

Graphic Varieties, Inc., a winner of many awards for its training

## along production line

films, has been re-activated by Stan Turteltaub and Jack Moss. The company was inactive for a period of two years. It will produce training programs and handle special assignments.

### Stage 54 West, New York City, Now Available Thru F&B Cecco

Another fully-equipped rental studio, Stage 54 West, Inc., at 421 W. 54th St., New York City, has been signed by F&B Cecco, Inc. It is the company's second collaboration in Manhattan, joining the previous arrangement with Myerberg Studios, Roosevelt Field, Long Island.

F&B Cecco is also operating its own studios in Hialeah, Florida. All of these operations are served by the company's large inventory of lighting, camera, sound and grip equipment.

### Larger New York Facilities for Pelican Films at 292 Madison

Pelican Films, Inc. has added an entire floor to its floor-and-a-half at 292 Madison Avenue, New York.

Sales and administrative offices have been moved to the new 24th-floor quarters from the 6th, thus making available new production, editing, screening and conference space on the lower story. Animation production, under Jack Zand-

er, executive vice-president, centered there.

### Rarig Presentation Service to Aid Business in Northwest

A veteran Northwest producer and distributor has established Rarig Presentation Services, Inc. Formerly operating the rental department of Rarig Inc. at 2100 N. 45th, East Washington, the new firm specializes in sponsored films, rental of visual equipment of all kinds, supplies operators and furnishes specialized presentation services national and regional sales organizations.

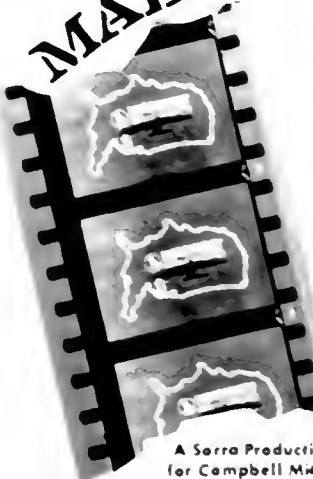

Mrs. Edith Rarig is president of the new Service company. The parent firm continues in the production and servicing of equipment for the production of motion pictures.

### Writer-Director Howard Bailey Moves to Winter Park, Florida

Free-lance screen writer and film director Howard W. Bailey, well-known in the industry as formerly located at Falls Church, Va., has announced a new permanent address in central Florida.

Bailey is now located at Winter Park, Florida and can be reached via A C 305, Midway 7-6. His mailing address is P. O. Box 718 in Winter Haven.

awaiting flights can watch free films at Tucson's Inter-air Terminal. Theater is operated jointly by Association of Atlantic Motion Picture Service; is open 12 hours daily.

### Travelers See Films in Tucson's Terminal Theater

Travelers with time on their hands between flights may fill their minutes by watching sponsor films free of charge at a small theater located in one of the air terminals across the country.

The small theater called the Travel Cinema has been set up on a permanent basis on the mezzanine level of the Tucson International Airport. The theater shows travel, sports and entertainment films provided by Association of Atlantic Motion Pictures. The programs are shown from early morning to midnight.

Operated by Atlantic Motion Picture Distributors, of Montreal, the theater's audiences are primarily business and the self-employed on business trips. Over 70% own stocks and 50% are college graduates. The theater in the Tucson International Airport is a paneled room with seats for about 75. As films are shown the sponsoring company is identified on a board near the screen. The sponsors whose films are shown in the Travel Cinema schedule are: American Airlines, Aspen Skiing Corp., Bankers Association, Newsweek, Sikorsky, Clark Corp., American Steel Institute, Connecticut Life, Council on Financial Education, and German Center.

Atlantic Motion Pictures and Atlantic Motion Picture Service expansion plans for more air terminal installations in the future.

### Canadian Pacific Film

"Canada" is the title of a new sound film recently add-

ed to the growing film library of the Canadian Pacific. The "moving panorama" of modern Canada was produced by Crawley Films Limited, Ottawa.

The film shows the country from five viewpoints: the land, economic development, transport and communications, Canadians and their heritage, and building for the future.

With the new title now in distribution across Canada, this sponsor's library includes 20 travel and resort films currently in circulation.

## Here's an exciting way to bring showmanship to sales meetings and presentations!

Da-Lite's new ELECTROLET® projection screen goes up and down (and out of sight) at the touch of a button. Add an extension cord and you can operate the Electrolet from anywhere in the room! Adds excitement and a "professional touch" to any sales meeting or presentation.

The ELECTROLET attaches easily to wall or ceiling. Plugs into any reg-

ular outlet. Operates trouble-free, year after year. Elegantly styled to match office and conference room decor.

Sound expensive? The 50" x 50" ELECTROLET is only \$54.95. Prices for the 60" and 70" models are just as modest.

Write for free color folder today. Da-Lite Screen Co., Inc., Warsaw, Indiana.

*Advertisers, Agency Execs Attend Premieres of "The World of Holiday" Aloft and at Sea*

HOLIDAY MAGAZINE took advertisers and agency representatives aloft and to sea to show its new editorial presentation, *The World of Holiday*. Premiere showings of the 30-minute color film-slide presentation were held aboard a TWA Starstream jet airliner in mid-June.

While images were projected on the plane's two wide screens, the magazine's ad director, Scott Kenyon, narrated over the cabin public address system. Sound was received on individual earphones of the plane's "in-flight" projection system.

Twin Eastman Kodak Carousel slide projectors beamed colorful scenes of tourist attractions throughout the U. S. and abroad, from the high Himalayas to the ski resorts of

*Advertising execs view "Holiday" scenes aloft.*

Colorado. The presentation takes its theme from the vivid "word pictures" of such Holiday contributors as Romain Gary, V. S. Pritchett, Laurens van der Post and Thomas Merton.

Editor Don A. Schanche told the viewers: "as part of the cultural explosion, Holiday strives to give its readers more pleasure and meaning from their leisure. We want Holiday to be a rewarding as well as a pleasurable experience, so we strive to cover travel from the purely intellectual aspect as well as the physical aspect."

Holiday promotion director Enfield Ford, who originated the presentation, notes that additional showings were to be given aboard the Holland-America liners S. S. Nieuw Amsterdam and S. S. Statendam as well as in major cities across the country. *The World of Holiday* was produced by Harry Pritchett.

## EVENTS IN SIGHT & SOUND:

(CONTINUED FROM THE PRECEDING PAGE 62)  
worthy comment at the recent spring meeting of the International Advertising Association in Paris:

"From a purely practical marketing point of view, dollars are not the key to advertising communication. *Ideas*, especially when couched in powerful consumer advertising messages, are."

Keep that in mind for the factual film.

\* \* \*

### *General Mills Ad Pioneer, Samuel C. Gale, Is Elected to Advertising's Hall of Fame*

The late Samuel C. Gale, for many years director of advertising for General Mills and the man who conceived the trade name "Betty Crocker" and who developed the "Breakfast of Champions" concept for that company's Wheaties cereal, was named to the Advertising Hall of Fame at the annual convention of the Advertising Federation of America, meeting in Boston on June 28.

Accepting the citation for his family was Sam C. Gale, Jr., customer relations executive for Capital Film Laboratories, Inc., Washington, D. C.

\* \* \*

### *Short Film on Racial Prejudice Earns Kudos for Robert Rosenthal; Wins Several Contracts*

☆ Robert Rosenthal, president of a new film production company in New York, has hit upon a unique way to create a most effective sample film of his company's work, which, at the same time, will pay for itself.

The film, *I Wonder Why . . .*, is a five-minute cinema version of the warm and appealing book by Shirley Burden on a particular form of racial prejudice. It won first prize in the documentary class at the recent National Visual Presentation Association competition. It has also been accepted for showing at film festivals in Cartagena, Cracow, Cork, Melbourne and Sydney.

More than that, it has won for its producers, Robert M. Rosenthal Productions, Inc., several contracts for sponsored film work, including an industrial film for Tel-Guard Company and series of TV commercials for Buddy-L Trucks and Eylure Lashes.

*I Wonder Why . . .*, which is narrated by Alexander Scourby and has original music by Don Elliot, has had some art film theatrical release. Deals are in the planning stage for much wider theatrical distribution in the fall.

Rosenthal came into the film industry from the University of Pennsylvania where he was so imbued with the motion picture as a means of communication that he submitted his senior thesis on film. He served in the armed forces in visual aids work at the Command and General Staff School, Army Pictorial Center, and as a director of 20 service films produced in France.

His associates in the new company are Fredric Abeles, who has been a director and editor on U.S.A. and Air Force films; Peter Salim, recently a theatrical production manager and assistant director to Nick Webster on a U.S.A. film; and Stephen Segal, a former director at the U. S. Army Pictorial Center. •

**Television Networks Step Up Color Programs;  
Coca-Cola Goes Color on All National Spots**

This column has been steadily predicting a tremendous surge in color television production and use, since early last year, when color set sales began to move into increasing thousands of U. S. households. This fall, all of the networks will feature color programming and television commercials will follow suit.

Beginning July 15, for example, all television commercials for the general consumer market for Coca-Cola will go multi-hued. Fred Dickson, vice-president for advertising and sales promotion for The Coca-Cola Company, says that the only spots to continue in monochrome will be some special market and "news" commercials such as those concentrating on promotions and new packages.

"Color in television is a fact," he comments. "Now that the techniques have been developed for producing color film which transmits satisfactorily on existing black and white sets we see no reason not to go all-out with color."

He points out that many television viewer studies have established the higher attention factor and viewer recall for color telecasts.

**American Airlines Premieres "In Flight"  
Showings of Travel Film on San Francisco**

It was only a matter of time until one of the air lines featuring entertainment films "in-flight" used these facilities for the added dimension of passenger information. On July 7th, a 10-minute short subject on San Francisco was premiered on American Airlines Astrovision flights. It will be shown first on all of the airline's Astrovision flights on which short subjects are presented and will run four weeks.

Starting July 21, for a two-week period, the film will be shown on Astrovision flights that offer full-length features, preceding the entertainment film on these longer-range trips.

The film, produced by Peckham Productions, Inc., working with American's film staff, describes life by day and night in the Golden Gate city as seen through the eyes of San Francisco newspaper columnist Herb Caen. As a bonus on New York to San Francisco flights only, American will make available a booklet keyed to the film. Written by Caen, the booklet tells the sights to see and places to go in "Baghdad-by-the-Bay," as he calls it.

Other travel subjects filmed by American are scheduled for projection in the months to come. Astrovision also provides action scenes of take-offs, landings and the terrain beneath the plane (from a camera positioned in the nose of the aircraft), as well as popular and classical stereophonic music and television programs via its Sony closed-circuit system.

**ANIMATED PRODUCTIONS, INC.**  
1600 Broadway, New York 19

U. S. Navy Exhibit personnel who man the Navy-Marine Corps Exhibit area at the New York World's Fair are pictured at the Kalart Company. They were accompanied by James Frazee (left), of Navy Training Device Center and greeted by Kalart vice-president Hy Schwartz (at right) with Nicholas Autore, Kalart Engineering; George Marczena, company's service chief.

**Navy-Marine Team from N. Y. World's Fair Exhibit Visits Kalart**

☆ Visitors to the New York World's Fair have given enthusiastic acclaim to the "Navy-Marine Corps Team in Action" exhibit on the ground floor of the Transportation Pavilion. Highlight of the area, which is devoted to the story of the nation's sea and land forces, is the Cine-Globe Theater, developed by The Jam Handy Organization as a Navy gunnery training device.

Throughout the area, Kalart/Victor Moviematic repeater projectors are used for continuous showings of films of relevant interest. These projectors are housed in fiberglass "spheres" and helping to keep the whole show "on the move" are Navy surface, sub-surface and aviation "rates" who were chosen from the ranks to give the visiting public a true picture of service personnel. They

have, however, been well trained to discuss the many facets of today's Navy-Marine Corps activities.

An example of this specialized training, helping to assure round-the-clock film projection in both the Cine-Globe and repeater installations, was the recent special training seminar attended by exhibit personnel at Kalart Company headquarters in Plainville, Conn. Service men were given thorough grounding in maintenance and on-the-spot repair by key personnel.

how  
many  
**HALF**  
salesmen  
have  
you  
?

It's easy to tell. A salesman may have a good knowledge of your product or service but, for sales success, that's only *half* of what's needed. The *other* half, equally important, is "people" knowledge. When a salesman lacks this, he's just *half* as effective as he should be.

To be *wholly* effective, salesmen must possess "people" knowledge, understand the fundamentals of selling, and develop persuasive skills that motivate prospects to want to buy.

This new University of Marketing audio-visual sales course *offers this knowledge*. It makes it easy to train your men in the attitudes and techniques of today's top earners. It enthruses men to want to do a better job . . . shows them how to work "smarter", rather than harder.

The six two-hour sessions are so clearly programmed, it's remarkably easy to conduct the training meetings.

Mail the coupon for details on how you can *add another half* to each of your men . . . and *double* his sales effectiveness.

## SALESMAN MOTIVATION and SALES TRAINING

### THE PARTHENON MIHOD

Make him identify  
Make him want to — Show him  
Leave him steamed

### "THE HARDESTY CASE"

Do your salesmen concentrate on a few pet items and neglect the rest of the line? *The Hardesty Case* is a hard-hitting-on-the-square comedy designed to persuade Ford car salesmen that they should — and can — put more sales effort on the light and medium truck lines . . . and along with it reviews some key sales fundamentals.

### "HEAVY GOING"

Do your salesmen tend to sell "performance" product on a price-conscious market? *Heavy Going* persuades Ford truck salesmen to earn their money by digging up all the facts and organizing them into a solid proposal that will prove to the customer he'll make a profit if he buys.

### "FILE ON HENRY ROYALL"

Did some of your men join the company expecting to make their money "inside"—and now they're expected to go outside and sell? *The File on Henry Royall* was made to persuade the 800 Bank of America branch managers that selling is necessary today — that they can do it — here's how.

The final developing process is the **MOMENT OF TRUTH**. Without perfection here, everything else is meaningless.

□ This is why most film producers choose Byron. At Byron, superb color developing by the custom-made ARRI machine assures the perfection of this moment. Byron was the first to offer 16 mm negative-positive developing in color . . . protecting your "Moment of Truth." This means consistency of color print-after-print-after-print . . . yours at Byron, where film producers from all over the world turn for the finest in 16 mm "Color-Correct"® prints—only at Byron.

# THE ARRIFLEX® STORY

Arrange to see  
this absorbing film  
on your own screen

No matter whether you have been using Arriflex cameras for years or contemplating buying your first, this 32 minute color and sound 16MM film provides "inside story" information that will heighten your appreciation or resolve your interest in these sophisticated filming tools.

#### HOW ARE ARRIFLEX CAMERAS MADE?

"The Arri Story" takes you to West Germany on a guided tour through the ultra modern Arriflex plant. Here you witness first-hand, design and detailed manufacturing steps of these world renowned cameras from drawing board to finished product.

#### WHY ARE ARRIFLEX CAMERAS SO RELIABLE?

It's all in the meticulous unrelenting testing procedure before a single camera is ever checked out of the plant. "The Arriflex Story" shows you how and why more time is devoted to testing and inspection than actual fabrication. When finally you reach the final check-out test you'll understand why Arriflex cameras consistently produce ultra-sharp, rock-steady footage to the highest professional standards.

#### WHAT'S THE RANGE OF ARRIFLEX ASSIGNMENTS?

"The Arriflex Story" takes you literally around the world and to many of the more than 100 countries where Arriflex is the preferred camera among professional cinematographers. From Alaska to Zanzibar, on assignments as diverse as missile tracking to microbe hunting, from cinema art to newsreel, you will witness the facts that have earned Arriflex its reputation as the most versatile, most reliable professional motion picture camera in the world.

"THE ARRIFLEX STORY" is offered on loan without charge for screening anywhere in the continental U.S.A. to the following groups: Professional producers and cameramen, professional associations and affiliated chapters, institutions teaching motion picture production, Government Agencies and services concerned with motion picture production. Please request on letterhead.

THE EDITORIAL VIEWPOINT

#### WILL THESE BE OUR WASTED YEARS?

THESE TROUBLED TIMES put the challenge squarely before all who work with and use the factual film medium: *where are the pictures to bring understanding of our common problems and of their possible solution to the countless millions in waiting audiences?* We have been endowed with a most persuasive means of reaching into men's minds and hearts; but let the record show our fear and doubt; let it show these wasted opportunities and neglect!

*Where are films* to show the negligent parent the meaning of his responsibilities; to motivate the millions of young people of all races and creeds to the meaning and rewards of jobs well done; where is there a single motion picture to stir the emotions and renew faith in the Golden Rule . . . "do unto others?"

The "Great Society" and the "War on Poverty" are being jeered in the streets by the masses whom they would benefit most; Job Corps' encampments erupt in violence; fatherless children raided the stores during the Watts riot. What do we know of the peoples of Southeast Asia and their hope of survival? The economic future of American industry swings on prospects of overseas markets and sways with the pendulum of highly competitive imports.

Let the record show that we excelled in using the film medium to promote goods and services; that in this time we had a physical plant capable of brilliant execution in screen dimensions from 70mm to 8mm. Let it also show that *there were millions of potential viewers in the theaters, owning television sets and gathering in groups of all sizes and ages for exposure to 16mm showings, day and night.*

*But what did we do with our opportunity?* How did we meet these needs in a time of misunderstanding, misinterpretation, lack of guidance and guidelines? We have only our faith in some enlightened potential sponsors and in the determination of skilled producers to rise to this time of challenge!

#### *New Farm Film Guide Lists 913 Programs Available to Audiences in Rural America*

America's No. 1 industry is the production of food and fiber. America's farms feed and clothe the nation and their output means basic survival for hungry millions abroad. Last year, America's farm families had a gross purchasing power of some 43 billion dollars and a net of about 13 billion dollars of disposable income after business expenses.

Against this background, the Editors of BUSINESS SCREENS, working in collaboration with the Farm Film Foundation, proudly announce a new FARM FILM GUIDE with its detailed listings of 666 privately-sponsored motion pic-

tures and filmstrips and their source. In addition, we have cross-indexed (for private reader reference) some 247 titles of motion pictures produced and distributed by the Motion Picture Service of the U.S. Department of Agriculture, which publishes the *other catalog* of such materials.

We commend this new FARM FILM GUIDE to all who serve agribusiness, producers and feeds, fertilizers and related products. But we especially dedicate this useful book to the waiting thousands of farmers and users in Rural America. Because it is a profit venture, the cost of this guide is held to \$1.25 per copy, with considerable count on quantity orders. Copies are postpaid when payment accompanies the order to: Farm Film Guide, c/o BUSINESS SCREENS, 7064 Sheridan Road Building C, Chicago 60626.

#### *World's Best in Business Films to Capetown Industrial Film Festival in Rouen France*

We look forward to the important 6th International Industrial Film Festival which begins on October 11 in Rouen, France, the only place in the world where specialized business and industrial motion pictures from all lands are in direct competition. On the occasion of this issue we supplement earlier listings of U. S. and French national entries with those of many other countries. Note them all, observe that excellence in film-making is not restricted to these shores.

These International Industrial Film Festivals take place under the banner of the Organization of European Industry. The U. S. entries are made through our own National Association of Manufacturers. In other lands abroad, pre-Festival competitions are held under the auspices of top management groups. To be continued on the following page.

### NOTICE OF FILM DISTRIBUTION MEETING TO BE HELD AT THE AMERICAN METEOROLOGICAL SOCIETY

45 Beacon Street  
Boston, Massachusetts 02108

on Monday, 27 September, 1966  
beginning at 9:00 A.M.

to discuss distribution of educational film materials (16mm sound motion pictures and 8mm silent loops) in atmospheric sciences, primarily at the secondary school levels.

## ARRIFLEX at work — ONE OF A SERIES \*

Photograph by Hellä Hammid

Francis Thompson and Alexander Hammid Shooting "To Be Alive"

### ARRIFLEX<sup>®</sup> filmed Johnson's Wax World's Fair cinematic masterpiece "TO BE ALIVE"

Inside the Johnson's Wax "Golden Rondelle" at the World's Fair, is 17½ minutes of sheer delight . . . the extraordinary 3-projector, 3-screen color film, "To Be Alive," . . . so sensitively and imaginatively produced by documentarians Francis Thompson and Alexander Hammid. Among Fair visitors, film critics and publications like Time Magazine, the opinion is unanimous . . . there's nothing better to be seen at the Fair!

Typical of the accolades given "To Be Alive" was Columnist Archie Winston's full column commendation in the New York Post, lauding the film as "a completely integrated work of art . . . a film masterpiece."

"The world of design, moving towards abstraction, is here," he wrote. "The world of personal intimate portrait is here. The photography is grand enough to make a melodrama out of the passage of a centipede, human enough to translate a boy's roller derby into a thrilling road race, or to understand the contemplative beauty of Walden's pond. From universe to frog, from stick-beating Africane to dancing American teenagers, to the world viewed in prism colors . . . it's all here, spilling over with

the life, emotion and happiness of existence."

"To Be Alive" encompassed 18 months of shooting in Europe, Africa and the United States. But long before the film makers set out on their cinematic safari, basic problems of the triple camera set-up had to be solved. It was Mr. Hammid who designed the camera rig with the three Arriflex 35's mounted on a single pedestal. Each camera is driven by a standard Arriflex constant-speed motor.

Selection of equipment was an important factor. "We expected to travel a great deal for the production of our three-screen film," Producer Francis Thompson explained, "and to work in remote areas where the triple camera would have to be carried considerable distances and set up rapidly for unexpected opportunities. Our camera system had to be light, compact, rugged and reliable even in adverse climates because the precision matching of the three cameras prevented us from interchanging any one of them with a spare. Moreover," he added, "We wanted a camera with which cameramen the world over were familiar. We chose Arriflex."

**THE EDITORIAL VIEWPOINT:**  
(CONTINUED FROM PRECEDING PAGE FOUR)

could well emulate this unequalled exposure of our medium to senior executives in business!

As a footnote, entries from Australia (*The Fabulous Hill*, sponsored by Broken Hill Mine and produced by R. Barrington Scott Pty. Ltd.); from Austria (*Do It Yourself and Formal der Sauberkeit*, sponsored by Persil GmbH and produced by WDS-Film); and from Canada (*More Homes for More People*) will round out all the data we have received from our able correspondents abroad. We are especially indebted to our European editor, Peter Rigg, and to the management of Festival affairs in Rouen, for their editorial cooperation.

**Metro-Kalvar Board Elects Noel R. Bacon  
President of Film Manufacturing Company**

The former commanding officer of the U. S. Naval Photographic Center, Noel R. Bacon, has become president and a member of the board of directors of Metro-Kalvar. The firm is jointly-owned by Metro-Goldwyn-Mayer and the Kalvar Corporation.

Bacon joined Metro-Kalvar as vice-president in 1963. Prior to that he served for 21 years with the United States Navy and retired with the rank of captain. Metro-Kalvar was organized in 1961 to further the applications of Kalvar film in the motion picture and television fields. The Kalvar film base is unique

in that it utilizes heat rather than processes to reproduce images on film

**Modern Names Crawleys as Film Co.**  
One of Canada's foremost production companies, Crawley Films Limited, has joined the international film distributor, Modern Picture Service, Inc. Modern has named Crawleys as their motion picture distributor in Canada. The distribution company has established Canadian headquarters in Toronto. In 1961, is currently distributing 458 titles for 59 sponsoring companies, trade groups and governments throughout the province. Meek is manager of this activity for Crawley in Canada.

**Eastman Kodak to Sponsor Academy Awards Color Telecast on Monday, April 18, 1966**

The Eastman Kodak Company will be the sponsor of the Motion Picture Academy Awards when this program is telecast in color on Monday, April 18, 1966 from 8 to 12 p.m., Eastern time.

A. Dexter Johnson, Kodak's director of advertising, said, "This is a natural association in view of Eastman Kodak's involvement and interest in the technical development of the motion picture industry, since its inclusion in communications — not only in the entertainment field — but in a wide range of activities: science, medicine, technology, and the outermost distances of space."

Category C: Industrial "Image" Films

**Kraftstoff**, sponsored by Aral AG; produced by Hugo Niebeling.

**Bis Ans Ende Der Welt**, sponsored by German Post Office; produced by Rudolf W. Kipp.

**253,000 Stunden**, sponsored by Rohm & Haas; produced by Domo-Film, G.

Category D: Technical Information

**Mehr Sehen-Besser Erkennen**, sponsored by Siemens-Reiniger; produced by Siemens-Reiniger.

Category E: Industrial Research

(CONTINUED ON THE FOLLOWING PAGE)

# Autoload<sup>®</sup>

With some projectors "automatic loading" means almost. With the Autoload<sup>®</sup> projector it means *completely automatic threading*, and a whole lot more!

It threads itself completely, automatically, start to finish. No other 16mm sound projector, anywhere in the whole wide world can.

It stops on a single picture for discussion, reverses so you can get back to a scene fast, throws a brilliant picture in lighted rooms, sets up in seconds.

Features like these have made the Bell & Howell Specialist Autoload Filmosound the largest selling 16mm sound projector anywhere.

# Bell & Howell

builds photographic instruments a little better than they really have to be

**INDUSTRIAL FILMS FROM ABROAD:**

(CONTINUED FROM PRECEDING PAGE EIGHT)

**Hochspannung-Hochleistung**, sponsored by AEG; produced by Wolfgang Pahl.

**Der Heisse Frieden**, sponsored by BASF; produced by Gessellschaft fur bildende Filme.

**Getestet Und Fur Gut Befunden**, sponsored by Henkel & Cie; produced by Rotofilm.

Category F: Manpower Training

**Anders Als Maschinen**, sponsored by German Provincial Industries Employers Confederation; produced by Franz Thies.

**Nur Der Nebel Ist Grau (Fog Isn't the Only Thing That's Grey)**, sponsored by Thyssen-Hutte; produced by Dido-Film.

Category G: Safety Education

**Gefahrliche Diebe**, sponsored by Farbenfabriken Bayer AG; produced by Pit Müller.

**Gefahrlicher Start**, sponsored by German Mining Institute; produced by Elan-Film.

**THE ITALIAN ENTRIES**

Category A: Industrial Subjects

**Arese Omaggio Al Portello**, sponsored by Unieuropa Film; produced by Augusto Mingione per Unieuropa Film.

**Dal 1830**, sponsored by Bassetti S.p.A.; produced by Romor Film.

**Fallout**, sponsored by Comitato Nazion. Energia Nucleare; produced by Cortometraggi Gigi Martello.

**I + I = 10**, sponsored by Alberto Mondini e

Carlo Ventimiglia; produced by A. Mondini.

to get the audiences you want  
for your film, does your distributor  
fire a shotgun

# "Selective distribution" delivers real people, not just numbers.

Get you millions of viewers for  
your sponsored film, if that's what you  
want, if you want a better defined  
audience, we can deliver that, too. Want  
to focus on adults, rather than teen-  
agers? A predominantly female audi-  
ence? Community leaders? You name it.

Sterling Movies U.S.A. developed "Se-  
lective Distribution" to give sponsored  
films pin-pointed exposure, not a hap-  
azard collection of anonymous viewers.  
Call us. We'll show you how we can set  
up a specific distribution pattern which  
will zero in on your film's objectives.

TO THE UNSUNG HEROES OF OUR FILMSTRIP DEPARTMENT

AT CFI, OUR EXPERTS HELP YOU find many short cuts to great filmstrips. Working with you in the inception stage, they help you get the most from your material... often saving you time and money. And with our special facilities, we'll furnish the parts you might be missing. *A flower background? A line of hand lettering? Type set on cells for superimposure? Can do.* Our art talent will design and execute original frames for you, or we'll copy your flat art up to 24" x 32" (32 field). *Different size transparencies? We shoot directly from 35 mm through 8 x 10, with no intermediate reduction to cause loss of color or detail.* *Product to be photographed? We'll shoot it into your filmstrip against a colorful background.* And with all this service, at CFI you always get faithful color rendition with minimum contrast gain and frame to frame color correction to insure over-all balance. And our unique continuous-loop printing equipment insures absolutely uniform filmstrip prints from scratch-free negatives. *How long? Well, normal delivery is one week. On super-rush jobs, we'll work with you to a tighter deadline.* *Need advice? Let's discuss your problems. Call Lou Livingston at HO 2-0881.*

*Your filmstrip benefits from the superior facilities and technology that have been developed to meet the high standards of the motion picture industry.*

**Elect Bill Luther Executive Vice-President of Jam Handy**  
 \* Directors of The Jam Handy Organization have elected William G. Luther as executive vice-president of the New York, Detroit, Chicago and Hollywood-based

W. G. Luther: in new post at JHO.

company. Announcement of the election was made by president Jamison Handy in August.

During 40 years of association with Jam Handy, Mr. Luther has held executive responsibilities in nearly all functions of the Organization, including motion picture utilization, slidefilm production, editorial and customer services.

He was named vice-president in charge of Chevrolet contact at JHO in 1946 and became senior vice-president in charge of General Motors' contact in 1959.

**Modern's N.Y. Headquarters Now at 1212 Ave. of Americas**

\* Headquarters offices of Modern Talking Picture Service, Inc., in New York City, will occupy two entire floors at 1212 Avenue of the Americas in early September as the national film distribution company acquires some 60 per cent more space. Modern has been located at 3 East 54th Street for many years.

The move to Manhattan's new "Main Street" puts the film company in an area where headquarters of NBC have been long-established and where both ABC and NBC are currently completing new HQ buildings. The headquarters shift is only one of four moves by Modern in the New York metropolitan area within coming months. The Rockefeller Center film library will also move to the Avenue of Americas' address (separate floor) and various departments now located at 21 West 60th Street

will occupy a building erected to house them at Hyde Park, Long Island, about November 1st.

Modern Teleservice, company, has re-located in Movielab Building at 654th Street in New York.

\* \* \*

**Robert Kleinfeld is President of Photo Manufacturers**

\* The National Association of Photographic Manufacturers elected Robert L. Kleinfeld, president for marketing in Photolamp Operation of Electric Products, Inc. as president for the coming year. He succeeds Ronald H. Smith, president of Smith-Victor Corporation of Griffith, Indiana, in that position.

Directors of the association named William R. Freeman, president of Amplex Corporation of Place, N. Y., and Eugene Martin, president of Hudson Photographic Industries, Inc., Irvington, N. Y., as vice-presidents.

E. S. Lindfors, vice-president of Bell & Howell Photo Sales, Farmingdale, N. Y., was re-elected treasurer for the seventh consecutive term. Joseph T. Moise was re-elected secretary.

**DRAMATIC INTRODUCTION OF A NEW SALES PROGRAM STARTED HERE**

KALART/VICTOR Moviematic Repeater Projectors loaded with a 16mm sound print of a colorful selling film got Hanes Hosiery Mills representatives off to a running start with buyers across the country. The company supplied the task force with lightweight, desk-top Moviematics whose performance, day after day, aroused prospect interest and clinched sales. How about your product or service? You can buy or lease Moviematics and there are 7 models available. Ask your dealer or write: KALART/VICTOR, PLAINVILLE, CONNECTICUT 06062, Department 107.

*First and Foremost in 16mm Motion Picture Equipment*

**Lanci Heads Government Film Service Department at Du Art**

Du Art Film Laboratories, under its new contract with the United States Government for the distribution of Federal films available for public sale, has set up a U. S. Government Film Service Department, directed by Gabriel Lanci.

Films produced for the U. S. Office of Education, the Public Health Service, the Department of Defense and the Department of Agriculture are among the considerable number of titles now available from Du Art. All subjects are available at special Government-established print costs. Price lists are currently available and catalogs are promised for later in the year.

Requests for lists of titles and their prices should be addressed to "U. S. Government Film Services, Du Art Film Laboratories, Inc., 245 West 55th St., New York City, N. Y. 10019.

\* \* \*

**Record Sales, Earnings for Capital Film Lab at June 30th**

Capital Film Laboratories, Inc., Washington, D. C., has reported that sales and profits for the quarter ending June 30 were the highest in the history of the company. Sales during the period totaled \$669,000 and were 46 per cent higher than the \$471,000 total reported for the same quarter of '64. Earnings rose 570 per cent, from \$14,102 to \$78,682, according to president Alfred E. Bruch.

The increase was due primarily to larger color processing volume. The lab's president noted, "since the installation of complete color facilities two years ago, our volume has steadily increased." He cited plans to continue investment in color capability at an annual rate of \$150,000 or more.

\* \* \*

**M. A. Heitzman to Jam Handy as School Service Executive**

Milton A. Heitzman's appointment as head of distributive operations on the School Service staff of The Jam Handy Organization has been announced by president Jamson Handy.

Heitzman served as director of the Department of Audio-Visual and Broadcast Education of the National Council of Churches for five years; he had four previous years of experience in the production and utilization of filmstrips in elementary and secondary education during his career.

Norm Lindquist: film title now heads NVPA

**Lindquist Elected President of Midwest Chapter of National Visual Presentation Association**

The Midwest Chapter of the National Visual Presentation Association has installed Norm Lindquist, sales vice-president of the Fred A. Niles Centers, Inc., of Chicago, as its 1965-66 president.

Other chapter officers include Howard H. Rice, Missouri, and Marvin E. Goessl, Inc., vice-president, Howard Jacobson, Heitzman Industries, Inc., as secretary.

According to Lindquist, the chapter's primary objective is to bring NVPA's "Days of Visual Presentation" program to Chicago. During the 12 years in office, the association has conducted an annual Spring seminar, a presentation and exposition. Meetings have been held in Chicago.

With membership in the United States and Canada, the group includes both producers of visual presentations of all types, plus educators, industry and business groups using visual presentation media.

## TODAY'S PR FILMS GIVE CLIENTS, VIEWERS MORE

HUMPHREY

### Humphrey Vision Series, 'Bringing America'

television travel series, "Bringing America," features Vice-President Humphrey urging Americans of the world to visit the United States. The commercial from a speech he delivered at the re-opening days at the 1965 World's Fair to introduce each

series, developed by Association Films, a division of Association Films, is comprised of films from such sponsoring companies and organizations as American Airlines, Gulf of America, N. Y. World's Fair and Firestone Tire & Rubber Company. Stations will  
*(Continued on Page 4)*

### Audience Selectivity Key to 'Schoolhouse'

Audience selectivity has always been a distinguishing characteristic of sponsored film distribution. To deliver highly specialized audiences for clients with precise objectives requires sources, resources and a bit of resourcefulness, too.

A case-study in point: "To Build A Schoolhouse." This 28-minute color film, produced by Pelican for Educational Facilities Laboratories, has as its primary audience school superintendents, principals, school boards, audio-visual directors and community service organizations. The purpose of the film is to acquaint educators with the new changes and challenges in  
*(Continued on Page 4)*

### AF Brass Appears On WNYC-TV

Bob Mitchell, president of Association Films, and Bob Finchout, vp, appeared on "World's Fair Report," over WNYC-TV recently. The taped show was televised five times during a one-week period. Interviewed by Bill Berns, vice-president of PR for the World's Fair Corp., Messrs Mitchell and Finchout attested to the popularity of the promotional film, "To the Fair."

The film is reaching the largest average audience per booking of any public relations film in current distribution: 201 persons or 101% over the norm of 100 persons per booking.

### Industrial Film Techniques 'Advanced as Fellini and Others,' Says The New York Times

HILLARY

### 'High in Himalayas' New Hillary Film

It is said that the natives of the Himalayas are respectful of two entities, the Abominable Snowman and Sir Edmund Hillary. Sir Edmund they know as a man of boundless energy, stamina and courage. The Snowman, as Sir Edmund says, "belongs in the field of mythology."

You will find no Snowman in "High in the Himalayas," the new Sears, Roebuck and Co. film about the Hillary expedition up Mount Tawche on the Tibet border. The purpose of the climb was to help natives in remote villages build badly-needed  
*(Continued on Page 3)*

"Industrial film-making techniques are, in many instances, as advanced as those of such renowned feature film directors as Fellini, Resnais, and Antonioni." This observation by Leonard Sloane, writing in *The New York Times*, is a succinct sum-up of the big change that has taken place in industrial and public relations films of the mid-sixties.

A visit to the World's Fair is visible and vivid proof that this medium has advanced tremendously in the past few years.

Significantly, industrial film producers have not been content to just follow in the creative footsteps of theatrical practitioners. They have, in many instances, created entirely new forms and techniques, not possible for presentation on conventional screens.

The now classic example is Francis Thompson's "To Be Alive." There is no existing method of presenting this tri-screen film in theaters—or elsewhere—precisely as Mr. Thompson has created it. This is true, too, of Harry Coleman's "Theaterama" which encircles audiences at the New York State building.

As producer Harry Strauss

## EDITORIAL

### The Educational PR Film

The industry-sponsored public relations film has long been an accepted teaching aid in the nation's high schools. It is not at all unusual for the school audience to represent between 60 and 75 per cent of the *total* non-theatrical audience. Such exposure is important to sponsors. It means that their films are receiving almost perfect utilization, that is, that they are being used in the training and development of young minds.

The classroom showing provides an ideal viewing experience. The audience is attentive and ready to absorb the material on the screen. (Who knows, Miss Dove might spring a pop quiz!) There are the plus factors of having the film introduced and, very often, discussed by the teacher and class.

And, yet, with the very broad exposure so many PR films receive in our schools, *very few of the films were produced with an educational purpose uppermost.* Most are, instead, broad-based, general interest films, suitable for clubroom and classroom.

There is a need we feel for more *educational public relations films*, films made specifically as educational aids for classroom and ETV use.

The value to the sponsoring company would be manifold: on-screen identification through a credit title; the PR value of making a film which would present the sponsor as an enlightened good corporate citizen, and the very real possibility that the film will render an educational service to the industry or company itself.

Altruistically perhaps, the contribution would be toward the creation and development of better educated citizens.

There are a number of educational PR films already in distribution. To name a few: "*Personal Financial Planning*" and "*Wise Use of Credit*," two money management films from National Consumer Finance Association to orient students to the economic problems of daily living; "*Life Insurance, What it Means and How it Works*," a film "primer" on the workings of life insurance from the Institute of Life Insurance; "*The Making, Shaping and Treating of Steel*," six films for science classes from United States Steel Corporation, the nutrition education films of the National Dairy Council (one of the most education-minded of sponsors); "*International Indian Ocean Expedition*," a film on oceanography for science classes from National Science Foundation; and, of course, "*The Twentieth Century*," a veritable history of our times from Prudential.

These sponsors know the public relations value of educational aids as such. With 50 per cent of today's population under 25, it would behoove other film sponsors to help in the educational development of our young people.

# VOICE OVER

THE SPONSORED SCREEN SCENE

### The Great Race

Jimmy Clark and those magnificent rear-engine racers were stars of the '65 Indianapolis 500 . . . You can see 'em all in the new tire-scarer "The Short Way Around" . . . as the film's 500 had more than its share of firsts: England's Jim was the first

JIM CLARK

foreign-born driver to win the 500 . . . his Lotus Ford was the first foreign-built winner since 1949 . . . four rookie drivers finished in the top 10 . . . a new average speed record of 151.138 miles per hour for the 150 lap contest . . . rear-engine racers won the day . . . and tired front-engine roadsters lost time . . . Racefilm Productions photographed the 21-minute thriller from trackside, to the pit stop.

Art Arfons shows how he became "the fastest man on earth" in another Firestone speed special, "Challenge—A World Speed Record" . . . his fire-bomb is a 17,000 HP car called the Co-Monster which takes Art and audience on a 536.71 mph speed run on the white hot Bonneville Salt Flats . . . if you don't think that's fast, hear in mind that a jet plane cruises at about that speed!

Gull's "Twelve Hours at Sebring" puts you in the driver's seat (with harness, helmet and cool courage) to give you a racer's eye view of this rough, tough track competition . . . the Sebring Grand Prix is the longest race in America and one that tries the mettle of the metal of machines . . . Dynamic did this one and in less than six months it's racked up a community and TV audience of 24 million persons.

### Tennis Anyone?

Billy Talbert, six-time Davis Cup winner, introduces "Tennis for Everybody" the new U. S. Lawn Tennis Association film dedicated to the expansion and elevation of tennis as a national sport . . . action highlights show Maureen (Little Mo) Connolly instructing youngsters in the fine points at the annual Forest Hills tennis clinic, and Maria Bueno, Neil Fraser, Darlene Hard and Rod Laver in dazzling demonstrations of tennis terpsichore . . . the film's in summer TV release to draw interest in the U. S. Nationals.

BILL TALBERT

### Rod and Reel

A cameraman's patience is only matched by a fisherman's patience. He's the guy who must sweat out the Walton as well as the weather and hope to get some footage that will show both off to cinematic advantage . . . Alcoa's "Trout to Dream About" is about a fisherman who tells his wife about a dream he had. (Note: she must be a dreamer to accept fishing in such good spirit). In the back we accompany him to Waterbury Lake in Saskatchewan to hook the hard-to-net Artie Grayling, a trout to test the skill of a fisherman . . . it's a delightful and exciting 28 minutes.

American Airlines takes to the water, fishingwater that is, with "Fishing the Rivers" a new quarter-hour trilogy that goes after bass and trout (good name for an ad agency!) . . . AA's "Kingfish and Stripers" and "Sportfishing" are proven favorites with fish and landlubbers with a non-theatrical audience of 433,481 persons to date . . . Big on TV, too, in "Kyle Rote's World" series and special AF concepts.

# ative PR Films ve Audiences More

(Continued from Page 1)

Times. "In the early industrial films they were illustrations of machines too boring into an office." In a story The Wall Street Journal pointed up the changes that have taken place. Public relations films, the Journal said, are bolder, more imaginative and more direct to the medium. "An example is American Airlines' 'San Francisco,' a 10-minute introduction to the city expressly for Astrovision showings. It 'communicates' an indefinable something taken San Francisco to its heart. A spirited jazz and spritely script by Collier Caen complement the imaginative, roving work that seeks out the city. Coming to the screen the urgency of a big-city 'Cost of Hope' (Johnson) utilizes something of the 'ema verite' technique. Quick pans and track-cuts put the audience in agency wards, operating literally at the doctor's station in PR films has

come a long way too. The "cat and mouse" styling of yesterday has given way to the slick sophistication of such films as Pelican's "Europa." This 10-minute short from the European Economic Community uses humorous animated characters to tell the story of the Common Market. Backgrounds are woodcuts, engravings and works of the masters.

Another film in "adult" animation is Pittsburgh Plate Glass Company's "Adventure in Color," produced by Dynamic. Swirls, splashes, swatches of color cascade across the screen in high style, more than fulfilling the promise of the title.

The pint-size "photoplays" of yesteryear have been displaced by such probing, personal dramas as "The 91st Day" and "You are not Alone," mental health films that are both adult in treatment and contemporary in technique. Each is a film that has something to say and says it well.

The maturity of the industrial and PR film has resulted in audiences getting more from them and "the companies paying the bills more for their money," observes the Times.

"HIMALAYAS" PREVIEW—The new color film, "High in the Himalayas," sponsored by Sears, Roebuck and Co., was recently previewed in New York City for sports editors and writers. Sir Edmund Hillary, famed conqueror of Mount Everest, introduced the film, which documents his assault on Mount Taweeche. Pictured at the preview are: Robert D. Mitchell, president of Association Films, Sir Edmund, Gilbert M. Zelman, president of the Matterhorn Sport Club and co-host for the Manhattan premiere, and George C. Potts, director, Consumer Information for Sears.

## HILLARY 'HIGH IN THE HIMALAYAS'

(Continued from Page 1)

schools and water lines. To the natives, Sir Edmund, has also become something of a good samaritan as well as adventurer.

Dr. Michael Gill of New Zealand, a member of the Hillary party, exposed more than 10,000 feet of color film which has been edited down to the 27-minute motion picture. The result is a film that for suspense and excitement has few peers. The ex-

pedition is shown inching its way up sheer cliffs and icy slopes, across deep crevasses, and securing a precarious foothold on narrow ridges as they make the 21,000 foot climb.

Sir Edmund's narration adds authority and authenticity to one of man's great accomplishments. "High in the Himalayas" is in national non-theatrical and television release through Association Films.

## Association Films Offers Astrovision Showings

Association Films will not only serve its clients for any film that takes place on an Airlines' Astrovision through October 31. Association Films has been working with Trans-Lux Distribution Corporation in providing travel films for viewing on intermediate haul flights. Available films are shown as often as 15 times a day over a period. In announcing the service, Robert D. Mitchell, president of Association Films, said, "We offer such airborne films as an exciting and direct way to reach adult audiences, especially business

travelers and vacationers. For the next three months, during the peak period of vacation and pleasure travel, we are offering Astrovision exposure to our clients as a 'bonus.'

"The business of reaching people must be geared to the manifold changes taking place in America. Movies aboard jet planes is just one manifestation of the mobility and fluidity demanded of film distribution."

Among the films recently selected by Trans-Lux for airborne viewing are: "America's Cup Races, 1961," the story of the yachting classic; "New England Portrait," the four seasons of New England; and "Twelve Hours at Sebring," an auto racing film.

## V for Vitamins!

American's have probably never been more waistline-conscious. The Battle of the Bulge is being waged on all fronts, with the "drinking man's diet" and other similar tracts part of the battle strategy.

Sometimes in our zeal to curb caloric or carbohydrate intake we overlook the importance of vitamins for healthy, strong and disease-resistant bodies. "Vitamins and Your Health," from the National Vitamin Foundation, is a sensible, easily-understood film that answers questions about our health and the part vitamins play.

In 17½ minutes it tells why beri-beri and scurvy are rare and why improper eating habits rob us of our vitamin needs. The "filmograph" technique by Visualscope helps audiences visualize "Vitamins and Your Health."

## 'Instant Exposure' I. E. Audiences Fast!

Association Films has developed an "instant exposure" plan for the distribution of Hollywood promotional shorts and featurettes. The service, called "Operation Featurette," is tailored to reaching audiences before and during the release of major feature films or roadshow attractions.

These shorts, usually behind-the-scenes glimpses of Hollywood features in production, are used to generate interest in going to the movies. Typical is "Big Sur," a 10-minute short narrated by Richard Burton, which includes production shots of "The Sandpiper" (in which Burton stars with Elizabeth Taylor).

"Operation Featurette" adapts such sponsored-film services as Movie - A - Work to the motion

(Continued on Page 1)

# PREviews

## of New PR Films

A checklist of new sponsored films in distribution through Association Films. If you would like to preview any of them please check box and we will reserve a print for your use.

- Agriculture, Research and You** (Chas. Pfizer)  
The third in Pfizer's excellent agriculture series
- Beaver's Tale** (American Dental Association)  
Charming animated cut-out film to prepare children for their first trip to the dentist
- Set the Stage for Dental Health** (American Dental Association)  
Basic dental health facts for parents and teachers
- Blondes Through the Ages** (Clairol)  
Blondes from Helen of Troy to Princess Grace
- Emergency 77** (Metropolitan Life Insurance Co.)  
Importance of first aid and how a hospital emergency staff operates
- Fabulous World of Food** (Grocery Manufacturers of America)  
A filmstrip on stretching food budget dollars
- Food, the Color of Life** (National Dairy Council)  
How knowledge of food nutrition combats starvation and malnutrition
- International Indian Ocean Expedition** (National Science Foundation)  
A scientific expedition to one of the last unexplored oceans
- Lessons in Loveliness** (Avon)  
Just what the title suggests!
- A New Art in Cooking** (Lawry's Foods)  
Creative cooking using seasoning blends
- Of Men and Minds** (E. R. Squibb & Sons)  
Research into the causes and cures of heart disease
- Starvation Without Hunger** (California School Food Service)  
Describes the food service program sponsored by the State. (California audiences only)
- Choices** (ALCOA)  
An imaginative, highly-cinematic film on new applications of aluminum
- Change for the Better** (ALCOA)  
Douglas Fairbanks, Jr. tells of some changes that have taken place in the 20th century

Please send the films checked above as they are available. Thank you.

### Airborne Yachting!

"America's Cup Races, 1964" reached a new "high" in audiences this July and August by being shown on several hundred American Airlines' Astrovision flights. Movies are now on land, on sea and in the air!

# 'Schoolhouse' Audience

(Continued from Page 1)

school construction, with the emphasis on making the building fit the needs of modern education and not vice versa.

To reach those whose influence and approval are critical in school building programs Association Films undertook a promotional program that is, perhaps, a model in selectivity.

A special letter was developed with EFL, and sent to 13,000 school superintendents throughout the United States. The film was offered at the annual meeting of DAVI (Department of Audio Visual Education of NEA), attended by audiovisual directors and film coordinators from virtually every school system in the country.

School principals and state, county and local boards of education were contracted through special mailings suggesting they show the film at PTA and board meetings, faculty get-togethers and in their local communities.

The film was included in a special brochure on architectural and design films, developed by Association Films and sent to chapters of the American Institute of Architects, construction

and design engineers a county and state engineering departments.

Letters from Harold I. president of EFL were every commercial and EFL in the country suggest the film be used "at a time when it can be seen by educators and communi-ers."

The results of this and highly-selective promotion and distribution have been most gratifying. The "Schoolhouse" has been shown 3,564 times by school superintendents, principals, architects, school boards, faculty, community service organizations (Kiwanis, Rotary, Lions, community action groups) and adult audience to date is 50,000 men and 51,709 women. It has been on television more than 100 times to an audience of over 800 persons.

Association Films has developed this kind of specialized audience distribution in many years. We have found to be one of the most effective methods of reaching the people who make a client's marketing or PR objectives a reality.

## Travel Agent Kits Being Mailed Out

As part of its program to make local travel agencies "sources for film programs," Association Films has prepared promotional kits for agents all over the country.

Kits include a two-color poster for window or counter display, suggested news releases and letter to program chairmen, and "hints 'n helps" for arranging programs for local organizations.

## 'Operation Featurette'

(Continued from Page 3)

picture industry. Several thousand high schools, industrial plants, business groups, and clubs subscribe to this weekly service. Promotional shorts can be easily programmed into these schedules.

Prints can also be spooned into key cities, regions, and major resort areas. In the Catskills alone more than 100 resorts show sponsored films on a weekly and bi-weekly basis. Other areas serviced with Association Films product are the Poconos, Adirondacks, Florida, and shore areas in Connecticut, Long Island and New Jersey.

## 70 Color Films All About India

Many travelers agree India is one of the most beautiful and spectacular countries in the world. Proof, if such is needed, can be found in the Government of India Tourist Office films we distribute in our Hayward, Calif. film center.

A few of the titles cover the breadth and depth of the country: "Delhi," "A Holiday in South India," "It's a Wonderful World—India," "Taj Mahal," "Jaipur." Arouse your spirit of adventure?

## 'Discovering America'

(Continued from Page 1)

be offered the films on a weekly basis to meet their program requirements.

The looting of the Vice President was secured from the Press International and has been prepared in a newsreel-type format by Association Films. It leads into a "Discovering America" title preceding each film.

Participation in the series being offered to travel companies, state tourist boards and resort areas.

It costs plenty to produce 1,000 feet of 16mm film. But it costs only pennies per month to protect these irreplaceable A&B roll color originals, reversal positives and tapes from damaging extremes of temperature and humidity. Store them at the famous Bonded Film Storage vaults in Fort Lee, New Jersey. Bonded now provides **temperature and humidity regulated storage areas**, when specified. Also available on request are **environmental controlled chambers** for maximum care and protection. Bonded experts record every carton you send in, individually log the location and keep everything at your fingertips for you. Bonded's radio-directed trucks will pick up and deliver for you anywhere in Metropolitan New York. Bonded has skilled packers and on-the-premises screening and shipping. (Ask De Luxe Laboratories, they've been with us for years). Better still, write us at 630 Ninth Avenue, New York City 10036.

## Scholar-at-Large

**Cullman Service Fellowship  
to New York Port Executive**

**T**HE ASSIGNMENT which industrial audiovisual executives dream about has come to Robert F. Unrath, Port Promotion Manager in the World Trade Department of the Port of New York Authority.

He has been awarded the Howard S. Cullman Service Fellowship, given annually "to develop the promise of unique qualifications and talent" among employees of that bi-state agency and will undertake a year-long extensive program of technical study and practical work experience in "new techniques and methods" used in the production of motion pictures for education, promotion and related purposes.

### Prize Films Widely Shown

Unrath wrote, directed and produced the Port's trade promotion film, *The Fabulous Decade*, winner of a Blue Ribbon Award at the American Film Festival in 1960; *Sixty-Seven South*, which received similar honors in 1962; and *Containers and Cargoes*, which was premiered early this year.

The films, translated in many foreign languages, have been viewed by world wide audiences. Unrath is also in charge of the Authority's monthly port promotion magazine and creates trade development brochures, visual aids and maps. He was awarded the Port Authority Distinguished Service Medal in 1960 and the Executive Director's Award of Achievement in 1962.

### Will Visit Studios and Labs

In an exclusive interview with **BUSINESS SCREEN**, the new film "scholar-at-large" discussed his plans for formal technical study, coast-to-coast, with on-the-job

**Robert F. Unrath: his fellowship provides full year of film study.**

training in the latest production techniques to be included in year-long itinerary. He will visit leading commercial film animation studios and laboratories. He has already been assured a warm welcome by several film studios.

The fellowship was named in tribute to Honorary Chairman Howard S. Cullman on the anniversary of his Port Authority service. The employee selected for the fellowship is granted a leave of absence without salary to undertake studies and on-the-job training, with expenses paid, to improve his contribution to the public service upon returning to his Port Authority job.

### Three Decades of Port Service

Unrath joined the Port Authority in 1935 and occupied various positions in the port promotion field before being appointed to his present post as Port Promotion Manager. From 1941 to 1945 he served in the United States Coast Artillery Corps, attaining the rank of major. He graduated from the School of Army and Business Administration at Pace Institute in 1940 and attended New York University as a Special Student in Foreign Languages in 1946 and 1947.

## and Events Along Production Lines

**Electronics, Inc. Names Morton Donald Dubin a Vice-President**  
 Videotronics, Inc. has appointed Morton Donald Dubin a vice president. Dubin, a producer, joined the company in 1959 after serving

Morton Donald Dubin

in film production and advertising agencies. Dubin is 34. Morton has been in film production for more than 15 years. He started out as a fledgling Shake-camera operator, later became a film assistant director.

**Sy Kane Field Posts to Lord and Edwin Bulkley**  
 Appointments for John Lord and Edwin R. Bulkley have been announced by Howard Turman, manager of the Audio-Visual Division, DuKane Corporation, Chicago, Ill.

Sy Kane has been handling mid-level production in addition to his duties as a production advisor; he will devote his entire time as to materials preparation in the audiovisual field. Lord will handle the territory covered by Lord, secretary-manager for Illinois Division.

### Trans Radio Productions to Occupy New Studios in Boston

Trans Radio Productions, Inc., of Boston, Mass. is building a new film and recording studio at 1031 Commonwealth Avenue in that city. Three sound stages, the largest of which is 50' x 50' and two independent sound control rooms with four-track stereo sound are in the plans. There is also an additional studio for a language laboratory.

The studio's art department will occupy expanded facilities with special equipment and personnel for animation and filmstrip production.

According to Oscar H. Cheses, TR's president, the new building is to be completed in September.

### Spelletich Joins Technicolor as Detroit Regional Manager

The new Detroit regional manager of Technicolor's Commercial and Educational Branch is Kalman "Spec" Spelletich, Jr. His appointment was confirmed last month by general manager Robert T. Kreiman.

Spelletich is the former sales manager of Victor Animatograph Corp. and was a regional sales manager for the DeVry Corporation. Prior to his current Technicolor post, he served Dictograph Products, Danbury, Conn. as a communications consultant. He is a graduate of St. Ambrose College and took his degree in economics at Grinnell College.

### Sy Cane to Direct Sales for Camera Service's Subsidiary

Sy Cane has been appointed sales manager of Camera Sales Center Corp., a subsidiary of the Camera Service Center, Inc.

### Savage-Friedman, Inc. Joins TV Production Field in N. Y.

A new New York television film production company, Savage-Friedman, Inc., has been formed by Lee Savage, former vice president and creative director, and Harold Friedman, former executive producer, of Elektra Films.

### Edmonds Heads Film Division for Walter O'Connor Company

The appointment of Robert J. Edmonds as executive producer in the Motion Picture Division of the Walter G. O'Connor Company, Harrisburg, Pa., has been announced by the president of that communications firm.

A former staffer at the National Film Board of Canada and active in production in both Chicago and New York, Edmonds has written,

Robert J. Edmonds

produced and directed films of every description, from features to TV commercials. His educational films are distributed by the International Film Bureau and by leading U. S. film libraries.

He has also served as an announcer and commentator, with extensive experience in live broadcasting. Recently he has been instructing in Film Editing and Theory at New York University. The former executive secretary of the Screen Directors International Guild will locate with his family in the Harrisburg area.

## WHAT MAKES PROSPECTS DOLLAR CONSCIOUS?

The salesman's own attitude towards price often can build price resistance in the prospect.

To immunize your men against price-fear, here's a forceful color filmstrip. It shows how to focus sales presentations on product advantages:

### "Developing the Right Attitude Towards Price"

stressing the need to put price in its proper place, by a knowledge of product properties and benefits. Salesmen learn how to handle price resistance, and how to build prospect acceptance inspired by the virtues inherent in a product. This practical and resultful color filmstrip is one in a series:

### "SELLING IS MENTAL"

filled with valuable ideas on attitudes and techniques in dealing with people. Six filmstrips designed for use in 18 sales meetings.

**T**HE YEAR MOVES TOWARD its final quarter with the several remaining U. S. film award programs on the calendar, plus the important 6th International Industrial Film Festival on October 11-16th at Rouen, France.

The traditional Columbus Film Festival will observe its 13th annual program in that Ohio city on October 1-3, beginning this year with the annual Chris Award banquet on Friday evening, October 1st at the Gallery of Fine Arts, followed by showings of award-winning films to the general public on Saturday and Sunday in the auditorium of the Battelle Memorial Institute.

We look forward to this civic event, which honors both the film medium and the good people of Columbus who give so much of themselves to every aspect of the affair. A wonderful idea, this sharing of the best in factual films over the weekend following the awards presentation!

\* \* \*

#### 2nd Management Film Awards in New York on October 14-15

Of special interest to business is the 2nd Annual International Management Film Festival, October 14-15 in New York City. Sponsored by the Society for Advance-

## October's "Festival Month" on Fall Calendar

### Columbus Presents 13th Annual "Chris" Awards October 1st

ment of Management, this event will feature a seminar on "The Motion Picture As a Management Tool of the 1970's" and awards are to be presented to films in three specific categories of importance to management.

Award-winning films will be honored at a special awards program and the Grand Prize will be presented at a special banquet in that city on October 15. Peter Livingston is director of the film festival.

\* \* \*

### Films for Communication, Art to Compete at San Francisco

Two programs during the 9th Annual San Francisco International Film Festival will focus on factual motion pictures. Educational, institutional and business films will be featured in the "Film As Communication" competition and experimental and interpretive films will compete for the "Film As Art" awards. Richard Fowler, of Vista Productions, is chairman of the Festival's non-theatrical division.

Film makers from throughout the world will gather at the top of Nob Hill in the city's Masonic

Auditorium for both events. Facilities include a theater, screening and meeting rooms, Festival offices and press quarters.

The Golden Gate Award will be presented to the best "Film-As-Art" and to the outstanding entry in "Film-As-Communication" plus silver awards and two honorable mentions in each category. Cash awards totaling \$1,000 will be given the film or films judged "most deserving" by the awards jury in the "Film-As-Art" competition at San Francisco.

There is a separate division for materials originally produced specifically for television, either on film or tape but these must have been submitted on film.

\* \* \*

### 5th International Film, TV Program Details Are Released

October's "award-month" programs continue on the 14th and 15th in New York City when the privately-promoted International Film & TV Festival presents a multi-faceted program at the Americana Hotel in Manhattan.

Herbert Rosen's project is in its fifth year. Emphasis in '65

seems to be on televisio of the medium as Willie C Jr., director of film program at WPXI-TV, speaks of "Cost of Documentaries in Color Era" and Tom Jernigan, program chief of the Triangl discusses public service programming. A workshop session on UHF-TV will be guided by Cooperstein, president of CINE 47 in New York.

One exception to this TV-ent program is Steve Kravitz talk on "Producing for Profit Abroad?" Award to standing films and TV specials round out this even

Mr. J. M. Squiers, Jr.  
President  
Willard Pictures, Inc.  
45 West 45th Street  
New York, New York

Dear Jack:

A little belatedly, I would like to officially express our satisfaction and delight with our film "The Seed and The Sineu" and our appreciation for all the fine work done by Willard Pictures -- especially you and Frank Brittain -- in bringing the film to a high state of quality within a very compressed time schedule.

On the personal side, I think I should say that one of the compensating satisfactions of a very difficult project such as this film is that you get to know people quite well through working with them in periods of stress, strain and pressure. All I can say is that the next time I'm in trouble on a project like this (or, preferably, even before I'm in trouble) I hope I can count on you and Frank to help bail me out.

Cordially,

Robert K. Wagner

## How do you measure quality in film transfers?

You know it when you see it! Your eye is our judge. That's why we demand perfection in clarity, definition and true grey scale. We get perfection by complete control. All of our work is done under one roof... a unique way of operating in our industry. And we feel the results are worth it. So do our clients—companies like AMERICAN MOTORS, MGM-TELSTUDIOS, MCA-TV, HEATH DE ROCHAMONT, even AMPEX. Their names tell you a lot about our standards. But there's a better way to find out. Try us. We offer "in by 9—out by 5" processing—with your transfer jetting back the same night. And optimum quality is guaranteed (backed by two decades of expert Hollywood technology). If you believe your eyes call Acme Film Laboratories, Inc., Hollywood, 1161 North Highland Avenue, HO 1-7171; New York, 100 Madison Avenue, HA 1-310.

Acme Film Transfers **A** 

## News Along the Film/Tape Production Lines

### Foreign Language & Cinema Service Logs Year's 25th Film

✧ In the first seven months of the year, Foreign Language & Cinema Service, Hollywood, used eight languages in translation and dubbing of 25 versions of 15 sponsored films, according to Albert Amateau, director of the company.

The production log includes the following: Conway Research and the Government of Guatemala, *Fomento*, produced by Frank Willard Productions, Atlanta, Ga., in Portuguese and Spanish; Degesh Co., *The Hidden War*, Driscoll-McNamara Productions, Mandarin-Chinese; Douglas Aircraft Corp., produced by the Douglas Motion Picture Unit, *F-A Skyhawk*, Portuguese and Spanish, and *SATS I*, in German; Garrett Airesearch Corp., produced by Technical Communications, Inc., Los Angeles, four untitled technical missile films, in French.

Other productions include *SATS II*, sponsored and produced by Lockheed Aircraft Corp., Burbank Division, German; Multi-Electronics of California, Inc., *Electronic Alarms & Signals*, was translated into six languages. •

\* \* \*

### "Instant" Movie Promotion Via New Association Films' Plan

An "instant exposure" plan for the distribution of entertainment motion picture promotional shorts and featurettes has been developed by Association Films. The service, called "Operation Featurette" is tailored to reach audiences before and during the release of major motion picture features and road-show attractions, according to AF vice-president Robert Finchout.

"Urgency is the keynote of this program," Finchout noted. "The life span of the average theatrical promotion short is probably three months at best. This means it must get to potential moviegoers when the exploitation campaign is in full swing. After the major play-off, a promotional short is as dated as yesterday's newspaper."

"Operation Featurette" adapts such AF services as "Movie-a-Week" to the motion picture industry. Several thousand high schools, industrial plants, business groups and clubs subscribe to Movie-a-Week.

The AF executive also said, "we can easily program a promotional short into these schedules and also move prints into key cities, regions

and major resort areas. Immediate kills alone, for example, more than 400 resorts show our films on a weekly and bi-weekly basis."

Association Films estimates that with 200 prints of a featurette in distribution, the production company can reach 500,000 moviegoers in three months.

### Acme Lab Acquires Two VR-2000 Videotape Recorders

The purchase of two VR-2000 Videotape Recorders by Acme Film Laboratories, Hollywood, will help meet the increasing demand for color videotape reproduction and a steady increase in videotape syndication, according to Acme's general manager, Mel Sawelson.

This new high standard equipment, utilizing the "high resolution" extends limits of video but provides more room for color separation. It also permits the generation copies with quality essentially equal to the video "master."

The investment of nearly a quarter of a million dollars was made "to continue the laboratory's effort to make its facilities one of the industry's finest." Acme specializes in tape-to-film transfer and tape-to-tape duplicating in 16mm color and black & white, developing and printing. Headquarters are at 1161 N. Highland in Hollywood.

**Top Agency Creative Director to Assist President at Niles**

Marketing-sales promotion consultant and former agency creative director Thomas Seymour Wainwright has joined Fred A. Niles Communications Centers, Inc. as assistant to president Fred A. Niles at that company's headquarters in Chicago.

Wainwright heads up a special creative staff committee for all three Niles studios (Chicago, Hollywood and New York). This

Thomas Seymour Wainwright

group integrates producers, directors and cameramen to assure a fresh, tasteful approach to all production work.

In discussing the appointment, Niles said: "it's no secret that the finest scripts and concepts are only brought to fruition by imaginative thinking and implementation at the production level.

"As an agency man, Tom Wainwright worked with our people here in producing films for his clients that were outstanding in every respect. We feel that he can help us greatly in all of our work."

In addition to his assigned group task, Wainwright will also aid in general administration, helping to formulate marketing, sales promotion and advertising policies for the Niles organization. He is the former vice-president and creative director of Kastor, Hilton, Chesley, Clifford & Atherton, Inc. of New York and was a principal of Wentzel, Wainwright, Poister & Poore Inc. in Chicago.

**James Manilla Joins Willard Pictures, N. Y., as Senior V.P.**

John M. Squiers, Jr., president of Willard Pictures, Inc., has announced that James N. Manilla, formerly vice-president of Filmex, Inc., has joined the company as its senior vice-president.

Willard Pictures, Inc. has been active in educational and industrial motion pictures since 1932

and with the addition of J. Manilla to its staff, the company plans to expand its activities in the

James N. Manilla

fields as well as in the production of live industrial shows and creative marketing services.

Mr. Manilla was Senior Producer in the Television Department of McCann-Erickson Inc. from 1954 to 1962. He has had 25 years of production experience throughout the world and has received several national and international film awards. Manilla is currently teaching a course in production at New York University's Department of General Education.

**Bonded Names S. Hawthorne Agency Service Administrator**

Sally B. Hawthorne has been named administrator of agency services at Bonded TV Film Service, New York. In announcing her appointment, vice-president Leslie noted:

"In her administrative position Miss Hawthorne is responsible for the internal functions of the New York Agency Service Department. Supervising a staff of 17, she will coordinate advertising and maintain communication in all operations. This includes Traffic group, Expediting, Creative Department, Screening, Breakdown, Shipping and Storage."

Bonded's Agency Services Department handles television procurement for advertising agencies and clients, in addition to film services.

to your filmstrip questions...**

What has research  
discovered about the  
learning value of filmstrips?

**Many questions like these are covered in our  
FREE FILMSTRIP BOOKLET. Write for it today!**

Now... for the first time, an informative documented booklet has been prepared, telling you everything you should know about filmstrips... how to make them, how much they cost, when they should be used (— and when not to use them), what production methods are best for your program, etc. In addition, this new booklet brings you the recommendations of outstanding experts in the fields of education and mass communication, and summarizes the results of recent training studies. You will find it invaluable in planning your next training program — and it's yours FREE! All you have to do is send us the coupon and tell us you want it!

*Specialists in filmstrips and color  
slide duplicates for over 17 years!*

INTERNATIONAL ASPECT of the drug manufacturing firms of the United States is a complex and many-faceted. So, it's not surprising to ask, "Why assume the risks of going overseas?"

Answer: The total returns from our international operations more than justify the investment.

Investment may be difficult to prove, but we refer to the problems or situations existing in one of our major markets — all call Country X.

In the past 10 years continuing legislative action have deliberately contributed to advertising publicity.

Controlled price controls have been suggested and some adopted.

Legislation designed to remove drug patents has been formally introduced.

Use of generic name drugs only has been suggested by some teaching universities.

Country X proposes tighter controls at the national and provincial levels.

A certain panel approved drugs would be unavailable.

Some politicians of Country X have suggested the spectre of drug prices as a means of raising costs for all medical care.

Finally, legislation has been drafted to dictate to the physician the types of drugs available for his hospitalized patients.

So, might well ask, "Why get into this mess?" My reply, "Why not? We're already in and operating, for Country X is the United States."

Perhaps one answer as to why we go overseas is to get away from it all! By conquering some overseas markets are simple.

Conquering the National Interest

For most American drug firms, efforts to go overseas are worthwhile from a business standpoint because sales and earnings justify the investment. They are worthwhile from the standpoint of our national interest because this investment bolsters our domestic industry and our international balance of payments.

This usually runs annually somewhere between \$100,000,000 to \$200,000,000 on the favorable side — a high ratio compared to total sales volume. Our overseas operations are worthwhile because they boost the economies of nations in which we operate. They are worthwhile from the business standpoint, since we can fill unmet health needs that otherwise would go unmet — or not at all.

The drug manufacturing industry of the United States is world oriented, more so than most any other U.S. industry. It acts in world terms constantly and persistently. It will continue to do so. Some of our firms obtain from one-fourth to one-half of their business from probably one-quarter of all prescriptions used today outside the U.S. and the rest of the world come from the domestic and foreign plants of American companies. This is an unusual strength, since we did very little business offshore prior to World War II. We'd like to tell you how by long-range strategic moves, and well-thought-out investments we entered world markets. It wasn't

# THE AMERICAN DRUG INDUSTRY on the World Scene

by George R. Cain, Board Chairman and President, Abbott Laboratories\*

quite that way. The truth is that in 1937 Abbott, for example, began a few cautious moves into Latin America — these countries first because our overseas manager at the time was a Mexican. Naturally our first plant outside the U.S. was located in Mexico City.

## Filling a Vacuum After World War II

Soon rumblings of war on the European continent broke into the full-scale holocaust on September 3, 1939. Latin America was left without its traditional suppliers — Germany, England, France, Italy and Switzerland — and the U.S. drug industry was literally drawn into this vacuum. The war, and the immediate postwar years, really forced our industry to international maturity.

Since then our excellent American research facilities, teaching institutions, medical schools and exchange fellowships in medicine and related skills have enhanced our position in the medical field — and made us the number one supplier of pharmaceuticals to the world.

One more example of how medicine has changed: Twenty-five years ago a surgeon who had studied in Vienna bore a mark of distinction. Today, the status symbol goes to the man from such places as Mayo, Hahnemann and Harvard, and the refugee from Austria has difficulty even being accredited.

## Population Boom All Over the World

Population figures alone indicate the potential of the international markets. The world is increasing at a rate of at least 14,000 human beings every day. Even outside the iron and bamboo curtains there are more than

two billion persons — or some ten times the population of the United States.

More important, the biggest rise in living standards over the next several decades will come from outside North America. Even a small rise creates a demand for all kinds of products. Drugs and medical services stand high on any list. Per-capita use of prescription drugs is relatively low in most of Europe as compared to the United States, and it is extremely low in most of the rest of the world. Hence the potential markets in these developing lands are tremendous. Moreover, these huge markets exist for already developed products that are more or less taken for granted in this country.

Human and animal health problems know nothing of national boundaries. Our products can prevent, control, or cure disease in Buenos Aires or Tokyo or Athens just as effectively as in New York or Chicago or Philadelphia. Health needs are universal and the American drug industry has the wide range of resources to fill these needs. Increasingly, the world of medicine is becoming more internationally oriented through better communications and such activities as the World Health Organization.

## Exporting Know-How to Other Lands

Some of our products are effective in treating such diseases as malaria, yaws and leprosy — all relatively unknown here but major problems in many countries. American firms are making great efforts to find a cure for Schistosomiasis, the parasitic infection that afflicts at least 150 million persons in the less developed tropical lands. Our companies can — and are — contributing to the control of plant and animal diseases, in effect exporting products and know-how to increase the food productivity so desperately needed in most nations of the world.

In recent decades scientific progress, product innovation and aggressive marketing by American companies have brought world leadership. To maintain this leadership, even in this country, we must compete vigorously and continuously on an international basis. The only other course is stagnation and eventual decline.

We have growing competition world-wide. European-based firms — Ciba, Hoffman-LaRoche, Geigy, Burroughs-Wellcome, to name a few — provide tough competition in this country, as well as in Latin America and elsewhere. Their stakes, as well as ours, loom big in markets around the globe.

The world is always a mixture of stability and upheaval, and a broadly based company, as any growth drug firm must be, will in any given year have disappointments in some overseas markets and successes in others. Over the

\*Mr. Cain's cogent review of world marketing originated in a speech which he delivered on May 19 at the Financial Analysts Federation's Annual Convention in Philadelphia. His company has made noteworthy use of audio and visual media.

Director Morris Rapt (standing) coaches the cast of "The Salesman Isn't Dead - He's Different."

## Films Add Dimension to Features in Fortune

Motion Pictures Derived from Timely, Relevant Editorial Features Are Reaching Fortune's Intended Audience; Top Management's Decision Maker

CAN MOTION PICTURES PROVIDE an effective method of extending a business publication's editorial influence?

Based on our experiences with Fortune Films, at Fortune Magazine, we would say that the answer is emphatically "yes".

Over the past decade, Fortune Films has released a series of motion pictures aimed, like the magazine itself, at the decision-making levels of top management.

The films are made available on free loan to interested business concerns where they are used for management meetings, marketing sessions, sales meetings, sales training and many other purposes. They are also available on free loan to trade associations, cham-

bers of commerce, colleges and universities and various civic groups. Prints of the films may also be purchased by companies which can make extensive use of them.

### Pictures Have Been Shown to Millions

During the time that Fortune Films has been in existence, our films have been seen by millions. One distributor estimated that one of our films, *The Big Change in World Markets*, reached an audience of 15 million in five years. One business concern reported that it had shown one of our films to 5,000 of its employees, from top management down.

The latest Fortune Film, *The Salesman Isn't Dead - He's Different*, made with the cooperation of International Business Machines

by Robert C. Hattersley  
Managing Director, Fortune Films

Corporation, has proved so popular that there is a two months' waiting list, even so extra prints were made to keep up with the demand. The two premiere showings of the film, plus a single advertisement in Fortune, drew requests at the rate of 200 a week for the first year.

There is also a vast unseen and untapped audience. The United States Information Agency, for example, has distributed one of our films overseas, after translating it into several languages at their own expense. Fortune Films have also been shown on hundreds of television stations across the country.

### Films Aim: to Serve Business Community

However the films differ from each other, the ultimate aim is always the same. Fortune Films, like the magazine, attempt to serve the interests of the business community, creatively and positively. The subjects chosen have broad potential use for all businesses. But selfishly, we feel that anything we can do to help business prosper in general will, in the long run, be reflected in Fortune's advertising revenues.

Despite the fact that there is a potential profit in marketing prints of the film — and our outside producers do a fair business with such sales — immediate dollars and cents returns are not our concern. Even so, we occasionally get such a return.

### One Showing Result: a 24-page Schedule

One steel company was so impressed by a showing of one of our films that they told us it resulted in their placing 24 full-page ads in Fortune. One decision like this more than balanced out the costs of our effort. However, while such instances delight us, they really aren't our primary aim. The purpose of this operation is to communicate information that will provide the maximum benefit to business and industry at large, rather than turning an immediate profit.

A classic example of this is our first film, *The Changing American Market*, an 18-

Welcome antidote for sales convention boredom is provided in this film classic "The Salesman"

"No matter how convincing the sales materials, you must point them in the right direction . . ."

Hail the Chief! "A salute to Our Leader" is an appropriate gesture at this historic convention

animation picture that got Fortune the ground. We felt that this would reinforce the confidence of managers to the point where they would gear up to the potential of the bigger and better markets which had been outlined in a series of Fortune articles.

I believed that marketing men should be encouraged to make expenditures to an optimistic outlook rather than a conservative one which would have them retreating at the first slight change in business trends. Naturally, the market was figured to cut itself X% of the big-rising budget cake which would

#### With Prediction Proved Conservative

In planning the production of this first film we faced a fantastic challenge to Fortune's economic editors. Quite a few eyebrows were raised when the results were first screened. The predictions in *The Changing American Economy* seemed far too lushly optimistic and contrasted with many a conservative-minded

outlook for the powers of positive thinking. Fortune's editorial predictions erred only slightly on the conservative side. The rapid growth of the American economy outstripped Fortune's optimistic outlook, and managers who had formulated their plans in 1947 to it were mightily grateful.

#### That Film Now Used by Study Groups

That first picture is something of a classic piece. But it is still shown in economic and marketing classes in universities and colleges. Professors like to use it as a focal place from which to launch into a discussion of recent economic changes. They point to the film as a "milestone" documentary which came out right at the time when great changes were taking place in the American economy — all of them accurately predicted in the presentation. It is for performance that this film program has attained a high degree of acceptance. It appears to have in business

schools probably the reason why outside companies are willing to sponsor the films. Although the bill for the first few productions soon became apparent that we would not have some sort of "angel" to back the project if we were to continue. We simply cannot afford to make our own films and run them out free of charge.

#### Our Approach to Sponsorship of Films

The first such film to be sponsored was *Change in World Markets*. This was a study in the examination of world marketing techniques designed to encourage managers to become more global minded in their outlook. But there was the sponsor problem.

QUESTION: Who would be willing to sponsor a motion picture about the potentials of world trade?

ANSWER: A company which stands to profit by an increase in world trade and wants to encourage it and be identified with it.

QUESTION: Find such a company.

ANSWER: Like trouble? It was not. It turned
